# Aladdin Homes

**"Sold By The Golden Rule"**

The Cedars

You can buy a complete house direct from the manufacturer, saving four profits on the lumber, mill-work, hardware and labor—by the Aladdin System

## ALADDIN Houses Are Not Portable

### The Service ALADDIN Offers You

Tens of thousands of American families have solved their homebuilding problems through Aladdin service. For seventeen years this great Organization has devoted its energies, its brains and its experience to making homebuilding simpler, easier and less expensive. As told on pages 10 and 11, this valuable service is yours without one cent of cost.

### The Saving ALADDIN Offers You

Aladdin houses are designed to use standard sizes of materials. Standard sizes scientifically manufactured in Aladdin mills avoids over 18% waste as against hand-cut materials bought the usual way. Aladdin sells direct to homebuilders thus saving all the middlemen's-profits. This system opens the way for you to save from 25% to 40%.

### The Safety ALADDIN Offers You

The Greatest Homebuilding Organization in the world; three great manufacturing plants, the highest credit rating of the commercial credit agencies; an unequalled record of square dealing with thousands of big business institutions and tens of thousands of home builders in every state—these facts assure you of the utmost safety in dealing with The Aladdin Company.

**THE ALADDIN COMPANY**

Bay City, Michigan

Wilmington, North Carolina

Portland, Oregon

# The Victory

An interesting and charming home.  
It is astonishingly priced at.....

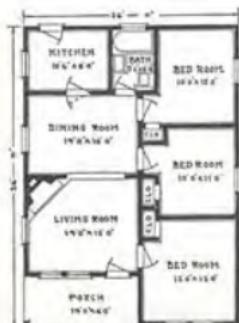

**\$975.00**

DIGNIFIED simplicity was the aim of the thoughtful designers in creating the Victory. There is spread before you on these two pages a truly remarkable selection of interesting homes. Seven arrangements of the same size structure offer you an opportunity to pick exactly what your needs demand.

## Quality of Materials

Splendidly manufactured siding and flooring; interior wood work entirely free from knots and defects—that's the kind of materials Aladdin guarantees. No finer quality grows. It is beautiful in grain, strong and lasting. Highest grade paints and varnishes are also assured. You will be assured of a high type of material and construction. The types having the 26-foot front can be placed on a lot as narrow as 30 feet, while the 36-foot front designs can be placed on a 40-foot lot.

## The Victory—Plan W

Plan W offers you a porch, big living room and dining room, three splendid bedrooms, kitchen, bath and three bedroom closets. Note the spaciousness of the planned bedrooms. Doors and windows are thoughtfully considered in connection with the placement of bed and other furniture. Plumbing expense is held down by placement of bath room next to the kitchen. Ample wall space in kitchen gives opportunity for excellent arrangement of fixtures. Scientific design has made this a really big home—at small cost.

## Construction Details

On page 16 you will find full details concerning the materials furnished. All designs on these two pages are regularly furnished with outside finish of wood or stucco, as you prefer. Inside walls, similar to pictures shown on first page, are specifications and costs on page 16. If you want to stucco the outside walls, sheathing and lath will be furnished at no charge in the above price. Any Victory plan in single construction, price \$975.00. Double construction, price \$1,495.00. See page 16 for details.

## A Cozy Interior

This is how one experienced home-maker has arranged the interior. There is ample opportunity to express one's taste in this roomy home.

# Here Are Six Other Fine Plans of the Victory to Choose From They Are All Priced the Same—\$975.00—Really Marvelous Values

THE six plans on this page, any one of which may be had at the above quoted price, are all tested plans, having been built many times. There are valuable features included in each, yet each offers a particular arrangement for a particular need. As stated on the preceding page, if you desire to stucco the outside of your home, we will furnish sheathing and lath for the outside walls at the price quoted above.

## Picture Showing the Victory With Porch

Size 24' x 8'

The front porch shown in illustration at left is size 24' x 8 ft. and will be furnished at an extra cost of \$100.00. It is designed for use on side or front of any of these plans.

\$160.00

## The Victory—Plan E

Plan E

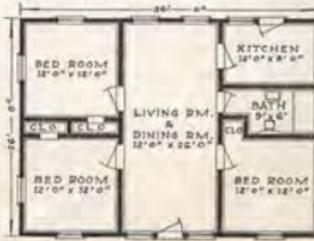

## The Victory—Plan D

Plan D shown below is a well balanced design of splendid arrangement and appeals strongly to the average family. It includes a generous porch in its dimensions of 26x36 feet, and its accommodations meet the needs of the true American home. All the rooms are of good size, well arranged, and every comfort and convenience is provided for.

## The Victory—Plan G

For many years there has been a popular demand from Aladdin customers for the central living room, dividing the home. Plan G shown below meets these ideas perfectly. Should you like to partially separate the central room into living room and dining room, an arch can be added at the point next to the closets at a slight additional cost. Study of this plan will reveal many advantageous features.

## The Victory—Plan A

Complete conveniences for a family of six are represented in the interior arrangements of the Victory Plan A. The living room has unusual wall space and opening as it does through an arch to the dining room there is an impression of spaciousness which is the result of a depth of 24 feet. The bath is well detached, a desirable feature. Note especially the three large bedrooms, each with closet. A study of the window placements will reveal excellent light and airiness. Plan A shown at the right.

Plan A

## The Victory—Plan F

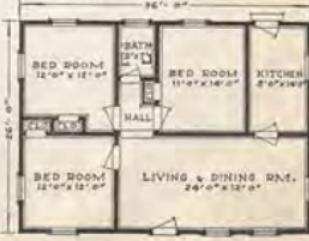

Here is a design especially presented for those who demand a spacious living room. Light and air enter from three sides, as it extends for 26 feet across the entire house—big enough for a dance. The balance of the house is arranged in accordance with the very popular idea of adjoining sleeping quarters and contiguous kitchen and bath. This plan has been a popular one for the family of three or four, and will be much admired by all discerning observers. Plan F shown at right.

Plan F

## The Victory—Plan C

Here is Plan C shown below a combination of three fine bedrooms with a 24x12-foot living room. For the family of six whose desire is for the big living room type, the plan has every required feature. The kitchen is light and airy and offers lots of wall space for fixtures. Each bedroom is provided with closet, while the location of the bathroom next to entrance of bedrooms is ideal.

# The Capitol—an Interesting Dutch Colonial Type—Price \$1932.00

This is one of the most popular homes ever designed. It contains every modern convenience and is ideal in appearance, arrangement and comfort.

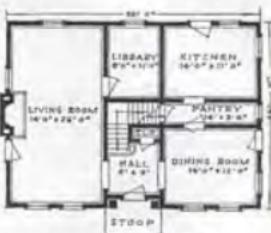

THE CHARM of the Dutch Colonial never fades. The early Dutch settlers along the coast of New England developed this type with its gambrel roof, shingles and broken roof lines. Aladdin designers have held true to this inspiration while actually giving full dimensions to the second floor in height, breadth and depth. No space is lost, ceilings being full height and square, yet the observer on the street gains the impression of a true gambrel type. Note the protected entrance, columned, and inset—a true Colonial approach.

Examine minutely the placement of the rooms. Can you conceive a higher degree of perfection? The entrance hall with semi-open stairway and cloak closet demand your admiration the minute you enter. Arches lead to the right and left into living room and dining room. Think of the possibilities of a living room 26 feet deep and 14 feet wide! Leading from this interesting room is a library or den. On the other side of the house is found pantry separating dining room and kitchen, with cellar entrance under the main stairway. There are six rooms on the second floor—and four closets. It may be called a twelve-room home, and at a price that is unapproachable through any other source, at this remarkable price. The porch is size 14 x 8 feet and may be had by adding \$76.00 to the above price. The porte-cochere at the opposite side of the house is meant as a covered driveway and is size 14 x 10 feet. Its price is \$61.00.

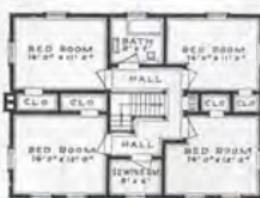

Living Room—The Capitol

Sheathing and lath for a stucco exterior will be furnished in place of siding at no extra cost. If you want sheathing and shingles for the exterior in place of siding see specifications on page 16. The price of the Capitol in single construction is \$1932.00. In double construction the price is \$2254.00. See page 16 for details.

First Floor Plan—The Capitol

Second Floor Plan—The Capitol

# The Liberty—a Splendid 2-Story, 7-Room Home—Price \$1068.00

A STRONG, substantial, dignified and complete American home! Thus might be described, in one sentence, the splendid "Liberty." To avoid the wasting of a single penny is a duty we all owe to our families and ourselves. To accomplish this object in the building of a home is the most laudable of all ambitions. Aladdin designers set about the task of creating a structure in which there could not be wasted one foot of material—one inch of space. Waste material, or waste space, means wasted dollars for the owner.

Examine minutely every feature of the Liberty. Clean square lines, well proportioned walls and roof, even placement of windows, blend into perfect harmony. It pleases the eye at first impression as well as under more continued study. Two interior arrangements are offered at the same price, one having three bedrooms and one with four bedrooms. Details of construction, and specifications will be found on page 16. The Liberty is priced at \$1068.00 for single construction and \$1253.00 for double construction. See page 16 for details.

## The Liberty—Plan J

Plan J affords gratification to the careful and discerning observer because it illustrates a perfect example of avoidance of waste space. No unnecessary angles or projections are discoverable in the partitions dividing the rooms. Handsome semi-open staircase leads from generous living room to second floor, where are found three bedrooms, bath and splendid closets. Pantry and rear porch are valuable features of the first floor.

First Floor—Plan J

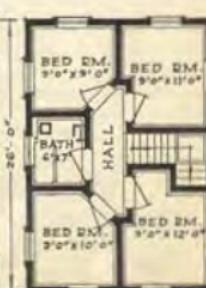

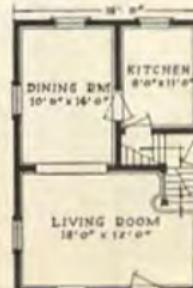

Second Floor—Plan J

## The Porch

If you wish porch size 10' x 8' shown in picture shipped with the Liberty add \$123.00 to the above price. Or you may order the entrance hood shown over front door of the Newport shown on page 7 for \$12.00.

## The Liberty—Plan K

For those whose necessities require four bedrooms, the Liberty Plan K has been devised by our designers. Think of it! Living room, dining room, kitchen, bath and four bedrooms, all included in a house of the dimensions of the Liberty, and, more remarkable still, at the price of \$1068.00. This home is big enough for a family of eight and offers all modern conveniences.

First Floor—Plan K

Second Floor—Plan K

# THE CEDARS

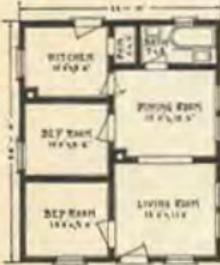

See Picture on Front Page

**\$710.00**

THE Cedars is a beautiful bungalow, marvelously priced, and remarkably designed. Four fine plans are shown below, while the photograph on the front page illustrates the charm and home-appeal of the exterior. It is priced with siding in single construction at \$710.00 but sheathing and shingles will be furnished as indicated in specifications on page 16. The price in double construction is \$836.00. Porch shown in picture may be had by adding \$120.00 to the price.

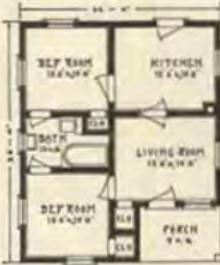

## The Cedars—Plan 1

Plan 1 of the Cedars design offers a type with dining room, arched opening to living room, two bedrooms, kitchen, bath and pantry. It is a much-sought-after type and never fails to make a happy little home. Note the double windows in living room and dining room.

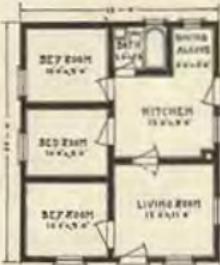

## The Cedars—Plan 2

The Cedars, Plan 2, presents a type with inset front porch together with a cosy arrangement of rooms. Note especially the closets off each bedroom with an extra closet from living room. Two fine bedrooms with bath between and big living room and kitchen offer every comfort.

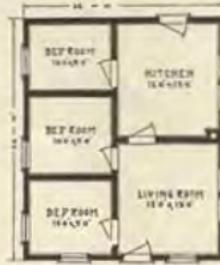

## The Cedars—Plan 3

Here is a plan for a family of six. Three bedrooms, living room, kitchen, dining above and bath. A cosy, convenient little home as you will agree. Porch size 16 x 8 feet will be furnished like shown in picture, for \$120.00 additional.

## The Cedars—Plan 4

The Cedars, Plan 4, is produced as the result of a demand for three bedrooms, with big living room, and big kitchen. It also has double windows in the two latter rooms. As mentioned above the porch shown in picture on front cover may be had by adding \$120.00 to the above price.

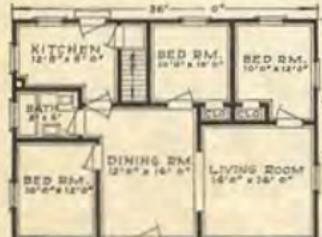

## The Potomac—a Quaint, Colonial Bungalow, Price \$1015.00

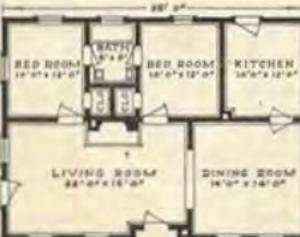

## The Potomac—Plan L

This plan gives full accommodations for a family of six, having three bedrooms. A fine living room, extra large dining room, bath, kitchen and inside cellar entrance complete this desirable arrangement.

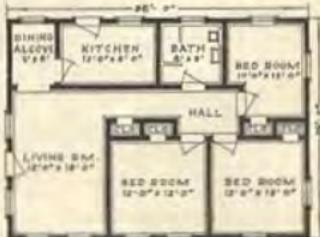

## The Potomac—Plan M

In Plan M we find an arrangement that has had a long period of popularity with our customers. A big living room, size 22 x 14 feet with fine light and convenient access to other rooms, is a delight to the family. The dining room is 14 x 8 feet. Other rooms are well proportioned.

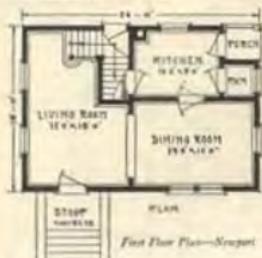

## The Potomac—Plan N

Here is an original arrangement, featured by a dining alcove. It offers a big living room, with three bedrooms, bath and kitchen with an extra closet, four closets in all. The hall gives segregated access to all rooms. This plan is a big seller.

# The Newport—an Interesting Type of 2-Story Home—Price \$1195.00

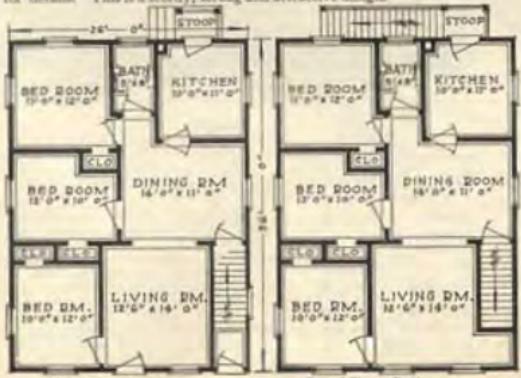

POSSIBILITIES of the stucco exterior for any of the Aladdin homes are illustrated in this picture of the Newport. Stucco is especially well adapted to this handsome design, although it will be furnished with siding or sheathing and shingles for the side-walls as preferred, as described in specifications on page 16.

The Newport contains a fine living room, dining room, kitchen, pantry, rear porch, grade cellar entrance and three bedrooms, bath and closets on the second floor. It is a complete, sturdy and handsome type of American home, offering the very greatest amount of convenience and room possible for its size. There is found plenty of light and air in all rooms.

The Newport requires a thirty-foot lot if faced the long way, but can be set on a twenty-two foot lot if faced the narrow way. The price quoted is based on siding for the outside walls, but sheathing and lath will be furnished at no additional charge if you would like to have stucco walls. Sheathing and shingles will be furnished for the outside walls as described in specification on page 16. All the material is of the finest grades, all interior trim being clear lumber of handsome grain. For detail information as to the construction see page 16. The Newport is priced at \$1195.00 in single construction. Double construction price \$1378.00. See page 16.

## The Duplex No. 10—14 Rooms—Surprisingly Priced at \$1753.00

The Aladdin Duplex No. 10 presents an astonishing opportunity for profitable investment at the price quoted. This design has been erected during the past ten years in many localities and has proved to be a perfect type to meet the average demand. There are two seven-room apartment homes of most unusual attractions under this one roof. All materials as quoted in our general specifications are included at the remarkable price of \$1753.00 in single construction. If you want to include the 20x8 foot porch which this Duplex is shipped, add \$150.00 to above price. Shingled walls will be furnished as described on page 16. Double construction is priced at \$2070.00. See page 16 for details. This is a sturdy, strong and attractive design.

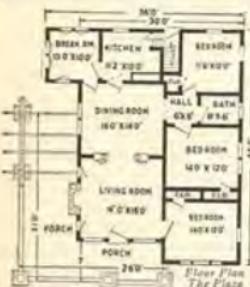

The Duplex—a fine example of modern low cost two-apartment building

# The Plaza—\$2819.00

A CALIFORNIA bungalow of magnificent lines is represented in the Plaza. It presents a most interesting treatment of roof lines and gables. Heavy eaves are supported by brackets, and the shingled side walls blend beautifully into the whole picture.

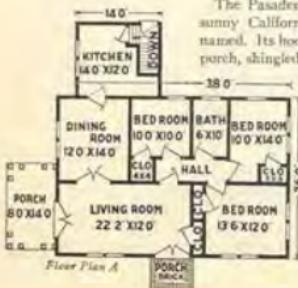

The porch of expansive dimensions is partly roofed by the main gable and partly by pergola rafters. The interior arrangement is the work of a master designer. Large living room, large dining room, three bedrooms, closets, bath, kitchen and inside grade cellar entrance offer the last word in a modern bungalow. Write Department K about it.

# The Pasadena A \$2286.00

The Pasadena A is as beautiful as the sunny California city after which it is named. Its hooded front entrance, pergola porch, shingled side walls and odd type of roof make a picture of great appeal to the beholder. The interior arrangement is one that has been tested by time and proved to be the acme of comfort and convenience. Write for further information if this design appeals to you. Address Department K.

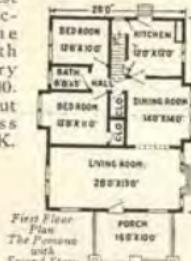

# The Pomona

## One Story \$2471.00

THE POMONA has been one of the biggest sellers in the entire Aladdin line of homes. It will be found erected in hundreds of localities about the country. It is furnished in both one story and two story as shown by the accompanying floor plans. The one story plan has three bedrooms while the two story plan has four bedrooms. Each plan is worth careful study. The Pomona is worthy of a place in the very finest residential sections. The Pomona with second story price \$2682.00. Write us about it. Address Department K.

# The Sunshine \$2245.00

Sunshine No. 2

Many owners of this handsome bungalow have written us enthusiastically praising its beauty, its utility and its sturdiness. The projecting bay window is a never failing joy to owners, while the great big porch makes comfort and health an easy accomplishment. The floor plan is a tested one, and will reveal many interesting possibilities as it is studied. Write Department K about it.

## The Marsden \$2690.00

The Marsden is considered to be the very finest type of story-and-a-half home ever presented. A study of its interior arrangement is astonishing in its results from the standpoint of utilizing space. The living room extends entirely across the front of the house, being 26x16 ft. The dining room has two triple windows, with projecting bay.

Up stairs are found three fine bedrooms, with three big closets and bath. Grade cellar entrance leads from kitchen. The exterior speaks for itself, a beautiful picture. Write us, addressing Department K.

## The Detroit No. 1 \$2018.00

The Detroit No. 1 is a sensible, dignified and certainly very attractive story-and-a-half home. Its lines are well proportioned, its interior rooms carefully placed, and it has never failed to give the best of satisfaction to all owners. Siding is furnished for the first story and shingles for the second story gables. Further information will be gladly supplied upon request by addressing Department K.

## The Venus No. 2 \$1870.00

This house is beautiful with pure white siding, shingles in upper story stained green and green trim for general trim.

First Floor Plan No. 2

Originally sticks out all over the Venus. It is a two-story house of entirely different features than discoverable anywhere. The first story is meant for siding while the second story is shingled, divided by a belt. Hooded casement windows front the house in the second story, and a porch of unusual lines is noticeable. The interior is carefully planned and well arranged. Address Department K for further information.

## The Standard \$2344.00

The Standard is a high type and a perfect example of the modern American home. Its square lines afford the largest possible amount of floor space, its hip roof with dormer window holds down the apparent height. Its big porch with scrolled rafter ends embellishes the front, while the shingled second story touches off the handsome design in splendid shape. The interior shows many desirable features. For further information write Department K.

# Facts About the ALADDIN Plan and The ALADDIN COMPANY

THE Aladdin Plan of homebuilding has been in successful operation for seventeen years.

The whole purpose of the plan is to help builders of modest homes.

Its first object and principal benefit, is to save money for builders of modest homes.

The Aladdin Plan has saved \$200, \$300, \$500, \$800—\$1200 and even more money on the individual homes of thousands of home builders.

Our home-builder customers write us after finishing their homes and tell us these things.

They tell us how we helped them to buy their materials for less than their local lumber dealer would sell them.

They tell us how much better our lumber is than they could get from their local dealers.

They tell us how strong their homes are, how warm they are, how convenient the room arrangements are, and how pretty they look when finished.

## How ALADDIN Saves You Money

Now let us tell you how we save you money:

The ready-cut plan avoids wasting lumber when building—saves about \$18.00 out of every \$100.00 worth of lumber ordinarily used in building your home.

Nine-tenths of all lumber coming out of the forests are in 8-foot, 10-foot, 12-foot, 14-foot and 16-foot lengths. When you want to use other lengths you have to pay more money for the same quantity and quality. Aladdin designs houses to use standard lengths. That's the economy of standard parts and that's the same kind of manufacturing economy that enables automobiles to be manufactured so cheaply. And that is what enables us to put in higher quality at lower prices.

Rapid, automatic machinery handles this lumber so swiftly, so accurately and so perfectly, that one man at a machine in our mills will cut as much as nearly a hundred carpenters can in the same length of time. And you get the benefit of this saving.

The Aladdin system of cutting the lumber in the mill saves about \$30.00 out of every \$100.00 worth of carpenter labor—as against the old system of measure, try, cut and fit on the job.

"It's just common horse sense," wrote a customer, after he had moved into his new Aladdin. This man was so proud because he built his Aladdin himself—and he was not a carpenter either.

## Twenty Feet of Lumber From a Sixteen-Foot Board

Think of taking a six-inch board sixteen feet long and getting twenty feet of six-inch board out of it!

Think of applying this system of saving throughout all the lumber used in building your home!

Think of your own good money it saves!

Think of your money this system saves, for the board is priced to you in exactly the number of feet of lumber going into it.

To eliminate waste by scientific planning, designing and cutting of lumber is to save your money from the waste pile.

W. J. Sovereign, president of The Aladdin Company, conceived this tremendous thought, originated, perfected, and established the system.

The principle has been so thoroughly estab-

lished that these customers of ours tell us how pleased they are with all their dealings with us.

And, really, we are most pleased when they say this, for the Aladdin people are human. We are just ordinary people whose life work, life experiences are devoted to homebuilding, devoted to making homebuilding simpler, more economical, easier and more pleasant for our customers.

Every stockholder in The Aladdin Company is a worker in the company. We are all interested in every customer and we are all interested in knowing that every customer is satisfied.

Aladdin Homes are the original and first ever sold where the materials were all prepared in the mill, cut to fit and ready to be nailed in place when the house is being built. The ready-cut house industry was founded by Aladdin—by W. J. and O. E. Sovereign and the present workers, in The Aladdin Company.

lashed through the success of The Aladdin Company that it is now accepted and approved by lumbermen, contractors, engineers and scientists.

**Build It Yourself** We usually advise our customers to have a carpenter, if possible, but we do say that any sensible man can build an Aladdin home if he follows our simple plain instructions and detailed blueprints of erection.

Every piece of material is cut to fit, with just a few exceptions. And these pieces are marked and numbered so that you know just where every piece goes when you look at the pictures and photographs we supply.

Of course if you build your own house, like so many other Aladdin customers have, you, too, will save the money you would have to pay a carpenter.

## Avoid Profits of the Middleman

The Aladdin Company buys immense quantities of lumber from the forests, getting the absolutely lowest prices. You therefore buy direct, without any middlemen to add their profit to the price of your lumber, millwork and hardware.

Is it any wonder our customers write us and tell us they saved \$300, \$500, \$800 and more, when we are able to avoid all these wastes that exist for the person who builds the old way?

For years many great corporations have been buying and building Aladdin houses for their employees. The United States Government and many states and cities have been our customers. These facts all prove that there is economy and satisfaction for our customers.

## This Catalog Our Only Salesman

With this catalog, you are able to keep the profits in your own pocket that you ordinarily pay to your local dealers. Because we do not sell through dealers, they can't add their several hundred dollar profits to the goods you buy from us. You keep this money yourself.

When your dealer says "Don't buy your lumber out of town," ask him where he buys the lumber he wants to sell you.

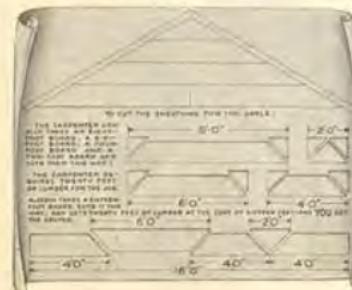

You see he buys his lumber up here and the only money that stays in your town is the dealer's profit. Wouldn't you rather have it in your pocket than in his?

This catalog makes possible this saving—and many others.

## ALADDIN Homes Not Portable

And please remember, always remember, that there is nothing "portable", nothing "sectional", nothing "fabricated" about an Aladdin home. You can't take an Aladdin house down after it is built. It is designed, constructed and built just like the best architect-designed, contractor-built houses in your neighborhood. Aladdin houses are sturdy, warm and strong real year-round houses. They have been built and lived in for years in Maine, North Dakota, Michigan, Canada—and in Alaska. The President, the General Manager and most of the executives of The Aladdin Company have been living in Aladdin homes for years.

Aladdin houses are designed to use standard lengths of lumber cut from standard lengths of logs as they come out of the forest. This saves waste of lumber; saves that \$18.00 out of every \$100.00 we spoke of before.

## *How Lumber Is Cut to Fit*

The illustration at the left demonstrates the great saving and the simple work erecting an Aladdin home. The material is cut to fit in our mills and numbered according to the blueprints which explain every step of the erection. Your saw is unnecessary. The pieces fit together perfectly. And you save at least 15% waste lumber besides 30% to 40% of the labor of erection. Aladdin is the originator of the Readicut System of construction and has saved thousands of homeowners from \$300 to \$800 on their houses.

## *Sturdy, Honest Lumber Makes Sturdy, Honest Homes*

Early in its history, The Aladdin Company started to improve the quality of lumber that had been the custom to put into modest homes. It started to furnish beautiful, clear lumber for the doors and interior, woodwork. And ever since it has devoted its efforts to improving this quality. It feels and believes that the modest home should have as good quality as the biggest homes. The beautiful, velvety-grained Oregon fir and yellow pine used in Aladdin homes is the finest coming out of the forests. It takes the handsomest stains, oils and varnish and holds the colorings permanently.

The paints furnished are standard high quality—the beautiful brushed brass hardware and locksets finish off the woodwork attractively. Our roofing is made by the biggest company in the country and guaranteed. Pleasure and pride can't help but come to you when you know how good a home you have built, and especially when you have secured all those good things and saved a lot of money too.

Some people will tell you not to build an Aladdin house. But most of them will be people who will lose some profit they expected to make out of you if you do. They will be people who want to sell you something who will want to get your money. They will never be people who have built Aladdin homes.

**Painting** You receive paint for painting the outside, two coats of stain and varnish for interior trim. You may choose natural oil and varnish, light or dark oak stain and varnish or mahogany stain and varnish. These materials are standard high quality and make a beautifully finished job.

**Masonry, Chimneys  
and Fireplaces** Chimneys can be located anywhere in the house you like, for we do not cut the materials for these openings. If you do not want the fireplace which may be shown don't build it. Of course, any excavation work, and the foundation work must be done on the ground. Brick, stone and cement can be had in your locality as cheaply as we could furnish it. We furnish you a foundation plan to tell you how to proceed to build the kind of foundation you want.

## **HOME OFFICES**

*at*

# **THE ALADDIN COMPANY**

*or*

**BAY CITY, MICHIGAN**

## *From the Pyramids to the Woolworth Bldg.*

To him who says the Readicut System is not possible or practicable, point to the Pyramids of Egypt, refer to Solomon's Temple as described in the Bible, or inspect Washington Monument, or the 57-story Woolworth Building in New York City. You will find that each was prepared, erected and completed by the Readicut System. But it remained for The Aladdin Company to first apply the system to your benefit in the building of a home. And thousands of American families scattered over this broad land will testify to its economy and practical success.

The pyramids aren't portable, the Woolworth Building is not portable, nor are Aladdin houses portable.

If you attempt to tear apart, or dismantle an Aladdin house, the most expert contractor could not tell it from any first-class frame dwelling because there is no difference.

**ALADDIN Customers** If you want to ask advice, it is only fair to yourself and fair to us, to ask people who know about Aladdin houses. Can a man who hasn't built an Aladdin house know as much about it or about us, as a man who has dealt with us? We will give you the names and addresses of many customers to write to, or call on. We wouldn't do that if we didn't know they saved money, would we? All right then, if a dealer or a contractor tells you not to build an Aladdin house, ask him for his reasons and investigate those reasons by talking with a man who has built an Aladdin house. Don't take anybody's advice, who has not actually built an Aladdin house. Get your facts from people who know.

## *Seventeen Years of Experience*

The houses shown in this book are the best we have planned in our seventeen years' experience. We have learned from furnishing homes for thousands of families enough to make a city of a quarter of a million population.

Each size has many different floor plan arrangements to suit your family and your tastes.

We have designed these houses and priced them so that you can get into a home at the lowest possible cost, or you can have added values like porches, kitchen cabinets and other luxuries and necessities. You can buy as much or as little as you like. We want to satisfy you exactly.

## *The ALADDIN Guaranty*

Satisfaction, or your money back, is the surest guarantee ever written. When this guarantee is backed by a company whose assets run into the millions you are assured of absolute safety in all your dealings. The Aladdin Company guarantees your satisfaction or your money back in every transaction with us.

## *Are You Interested in Summer Cottages?*

A separate booklet is ready to be mailed to you should you be interested in summer cottages.

Aladdin Summer Cottages are single walled, exposed studding, single matched ceiling partitions with rooms open to the rafters.

If interested in building one or more summer cottages write us asking for summer cottage booklet. It will be mailed to you promptly.

# How an ALADDIN Home Looks in Course of Construction

Starting Construction on First Day

Progress Work up on Third Day

Progress of Work on Sixth Day

Exterior Finished on Eighteenth Day

*This is the ALADDIN Pomona, as it looks during the four stages of its building. There is nothing portable or sectional in any ALADDIN house*

## Hunting for Pieces —A Criticism

Of course, the Aladdin Readi-Cut System receives adverse criticism from some contractors, lumber dealers, and others. This criticism comes chiefly from those who have had no experience with, or knowledge of, Aladdin houses. Self-interest, here prompted by loss of profit, begets the antagonism.

The Simple Plan of Laying Out Material

One of the most amusing remarks made is that the builder of an Aladdin house will lose as much time hunting out his material and finding the right piece as he will save by the Readi-Cut System. Of course this remark on the face of it is an admission that time is saved by the Aladdin System. However, any thought about time lost in hunting for pieces is immediately dispelled when you see the simple system of laying out materials that accompanies the instructions for every house.

## Aladdin Achievements

What Aladdin has done for others is important to you as indicating what we can do for you. Aladdin has built six cities. Aladdin houses received highest awards at the **Panama-Pacific International Exposition (WORLD'S FAIR)**, **Michigan State Agricultural Exposition**.

Selected by the United States Government to co-operate in the production of an ideal workman's cottage. Selected by State of Michigan to furnish homes for State officials. Furnished houses for the British Government. Furnished a house for the president of the Republic of Liberia, East Africa. The City of Charleston, South Carolina, is an Aladdin customer.

We have furnished from one to three hundred and fifty Aladdin houses to each of the following great industrial concerns:

A. D. Jaquard & Co., Atlas Chemical Co., Arthur Elginines Co., Alan Wood, Iron & Steel Co., Atlantic Mills Inc., Atlas Powder Co., Bristol Brass Co., Calumet and Hecla Mining Co., Cudahy Refining Co., Dominion Coal Co., Dow Chemical Co., Duquesne Powder Co., Ford Colliery Co., H. E. Bell & W. G. Zoller, H. L. Barber & Co., Hercules Powder Co., J. M. Gandy, John Deere, Jones & Laughlin, L. M. Allis, L. C. Young Co., L. C. Young Mfg. Co., Mark Mfg. Co., National Arrow Mfg. Co., Pennsylvania Coal & Coke Corp., Pennsylvania Coal Co., Pittsburgh Plate Glass Co., Rich Creek Coal Co., Standard Oil Co., Standard Silk Co., The Tide Water Pipe Co., Ltd., Valley Mould & Iron Co.

Do Aladdin customers come back to us for more houses? Here's the evidence:

One of the above customers placed the following quantity orders for Aladdin houses at intervals of from two to eight weeks apart covering a period of a single year:

Sixty Aladdin Houses. Thirty-One Aladdin Houses. Six Aladdin Houses.  
Forty Aladdin Houses. Sixty-Seven Aladdin Houses. Two Aladdin Houses.  
Fifty Aladdin Houses. Twenty-Six Aladdin Houses. Twelve Aladdin Houses.

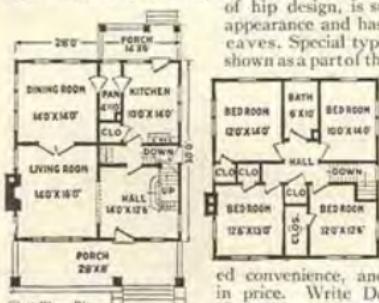

Can stronger evidence be given—that than a great modern business house shall time after time buy and erect Aladdin houses in large numbers? Doesn't it prove effectively that Aladdin Prices, Aladdin Quality and Aladdin Service are supreme?

**The Spokane \$3103.00**

Stucco on the upper story of the Spokane forms an interesting part of the architectural features of this fine square type. The first story is furnished with siding. The roof, of hip design, is substantial in appearance and has extra wide eaves.

Special type stairway is shown as a part of the interior embellishment. All rooms, including four bedrooms are unusually large. A rear porch is a much appreciated convenience, and is included in price. Write Department K about it.

First Floor Plan

**The Winthrop \$1959.00**

The Winthrop is another charming example of the true California bungalow. Its wide eaves, shingled side walls, bay window from dining room, grouped windows, and exposed rafters are all typical of western craftsmanship. Features of the interior are the unusually large living room, and dining room, grade cellar entrance from kitchen, and well placed bathroom. Ask us for full information—Department K.

Floor Plan—The Winthrop

**The Dresden \$1688.00**

Big rooms in a modest sized bungalow distinguish the Dresden. Double windows in living room, dining room and kitchen afford unusual light and air. A dormer window in the front adds much to the appearance of the Dresden. Living room, dining room, grade cellar entrance, two good bedrooms, bath and closets combine to offer the utmost convenience in this desirable home. Write us, addressing Department K.

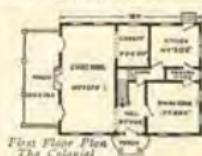

Floor Plan—The Dresden No. 2

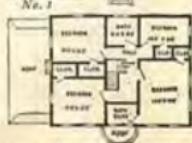

**The Colonial No. 1 \$3796.00**

New England and Southern Colonial features characterize the Colonial No. 1. It is a handsome structure both outside and inside. Its front entrance is graced with curved colonnade, while there are paneled side lights on each side of the front door. A fine porch is attached next to left living room, with French doors on each side of fireplace. An attractive open stairway is placed in the hall, and entrance is also had direct to kitchen. Cellar stairs are below main stairway. There is not room here to discuss all the attractive things discoverable in the Colonial No. 1. Write Department K for more information.

Floor Plan—  
The Colonial No. 1

Second Floor Plan—Colonial No. 1

# GARAGES PRICED AS LOW AS \$99.00

Aladdin garages have led the market for ten years. They are only sold and shipped car-loads for Aladdin's own stores. Sturdy construction, high grade material and rock-bottom prices have made an irresistible appeal to many auto-owners throughout the land.

## The Ford (Shown below)

The Ford, illustrated on this page, is made in two standard sizes, the 8x14 ft. being designed for Ford cars. It is just large enough to admit a Ford touring car with the top either up or down. Any garage of similar dimensions will not admit the Ford car. This size sells complete with all material cut to fit, panels to match the colors of your house, hardware, locks, mullions and trim. Price \$125.00. The 10x16 ft. size has the same construction.

wherever it may be erected. Paint to match your house. The Studebaker price is \$163.00.

## The Lincoln (Shown below)

(Shown below)  
Size 20 x 30 ft.

Distinctive and attractive. The Lincoln will do credit to any surroundings. It is furnished with siding which can be painted to match color scheme of home. Four swinging doors are provided. The Lincoln, Price \$265.00

## The Studebaker (Shown above)

Size, 12 by 20 ft.

The Studebaker will take the largest car on the market, with ample room at sides for working about car, also storage space for supplies. It has swinging doors. It is of a splendid type and always looks good.

### Specifications for Garages

Specifications, as follows: Siding, 4' x 8'; Strapping, 2' x 2' 24"; Gutter, 4' long; Siding for sides, walls; Rafters, 2' 4" x 2" on centers; Exposed Eaves, Roof Sheathing, inch lumber laid tight. Fifteen-year guaranteed green slate surface roofing for roof. Hardware, nails and paint for exterior construction. Metal frame, ready-cut panel and complete blueprint showing every step of erection. All garages shown are furnished without floors, as practically all auto owners prefer to build floor of concrete or cinders.

## Kitchen Cabinet

The housewife today looks upon a kitchen cabinet as a real necessity in the home. Because of this The Aladdin Company designed a kitchen cabinet and broom closet of superior convenience.

The cabinet is 5 feet wide over all and 7 feet high. The bottom section is 18 inches deep and the top section is 12 inches in depth. The broom closet is 18 inches wide and 12 inches deep.

These kitchen cabinets are constructed of the finest Oregon fir, a very high-grade lumber with a beautiful grain. All material machined and crated ready for assembly. Price A l a d d i n K i t c h e n C a b i n e t 3C-1. \$36.00

## Aladdin Sanitary Indoor Closet

### Easy to Install

Place it in a hall, a spare bedroom, clothes closet—any convenient place. Simply make sure that it is well located and arranged to provide good draft. It only takes 15 minutes to half an hour to set it up completely.

### Absolutely Odorless

The chemical we supply is exceedingly strong and quick in action. It sanitizes and completely disinfects any article that may come in contact with it, destroying the active and making the closet odorless, sanitary and disinfected in every way. One gallon of this chemical, properly diluted, will bathe from six to eight persons in the average family. Supply six to two gallons of water in the tank and combine with a pint of chemical and the closet is ready for use. Don't use some of the inferior grades of chemical appearing on the market—we can assure you that our product is the best, which insures the success of the closet.

### Complete Outfit Includes Toilet

Six feet of Pipe, Two Pails, Wall Collar, Tank, Pump, Paper and One Gallon of Chemical.

SH-21—Aladdin Sanitary Indoor Closet, as described. Weight 50 lbs.

**\$5.75**

F. O. B. Factory

Grey Enamel Finish

Arch No. 3C-2—a Plain Column Colonnade. For smaller homes or one where extreme simplicity is desired. We furnish these made of Yellow Pine or Oregon Fir. Price Arch 3C-2 ..... \$19.00

## Aladdin Medicine Chest

A very convenient addition to any bathroom. Made to be placed in a recess in the wall, the face to come flush with the plaster. Size of recess required in wall is 20 inches wide, 20 inches high, 4½ inches deep. Has three adjustable wood shelves. Medicine Chest 3C-3 ..... \$12.00

## Aladdin Closette

Here is a practical plan for a clothes closet that utilizes 4½ square feet of floor space, and yet gives more hanging space and storage space than most of the common six-foot closets that require 21 square feet of floor space.

By the use of coat hooks, casting about 5 yards of dozen lengths of wire, and being able to hang twelve rods or tubes in this space, each being easily reached and inserted, there is no greater convenience or convenience than can be gained in the average ordinary size closet! Above the compartment is space for hats, shoes, etc., and below the coat closet, there is space for the many other articles that may require a place out of the way.

The cabinet is six feet high and, in many instances, it can be built into the bedroom wall, so that it utilizes the six inches of wall thickness and really occupies only one foot of bedroom floor space!

Aladdin Closette 3C-4..... \$10.00

## Homecraft Built-in Buffet

A well proportioned "Homecraft" built-in sideboard or buffet has been very popular wherever offered. It is 4 ft. 6 in. wide and 7 ft. high, 34 in. deep. Has a plate mirror back in center over two large drawers and two smaller ones. The Homecraft Built-in Buffet 3C-5 Price 3C-5 ..... \$90.00

## This "Homecraft" Bookcase Arch

Has been used in thousands of homes and in every case has given perfect satisfaction. The cases are 2½ ft. wide, the columns 8 in. square. Built out complete with hardware and glass doors, as shown.

Bookcase Arch 3C-6.....

**\$66.00**

# Extra Features Obtainable for ALADDIN Houses

For those customers who wish to embellish their new homes with a few distinctive touches, we have provided a number of features, as shown here, at but slight additional costs

## Sun Room

This sun porch is size 14 x 10' and is designed especially to attach to the Capitol, Dutch Colonial, shown on page 4 of the catalog. It can however be attached to any Aladdin house as an extra room or as a sun parlor. The price includes all material such as framing lumber, flooring, roof, rafters, windows, glass, nails, paint, etc. We do not sell this separate but will furnish it with any Aladdin house for \$219.00 in single construction and \$255.00 in double construction.

## Pergola Porch

This pergola porch may be attached to any Aladdin house and is shown as part of the Capitol, Dutch Colonial, shown on page 4. Materials furnished include all framing lumber, flooring, finish lumber, columns, roofing, paints, hardware, etc. It is size 14 x 8' and is priced at \$76.00. Will make a desirable addition to any Aladdin house.

## Rear Addition No. 1

This addition is designed as an extra room to be attached to any Aladdin house. It can be used as a kitchen, extra bedroom or for other purposes. Price includes all lumber, door, window, glass, hardware, etc. In single construction price \$102.00. In double construction price \$125.00; size 8 x 10'.

## Grade Cellar Entrance No. 2

This addition is designed to afford a grade cellar entrance and can be attached to any Aladdin house. All material necessary for the complete addition is included together with steps to kitchen and steps to basement. Price of this addition in single construction \$83.00, double construction \$95.00.

## Hip Roof for Columbia

We have had occasional calls for furnishing a hip roof for the Columbia type. This is shown in accompanying illustration. This will be furnished for any Columbia size 18 x 26 instead of the gable roof at an additional cost of \$12.00.

## Gable Roof Porch

We have designed an attractive type of gable roof porch with two square columns and exposed eaves for attaching to any Aladdin house. The materials furnished include paint, nails, roofing and steps together with porch railing on two sides for \$75.00. This will make a very attractive addition to either the front or rear of any of our houses. It is size 8 x 8'.

## Gable Entrance Hood

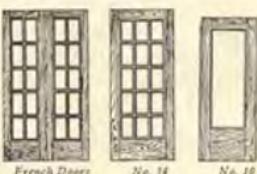

Here's an attractive little feature that may be added to either the front or rear entrance of any Aladdin house. It is of the rustic type with exposed rafters and attractive brackets. It affords excellent protection during inclement weather. This is furnished complete including paint and nails with any Aladdin house at a cost of \$12.00.

## Eave Brackets

For those who desire to embellish the exterior appearance of their Aladdin home we are prepared to furnish our Standard type of reinforced eave bracket. This will be supplied only with Aladdin houses and furnished in proper size to fit the house you buy. Price of bracket is 50c each.

## Special Doors

Here we show two types of front doors and one type of French door for interior arch openings. Prices of these doors of course include glass together with material for finishing in accordance with that supplied with the house you purchase. Pair of French doors are priced at \$26.85. Full glass door No. 10 instead of sash door specified furnished at additional price of \$3.25.

Divided light front door No. 14 instead of sash door at additional price of \$3.50. French door No. 14 and full length glass door No. 10 are each size 2' 8" x 6' 8". The pair of French doors are each size 2' x 7', making the pair 4' x 7'.

## Green Slate Surfaced Shingles

We can furnish green slate surfaced shingles instead of the slate surfaced roofing specified on the various houses at the following additional charge.

Columbia.....	\$28.00	Newport.....	\$32.00
Liberty.....	\$30.00	Potomac.....	\$32.00
Cedars.....	\$32.00	Duplex No. 10.	\$32.00
Victory.....	\$32.00	Capitol.....	\$38.00

They are made of the same high grade materials as the roofing. The size of each shingle is 8 inches wide by 12½ inches long. They lay 4 inches to the weather. Thereby giving you better than three thicknesses on your roof. We can recommend them in every way to give perfect satisfaction.

# Specifications and Details of Construction

PLEASE read these specifications carefully so that you will thoroughly understand them. All the houses in this catalog except those shown on pages 8, 9, 13 and 20 are furnished and priced in both single and double construction. Detailed specifications of single construction are given below for each type of house.

Specifications for double construction are the same as single construction, but with the following additional materials included: Sub-floor sheathing under finished floor with building paper to be placed between the two floors. Outside wall sheathing under bevel siding with building paper to be placed between. Sash weights, sash cords, sash pulleys, sash locks for all double sliding windows. Additional nails for the above additional material.

## SPECIFICATIONS VICTORY—Size 26 x 30 Pages 2 and 3 POTOMAC—Size 26 x 36 Page 5 (SINGLE CONSTRUCTION)

# BIG SAVING ON PLUMBING, HEATING AND LIGHTING

## Re-Circulating Aladdin Furnace

Costs Little More Than A Stove

### Some Important Features

Tapered for heat saving coil. Extra heavy cast radiators. Complete re-circulating system. Two electric fire-pots, built into top cover.

Complete with lights, knobs and all accessories put at factory to save time and money.

Complete equipment includes clock, draft, chimney, auxiliary cement for flue pipe, pipe wrenches, pipe cutters, pliers, pipe cleaner, flexible damper chain and wall plates.

### How It Works

In Aladdin Re-circulating Planch Furnaces are enclosed two separate heating systems to serve air heating.

One burner is mounted inside the furnace, another outside.

Both burners are completely isolated in your house is necessary to keep all your rooms comfortable warm.

Cold air from outside enters through outer section of furnace casing, as illustrated, and circulates around furnace and into rooms.

It then passes through the hot furnace casings becoming heated and expands rapidly, passing through center of radiator to the room above from

which it is distributed throughout the house.

### Ask for Furnace Folder

#### Lavatory (3M-212)

# The Columbia—a Real Gem—8 Plans—Priced at \$538.00

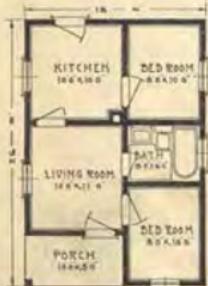

THE modest cottage is the foundation of the American Republic. The American citizen is master of himself and his destinies when he steps across the threshold of his own home. He pities the flat dweller and the renter with their multiple restrictions, confinements and tribute-paying exactions. "He owns his own home," is a recommendation for thrift, character and integrity that all the world recognizes.

Wise, therefore, is the man who arrives at this momentous decision. However modest it must be, "it will be mine for the happiness of my family and myself."

The Columbia breaks through the clouds of obstructions, high prices, middlemen's profits, architects and contractors' fees and opens up the big opportunity to "Start right now;" to start with less than you thought possible, to start with a most modest savings.

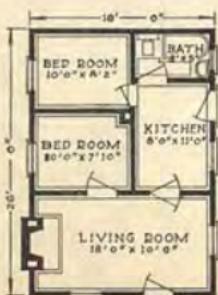

## Columbia No. 8

Included in the Columbia No. 8 are a porch, large living room, combined dining room and kitchen, two bedrooms, a central bath and a room for a family of four. The picture shown above applies to Columbia No. 8.

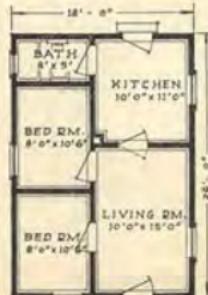

## Columbia No. 4

No. 4 is a very popular arrangement of big living room, kitchen, bath and two bedrooms. All rooms are the maximum size obtainable in these dimensions.

## Columbia No. 5

The rooms in No. 5 are proportioned differently although of the same accommodations as shown in plan No. 4. It has been a favorite in the hearts of those who have built it.

## Columbia No. 6

Columbia No. 6 gives big living room, and dining room, with two bedrooms and kitchen. This type is designed so that there are no pipes or water or sewerage for modern conveniences.

The Savings After Building a Small Home Will Add More to Your Happiness Than the Luxuries of a Big Home. These COLUMBIAS Are Priced at \$538.00

*Be it ever so humble—"it's our own"*

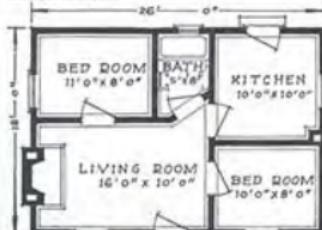

#### Porch for Columbias

The porch shown in the accompanying picture will be furnished for \$60.00. It is size 14x6 ft. and price includes all materials complete.

#### Columbia No. 2

No. 2 is another variation of this remarkable design wherein two bedrooms are included with the big living room, kitchen and bath. It is a big seller and never fails to delight its owners.

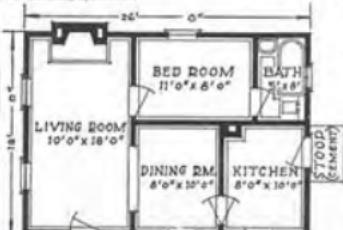

The Columbia is the foundation of the Aladdin business. That is because of the thousands of men and women who recognize it as the foundation of their home-owning ambitions. It is a place to start. Later successes may come enabling a larger and more ambitious house. But the Columbia is the starting point; it conserves expenses, inspires thrift—and saves money. Eight floor plans are presented. They are all priced alike—\$538.00! Choose that which meets your needs best—and LET'S GO!

As in other larger plans, you may have sheathing and lath in place of siding without extra cost if you prefer. You can see the effect of the picture on front page for the side walls instead of siding can be had. The Columbia is priced at \$538 in single construction, and \$641 in double construction. See page 6 for full details.

#### Columbia No. 3

This type, No. 3, shows the living room running the depth of the house, having three exposed outside walls. Added to this are the dining room, kitchen, bedroom and bath—a charming apartment.

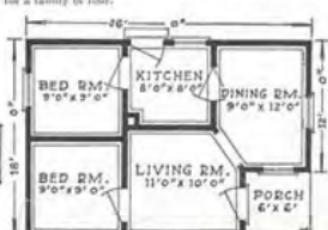

#### Columbia No. 1

Here is a very popular plan for a small family. It is arranged with living room, kitchen, bedroom, bathroom and bath. All rooms have ample wall space.

#### Columbia No. 7

No. 7 illustrates another variation of the inset porch and the Columbia. It also includes living room, dining room, kitchen and two bed rooms. It is a very little nest for a family of four.

# The Cape Cod—Colonial Bungalow Masterpiece \$2212.

AN atmosphere, purely Colonial in inspiration, pervades this chaste creation of Aladdin designers. It gives one the impression of a cameo chisled from granite and jade. The Cape Cod met with instant appreciation upon its appearance and continues one of our most sought after designs.

Casement windows with divided lights and bordered by shutters grace the front, while the French type front door with side lights never fails to charm the observer. The simple gable that adorns the roof is both an architectural advantage as well as a utility.

There are three splendid bedrooms arranged for the interior, each leading off from central hall. Convenient little cloak closet is placed just next to the entrance. Large closets are shown for each bedroom. The living room extends 23 feet across the front of the house, and French door opens onto pergola porch.

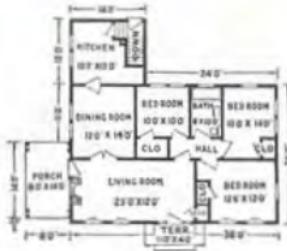

Dining room is separated from living room with a pair of French doors, while the kitchen is large and a convenient cellar entrance leads below.

Taken as a whole the bungalow is the last word in appearance, convenience and construction. The materials are all of the very finest that grow, the framework is strong and designed in accordance with the very best standards of architectural practice.

Satisfaction is the never failing result of the many customers who have selected the Cape Cod. Address Department K if interested in this home.

## THE ALADDIN COMPANY

Bay City, Michigan,      Wilmington, North Carolina  
Portland, Oregon

 THE FIRST NATIONAL BANK  
Bay City, Mich.
