## Job Description

A behavioral health technician helps doctors and nurses with the treatment of patients who have various behavioral problems, such as substance abuse, post-traumatic stress disorder, mental instability and physical and emotional abuse. These professionals often work in hospitals, shelters and mental health facilities. According to the U.S. Bureau of Labor Statistics (BLS), behavioral health technicians, also called psychiatric technicians, earned a median annual salary of \$31,140 as of May 2015. Job growth for these technicians is expected to be about average, with a projected increase of 5% from 2014 to 2024, according to the BLS.

## Duties

A behavioral health technician is expected to understand and implement individual treatment plans, record patient behavior and provide a safe, supportive environment for the patients. Technicians may provide and record patient medications and assisting in daily activities.

## Requirements

### Education

Behavioral health technicians typically hold a certificate, though associate's degrees are also available in the field. Students can also often find internships while in the university to help gain experience. All degree ranges will receive extensive on-the-job training.

## **Certification**

The most prominent organization offering certification in this field is the American Association of Psychiatric Technicians. There are four levels of certification that can be attained based on education and experience, and all levels require successful completion of an exam and/or an essay test. Level 1 certification entails completion of only a high school-level education, while Level 2 requires completion of 30 semester credit-hours and one year of professional experience.

There are a number of educational routes that one can take to become a behavioral health technician, though most of these professionals hold a certificate or an associate's degree. Those interested in this career field may also need to secure certification, depending on the employer and state where they work.
