

As an instructor, you have the option to select a Language Pack. This option allows you to choose which language is used for all course shell features such as buttons, titles and all other text. You have an option to override any language choices that students may have made. This can be helpful if you teach a language other than English and wish to give students additional practice in the course's language.

To set a new language:

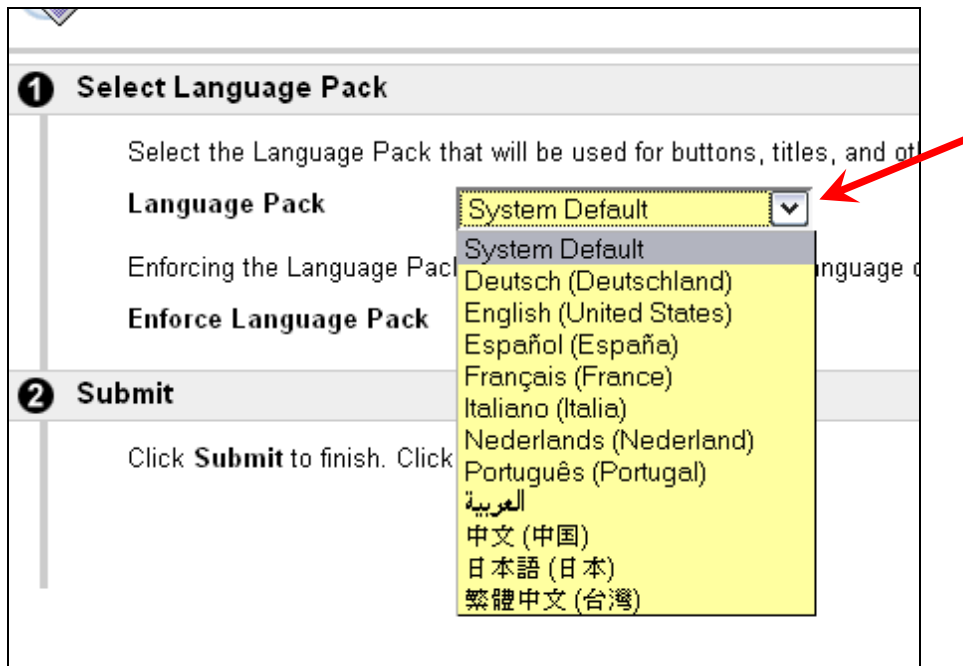

1. Enter the course shell by clicking on the **Course Name** on your Blackboard Home Page and click **Control Panel**.
2. In the Course Options area (bottom left column) click on the **Settings** link.

3. On the next screen click **Set Language Pack**.

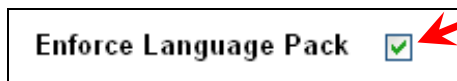

4. Click the **drop-down arrow** to see a list of choices for your course's language and choose the new option. Please note the choices in the screenshot below.

The screenshot shows a form titled "1 Select Language Pack". The instructions read: "Select the Language Pack that will be used for buttons, titles, and other course content." The form has two sections: "Language Pack" and "Enforce Language Pack". The "Language Pack" section contains a dropdown menu currently set to "System Default". A red arrow points to the dropdown arrow. The dropdown menu is open, showing a list of language options: System Default, Deutsch (Deutschland), English (United States), Español (España), Français (France), Italiano (Italia), Nederlands (Nederland), Português (Portugal), العربية, 中文 (中国), 日本語 (日本), and 繁體中文 (台灣). The "2 Submit" section contains the instruction: "Click **Submit** to finish. Click **Cancel** to return to the previous screen."

5. You may choose to enforce the language pack and override student's choices.

The image shows a close-up of the "Enforce Language Pack" checkbox, which is checked. A red arrow points to the checkbox.

6. Click **submit** at the bottom of the page and **OK** on the next screen.
