## SUMMARY

---

Results-driven management professional with experience leading teams, project management, and providing eloquent instruction for diverse students. Established track record of creating and implementing instructional programs and long-term strategies aimed at growth and sustainability. Seeking higher education faculty teaching position in information security and/or computer forensics.

---

## HIGHLIGHTS

---

- Logistics Expertise
  - Responsible leader and mentor
  - Values Diversity
  - Project/Program Management
  - Excellent problem-solving ability
  - Collaborative Leadership
  - Forward-thinking and innovative
  - Driven by challenge and development opportunity
- 

## ACCOMPLISHMENTS

---

- Acquisition Professional Development Program (APDP) Air Force DAWIA Level 2 certified
  - Possess exceptional ability and knowledge to lead multi-million dollar projects through vigorous testing and fielding results
  - Developed talent for establishing priorities, allocating resources, and supervising employees/students
- 

## EXPERIENCE

---

### UNITED STATES AIR FORCE Edwards AFB, CA

#### Low Observable Logistics Test Evaluator

10/2006 to Current

- Instructed over 300 personnel in military subjects with a keen ability to tailor education to different educational backgrounds, personalities, and learning disabilities
  - Led and supervised 24 Air Force, contractor, and foreign partner employees across a 396 billion dollar program
  - Oversaw daily planning and scheduling of Logistics Test & Evaluation events throughout a Developmental Test and Evaluation Program
  - Maintained continuous alignment in aircraft maintenance operations and support, processes, and scheduling techniques in understanding interrelationships of low observable material inspection, documentation techniques and aircraft signature requirements
  - Coordinated 1,200 maintenance events evaluating design, maintainability, sustainability, and supportability
  - Generated 150 Action Requests/Deficiency Reports aiding in increased war fighting capabilities throughout the U.S. Air Force, U.S. Marine Corps, and U.S. Navy
  - Directed monthly and annual statistical reports targeted for program enhancement, resulting in 9% decrease in life-cycle sustainment costs through initiated process improvements
  - Coordinated and planned multi-million dollar Climatic Lab Chamber testing to ensure operational program readiness
  - Creative problem solver with advanced composite and structures experience providing expertise in analyzing air vehicle defects
  - Deeply integrated with extensive program knowledge in the Autonomic Logistics Information System (ALIS) along with all low observable applications within ALIS for mission planning and determining Radar Cross Section health of the aircraft
- 

## EDUCATION

---

### MASTER OF PROFESSIONAL STUDIES: HOMELAND SECURITY: INFORMATION SECURITY AND FORENSICS

2014

Pennsylvania State University, University Park, PA, United States

Minor in Information Security and Forensics
