

Master of Public Health (MPH)

at Central Michigan University

Now accepting applications for Fall 2017

What is Public Health?

Public Health is defined as “the art and science of preventing disease, prolonging life and promoting health through the organized efforts of society.”

Since 1900, the average life span in the United States has increased more than 30 years, and 25 years of this gain have been attributed to advances in public health.

The *Master of Public Health (MPH)* at Central Michigan University is designed for students who wish to advance as practitioners in the field of public health and/or are planning to pursue doctoral programs in health science.

Projected Job Growth

According to the *Bureau of Labor Statistics*, the need for health educators and community health workers is **projected to grow at a faster rate** than the average for all occupations (13%) **at 21% between 2014 and 2024**. Community health workers specifically are projected to grow at an even more rapid rate of 15% between 2014 and 2024. The primary reasons for this exponential growth are due to a greater emphasis on *improving health outcomes* and *reducing the costs of healthcare* through education related to healthy habits, behaviors and use of healthcare services.

Core Faculty

The MPH program features expert faculty from the **Division of Community Health**, the **School of Health Sciences** and other colleges on campus to provide enriched classroom experiences, to mentor students in research, and to organize practical international and rural learning experiences for students.

Program Information

Master of Public Health (MPH)

Minimum Totals for Graduation: 48 hours

The *Master of Public Health (MPH)* is a widely recognized professional credential for those seeking leadership and managerial positions in governmental, nonprofit, and private organizations in Public Health.

The MPH program at CMU is designed for individuals who have recently earned a bachelor's degree *and for working professionals* who have already earned a bachelor's degree but now wish to pursue a graduate degree program.

The CMU MPH program is an *interdisciplinary program* designed to provide students with *in-depth training* in the core areas of public health, including *biostatistics, epidemiology, environmental health, social and behavioral science*, and *management of health services*.

Through classroom instruction, research, and field practice, students develop competencies to design culturally-responsive behavioral and social change interventions to address health challenges affecting rural and under-served communities across the state of Michigan and the world.

Admission Requirements

Admission into the MPH program requires:

1. Bachelor degree from an accredited institution of higher learning.
2. GPA of 3.0 on a 4.0 scale.
3. Statement of Purpose (1-2 pages).
4. *GRE, GMAT, or MCAT.*
5. For non-English speakers: proficiency in English, to be able to study and communicate in English.
6. Two Letters of Recommendation.*

MPH Program
