Full Text for the Most Authoritative Nursing and Allied Health Literature Available

This valuable resource provides full text for nursing and allied health journals indexed in the CINAHL database, many of which contain no embargo. Nurses, allied health professionals, researchers, nurse educators and students consider this database an essential full-text research tool.

Full-Text Coverage for a Wide Range of Nursing and Allied Health Subject Areas

CINAHL with Full Text provides an easy-to-use interface with basic and advanced search features and searchable cited references. CINAHL Subject Headings help users effectively search and retrieve information and follow the structure of the Medical Subject Headings (MeSH) used by the National Library of Medicine.

CINAHL with Full Text provides full text for the top nursing and allied health literature available and covers a wide range of topics including nursing, biomedicine, health sciences librarianship, alternative/complementary medicine, consumer health and 17 allied health disciplines.

This full-text resource also includes the CINAHL index, featuring publications from the National League for Nursing and the American Nurses' Association. In addition, this database provides access to health care books, nursing dissertations, selected conference proceedings, standards of practice, audiovisuals, book chapters and more.

Content Includes:

- Full text for nearly 580 journals
- Full-text coverage dating back to 1981
- Indexing for over 3,100 journals
- More than 3.4 million records
- Author affiliations
- Searchable cited references
**Additional Resources:**

**eBooks - Medical Featured Collections**

**Additional services available:**

**EBSCO Discovery Service** Takes Medical Research to the Next Level

*EBSCO Discovery Service* (EDS) takes medical research to the next level through a perfect combination of content and technology, taking into account all of the critical elements in the research process. EDS is the ideal platform for researchers and users of any level, including:

- Novice users performing simple searches
- Advanced users conducting a sophisticated search
- Library administrators looking to quickly and conveniently streamline resources

Through a single search box, EDS provides fast, streamlined access to all of the institution's content, but within the context of a greater experience that pulls together intuitive features and functionality, high-end indexing and instant access to critical full text. **Learn more about EDS for Medical Research.**
