<b>Comments:</b> Reviewers compliment the clear and well written narrative in the content guidelines/standards matrix, the experience and qualifications of the faculty, the MTTC passing percentages, and the program summary. Reviewers request that the institution review the status of the list of the elective course work required in these programs. Program Summary 1.b. indicates that program participants select from a stipulated list of six courses. A statement at end of Form XX indicates that program participants select from a suggested list of six courses. The institution is encouraged to begin collecting program performance outcome data related to the Middle Level standards because program performance will be the basis of subsequent periodic reviews.
