Criterion 4 Evidence
Developing a Program Assessment Plan

STUDENT LEARNING OUTCOMES ASSESSMENT
DEVELOPING A PROGRAM ASSESSMENT PLAN

1. Assessment has taken on a variety of meanings. It may mean the process of grading a student's course assignment, or use of a standardized test imposed by external accountability, or any activity designed to evaluate the success of a program, course or institutional effectiveness.
2. Program Assessment focuses on student learning and the experiences associated with a specific program of study (i.e. major, possibly minor, concentration, certificate, graduate degree).
 - a. Has the student acquired the skills, knowledge and habits of mind (values, dispositions)?
 - b. How well are you doing it?
 - c. How can you improve?
3. Effective Program Assessment
 - a. Systematic, ongoing, acquires information over time; cultivates a culture of inquiry.
 - b. Meaningful. Builds a body of evidence to improve the program.
 - c. Built around the program's mission statement
 - d. Multi-faceted. Information is collected on multiple dimensions, using multiple methods and sources.
 - e. Faculty-designed and implemented.
4. Develop a Program-level Assessment Plan
 - a. Developing an effective assessment plan begins with being clear about what program faculty are trying to accomplish. A clear program mission and accompanying learning outcomes serve as the foundation for the entire plan. **IN A NUTSHELL:** What questions do you believe need to be answered, which will lead you to determine the methods you will employ, and how useful the assessment results are for making programmatic changes.
 - b. Checklist
 - Agree on your mission.
Successful program assessment begins with a program mission linked to the institutional and college mission statements. Program effectiveness begins with a clear sense of what the program is designed to accomplish.
 - Create program learning outcomes.
Describe the ideal student in your program. Be concrete and focus on those strengths, skills and values you feel are the result of or at least supported and nurtured by the program experience.
Ask yourselves: What does this student know? What can this student do? What does this student care about? Bottom line: What is it you want students to know, understand and be able to do when they graduate?
 - Align your curriculum.
Review instructional materials.
Review syllabi and course outlines.
Review course assignments and tests.
 - Brainstorm; identify and select measures - Set timeline to collect the evidence.
 - Discuss results and use information to improve program.
 - Communicate results.
 - Evaluate the process, make necessary adjustments.

STUDENT LEARNING OUTCOMES ASSESSMENT
STEPS FOR DEVELOPING A PROGRAM ASSESSMENT PLAN

- Step 1** ***Program Mission Statement***
Establish a description of the purpose of the program, who it serves, its broad goals, and how it fits into the mission of the University.
- Step 2** ***Program Learning Objectives – Expressed in Student Learning Outcomes***
Statements of what the student will be able to do upon successfully completing the Program. The statements articulate outcomes in the areas of 1) knowledge; 2) skills; and 3) dispositions and habits of mind.
- Step 3** ***Curricular Cohesiveness***
How well does your curriculum address the learning goals?
Do students have ample opportunity to study and practice the learning goals repeatedly and intensively?
- Step 4** ***Strategies***
Determine the assessment strategies that will be used to understand how programs are working and to determine whether they are contributing to student growth and development. Establish the level of expected performance and decide on a schedule for collection of evidence. Utilize multiple measures of learning. Select methods most suited for your discipline.
- Step 5** ***“Close the loop.” Interpret and Share Results.***
How will the information be used to make program improvements? Establish communication channels to share information.

Criterion 4 Evidence
Elevated Risk Campaign

Elevated Risk Campaign
A campaign to support students who are at an elevated level of risk
Project Lead/Responsibility Center: Sydney Davis

Target Population

- First-year students who were identified as having elevated risk.

Objective(s) - By the end of [TIME], this initiative will...

- Connect identified students to resources and skills that will support their success at CMU

Work List Parameters

- Generated by OSS

Identified Students

- 8 students

ID#	FirstName	LastName	Email	Notes
1	Student identity removed			
2				
3				
4				
5				
6				
7				
8				

Action Steps for Students

- Determine what struggles identified students have been facing in their first year at CMU
- Develop a success plan based on their needs

Communication Plan

Method	Timing/Frequency	Communication Objective & Resource(s)
Phone call	Once mid semester, beginning of campaign	<i>To talk with the student about how their semester is going and determine what struggles they may be facing</i>
E-mail	If non-responsive to phone call, once after phone call and once at end of semester before finals	<i>To encourage the student to call to set up an appointment to discuss how their semester is going and what struggles may be taking place</i>

Phone Script

Hi, is this _____?

This is Sydney, the Success Coach in East. How are you?

Is this a good time to talk?

NO

Okay, when would be a good time to call back?

YES

Okay, great! I was just calling to see how your first semester went.

STUDENT RESPONSE

Discuss how coaching can address their concerns about last semester

Attempt to set up meeting with student, if they say no, remind them that I am available any time to meet if they change their mind

E-mail #1: General outreach

Hi (student),

My name is Sydney and I am the Success Coach in the East Residence Hall. I have been trying to get in touch with you and left a voicemail for you today. I would like to speak with you to discuss how coaching may be helpful for you this semester. I work on things like time management, study tips, test taking/anxiety, and other skills that affect your life as a student. Please reply to this e-mail with some dates/times that work best for you so we can meet and chat. You can also call me at (989) 774-3916.

E-mail #2: Prepping for finals e-mail

Hi (Student),

Finals are rapidly approaching and now is the time to start thinking about how to prepare! Below are some tips to make the most out of your study time and get the biggest payoff for the time you spend preparing!

- Study smarter... not harder.
 - Invest your time in techniques that produce more output (discussing with others, personal experience/connections, and teaching someone else) to maximize your effectiveness and get the most out of your study time!
- Aim for moving from short-term memories into long-term memories.
 - The short-term area of our brains holds about 4 pieces of information before we turn into zombies while studying – we've all been there! When you reach that threshold, take a break and allow time for processing. Consider starting now to do this!
- Participate in discussion during review sessions.
 - Exchange thoughts with others, including the professors and classmates, to retain what you are learning and draw on those conversations as you're taking the exam.
- Create study groups & review together for the exams.
 - Talk things through, gain perspectives from others, and make connections you might have otherwise made. Bonus points if you can teach a concept to

someone in the group who doesn't understand!

- Make it meaningful!
 - Connect concepts to prior knowledge and/or personal experiences to create a mental "hook" and retrieve that information during the test.

For additional assistance as you consider managing your time and finding the strategies that work most effectively for you, consider attending GPS Success: Finish Strong TOMORROW NIGHT (Tuesday, April 21) at 7 pm in the UC Lake Michigan Room!

Progress & Evaluation Markers (aligned with objectives)

Metric	Target	Actual Outcome
<i>Reach 100% of students through 2 e-mails and/or 1 personal meeting</i>	100% (8/8)	75% (6/8)

Claudia Douglass, Vice Provost Academic Effectiveness
From: Michael A. Gealt, Executive Vice President and Provost
Date: March 4, 2016
Re: Program Review for the Undergraduate Dietetics Major

Congratulations on the completion of a successful self-study and program review. The self-study documents were also submitted to the Accreditation Council for Education in Nutrition and Dietetics (ACEND) which granted full accreditation for the Didactic Program in Dietetics. The self-study was clear and well prepared and documented a high-quality program. I encourage you to continue your strong connections with other colleges and the community. A few recommendations to strengthen the program stemming from the department analysis and the program review discussion are noted below.

Based on my review of the self-study, dean's review, external reviewer's comments, and related materials, I have rated the program as high quality and recommending that it remain at its current size. Should additional resources be needed, they will need to come from college-level reallocation. Please refer to the table at the end of this letter for the specific ratings.

Undergraduate Dietetics Major

1. We discussed the potential for a new major/minor in food science (not the exact title). Explore the potential for the new program with other academic areas and proceed to develop it if it shows promise.
Leadership: Department Chair
Timeline: Provide a brief report describing communications with other areas and progress on developing the major/minor prior to the end of the Spring 2016 semester.
2. After the arrival of your new faculty member, proceed with the remodel of the foods lab, software purchases, and development of curricular changes to update the program.
Leadership: Department Chair
Timeline: Provide a brief progress report prior to the end of the Spring 2016 semester.
3. Develop a plan to track your graduates and include it in your assessment plan.
Leadership: Department Chair
Timeline: Provide a brief summary of the tracking strategies and approval of the revised assessment plan prior to December 15, 2016.
4. Explore opportunities for collaboration with other campus units in interprofessional education and in the potential for 2+2 programs into the food sciences.
Leadership: Department Chair
Timeline: Provide a brief summary of discussions and future plans by May 15, 2017.

If you have any questions about these recommendations, please do not hesitate to contact Dr. Claudia Douglass or me. As you complete these recommendations, please send a brief update to the Vice Provost for Academic Effectiveness.

Program	Department			EHS Dean			Provost		
	Quality	Growth	Resources	Quality	Growth	Resources	Quality	Growth	Resources
Dietetics Major	2	2	2	2	2	2	2	2	2

Ratings of Quality and Funding ¹	
Program Quality	
1 = Exceptional Quality	Program quality is truly exceptional, constituting one of the top programs among comparator programs nationally
2 = High Quality	Program is of high quality and needs few if any improvements
2.5 = Moderately High Quality	Program is of moderately high quality, but needs improvement in a few areas
3 = Needs Improvement	Program is a solid program, but needs significant improvement in many areas
4 = Low Quality Program	Program is of marginal or low quality
Program Size	
1 = Increase Size	Program is in high demand or demand is expected to increase.
2 = Maintain Size	Program size should remain the same.
3 = Decrease Size	Program demand is reduced. Decrease size of program.
4 = Combine with another program	Program will be strengthened if combined with another program.
5 = Eliminate Program	Program is no longer needed. Plan for program deletion.
Changes in Funding	
1 = Top Priority	Program needs additional resources and should be a priority for new resources or reallocation of existing resources
2 = Secondary Priority	Program needs additional resources and should be a priority for new resources or reallocation after addressing top priority programs <ul style="list-style-type: none"> a. University-level reallocation b. Provost-level reallocation c. College-level reallocation
3 = No Increase	Program does not need additional resources beyond those that are available at the department level or through department actions
4 = Reduction	Program resources should be reduced and reallocated to higher priority programs

Re: Program Review for the Undergraduate Philosophy Major and the Ethics, Values, and Society Minor

Congratulations on the completion of a successful self-study and program review. The self-study documents were well prepared and clearly explained changes in enrollment as well as the strengths and challenges of the curriculum. I commend the department on their faculty scholarship. We noted in our discussions the need for additional Writing Intensive and Quantitative Reasoning courses, and I see that they were developed and are being offered. The action steps noted in your self-study are on target and should be pursued. In addition, a few recommendations to strengthen both programs stemming from the department analysis and the program review discussion are noted below.

Based on my review of the self-study, dean's review, external reviewer's comments, and related materials, I have rated the program quality, potential for growth and need for resources. Please refer to the table at the end of this letter for the specific ratings. The programs are of high quality and have the potential for growth. Additional resources will need to come from college-level reallocation.

Undergraduate Philosophy Major and Ethics, Values, and Society Minor

1. Explore ways to attract more women to the programs and encourage excellent graduating students to remain in the field and pursue the professorate.
Leadership: Department Chair
Timeline: Provide a brief report describing mechanisms to encourage gender balance you're your programs. Submit to Dean and Provost prior to December 1, 2016.
2. Develop a marketing strategy for both programs. This might include both on and off-campus outreach.
Leadership: Department Chair
Timeline: Provide a brief summary of the marketing strategies, their implementation and success prior to December 1, 2016.
3. Explore opportunities for collaboration with other campus units in the areas of applied ethics, medical ethics, and business ethics. In some cases, an online certificate might have value.
Leadership: Department Chair
Timeline: Provide a brief summary of discussions and future plans to the Dean and Provost by December 1, 2016.

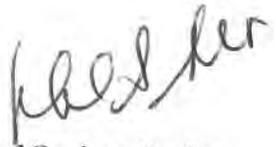

If you have any questions about these recommendations, please do not hesitate to contact Dr. Claudia Douglass or me. As you complete these recommendations, please send a brief update to the Vice Provost for Academic Effectiveness.

Program	Department			HSBS Dean (taken from prioritization)			Provost

Re: Program Review for the Undergraduate and Graduate Programs in Mathematics

Congratulations on the completion of a successful self-study and program review. I commend you on the review of so many programs. Based on my review of the self-study, dean's review, external reviewer's comments, and related materials, I have rated the program quality, potential for growth and need for resources. Please refer to the table at the end of this letter for the specific ratings. All of the programs are of high quality, but they differ in their potential for growth and therefore needed resources. Additional resources will need to come from college-level reallocation. We discussed the use of tools beyond the SOS for the evaluation of teaching, the need for faculty release time for research, and ways to recognize exceptional faculty service. One reviewer suggested a review of the department "brand" with consideration of a name change. These are all department concerns that need to be discussed with the faculty and then the Dean and therefore are not included in the comments below. A few recommendations to strengthen the programs stemming from the department analysis and the program review discussion are noted below.

Undergraduate Major: Mathematics

1. Improve methods used to place students in the initial mathematics courses with the intention of increasing student success. There may be a need to consider a different placement examination and developmental mathematics courses.
Leadership: Department Chair
Timeline: Provide an update on the methods to the Dean and Provost by May 1, 2016 with a follow up report on DEW rates in relevant courses by May 31, 2017.
2. Complete a review of the curriculum to reduce the number of required credits and to increase flexibility in offerings in an effort to reduce time to graduation. Consider eliminating the "pure" and "applied" concentrations on the mathematics major.
Leadership: Department Chair
Timeline: Provide a report of curriculum discussions and changes to the Dean and Provost by December 31, 2016.

Graduate Program: MA in Mathematics

3. Complete a review of the curriculum in an effort to reduce the number of credits for graduation and to increase flexibility in course choices and offering schedule to improve time to graduation.
Leadership: Department Chair
Timeline: Provide a progress report to the Dean and Vice Provost by May 31, 2016 and a final report to the Dean and Provost by May 31, 2017.

Graduate Program: PhD

4. Complete a review of the curriculum including the possibility of having additional “tracks” or “concentrations, reducing the number of credits for graduation, and increasing flexibility in course choices and offering schedule to improve time to graduation.

Leadership: Department Chair

Timeline: Provide a progress report to the Dean and Vice Provost by May 31, 2016 and a final report to the Dean and Provost by May 31, 2017.

All Programs:

5. Work with the college marketing and recruitment committee to develop strategies to increase enrollments in all programs.

Leadership: Department Chair

Timeline: Provide a brief report describing the marketing and recruiting initiatives for the BS/BA, MA and PhD programs in mathematics and statistics to Dean and Provost prior to October 1, 2016.

If you have any questions about these recommendations, please do not hesitate to contact Dr. Claudia Douglass or me. As you complete these recommendations, please send a brief update to the Vice Provost for Academic Affairs.

Summary of Program Ratings – Mathematics												
Program	Department			CST Dean								
	Quality	Growth	Resources	Quality	Growth	Resources	Quality	Growth	Resources	Quality	Growth	Resources
Math Major (BS/BA)	2	1	1	2	1	3	NA	NA	NA	2	2	3
Statistics Major	2	1	1	2	1	3	NA	NA	NA	2	1	3
Math Major (BSEd)	2	2	1	2	2	3	NA	NA	NA	2		3
Mathematics (MA)	2	2	1	2	2	3	2	2	3	2	2	3
Math – college teaching (PhD)	1	2	1	2	2	3	2	2	3	2	2	3

Ratings of Quality and Funding!	
Program Quality	
1 = Exceptional Quality	Program quality is truly exceptional, constituting one of the top programs among comparator programs nationally
2 = High Quality	Program is of high quality and needs few if any improvements
2.5 = Moderately High Quality	Program is of moderately high quality, but needs improvement in a few areas
3 = Needs Improvement	Program is a solid program, but needs significant improvement in many areas
4 = Low Quality Program	Program is of marginal or low quality
Program Size	
1 = Increase Size	Program is in high demand or demand is expected to increase.
2 = Maintain Size	Program size should remain the same.
3 = Decrease Size	Program demand is reduced. Decrease size of program.
4 = Combine with another program	Program will be strengthened if combined with another program.
5 = Eliminate Program	Program is no longer needed. Plan for program deletion.

Changes in Funding	
1 = Top Priority	Program needs additional resources and should be a priority for new resources or reallocation of existing resources
2 = Secondary Priority	Program needs additional resources and should be a priority for new resources or reallocation after addressing top priority programs <ul style="list-style-type: none"> a. University-level reallocation b. Provost-level reallocation c. College-level reallocation
3 = No Increase	Program does not need additional resources beyond those that are available at the department level or through department actions
4 = Reduction	Program resources should be reduced and reallocated to higher priority programs

Criterion 4 Evidence

Factors Impacting Transfer Success

Decision Tree Analysis of Transfer Student Performance at a Public 4 Year Institution

Emma A Gunu, MS

Research Analyst - Office of Institutional Research, CMU

&

Robert M Roe, PhD

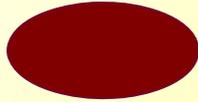

Executive Director of Institutional Research and Planning, CMU

Overview

- Given limited resources, there is a need to determine which high risk students will benefit most from outreach
- Metrics of success - retention and graduation and factors influencing those metrics
- Decision Tree Analysis
- Impact of 2year Degree on Performance at CMU
- Conclusion

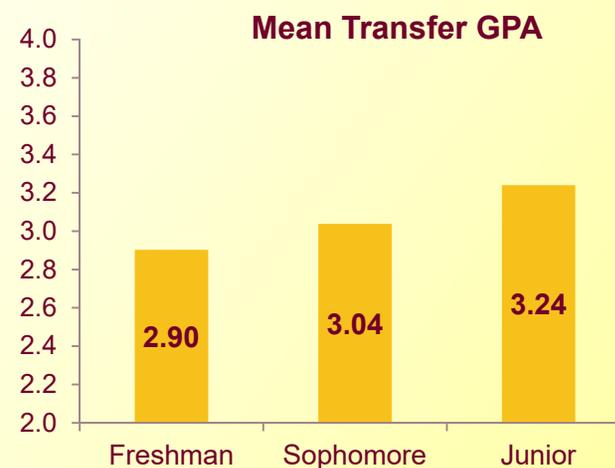

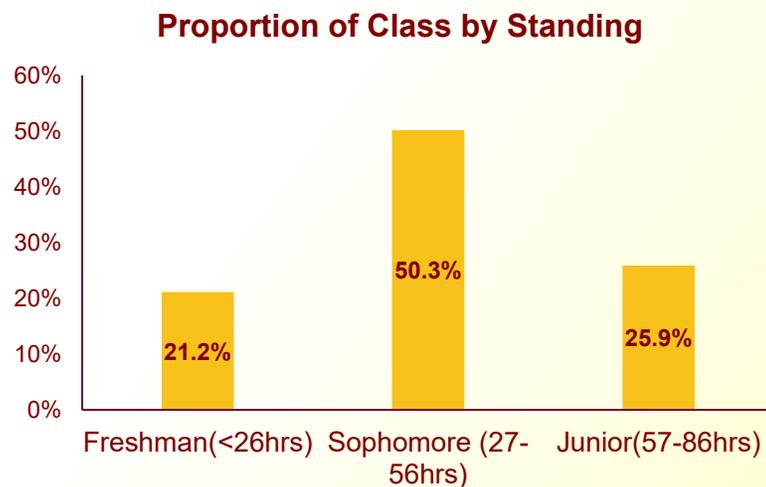

Two Talks in One

- We will present information about students at highest risk who are most likely to benefit from outreach
- We will also present the statistical methodology behind the practical information
- Statistical methodology slides will be identified by: 

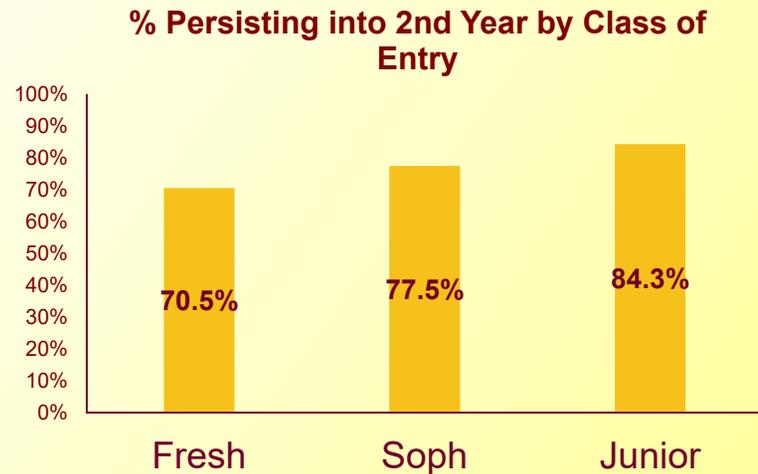

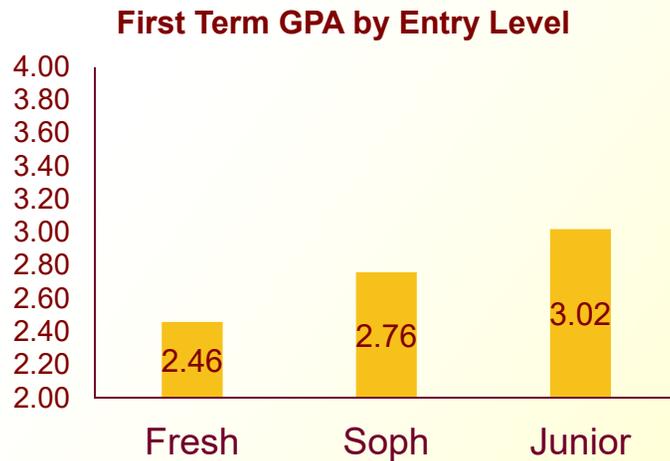

Importance of Identifying At-Risk Transfer Students

- Of CMU's main campus, traditional enrollees, transfer students account for nearly 25% of new students (1400-1500 transfer students/yr)
- Office of Student Success has limited resources often focused on FTIAC students
- No in depth analyses had been conducted so we started by determining factors that influence performance

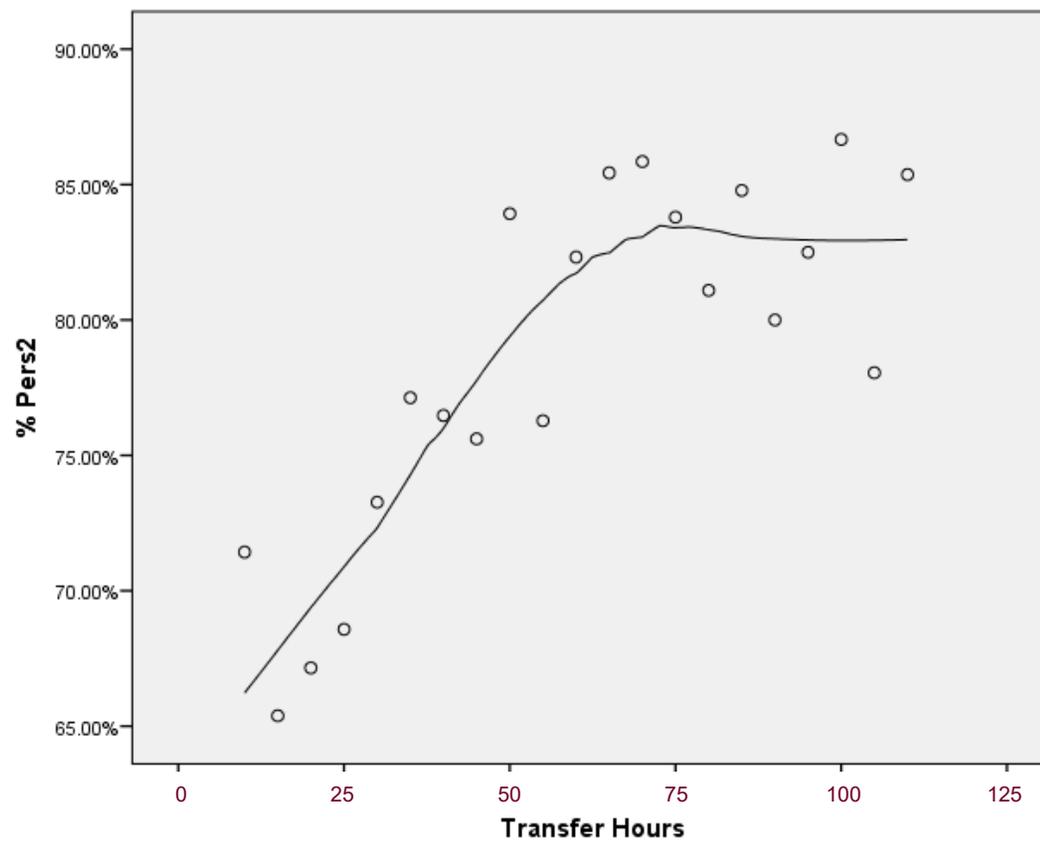

Entry Credentials by Class

First Year Performance

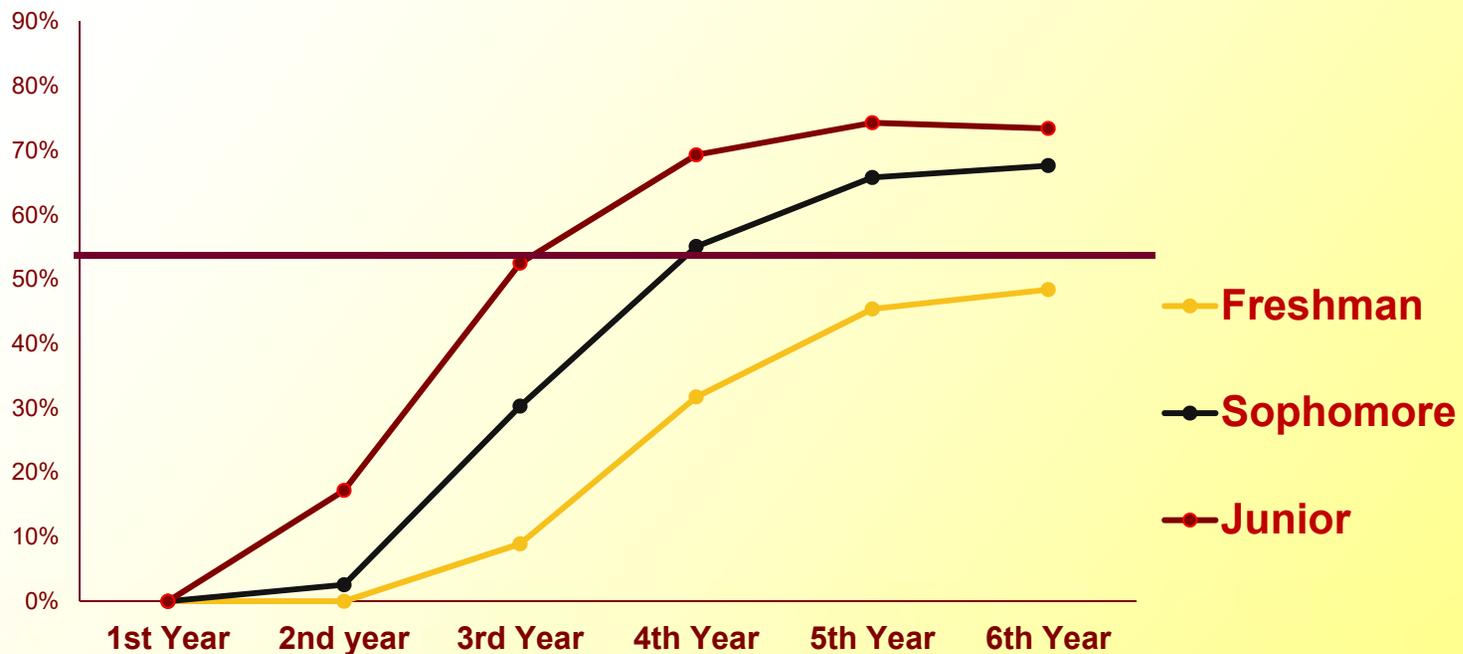

LOESS of Persistence by Transfer Hours (for Rueben)

Graduation by Level of Entry

Last 3-year mean % Graduating in Year by Class of Entry

Best Way to Classify Students Who are at Risk?

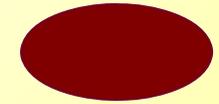

- We now know performance varies by transfer hours but what about other factors?
- Could use logistic regression to determine which factors are predictive
- However, this is not useful in classifying which *groups* of students are at risk

What Factors Might Impact Performance?

- Full or part time student
- Transfer GPA
- Total transfer hours
- Transfer College Year
- Low Income Status
- First Generation Status

Stepwise Logistic on Factors

- Use Stepwise Logistic to determine which factors are predictive

Logistic - Stepwise

Variables in the Equation							
		B	S.E.	Wald	df	Sig.	Exp(B)
Step 1 ^a	TRANGPA	.796	.054	217.894	1	.000	2.216

Step 4 ^d	LOWINC	-.324	.067	23.659	1	.000	.723
	FULLPART	.733	.128	32.890	1	.000	2.081
	TRANGPA	.700	.055	160.898	1	.000	2.014
	TRANHRS	.013	.001	75.412	1	.000	1.013
	Constant	-1.968	.208	89.593	1	.000	.140

a. Variable(s) entered on step 1: TRANGPA.

b. Variable(s) entered on step 2: TRANHRS.

c. Variable(s) entered on step 3: FULLPART.

d. Variable(s) entered on step 4: LOWINC.

Decision Tree Models

- Several types of decision tree models
- Chi-square Automatic Interaction Detection (CHAID) Model and Classification and Regression Trees (CRT) are common
- We chose CHAID b/c we have some continuous variables (e.g. Transfer Hours, GPA)
- CHAID can be used to classify sets of data (e.g. what is the best way to classify our transfer students in terms of retention factors)

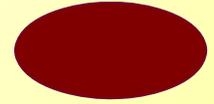

CHAID

- The procedure creates tree-based models that determine how variables best combine to explain the outcome in a given dependent variable
- Dependent variable is binary response – Retained vs Not Retained
- Predictor variables are any combination of variable types (continuous or categorical)

Decision Trees for Outreach

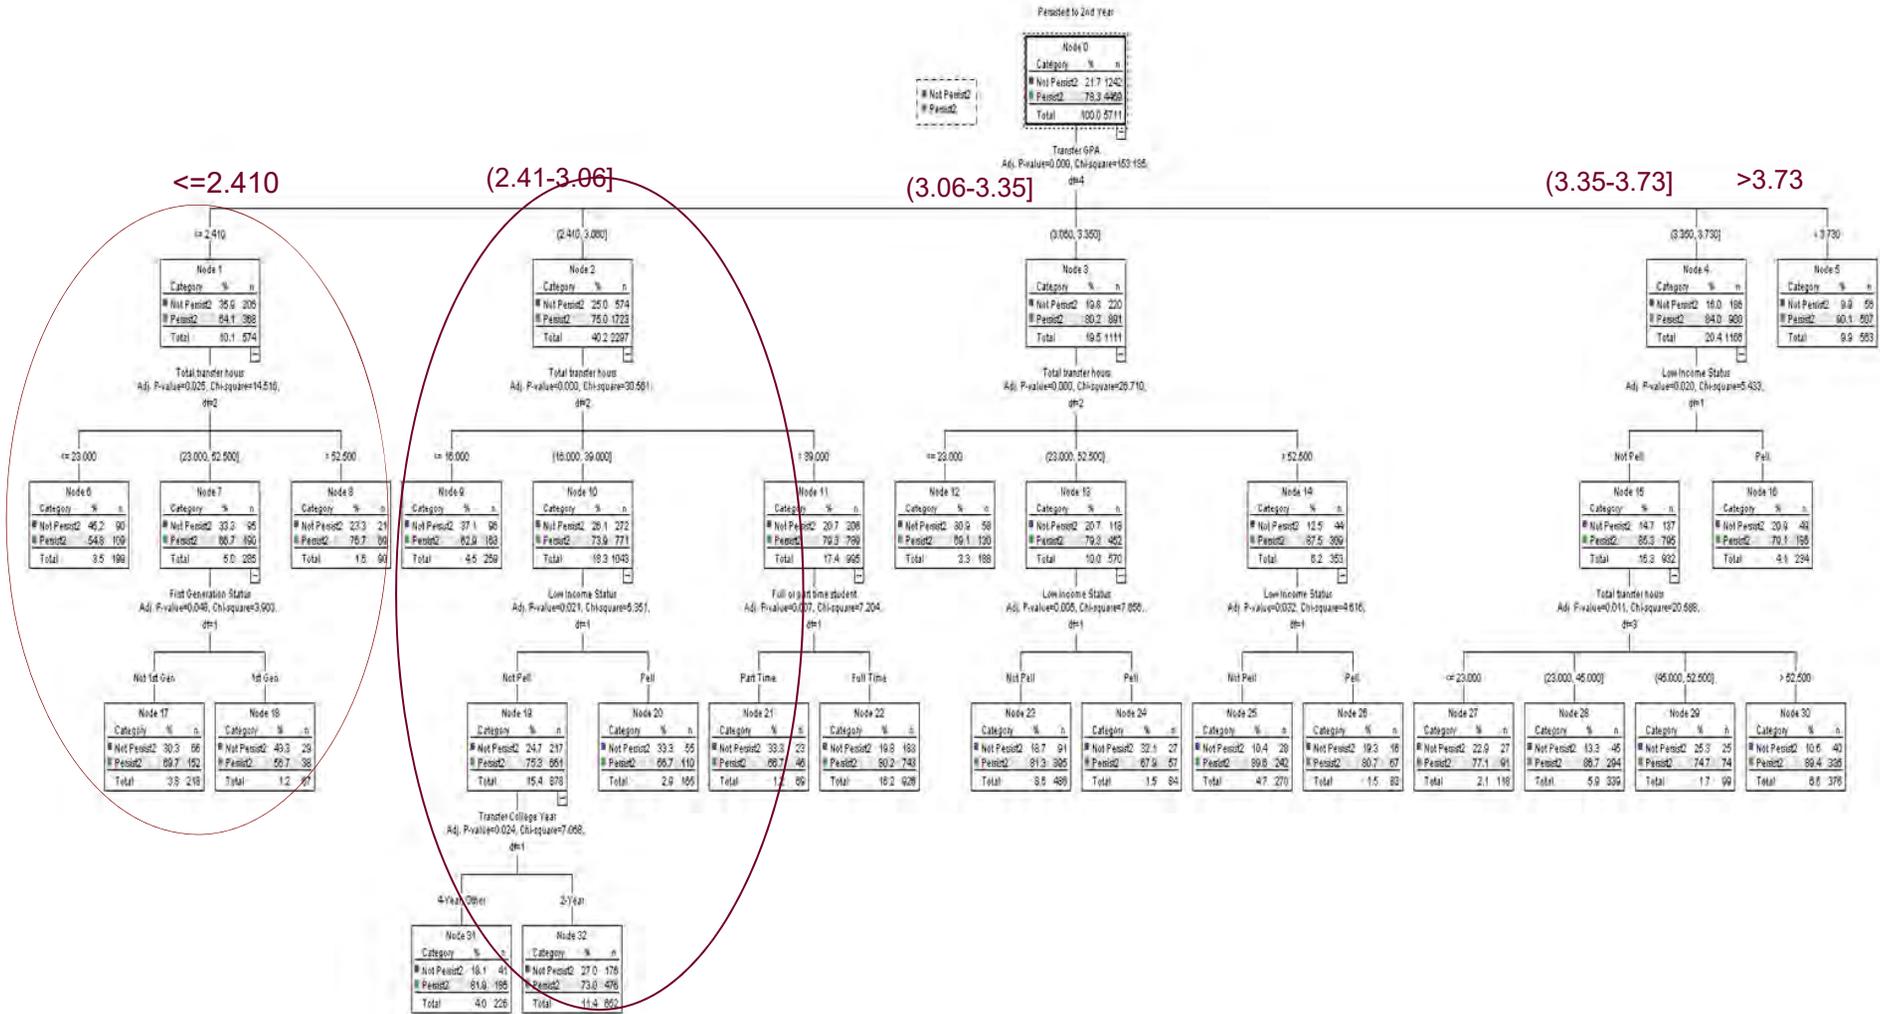

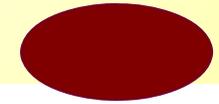

CHAID Analysis For First Year Retention

- Input variables
 - Full or part time student
 - Transfer GPA
 - Total transfer hours
 - Transfer College Year
 - Low Income Status
 - First Generation Status
- All were Selected by Model

CC transfer in this range at higher risk.

CC in this range at higher risk.

Impact of 2 Year Degree At CC

- Next we looked at the impact of obtaining a 2 year degree on persistence, graduation, and GPA

Impact of 2 year Degree

Graduation in 4yrs

	Graduated within 4 Years	
	No	Yes
No Associate Degree	1006 (56.2%)	784 (43.8%)
Associate Degree	190 (32.8%)	389 (67.2%)

$$\chi^2 = 95.714, p < .001$$

However, persistence and graduation are confounded with number of transfer hours.

Logistic Regression- Graduation in 4yrs

	B	S.E.	df	Sig.	Exp(B)
TRANHRS	0.028	0.003	1	0.000	1.029
Prior_2yr_Degree	0.28	0.122	1	0.021	1.323
Constant	-1.197	0.106	1	0.000	0.302

a. Variable(s) entered on step 1: TRANHRS, Prior_2yr_Degree.

Results

- The impact of a 2 year degree on persistence to second year and graduation in 4 or 6 years was significant beyond the impact of number of transfer hours

Summary

- The more refined assessment of transfer students revealed some interesting findings
- Using decision tree analyses on transfer data, we are able to identify very specific groups at risk (and groups likely to succeed)
- We have presented these results to the retention subcommittee, strategic enrollment group, and to the vice president of enrollment services
- Questions?

Criterion 4 Evidence
First Destination Survey Summary

Summary of the Career Services First-Destination Survey
December 2013 and May 2014 Graduates

Office of Institutional Research
Central Michigan University

December 2014

Summary:

The information contained in this document summarizes the data collected from those undergraduate students who graduated from Central Michigan University in December 2013 and May 2014. These two groups constitute a total of 3,521 graduates. Of these graduates, 388 completed the First-Destination Survey Online. An additional 274 were successfully contacted via phone and completed the phone survey, resulting in a combined response of 662 graduates, or 18.80%. Respondents did not differ from the graduate population in GPA, sex, race, or department. Therefore, this sample, while small, does not appear biased. Based on the results of this survey, 73% of respondents are employed either full- or part-time six months after graduating from CMU, while an additional 14% choose to continue their education.

There are two important notes to consider when interpreting the results of this document.

- For December 2013 graduates, the survey was administered only online. For May 2014 graduates, the online survey was administered online and via phone. This report contains only this information (Online data for December 2013 and May 2014 graduates and phone data for May 2014 graduates). For both December and May graduates, Career Services has conducted an investigation into the employment status of those who did not respond to the survey. The results of this investigation for are not included in this document for any group.
- Due to constraints of the delivery mediums, the online and phone surveys differ. Some questions appear only on the Online Survey. These questions are marked as such and are not displayed according to College in order to preserve the anonymity of those contained in the smaller sample.

Demographics: Response Rates by GPA, Gender, and Race/Ethnicity

	Graduates		Online Respondents		Phone Respondents		Combined Respondents		Difference
Total n	3521		388		274		662		2859

Total	73	67	71	45	137	84	57	534

Note: Percentages describe the proportion of people within the group (column) that selected the given option (row).

Question 6: How closely does your academic major at CMU relate to your current position?

- This question was asked of both Online and Phone respondents.

	CBA	CCFA	CEHS	CHP	CHSBS	CST	GC	Total
Not at all related	8 11%	10 15%	12 17%	15 33%	37 27%	10 12%	13 22%	105 20%
Slightly related	4 5%	4 6%	3 4%	3 7%	15 11%	9 11%	7 12%	45 8%
Somewhat related	7 10%	7 10%	4 6%	4 9%	16 12%	7 8%	12 21%	57 11%
Moderately related	16 22%	17 25%	15 21%	6 13%	20 15%	13 15%	11 19%	98 18%
Extremely related	38 52%	29 43%	37 52%	17 38%	48 35%	45 54%	15 26%	229 43%
Total	73	67	71	45	136	84	58	534

Note: Percentages describe the proportion of people within the group (column) that selected the given option (row).

Question 6A: What is the main reason you are not working in a field related to your major at CMU?

- This question was asked only of Online respondents.

	Count	
Never planned to work in my field	0	0%
Developed a new career interest	2	4%
Desired higher pay	2	4%
Could not find a suitable job related to my major	33	65%
Would have to relocate for a job in my field	3	6%
Desired increased opportunity for advancement	1	2%
Have not obtained required license, registration, or certification for my field	8	16%
Other	2	4%
Total	51	

Question 7: Based on your academic major at CMU, how prepared were you for your current position?

- This question was asked of both Online and Phone respondents.
- This question appeared Online only for those who indicated employment in Question 1.

	CBA		CCFA		CEHS		CHP		CHSBS		CST		GC		Total	
Not at all prepared	3	4%	1	2%	2	3%	4	9%	20	15%	1	1%	7	12%	38	7%

\$60,000 to \$69,999	3 5%	0 0%	1 2%	0 0%	1 1%	8 11%	2 4%	15 3%
Over \$70,000	2 3%	2 3%	0 0%	1 3%	2 2%	1 1%	12 24%	20 4%
Total	65	58	64	38	111	74	51	461

Note: Percentages describe the proportion of people within the group (column) that selected the given option (row).

Question 10: Where are you currently employed?

- This question was asked of both Online and Phone respondents.
- This question appeared Online only for those who indicated employment in Question 1.
- This question was open-ended. For all responses to this question, see Appendix A.

Question 11: What, if any, further education have you pursued since graduating from CMU?

- This question was asked only of Online respondents.

	Count	
Graduate degree	112	27%
Certification program	27	6%
Additional bachelor's degree / course(s)	3	1%
Associate's degree	3	1%
Job training / professional development program	58	14%
Other educational plan	13	3%
None of the above	205	49%
Total	421	

Note: Responses to this question are not mutually exclusive. Respondents selected all that applied to them. Therefore, percentages describe the proportion of responses endorsing an education option compared to the total number of responses.

Question 11A: What type(s) of degree are you currently pursuing?

- This question was asked only of Online respondents.
- This question was asked only of those who indicated they were pursuing further education in Question 11.

	Count	
Professional certificate	22	14%
Associate's degree	3	2%
Bachelor's degree	3	2%
Master's degree	91	57%
Doctoral degree	23	14%
Other	19	12%
Total	161	

Note: Responses to this question are not mutually exclusive. Respondents selected all that applied to them. Therefore, percentages describe the proportion of responses endorsing an education option compared to the total number of responses.

Question 12: Do you plan to eventually...

- This question was asked only of Online respondents.

	Count	
Obtain a graduate or professional degree	280	46%
Obtain certification through college course work	39	6%
Obtain certification through non-college work	44	7%
Obtain another bachelor's degree	12	2%
Take additional college courses	65	11%
Take professional development courses	122	20%
I have no plans to continue my education	46	8%
Total	608	

Note: Responses to this question are not mutually exclusive. Respondents selected all that applied to them. Therefore, percentages describe the proportion of responses endorsing an education option compared to the total number of responses.

Question 12B: What specific degree / certification are you currently pursuing?

- This question was asked only of Online respondents.
- This question was asked only of those who indicated they were pursuing further education in Question 12.
- This question was open-ended. For all responses to this question, see Appendix B.

Question 13: How helpful has CMU been in your...

- This question was asked only of Online respondents.

	Not at all helpful		Slightly helpful		Somewhat helpful		Moderately helpful		Extremely helpful		Total
Intellectual growth	10	3%	17	4%	38	10%	150	39%	173	45%	388
Personal growth	12	3%	20	5%	40	10%	102	26%	214	55%	388
Preparation for further education	24	6%	27	7%	67	17%	132	34%	138	36%	388
Preparation for a career	24	6%	41	11%	66	17%	134	35%	123	32%	388

Note: Percentages describe the proportion of respondents who rated helpfulness for each growth type, grouped by rating (e.g., of those 388 respondents who rated Personal Growth, 26% rated it as moderately helpful).

Question 14: How helpful has CMU been in your development of the following skills?

- This question was asked only of Online respondents.

	Not at all helpful		Slightly helpful		Somewhat helpful		Moderately helpful		Extremely helpful		Total
Verbal communication	15	4%	16	4%	44	12%	155	41%	151	40%	381
Written communication	12	3%	17	4%	48	13%	169	44%	136	36%	382
Math / statistics	38	10%	48	13%	104	28%	102	28%	74	20%	366
Information gathering	9	2%	17	4%	62	16%	142	37%	153	40%	383
Critical thinking / Quantitative reasoning	8	2%	26	7%	48	13%	127	33%	174	45%	383
Using computer technology	24	6%	43	12%	96	26%	99	27%	109	29%	371
Leadership	19	5%	34	9%	73	19%	105	28%	144	38%	375
Planning and organizing	12	3%	24	6%	59	16%	127	34%	155	41%	377
Interpersonal skills	13	3%	20	5%	54	14%	136	36%	154	41%	377

Note: Percentages describe the proportion of respondents who rated helpfulness in development for each skill, grouped by rating (e.g., of those 377 respondents who rated CMU’s helpfulness in the development of Planning and Organizing skills, 5% rated it as slightly helpful).

Question 15: How satisfied are you with the following at CMU?

- This question was asked only of Online respondents.

	Extremely dissatisfied		Somewhat dissatisfied		Neutral		Somewhat satisfied		Extremely satisfied		Total
Availability of required courses in your major	20	5%	41	11%	41	11%	155	41%	119	32%	376
Extent to which coursework prepared you for employment	17	5%	29	9%	59	18%	114	35%	106	33%	325
Extent to which coursework prepared you for graduate or professional school	29	9%	21	7%	66	21%	88	28%	112	35%	316
Opportunities to participate in internships or practicums	33	9%	29	8%	64	18%	94	27%	129	37%	349
Teaching ability of faculty	12	3%	25	7%	51	13%	172	45%	121	32%	381
Professional expertise of faculty	8	2%	17	4%	45	12%	142	37%	171	45%	383
Ability of faculty to provide academic guidance	19	5%	25	7%	53	14%	136	35%	151	39%	384
Ability of faculty to provide career guidance	32	8%	38	10%	72	19%	114	30%	121	32%	377
Ability of career services advisors to provide career guidance	38	12%	45	14%	66	21%	87	28%	80	25%	316

Note: Percentages describe the proportion of respondents who rated satisfaction for each facet, grouped by rating (e.g., of those 381 respondents who rated the Teaching Ability of Faculty, 32% were extremely satisfied).

Question 16: While attending CMU, did you participate in any of the following experiences?

- This question was asked of both Online and Phone respondents.

	CBA	CCFA	CEHS	CHP	CHSBS	CST	GC	Total
Campus employment	30 12%	40 16%	36 15%	29 12%	55 22%	57 23%	1 0%	248
Capstone course	43 25%	30 18%	15 9%	9 5%	39 23%	30 18%	4 2%	170
Clinical experience / Student teaching	2 2%	8 7%	31 27%	24 21%	28 24%	21 18%	1 1%	115
Co-curricular activities	6 19%	8 25%	5 16%	3 9%	9 28%	0 0%	1 3%	32
Fraternity or sorority	13 19%	13 19%	7 10%	10 15%	19 28%	6 9%	0 0%	68
Honors thesis	18 18%	21 21%	12 12%	5 5%	25 25%	20 20%	1 1%	102
Internship	43 20%	32 15%	31 14%	34 16%	41 19%	30 14%	4 2%	215
Intramural sports	22 14%	16 10%	19 12%	25 16%	38 24%	20 12%	21 13%	161
Off-campus employment	21 14%	16 11%	19 13%	22 15%	41 28%	26 18%	2 1%	147
Research project with a faculty member	18 10%	31 17%	29 16%	15 8%	46 25%	43 23%	1 1%	183
Student club / organization	36 14%	29 11%	37 14%	45 18%	66 26%	43 17%	1 0%	257
Student government	1 3%	6 18%	5 15%	3 9%	13 38%	5 15%	1 3%	34
Student teaching	1 25%	1 25%	1 25%	0 0%	0 0%	1 25%	0 0%	4
Study abroad	89 13%	120 18%	87 13%	43 7%	170 26%	121 18%	31 5%	661
Varsity sports	0 0%	1 25%	0 0%	0 0%	2 50%	1 25%	0 0%	4
None of the above	15 13%	8 7%	11 10%	4 3%	28 24%	15 13%	34 30%	115

Note: Because activities are not mutually exclusive, percentages describe the proportion of respondents who indicated participation in each activity within each College (e.g., of those 215 respondents participating in an internship, 15% graduated from CCFA).

Question 17: Where did you complete your internship?

- This question was asked of both Online and Phone respondents.
- This question appeared Online only for those who indicated participation in an internship in Question 16.
- This question was open-ended. For all responses to this question, see Appendix C.

Question 18: How helpful were these experiences in obtaining your current position?

- This question was asked only of Online respondents.

	Not at all helpful		Slightly helpful		Somewhat helpful		Moderately helpful		Extremely helpful		Total
Study abroad	18	26%	5	7%	9	13%	11	16%	26	38%	69
Internship	13	8%	10	6%	15	9%	34	20%	101	58%	173
Clinical work	15	26%	3	5%	3	5%	7	12%	29	51%	57

Varsity sports	9	53%	1	6%	2	12%	1	6%	4	24%	17
Intramural sports	63	50%	21	17%	21	17%	9	7%	11	9%	125
Student government	15	48%	6	19%	2	6%	3	10%	5	16%	31
Fraternity or sorority	12	17%	6	8%	12	17%	15	21%	27	38%	72
Student teaching	10	14%	5	7%	2	3%	11	15%	44	61%	72
Co-curricular activities (e.g., plays)	14	26%	6	11%	6	11%	12	23%	15	28%	53
Other student club / organization	25	11%	21	9%	35	15%	68	29%	83	36%	232

Note: Percentages describe the proportion of respondents who rated helpfulness for each activity, grouped by rating (e.g., of those 72 respondents who rated the Student Teaching, 15% rated the activity as moderately helpful)

Question 19: What is your total student loan debt?

- This question was asked only of Online respondents.

	Count	
None	71	19%
Less than \$5,000	13	4%
\$5,001 to \$10,000	13	4%
\$10,001 to \$15,000	21	6%
\$15,001 to \$20,000	21	6%
\$20,001 to \$30,000	70	19%
\$30,001 to \$40,000	53	15%
\$40,001 to \$50,000	50	14%
Over \$50,000	53	15%
Total	365	

Question 20: What is your overall attitude toward CMU?

- This question was asked of both Online and Phone respondents.

	CBA		CCFA		CEHS		CHP		CHSBS		CST		GC		Total	
Extremely negative	1	2%	0	0%	0	0%	1	3%	1	1%	1	2%	0	0%	4	1%
Somewhat negative	3	7%	1	2%	2	5%	0	0%	6	6%	1	2%	1	3%	14	4%
Neutral	4	9%	6	13%	1	2%	2	6%	6	6%	5	8%	3	8%	27	7%
Somewhat positive	11	26%	12	25%	16	36%	8	24%	28	28%	17	28%	10	27%	102	28%
Extremely positive	24	56%	29	60%	25	57%	23	68%	58	59%	37	61%	23	62%	219	60%
Total	43		48		44		34		99		61		37		366	

Note: Percentages describe the proportion of people within the group (column) that selected the given option (row).

Question 21: What is your impression of the educational quality at CMU...

- This question was asked only of Online respondents.

	Extremely negative		Somewhat negative		Neutral		Somewhat positive		Extremely positive		Total
In your major department	8	2%	28	7%	19	5%	127	33%	200	52%	382
Across all departments	10	3%	34	9%	74	19%	179	46%	88	23%	385

Note: Percentages describe the proportion of respondents who rated the quality for each department cluster, grouped by rating (e.g., of those 385 respondents who rated quality Across All Departments, 23% rated their impression as extremely positive).

Question 22: If you could start over again, would you still choose to attend CMU?

- This question was asked of both Online and Phone respondents.

	CBA	CCFA	CEHS	CHP	CHSBS	CST	GC	Total
Definitely no	3 7%	0 0%	2 5%	1 3%	5 5%	2 3%	1 3%	14 4%

Responses to Question 23: “What Reasonable Measures can be taken to improve the Student Experience at CMU?”

Academic advisors were not that helpful in determining majors or order of classes or career guidance. Actually caring about each student and trying to give them guidance to do what is best for their future and giving them proper guidance to graduate on time. Because of CMU's poor guidance it took me 5 years to graduate which added to my debt.

Although I felt that most of my professors were knowledgeable in the topics they were teaching, they weren't always very passionate about the subject or helpful to students. However, I think CMU does a great job of creating opportunities and things for students to get involved in!

Anything I could suggest would be dismissed as unreasonable and I prefer not to waste my time with suggestions that will never be taken seriously.

As a transfer student, I didn't like the fact that I only had ONE option for a major in order to transfer most of my credits. If I had majored in something like culinary services, then came to CMU to major in Business, that would make sense. But that wasn't the case. I transferred from another school, majoring in Business, to CMU, still majoring in business, but again, was only given one option for a specific program.

As an adult education student, I have been in my industry for years. I really had no need for group projects, nor did it seem anyone else in the adult education classes. I find them maddening when people cannot commit or decide to let others in their group do the work for the grade. It is also awkward to accommodate/facilitate group projects in the adult learning environment where most of the students are working adults.

As an education major, I spent far too much time on learning content that I would never teach to grade school students. My education classes were sadly lacking. I learned almost nothing about working with students, which content is appropriate for different ages, classroom management, educational laws, working with curriculum maps, or creating plans to teach a unit.

Availability of online courses.

Better advisors. My pre-med advisor gave me terrible advice on multiple occasions. Other times this person did not know some of the basics. I believe this may have changed, or I hope it has since there's a med school at CMU now. I liked my advisor, but did not benefit from them at all. I just have to be honest. Also, I believe if I followed their advice I may not have been accepted at all. I love CMU though, so I look beyond that experience and understand that it reflects on the person and not CMU as a whole. I had this person as a professor too and they were great in those regards. I just don't think they quite knew what they were doing as a pre-med advisor.

Better career Focused classes More help with loan debt.....

Better professors in the math department

Bring back the Promise. Soooo expensive now.

Career services needs major work. They told me to look things up and didn't provide me with contacts. I was completely on my own. They didn't help me with grad school at all. Also, don't have grad students teaching the intro stats classes. I still don't understand it at all and now am struggling in grad school with it.

Catering to the traditional student is common place, how about working with and for non-traditional students as much. There are tons of scholarships for traditional students, yet only a few for non-traditional.

Chosen a different major, have a plan as to what I want to do with my life, study abroad in an intensive program

Class sizes need to be increased to allow students to enroll in the classes which are required for their major in a timely manor.

Classes need to concentrate on teaching towards the MTTC tests

CMU needs to allow professors and programs more financial freedom to offer opportunities to student such as bringing in outside speakers, long distance learning opportunities, more networking (for more than just the business majors). It is a great university with some brilliant professors and equally brilliant students but these resources aren't always used to the fullest extent because they are required to jump through so many pointless ""hoops"", such as requiring classes that are in no way useful to the student's desired field.

CMU should try to set up a program that helps graduates find work. Even within CMU itself, if you can get a degree from CMU aren't you worthy of being employed there? I am disappointed that I have applied for jobs at CMU and have never even been called even for jobs that aren't directly related to my degree even entry level positions. It's disappointing in my opinion it seems as if CMU wants your money and they don't mind if you get a job after graduation or not.

Continue to have great passionate professors. When you have them, make sure you don't lose them.

Always keep the students interests in mind, not just money and the bottom line.

Continue to hire faculty that genuinely cares about the wellbeing of the students attending the university. I am extremely grateful for all of the guidance I received from my professors throughout my time at CMU.

Continued support for all athletic offerings at University

Decrease cost of tuition and fees (example offer to opt out of gym membership)

Describe the importance of working on University Program classes before signing a major.

Development of a 4-year academic plan for all incoming students so they are on the right track academically.

Education classes didn't really provide idealistic expectations of teaching.

Employ professors who have more teaching experience as opposed to relying on experts in certain fields.

Encourage more involvement in student organizations. It is something I truly regret not participating in more.

Encourage students to follow their dreams, no matter how crazy they may seem. I was advised to drop out of the education program and become a counselor. Now I am an amazing teacher that the entire staff appreciates and the students say that I'm the best teacher ever. Support your students!

Encourage students to job shadow and get involved early! Really promote Leadership Safari...that really helped me freshman year! Overall, I absolutely LOVED CMU! I have no regrets! I am still here for my graduate studies, and I'm proud to be a Chippewa lifer! :)

Engineering department needs a total overhaul on professors minus a select few that actually teach and understand their students. Those professors student reviews speak for themselves.

Ensure that all students have the ability to feel safe in their belief systems. I felt constantly discriminated against in my religious beliefs as a Catholic on campus. I felt that I had no right to respectfully express my beliefs, or even to have them, at Central.

Every advisor I ever met with had something different to say for advice than the one I spoke to previously. I thought college would direct the student to exceed and progress once the degree was obtained. If anything, CMU has given me \$100,000 of debt and absolutely no help with finding a career path or direction to take in order to succeed in life. I am extremely unhappy with the outcome of my experience at central.

Everything was perfect

Expand the Honors program, increase diversity on campus (racial, ethnic, socioeconomic).

Faculty screening. In the Marketing department I had some amazing professors, (Mike Garver, Ken Cherry, Zac Williams, Richard Divine) but I also had professors throughout my general education that

really gave me a negative perception of the quality of educators at the University. Professors like Todd Levitt, and John Meixner give the university a bad name and make it more difficult to remember the professors that are passionate about their job.

Find a better way to judge faculty.

Find ways to better prepare students for the transition from student to career...

Fire director of social work program. Invest more into alternative breaks program.

Fire your dipshit management team who have no fucking clue what they're doing while wasting our tuition money on stupid, diminished returns (like a house maid for the President). Then you guys have the audacity to contact me and ask for alumnus donations. Listen shit heads, I purchased a \$60k degree from you, if you can't manage your finances to figure out that perhaps all the money you dump into your athletic department might fare better if reinvested into your educational infrastructure, people wouldn't think your academic rigor is a fucking joke. Also, stop forcing your students into two years of worthless pre-major courses without handing out an associate's degree. Those classes are, for the most part, worthless and basically reiterate what we've known since high school. But then again since your acceptance criteria for incoming students is so dismally low, I'm not surprised you assholes keep pushing it (all the while complaining about your budget that magically keeps coming up short). Oh, and start paying your on campus employees more. You want to gloat about the experience CMU provides and the ""opportunity"", then put your money where your mouth is and don't insult our work, either casual or professional, with a wage below \$9/hr.

First, stop increasing the cost of tuition. Tuition costs and interest rates are already incredibly high. I was hardly financially stable while attending college and while I was privileged to have a supportive, financially stable family, I can't help but feel for the individuals who want to but can't attend college due to financial problems. Education is the foundation of having a successful society and economy so increasing the cost of tuition 2+% every year, while increasing the President's salary and reducing or capping student employee hours so CMU doesn't have to provide benefits is just ridiculous and oppressive. Second, I do not believe the students at CMU were provided with adequate resources to better their education. We have a great library at CMU! It is large enough to accommodate large amounts of students, has great seating arrangements, and nice computers and printers. But the hours of the library were just unacceptable. Most students work and have class during the week so keeping the hours extended until midnight or later was great but the weekend hours were frustrating. Closing the library on Saturday at 6pm and not opening until noon on Sunday is the real problem. Weekends are when I studied the most because I only worked during the week and I'm not a person who goes out to drink a lot so I prefer to utilize my time studying then. Every single Sunday for the last two years I was at CMU, there was a line outside the library waiting for it to open and there were countless students complaining about having to leave at 6 PM on Saturday's. Michigan State University's library is open 24 hours most days of the week and has somewhat better hours on the weekends so I am not sure why CMU doesn't provide this. I know that if there's an issue like this the students should say something but no one that I ever spoke with, including my self, knew who the right person was to contact that could actually produce change. Self-reflection on what's most important to the students is needed and not just what grows your bottom line. Students are people, not just numbers on a stat report so they should be treated as such. Utilize the insane amount of funds you receive to provide a better educational environment, not just making the campus look prettier! Third, tenure with teachers should absolutely be eliminated. I understand the benefits of tenure as it provides academic freedom for teachers who are dedicated to their job and studies. But the reality is, the majority of these teachers, once they reach tenure, give up or don't care anymore. There are countless teachers I knew who had tenure and were so incapable of teaching that it was almost as if I was better off not going to class and just reading the books and completing the assignments my self. We students do not put ourselves in thousands of dollars of debt that we will be paying off for years to just teach ourselves the material because the teacher is incapable or simply doesn't care. Education is paramount! Eliminating tenure may not be the most feasible option for the university but something needs to be done. Even options such as

reevaluating tenure professors or requiring them to pass an examination of their teaching abilities could reduce the number of poor teachers. The professor evaluation cards at the end of the semester are not adequate enough as most students are lazy and either don't complete or just fill them out to get them done so they can leave. There needs to be better oversight of professors teaching abilities and teaching effectiveness as we pay way too much money to be provided with poor professors. Another issue I find is the ability to drop and add classes after they have already started. The withdrawal policy states that a refund is only available if the course has not met for a second time. If the course meets twice, students are only allowed to withdraw from the course at no or limited refund. The problem stems from the administrations inability

fix the student dorm problems. get better professors for some classes. graduate students should not be teaching courses, nor should doctoral students, unless they have good professional skills.

Focus more on professional development. For example, I am at MSU now and I cant tell you how many career fairs and companies they had on campus. I recognize that this is not possible everywhere, but learn about these events and let students know about them. CMU is not as marketable as other places, why go to CMU when they can go to East Lansing and talk to twice the amount of students? Embrace this, play off of other school events and help professors and departments to communicate these events around the state. The business college should use more case studies!!

Focus on coursework but also set aside time to have fun and get involved in as many things as you can Focus on growing already held majors and minors rather than putting so much focus on trying to create new ones. (Read: The Med School. The technical theatre department is in desperate need of some love.)

Focus on life skills that people use everyday and less on random practices or theories. No one was able to help me choose what I want to do after college and it shows still as I don't have a career, but a job.

Focus on students not in the ""hot spot"" areas like Larzelere and Barnes.

For students who choose to major in education, I would suggest that you implement a program that requires one full year of student teaching as opposed to one semester. I learned almost double the amount of teaching skills while student teaching that I learned in my edu classes.

For the education department- please STOP pushing so strongly for the online portfolio it was held up so highly and yet was completely useless in the real world and job market. Tell us how to write grants, deal with stress, something! Loved the program but that is a huge issue that truly needs to be dealt with. CMU- more multicultural events!

Free transportation to various businesses to and from campus (i.e. Meijer, Walmart, Target, Downtown Mount Pleasant). There were many people I knew that never knew about the downtown area with its wonderful local businesses and restaurants.

From the perspective of the art classes that were required for my major, they were quite backward. I believe technology should be used much, much more than it was, and many of the outdated classes should be phased out, or made into electives. There's no need to learn how to knit if you want to teach art. It could definitely be useful, but it's no requirement. I could name several classes like that. Computer related classes should be, on the other hand, most definitely required. And they're not.

Get better professors; most are boring, not interested in the topic they are teaching, do not care about students personal success, etc.

Get rid of University Programs (students only take them to get the credits and in reality learn very little, Have more career guidance, Have more help when it comes to picking further education institutions.

Give correct information. IE what one person says for classes is not what another says. It was a huge problem. Its taking classes that we do not need.

Greater consistency in quality of all department members. I think all instructors should be audited and monitored by the department. I think the experience of a course can vary too greatly between different instructors. A lot of the reason I gave such positive feedback was the result of just a few individuals. Dr. Robert Miller in BIS was probably the most motivational and influential educator I could have asked for. The whole department gets high praise because of him, he made my major worth while. I

think the business college as a whole prepared me well for my career. The public speaking, group leadership, and social skills I gained at CMU have been priceless. Having graduated, I have more school spirit now than ever, and I miss CMU.

Have better communication between faculty.

Have less University program courses. The majority were a waste of time and money. I do not feel they made my learning any more diversified.

Have more courses regarding career choice, preparing for life after college, more career discussion.

Have students go out into the working field more... Location they may pick. I had to do hours at places in mt. Pleasant but were not like places back at home where I moved after graduation & now I'm not technically using my degree for my current job. Can be disappointing, but still glad I got my degree-- just unsure if I would have gone this route.

Having all faculty members be as interested and invested in their students as the EHS faculty.

Help students out more with internships. I know people where the class set them up with internships. At CMU, students run into to issues of not graduating because they can not land an internship.

Hire another biochemistry instructor other than Sharma. His class was the only one in which I did poorly enough that it began to drag my GPA down.

Hire people that know what they are doing, to do the jobs that need to be done, correctly. Mostly upper administration is the problem. Course selection is also lacking.

Hire teachers students can understand. We pay to learn. We do not pay to have someone tell us that we need to read a book or power points. I understand supplemental material is an important part of learning but when a professor can not fluently speak the language to communicate with the students, it is extremely frustrating. There are so many things I could rattle off that I felt was wrong with CMU that I do not have the time to explain. This school was a nightmare. Registering for required classes that I could never get into but hearing students who did not need the classes to graduate got in was icing on the cake. Also, the advisors should not be aloud to advise they are terribly misleading.

Hiring the right faculty

Holding professors more accountable to their teaching abilities instead of making research weigh as much as it does. Though it's great that CMU hires prestigious faculty members, it is much more important to myself and many other students that the instructor can first and foremost be proven to be an effective educator.

I am happy I went to CMU, and for one of the top programs in the states, but for a school that prides itself on helping its students after graduating, to get a job, I have not received that kind of help. My advisor Tanya Domina could only advise me of an opening at meijer, when I asked for help on how and where to look for jobs. Since graduating, cmu has been highly unhelpful. Either do what you say you're going to do, or change your motto.

I attended the Global Campus program. The student experience in this program is excellent.

I came to CMU as a Macro graduate from Mid Michigan. It was quite difficult to find a counselor and felt I was on my own to figure out CMU and my classes.

I cannot think of any. My experience at CMU was one of the most rewarding in my life.

I can't think of any

I enjoyed every minute and miss it dearly. Keep doing what you're doing!

I feel like I was not prepared for how slim the job market is for my major (health fitness/cardiac rehab).

I finally met with a career coach from Career Services last week as an alumnus. I wish that I had taken advantage of this resource during my final semester as an undergraduate. Requiring students to undergo some sort of career advising process (major advising, career coach, etc.) should be part of the requirements for graduation and might help to ensure that students are better prepared for finding employment following graduation. Perhaps even instituting a class focused on resumes, cover letters, interviewing, job fairs, etc. as part of the University Program requirements would be helpful. I took six classes my final semester, worked two jobs on campus equaling 15-20 hours per week, and was

involved in the marching band, volunteer center, Honors program, group fitness classes, and various other on-campus events. I simply couldn't devote any time to career preparation. I probably would have if the university had emphasized it's importance during my final year. Overall, I really enjoyed my time at CMU. The experiences I had and the friends I made overshadow the difficulties I'm currently having finding employment.

I suppose I don't have a plan or all the answers -- but I feel as though the students are deceived while CMU tried to paint itself as a whole as a place of equality and ""home"", all the while remaining just as political and selfish as the other state universities. Just stop lying to students and be outright about where money goes and not hushing up news or events that may be damning to professors or leading faculty.

I think alot has already been done to improve CMU's overall experience. You have implemented a smoke free campus, are in the process of building a new building, are improving the old buildings with renovations, and make sure that the campus outside is well maintained. There are several activities students can engage in and many places on campus that make you feel comfortable and at home. Just keep taking the opportunity to listen to your former as well as present students on their concerns and CMU will always be a college you want to make your home.

I think that students should be advised to take courses/obtain degrees that are relevant to the job market today.

I think that students, overall, have a very positive experience at CMU. There is so much for them to be able to do, see, and participate in. If there is a way to increase funding for student organizations, that would be great. Another thing would be to find a way to increase student involvement of graduate students. Also, increasing financial aid for students would draw students to CMU, as well as retain students.

I think that teachers should help guide the students with actual experiences in the job field rather than strictly relying on book work.

I think the online classes are way over the top. They require too much, especially when that is not required in the classroom setting. I understand the logic, however, it was too much. As well, I attempted to join a sorority, even as an off-campus student. I didn't really get any good response/feedback so I didn't feel wanted by those groups.

I think there should be more help to get an internship. I ended asking my cousin for an internship at a place that i wasn't really into. I think there should be more help getting jobs. the career service website is great but maybe some supervisors can help you get into a job.

I was an online student who hoped to be able to take courses through my local center; however, none in my course of study were available. This info was not available until after I started.

I was incredibly displeased with my experience during audits. While some of the employees seemed genuinely interested in my education, there was a gentleman who was rude and seemed to take pleasure in telling me that I needed to take more classes and I was nowhere near I needed to be. It was the most distressing experience during my time at CMU and definitely a story I have told to incoming students. Avoid this person at all costs.

I was referred to a major that was not suited to me and I didnt like.

I wish staff evaluations were more meaningful.

Improve elementary cohort classes. Some are very good. Others were a complete waste. Don't make students buy books when they are never used. They shouldn't be labeled requires under course list.

Increase in introduction of new innovations in students' respective fields...less history, more future.

It all went smoothly

It took me 40 years to get my degree - starting as a freshman at Mt. Pleasant in 1974 and finally graduating in May of this year. There were changes in my programs; the method of delivery and my advisors changed multiple times. I don't think any of those things could be prevented. Perhaps regular contact with me by CMU would have precipitated my finishing sooner as well as financial aid opportunities for non-traditional students (which are not so non-traditional anymore!)

It would be nice to not require pointless UPs. The only negative experiences I have with CMU relate back to the UPs that were not relevant to me/what I was interested in doing post CMU. Everything else was a phenomenal experience for me.

It would be very helpful for all the new students (freshmen or transfer) to complete a 4/5 year academic plan like the honors program uses. I can't even remember how many other students I walked through a plan after showing them my own. Having that plan laid out from the beginning is very beneficial in planning your time at CMU and ensuring that you are able to graduate when you want to.

Job help I am having a difficult time

Just ensure that you are providing resources for all students on campus. Every student at CMU deserves a safe spot on campus where they can feel comfortable going.

Keep an eye on tenured professors because in my experience every tenured professor seemed to care less and be less engaged than assistant professors who still had a professional incentive, apart from compensation, to be outstanding.

Keep encouraging students to take advantage of their resources. Some of us really need a push.

Keep the departments more in touch with students. The history department (my minor) was always in contact via email and always offering opportunities. However my major department (the political science department) was silent and a lot of important issues were left to the last minute because of bad communication.

keep the great staff!

Keep the tuition/cost per credit hour consistent/lower.

Listen to student complaints about certain professors. I had a couple that probably should not have been teaching.

Longer library hours.

Lower the cost of attendance, do not require unrelated classes for majors (ie Introduction to Empirical Methods of Political Research for Political Science majors)

lower tuition! REAL internships, not slave labor!

Lower tuition. My total student debt is 30% higher than my gross salary

Make accounting professors more approachable and less pompous older white males who are difficult to connect with. I would suggest a required seminar on what is considered respectful treatment towards students. I am aware this will not change much since most of the members of this department are tenured and thus comfortable in their cushy jobs but maybe it will ring a chord with at least one member.

Make courses available with a wider selection of times & days, implement more safety measures, i.e: emergency phones, lighting, etc..

Make events and opportunities more available and marketed more.

Make sure required course load is reasonable, relevant, and useful

Make sure student teachers get to teach in all of their certified areas. For example, I had two student teaching placements but both were in history classes. I have no experience actually teaching high school biology and that is making it hard to find a teaching job.

Making money not such an issue. Also having more options for psychology clubs.

Making the SAC parking lot into a first come, first serve parking lot instead of a commuter lot. More advertisement of scholarships offered, especially those that apply to grades other than freshman.

More ""real world"" experience availability. The classroom can only give you so much knowledge/insight into life after school.

More academic rigor across all departments. My department (child development) was very good at instructing students in the current best practices of the profession. However, for the most part, the coursework was not academically rigorous in a way that would make me feel very prepared for graduate school.

More available classes in offered majors online and face to face classes.

More class experiences that relate to work life. I have to do a lot with ordering, inventory, par sheets, and managing a budget. I would have liked to learn more about that in school so I would be better prepared for a real work life experience

More class offerings in each degree. Less paper writing and more classroom work, not just lectures. This does not prepare for the real working environment. Reading and writing about what you read is basically teaching yourself.

More classes available

More diversity on campus. More undergraduate research and internship opportunities.

More group meeting areas within classroom buildings and other campus facilities.

More guidance in the real world jobs

More help getting a job right out of graduated from Central Michigan, more willing to help the athletes and people who already work for CMU rather than some of the ones that didn't have the privilege of living on campus at CMU and had to commute.

More help getting jobs after college. Just more help in general. Especially to transfer students, who come in blind and aren't offered any guidance unless they actively track it down, which isn't easy either.

More help getting students careers after graduation

More help with finding other financial aid options besides federal loans.

More helpful advisors in both majors and general advisors. More help with finding jobs after graduating

More honors courses offered. Revising the honors capstone project. Requiring four-year plans for all students, not just honors students. Requiring an academic audit BEFORE the student is an upperclassmen.

More job shadowing/professional events focusing on "day in the life" instead of company overviews/career paths

More of a focus on current Leadership programs offered on campus.

More opportunities for teaching majors to spend time in classrooms.

More opportunities to practice skills taught not just to peers but to those in which you will be using these skills with.

More preparedness for higher education

More relevant classwork. For business students we have to do so much base work and the "core" classes before getting into our major. A lot of the classes we take for the first 3 years before getting to major specific classes are irrelevant, full of busy work, and we just forget everything afterwards because it is unnecessary to our actual major. It would be good to have more practical things in class, such as doing activities you may actually do during a job instead of just taking notes straight from the text book for an hour. I did have several awesome professors whose classes I loved and learned a lot from. But for every amazing professor I had there was always an equally bad professor. I was in the honors program and always felt the honors classes were very good. I think every class should be held to that standard. Why are only a select amount of classes challenged to be innovative and interesting? I think all the classes at CMU should try to be like that. There is no point in my mind for taking/paying for a class when the teacher is just reading you the text book and then testing you on what you memorized. This does not help us grow or remember the information long term.

More scholarship programs. Less group work and more independent work. In the working force you rely more on yourself. CMU pushes group work but group work is more hindering based on lazy students. It's better to learn to rely on yourself.

More variability of classes so students have more options of when they take a classes.

More variety of English classes

More with financial Aid. Help finding grants and scholarship.

Most in-depth theatre program with better career and personal guidance and professor more interested in assisting students continue with furthering their futures than the politics of the department. Better class selection. Better art courses with better trained professors.

Most of my positive and beneficial experiences at CMU occurred because I was a part of the Honors Program, specifically as a Centralis Scholar. My partner also attended CMU and I was able to see the extreme differences in opportunities available to Honors students versus those available to non-Honors students. I definitely got a significantly better, more well-rounded, more diverse, and more influential education. If the university as a whole could have a model like that of the Honors Program, there would be even more successful students at CMU. The Honors Program was with me from my senior year in high school to now and they will continue to be with me throughout my life - encouraging me, offering opportunities, etc.

My cohorts seemed relatively useless and I feel like I did not really learn that much. Also I was amazed at how unprofessional some staff members were.

My experience as a student at CMU was an overall good experience. If I had to make a suggestion, I would ask that the career services department would be a little more invested in helping the students that come to them. From my personal experience, it was of some aid, but not enough to really prepare me for the intensity of job hunting. Most of what I have learned about searching for a job has been from trial and error. And as a person with a degree who owes a lot of money, I think that it wouldn't be too much to ask for a little more of a solid footing when walking out of CMU and into the job market.

My least favourite class was French, dislike the department. Wasn't very helpfu. Something needs to change. Maybe instead of someone who can actually speak French and English should teach the classes.

Need teachers in BCA program to have real world experience before teaching.

None that I can think of because I had an overall extremely positive experience

Not having the SAC parking lot a commuter lot. Or at least let student have the chance to buy a ""SAC"" parking lot pass at a reduced price. It is important to be able to be personally fit while getting an education.

Not raising tuition every year would probably help.

Nothing really. I wish I could change the caliber of students around me. At times I felt they held classes back and helped weaken my work ethic.

Offer degree programs at your off campus locations that employers recognize.

Offer more difficult courses as a face to face format. ex. Psy 385

Offer more sections of higher level classes.

On campus employment with flexible hours, more hands on experience in the education program, more support for club sports such as quidditch.

prepare students for employment by giving them experience in the field. Do not force them to live on campus to squeeze more money out of them. Quit raising tuition.

Proper faculty evaluations and dismissals. A majority of faculty in the classes I participated in never cared about my success or growth at CMU, in fact they hindered it with ignorant and self-righteous motivations.

Provide adequately prepared staff for the coursework necessary. Keep degrees up to date with the field.

Provide financial assistance to transfer students beyond the first two terms.

Provide more help with the UP class selection and making sure students are on the right track with them.

Provide more information to students about financial/assistance services on campus such as student employment, scholarships, medical assistance, free counseling, etc. I worked two jobs through college but many times i wasn't sure how I was going to pay for my next semester. It took a lot of time on my part to find the assistance I needed whether financially, medically or emotionally. However many students are in similar situations and don't always come out fighting. Providing this information in a more centralized place or something of that nature would remove the stress associated with students

trying to search for it. Instead that energy can be redirected to getting whatever help they need in a more timely manner so that learning can become the primary task at hand as it should be.

Quality of some professors

Quit nickle and diming your students.

Really analyze teachers' abilities and not keep around teachers that rarely pass students because they are members of the board. I had one teacher ruin my straight A's with a C.

Really none, CMU is great!

Rearranging the billing process/statements so that Veterans who attend CMU Global Campus full time can utilize their Post 9/11 GI bill. This has not happened to me personally, but my husband. I recommended CMU to him because I really like the programs and faculty, I LOVED my experience with CMU. He is taking what CMU considers a full course load but because of the way CMU bills for these hours (split into Fall A and Fall B) the VA is only paying him as if he is a part-time student. He has been in contact with several departments (including the Veterans Affairs Liaison at CMU and the VA). The VA has told him that if CMU would resubmit his bill to them specifically stating that he is a full time student he would receive his full benefits, but at it is he is losing some of his GI benefits by attending CMU simply because they don bill in a way that indicates students are full time, even when their credit hours are split over Fall semester A and fall semester B.

Re-enforcement of High Moral content in development of any chosen vocation

Reform the education department. Require UNIT plans for an entire semester of teaching. Be extremely selective of the professors you hire. I had a professor who word for word said ""im suppose to tell you how to get your teaching certificate, but I feel like you guys don't need to learn that right now. Nor the laws. I'm retiring soon so I can do whatever I want""... This was during my last cohort. I still don't have my certificate due to this, because I didn't know what qualifications were needed.

Provide an advisor for every freshman and to require a meeting once a year. Have the education department reiterate testing that has to be done outside of CMU! I had to find out through other students about this. And I had to be in school for an extra year because of this. Require a full year of student teaching like state does. I did a study for my final. The students in the education department rated CMU's education program with a B-, and overall feeling of a C+ of readiness to teach.

Regarding the teaching program, having more opportunities to be involved in the classroom, as well as how to deal/communicate with parents.

Replace Dr. Rattan Open up Honors program to entire student body. Build multi-level parking garage over student parking lot. Plant all of the trees. Maybe remove the sculpture that looks like a ""femur"" by Brooks. Decrease overall tuition costs. Increase teacher compensation. Divest from oil and other fossil fuels. Fire Georgie Ross. Then rehire. Then fire again just to see the look on his face.

Send recruiters to the inner high schools in Michigan to help prepare students for college and offer insight of the programs offered.

SERIOUSLY READ THIS I am so upset with the fact that I stayed at CMU. I was so excited to come here at first. But it was a huge failure. Teachers, except for 2-3 were very very arrogant and didn't teach. counselors didn't really care, they just saw me as an obstacle. Sporting events are a joke. nobody goes. cmu should not be division 1. People only care about drinking, doing drugs, etc. And that behavior was encouraged in the CMU environment. People, not just students, at central always encouraged me to get hammered. It was extremely depressing. I feel like such an idiot because I kept trying to make things work here. I should have transferred to Michigan State or Oakland. But you guys don't care. you're gonna get my money and thats all that matters right? don't spend it all in one place. CMU was the biggest mistake I have made.

Set higher academic standards. The bar is set way too low in almost all of your courses. This does not create an intellectually stimulating environment. The overall academic environment is one of apathy from both the faculty and the students. Too much of the student body doesn't care about learning anything, they just want to receive a degree with minimal effort and maximum partying.

Simply put, it's all about the money. Cost of living and cost per credit hour are overpriced. If these areas can be reduced the education and experiences provided at Central Michigan University will be worthwhile.

Since the ultimate goal of most students is employment, a more intense career training would improve student experience.

social events for transfer students

Some professors need to be reevaluated. For instance, although sociology counted as a pre req, I think it was a waste of money and I'm upset that all I learned were personal stories about the professors life. Cough cough Joseph debolt.

Some sort of educational audit or measure that asses the effectiveness of certain professors. I feel like the student opinion surveys were a big joke.

Speech needs to be protected for every student. University needs to change the illegal manner it attempts to discipline students through the code of conduct. Professors need to be able to handle differing opinions. You need to stop teaching Marxist bullshit in political science classes. Administration needs to not target students or RSOs they don't agree with.

Stop raising tuition to pay for the president's salary, for one.

Support all majors and departments, not just those that are the administration's favorites. Cut the bullshit leadership and honors programs and provide greater assistance to CMUs sizable first generation college student population.

Take SOSs into consideration when many students state they are not learning in a class and that a professor is not teaching material well. Review class exam scores periodically (before a curve is applied) to observe each professor's ability to teach effectively.

Teach kids how to start there 401k, pick Heath benefits, hsa plans. More on your own real world financial applications

The career service center is extremely disappointing. Instructors need to be trained to help students who are entering the professional world versus simply training students on how to cram for tests and not learning viable ways to use information.

The environment of the school as a whole is not as serious and academic as some of the other large universities. Also, there needs to be more focus on preparation for graduate school such as teaching about filling out apps, writing personal statements, etc.

The professors should be observed very often to ensure they are actually teaching the students and actually have the knowledge to help the students further their education. There are some professors that lack the knowledge to teach the classes that they teach. I had a wonderful experience with CMU until my last semester and I now have a bitter taste in my mouth from one professor who made every student in my class lives a living hell. She should not be allowed to continue to teach and treat students in the fashion that she does. When talking to other professors in my department, it seemed like they were all scared of her and nothing was able to happen to change the situation even though they agreed with the students that this was not right. Shame on you CMU for allowing this to continue to happen.

The quality of a CMU education lies with its faculty. Put those people on pedestals.

The UP classes could use improvement in relevance.

the upgrades to the facilities is great, but more upgrades would greatly improve student experience. More CMU Pride around town. Get the enter town involved and supporting CMU, especially on game days.

There should be another ""main stage"" type of event for the spring semester. This would not only help refresh the different clubs and things to do in the current students minds but also help any new students who have started in the spring.

This is specific to my department of communication disorders but I just feel as though I could have learned so much more in my undergraduate coursework to prepare me for graduate level classes.

To get information and attain knowledge from the professors, because they are very knowledgeable and also very helpful in improving students experience at CMU.

Training faculty and academic advisors better. They should be able to give you advice and guidance about careers and directions in which students can go within their field of study.

try to convince students to stay in the dorms so they can be more involved. Maybe have an exploration course that goes through general fields of study for people to learn what they want to do. Gear certain activities to people living off campus

Tutorial pertaining to first experience in taking online courses.

unless you drink, have sex with anyone, get arrested, put on probation etc you don't fit in here. I never should have stayed.

UP programs, I came to CMU knowing the major I wanted to study, the UPs only lowered my GPA and wasted my money. I realize they are suppose to make you more well rounded but I don't feel they had a beneficial effect for me. Maybe for students who have a major decided earlier can take less UP classes so they can have another minor.

Upgrade technology. I attended the global campus in the metro Detroit area, and the wifi and computer technology was really lacking.

Weed out the unnecessary classes that do not relate to your major.

Within the education department, I would like to see more classes offered for the general education students to learn about special education. Now that I'm working in a school, I've found I have a lot to learn that I wish I would've been prepared for in college. I also think having more of a variety of activities on the weekends (at night) to deter underage drinking. Freshman are easily swayed into going out and I think if there was a fun, enticing alternative they wouldn't be so drawn to the parties.

Overall, I feel CMU is a great university with a few areas that could use improvement. Oh, one area is parking. Students would be much happier if they weren't receiving parking tickets because they had to park in a meter or choose to be late to class. Build a parking ramp, it would use the space effectively while keeping the students and staff happy.

You need to focus more attention to transfer students. It's a hard transition into a university and they often times are left to fend for themselves.

Criterion 4 Evidence
FTIAC Persistence Graduation 2014

**Persistence & Graduation Rates

 - e. Graduation Rates of First-time Students by Gender
 - f. Graduation Rates of First-time Students by Ethnicity

Introduction

The Office of Institutional Research conducts an on-going study of persistence and graduation rates of on-campus undergraduate students at Central Michigan University. This report includes a summary of the results along with tables that present the persistence and graduation rates for first-time freshmen students. The tables present data on overall persistence and graduation rates, as well as rates broken down by students' gender and ethnicity.

For this study, a student is defined as having persisted into a given semester if he or she attended CMU during that semester or had previously graduated from CMU with a baccalaureate degree. Non-persisters include transfers (students who have transferred to other colleges/universities), stopouts (those who have dropped out temporarily and who will return to college in the future), and dropouts (those who no longer will continue with their education).

Summary

This report contains information about the persistence and graduation rates of Central Michigan University first-time freshmen entering CMU in the fall semesters between 1995 and 2014.

The major findings over the most recent three cohort years, on average, are:

- About 76.2% of first-time freshmen entering CMU in the fall semester began their second year at CMU.
- Female students have higher second-year persistence rates (77.6%) on average than Male students (74.4%).
- Second-year persistence rates by ethnicity, in ascending order are:
 - American Indian/Alaskan Native Students (66.4%)
 - Hispanic (67.6%)
 - Asian/Pacific Islander Students (71.4%)
 - Black, non-Hispanic (71.6%)
 - Unknown (73.9%)
 - White, non-Hispanic (77.4%)
- Of a typical first-time freshman class, 59.0% graduate from CMU with a bachelor's degree within seven years. Also, 21.7% graduate in four years or less, 49.4% graduate in five years or less, and 57.4% graduate in six years or less.
- Female students graduate within seven years at a higher rate (61.6%) on average than Male students (55.3%).
- Seven-year graduation rates by ethnicity, in ascending order are:
 - American Indian/Alaskan Native Students (32.5%)
 - Black, non-Hispanic (41.8%)
 - Asian/Pacific Islander Students (52.9%)
 - Hispanic (53.9%)
 - Unknown (57.0%)
 - White, non-Hispanic (60.7%)

**Table 1A
First-Time Freshman Persistence and Graduation Rates
By Entry Year**

All Students						Percent Persisting into Fall of Year						Percent Graduated in							
Fall Entrance	Cohort Size	Mean H.S. GPA	Mean ACT	Mean 1st Term GPA	Term Two Retention	2	3	4	5	6	7	3.5 Yrs or Less	4 Yrs or Less	4.5 Yrs or Less	5 Yrs or Less	5.5 Yrs or Less	6 Yrs or Less	6.5 Yrs or Less	7 Yrs or Less

Culture and Diversity Credit Using Applied Coursework

I. INTRODUCTION

HISTORICAL BACKGROUND

The General Education Program at Central Michigan University was first implemented in the late 1970s. The program contains a common set of academic skills, referred to as competencies, as well as a broad knowledge base, referred to as the University Program. While the majority of courses in the General Education Program are continuous with the rest of the university curriculum and consistent with a distribution model, one of the competencies employs a common course model.

The General Education Program has undergone some revisions since its inception in 1977. For instance, a Writing Across the University Program policy was implemented in 1987 and modified in 2014. A subgroup on racism and diversity in the United States was added to the University Program in 1992 and a subgroup titled Integrative and Multi-Disciplinary was deleted from the University Program in 2014. Finally, both writing intensive and quantitative reasoning requirements were added to the competencies in 2014.

The General Education Subcommittee of the Undergraduate Curriculum Committee and the General Education Council were initially tasked with overseeing the operation, evaluation, and modification of the General Education Program. With the 2010 revision of the Central Michigan University Curricular Authority Document, the two committees were combined into an advisory and policy-making body, the General Education Committee. The General Education Committee develops, reviews, and evaluates courses and policies pertaining to the operation of the General Education Program. As the primary advisory body for the Director of General Education, the committee is tasked with assessing the overall quality and impact of general education in undergraduate education.

The General Education Program serves both main campus and Global Campus students. The current General Education Program consists of over 250 courses taught across six colleges and generates in excess of 200,000 student credit hours per year.

CURRENT STRUCTURE

The General Education Program continues to provide students with a common set of academic skills and exposure to a broad knowledge base. The competency requirement requires students to complete two courses in composition, four courses designated as writing intensive, a course in oral English, a course designated as meeting the mathematics requirement, and a course designated as meeting the quantitative reasoning requirement. The University Program requires students to complete nine courses distributed across the four broad content areas of the Humanities, Natural Sciences, Social Sciences, and Studies in Culture and Diversity.

After completing the General Education Program, students should be able to demonstrate an understanding of the basic forces, ideas, and values that shape the world. They should be aware of the structure of organized human knowledge--the arts and humanities, natural sciences, and social sciences. They should be able to organize and access a broad knowledge base relevant to the modern world. They should be skilled in working with others, including those of diverse ethnic and cultural backgrounds, and in thinking reflectively about

themselves as individuals and as members of society. Graduates should value rational inquiry, honesty in scholarship, and life-long learning.

SPECIFIC STUDENT LEARNING OBJECTIVES

The General Education Program is intended to assist students in attaining the specific learning outcomes listed below:

1. Demonstrate undergraduate-level competence in written communication, oral communication, mathematics, and quantitative reasoning.
2. Examine and conceptualize contemporary problems through the application of procedures common in the natural sciences, social sciences, and humanities.
3. Display sensitivity to the influence on human functioning of cultural values and diversity

II. GENERAL EDUCATION PROGRAM COMPETENCIES

HISTORICAL BACKGROUND

The current structure of the General Education Program Competencies took shape in the late 1970s. In November of 1977, the Competency Committee submitted a report to the Academic Senate that was reviewed and voted in during the December 6, 1977, Academic Senate meeting. The following motion was approved during the meeting:

That the Senate receive the report from the University Competency Committee, and take the following action: that until a permanent competency program is established, every student graduating under the 1978-79 Bulletin or subsequent catalogue be required to present a grade of “C” or better in English 101, Speech 101, and a competency equivalent to module “G” in Mathematics 105, and the departments concerned be charged with identifying and developing methods for students to test out of these competencies.

Several changes have taken place since the initial development of the General Education Program Competencies, but the overall structure of the General Education Program Competencies has withstood the test of time.

CURRENT STRUCTURE

General Education Competencies are important skills that students expand during their course of study at Central Michigan University. Graduates are expected to demonstrate competence in the areas of Writing, Oral English, Mathematics, and Quantitative Reasoning. The requirements under each of these competencies were developed to aid students in mastering knowledge and skills deemed necessary to lead lives of constructive, concerned, and thoughtful persons.

A. WRITING COMPETENCY

Writing can be a tool for organizing and clarifying ones thoughts. Effective written expression is often necessary to contribute to ongoing debates or discussions in personal, civic, and vocational spheres and in ways that reflect different perspectives. Because writing is considered such an important skill, students must satisfy the Freshman Composition, Intermediate Composition, and Writing Intensive requirements as detailed below.

Freshman Composition Requirement

Students prepare a variety of public texts by applying knowledge of composing processes, rhetorical strategies, and textual conventions. This requirement is typically met by earning a grade of C or better in ENG 101 Freshman Composition.

As minimum criteria, students who complete the Freshman Composition requirement are able to:

1. use all aspects of writing processes, including invention, drafting, revising, editing, and polishing.
2. use a variety of technologies—from traditional pen and paper to electronic—for invention, drafting, revising, editing, and polishing.
3. listen to, reflect on, and make informed revision decisions based on responses to

- their writing provided by their classmates and instructors.
4. use appropriately the conventions of written English (such as formal and informal rules and strategies for content, organization, style, supporting evidence, citation, mechanics, usage, level of diction, etc.).
 5. analyze the rhetorical features of a variety of types of texts (nonfiction, informational, imaginative, printed, visual, spatial, and otherwise).
 6. apply key rhetorical concepts, such as audience, purpose, context, and genre.
 7. apply rhetorical strategies, such as ethos, logos, pathos; organization; tone and diction; figures of speech; etc.
 8. write texts for multiple purposes including (but not limited to) summary, reflection, response, interpretation, analysis, synthesis, critique.
 9. evaluate source material for credibility, bias, quality of evidence, and quality of reasoning.
 10. incorporate source material into their writing, giving credit to the sources of those ideas by using appropriate and correct citations.

Timeline: Students must meet their Freshman Composition requirement before enrolling in ENG 201 Intermediate Composition.

Intermediate Composition Requirement

Students acquire writing skills necessary for writing in upper-level major courses and beyond. This requirement is met by earning a grade of C or better in ENG 201 Intermediate Composition.

As minimum criteria, students who complete the Intermediate Composition Requirement are able to:

1. use all aspects of writing processes, including invention, drafting, revising, editing, and polishing.
2. use a variety of technologies—from traditional pen and paper to electronic—for invention, drafting, revising, editing, and polishing.
3. listen to, reflect on, and make informed revision decisions based on responses to their writing provided by their classmates and instructors.
4. use appropriately the conventions of written English (such as formal and informal rules and strategies for content, organization, style, supporting evidence, citation, mechanics, usage, level of diction, etc.).
5. analyze the rhetorical features of a variety of types of texts (nonfiction, informational, imaginative, printed, visual, spatial, and otherwise).
6. apply key rhetorical concepts, such as audience, purpose, context, and genre.
7. apply rhetorical strategies, such as ethos, logos, pathos; organization; tone and diction; figures of speech, etc.
8. write texts informed by research for multiple audiences and purposes including (but not limited to) interpretation, analysis, synthesis, critique, argumentation, and problem solving.
9. generate research questions and/or problems to guide research.
10. conduct secondary research (including expert opinion and empirical data) using methods for investigating questions appropriate to the student's discipline and using a variety of print and non-print sources;

11. evaluate source material for credibility, bias, quality of evidence, and quality of reasoning.
12. incorporate source material (including, when appropriate, empirical data) into their writing, giving credit to the sources by using appropriate and correct citations.

Timeline: The Intermediate Composition requirement must be met before students complete 56 hours of coursework.

Writing-Intensive Requirement

This requirement is met by earning a grade of C or better in six credits of writing-intensive course work in the University Program, as well as a grade of C or better in six additional credits of writing-intensive course work in either the University Program or non-University Program courses.

University Program Writing-Intensive Courses

As minimum criteria, students who complete writing-intensive courses in the University Program will be able to

1. use writing as a tool for learning course content.
2. engage in a process of drafting, revising, and editing assignments that integrates feedback into a graded final product.
3. select, analyze, and evaluate information/data from sources.
4. draw valid conclusions from information.

Non-University Program Writing-Intensive Courses

As minimum criteria, students who complete writing-intensive courses outside the University Program are able to

1. analyze, evaluate, and develop arguable and/or researchable theses.
2. use writing to engage in the inquiry methods appropriate to a discipline or profession.
3. use the discourse conventions of a discipline or profession (e.g., lines of argument, genre features, writing style, citation format, etc.)
4. produce finished products that communicate effectively within disciplinary contexts.

Timeline: Beginning with the Fall 2016 semester, two of the four Writing Intensive Competency courses must be met before students complete 56 hours of coursework.

B. ORAL ENGLISH COMPETENCY

Students demonstrate the ability to interpret, compose, and present information in oral form to a specific audience.

As minimum criteria, students who complete the Oral English Competency are able to:

1. identify and explain theoretical concepts central to the communication discipline in a variety of contexts: dyadic, small group, public speaking;
2. identify the concepts of effective communication (e.g., listening, information gathering, audience analysis, designing messages, perceiving, using symbols, managing conflict, relating, understanding cultures);
3. locate information from texts, libraries, electronic data sources, and experts;

4. define communication rules, norms, and expectations;
5. demonstrate communication competency in a variety of contexts;
6. exhibit competence in the public speaking context;
7. construct reasoned arguments in a public speech;
8. criticize arguments in oral messages;
9. evaluate the ethical implications of communication messages;
10. distinguish effective communication from ineffective communication and assess how to improve communication skills.

Timeline: The Oral English Competency must be met before students complete 56 hours of coursework.

C. MATHEMATICAL & QUANTITATIVE COMPETENCIES

Mathematics

Mathematics is one of the essential areas of human knowledge. It is a tool for understanding patterns that appear in the humanities as well as the natural, social, and behavioral sciences. This requirement is typically met by earning a grade of C or better in a course designated as meeting the Mathematics Competency.

As minimum criteria, students who complete the Mathematics Competency are able to:

1. solve linear equations, linear inequalities, systems of linear equations, absolute value equations, absolute value inequalities, rational equations, radical equations, and quadratic equations;
2. graph linear equations, linear inequalities, and quadratic functions;
3. evaluate functions and interpret graphs of functions;
4. apply exponent rules appropriately;
5. add, subtract, multiply, and divide polynomials and solve polynomial equations using factoring;
6. use algebra to solve applied problems.

Timeline: The Mathematics Competency must be met before students complete 56 hours of coursework.

Quantitative Reasoning

Quantitative reasoning involves the application of mathematics and quantitative reasoning in applied contexts. The overarching goal is to establish a foundation for effective quantitative reasoning and problem solving strategies that is useful for completing a program of study and relevant-to-life activities of most citizens. This requirement is met by earning a grade of C or better in a course designated as meeting the Quantitative Reasoning Competency.

As minimum criteria, students who complete the Quantitative Reasoning competency, for situations that appear in common life activities, are able to:

1. represent quantitative information symbolically, visually, numerically, and verbally;
2. interpret graphs, tables, and schematics and draw inferences from them;
3. use number sense, arithmetic operations, and technology to describe, analyze, and assess real-world problems

4. utilize measurement to describe geometric, physical, and other quantities for precision and accuracy
5. apply basic statistical concepts and basic data analysis to describe and interpret issues and draw valid conclusions;
6. use probability concepts;
7. formulate and analyze models to make predictions, draw conclusions, and judge the reasonableness of the results;
8. estimate and check answers to quantitative problems in order to determine reasonableness, identify alternatives, and select optimal results;
9. evaluate and create logical and quantitative arguments;
10. communicate mathematical and statistical ideas to others.

Timeline: The Quantitative Reasoning Competency must be met prior to graduation.

D. ADDITIONAL GUIDELINES FOR THE COMPETENCIES

Various competencies can be satisfied using a plethora of “test-out” procedures that are specified in the Undergraduate Bulletin. In addition, the chairperson of the department most directly concerned with a competency can judge a student to have satisfied a competency requirement by means other than those approved by the Academic Senate that chairperson can certify in writing to the Registrar that the student has satisfied the requirement. These competencies and departments include the following: Writing Competency - Department of English Language and Literature; Oral English Competency - Department of Communication and Dramatic Arts; Mathematics & Quantitative Reasoning Competency - Department of Mathematics.

III. THE UNIVERSITY PROGRAM

HISTORICAL BACKGROUND

The University Program took shape during the late 1970s. The following rationale for the structure of the University Program was outlined in a Letter of Transmittal from the University Program Implementation Committee to the Academic Senate dated February 15, 1977:

No grouping or regrouping of specific named courses will guarantee a student a general education, particularly when only thirty credit hours of time are provided in which to do the job. Indeed, the objective of a general education is presumably not merely to convey a body of subject matter, but also to equip a student with the conceptual tools to place the information he or she gathers during a lifetime into a meaningful perspective. With that view, the groups subject to definition (particularly humanities, natural sciences and social sciences) partake of a meaning deeper and richer than that defined simply by content. Instead, content and conceptual approaches blend and inform one another. What differs, for example, in a philosopher's view of the twentieth century and a social scientist's, is not only the content of their observations, the kinds of questions they ask, but also the way in which the questions are asked and the use to which the information gained is put. Neither content nor concepts alone are sufficient for defining the humanities, natural sciences and social sciences. Together, a rational, defensible and educationally sound division may be made. By reason of the above, group definitions were not primarily drawn with disciplines in mind. Indeed...academic units (generally based upon traditional disciplinary lines) may well find that their present course offerings fall within several categories, and may wish to propose courses for the program in several categories. But it must be admitted that, as with any attempt to classify knowledge, the knife does not always cut perfectly cleanly. There seemingly will always be some boundaries of a vague and blurred nature, where reasonable persons may reasonably disagree...

In 1991 the General Education Council identified three desirable characteristics for courses accepted into the University Program. The first proposition was **coherence**. The University Program is a carefully structured ensemble of courses designed to introduce students to the content and methods of major fields of human knowledge. The group and subgroup definitions are neither wholly subject matter in orientation, nor wholly methodological, but are a blend of both. The second proposition was **representativeness**. Each University Program course is presumed to be the only course taken by a student within a particular subgroup. Therefore, each course must be representative of the subgroup within which it is found. The third proposition is **completeness**. Each University Program course must stand alone as a complete and coherent statement and must be explicitly informed by a central guiding principle. These three propositions - coherence, representativeness, and completeness - ensure that students understand the content of each course, how each course fits into the larger picture of human knowledge, and, upon completion of the University Program, what that larger picture looks like.

Courses in the University Program introduce students to the major fields of human knowledge. A primary goal is to provide students with the conceptual tools necessary to provide order and meaning to the information acquired over the course of their lives. Courses included in the University Program were selected to aid students in developing a broad conceptual understanding that ultimately help graduates function as concerned and thoughtful persons.

CURRENT STRUCTURE

The University Program is divided into four groups, each with two subgroups. In addition to the general goal of the University Program – that students in every class will be able to demonstrate skills in reading carefully, discussing cogently, and writing clearly about the facts and the interpretation of facts covered in these courses – each subgroup is organized around specific learning objectives, which are listed following the group and subgroup definitions below. Courses in a particular subgroup should adhere to these outcomes. While it is possible that a course may not include every subgroup outcome, all courses should actualize a majority of the stated student learning outcomes. Individual courses most often include specific outcomes in addition to those outlined below.

A. GROUP I – HUMANITIES

Historically, “the Humanities” has designated study of the classical Greek and Latin heritage; in polemical usage, it spoke for a strictly human, as opposed to supernatural or divine, standard for measuring and valuing human affairs. In current academic affairs, the term still carries both of these older significances: it expresses the importance of the study of cultural and artistic heritage, and it affirms the need for consideration of the human being *per se*, and only secondarily as measured by scientific or institutional standards. Therefore, as a group, the Humanities are defined as those areas of knowledge and study that examine and explore human experience and achievement in order to attain a deeper understanding of the essential characteristics of the human condition.

Subgroup A: Human Events and Ideas

These studies involve concern with discerning coherence, order, meaning, and significance in human events and ideas. The focus is upon substantial and significant aspects of human experience and upon the development of ideas and ideals. The subject matter may range from the examination of broadly general or universal propositions to the examination of human thoughts and actions in various contexts over a period of time.

As minimum criteria, students who complete a course in Human Events and Ideas are able to:

1. demonstrate knowledge of significant figures, ideas, or movements that have shaped human experience and/or achievement in at least one area (literature, visual arts, philosophy, religion, music, and theatre) and place these materials in an historical, cultural, or intellectual context;
2. employ basic humanities methodologies to analyze, critically evaluate, and/or interpret issues, themes, literary or musical compositions, works of art, etc., from the domain of at least one humanities discipline;

3. engage in significant debates on issues in the humanities, demonstrating an ability to recognize diverse points of view.

Subgroup B: The Arts

These studies include a focus on the aesthetic dimension of human creative activity. Emphasis in these studies is placed primarily upon the development of aesthetic sensitivity, both intellectual and emotional, based upon critical analysis of the structure and the execution of works of art.

As minimum criteria, students who complete a course in The Arts are able to:

1. demonstrate an understanding of the aesthetic dimensions of artistic works and performances;
2. apply critical methodologies to the analysis and interpretation of artistic works and performances;
3. identify and explain the significance of major works and artists from a range of cultural, historical, and aesthetic traditions;
4. identify and explain the significance of key features or techniques characterizing major periods, genres, or traditions of art;
5. explain the relationship between artistic creations and their aesthetic, sociocultural, and historical contexts;
6. identify and interpret various ways in which the arts function in contemporary society.

B. GROUP II – NATURAL SCIENCES

As a group the Natural Sciences explore and examine natural phenomena in order to establish basic principles concerning the material universe. Its approach includes, but is not limited to, the observation, identification, description, experimental investigation, and theoretical explanation of natural phenomena. To these ends, the scientific method is crucial, providing as it does the rules for concept formation, conduct of observations and experiments, model building, and validation of hypotheses by empirical means.

Subgroup A: Descriptive Sciences

These studies represent an attempt to understand natural phenomena primarily through observation, description, and classification. Complex systems are analyzed in terms of the function of each part and their relation to other systems. Categories are developed while preserving their interrelatedness.

As minimum criteria, students who complete a course in Descriptive Sciences are able to:

1. describe the underlying principles involved in scientific inquiry;
2. make scientific observations and evaluate the quality of data collected to determine their significance and accuracy;
3. discuss observations and descriptions and make generalizations based on them;
4. describe and draw conclusions from general scientific principles;
5. apply scientific principles to daily living, including evaluating current issues in the media.

Subgroup B: Quantitative and Mathematical Sciences

These studies reflect attempts to understand phenomena primarily through experimentation, simplification, quantification, and deduction. Simplified models of complex phenomena are used to discover and establish fundamental principles. Mathematics statements concerning those models permit quantitative predictions.

As minimum criteria, students who complete a course in Quantitative and Mathematical Sciences are able to:

1. describe the underlying principles involved in scientific inquiry;
2. solve scientific problems, applying all of the steps of the scientific method, including formulating questions and hypotheses, making scientific measurements, and making quantitative evaluations of the data collected to determine their significance and accuracy;
3. discuss collected data and make generalizations based on them.
4. describe and draw conclusions from general scientific and mathematical principles;
5. apply computational skills and scientific principles to daily living, including the evaluation of current issues in the media.

Specific Criteria:

1. Each course should stress scientific approaches and methodologies as well as subject matter.
2. The fundamental goal of each course should be to develop an understanding of basic science.
3. Lab Course Criteria:
 - a. At least 30 clock hours per semester must be spent in lab work for each hour of credit;
 - b. University Program standards are not satisfied by demonstration labs; students must carry out substantially all of the lab work;
 - c. Lab courses must demonstrate the same kind of methods as the subgroup in which they are found.

C. GROUP III - SOCIAL SCIENCES

The social sciences are defined as those fields of knowledge and study that explore and examine the social dimension (and where appropriate the physical environment) of human life. In these studies an attempt is made to understand the behavior of individuals, groups, and institutions and, where possible, to establish scientifically validated propositions.

Subgroup A: Behavioral Sciences

These studies involve a focus on the analysis of individual human behavior within society. Studies of phenomena such as motivation, personality, and perception are included.

As minimum criteria, students who complete a course in Behavioral Sciences are able to:

1. recognize and explain the rudiments of the different methods used in the social and behavioral sciences;
2. recognize, explain, and cite examples of the reciprocal influences between individuals and their social environments;
3. recognize and explain prominent characteristics of individuals that influence or are influenced by social environments;
4. recognize and explain prominent characteristics of social environments that influence or are influenced by individuals.

Subgroup B: Studies in Social Structures

These studies involve the analysis of social structures, their functioning, and their changes, whether processes of evolution, history, or conflict. These structures include social institutions, organizations, networks, and groups as well as the cultural elements upon which they rest. This area's major causal foci are social and cultural forces.

As minimum criteria, students who complete a course in Studies in Social Structures are able to:

1. demonstrate a basic understanding of at least one major technique used in the analysis of social organization;
2. describe the structure, functioning, and patterns of change involved in at least one major area of social organization;
3. explain the process by which social and/or cultural forces shape some major aspect of social organization;
4. apply some basic concepts pertaining to the analysis of social organizations in the student's own social and/or cultural contexts or the context of participants in their own social organization.

D. GROUP IV – STUDIES IN CULTURE AND DIVERSITY

This group focuses on the exploration of cultures and societies outside of the United States (IV-B: Studies in Cultures Outside of the Anglo-American Tradition) and the history and continuing effects of racism for groups within the United States (IV-C: Studies in Racism and Cultural Diversity in the United States).

Subgroup B: Studies in Cultures Outside of the Anglo-American Tradition

These studies involve exploration of integrated geographical, cultural, or political regions or traditions outside of the Anglo-American cultural tradition (for example, Africa, Latin America, the Muslim World). They will explicitly include but not be limited to a search for that which makes the geographical, cultural, or political region or tradition under consideration a unity, i.e., the fundamental considerations linking those found within a geographical, political or cultural boundary and differentiating them from others outside that boundary. The courses may be based in more traditional academic disciplines, and may require the student to become familiar with specific disciplinary methodologies; but their major goal should be to acquaint students with the fundamental and distinctive characteristics of the geographical, cultural, or political region or tradition under examination. Alternatively this subgroup may be satisfied by

taking a course in foreign language which includes cultural study. Courses that do not indicate a specific region or tradition of study (i.e. are global in scope, or are surveys of most or all regions in the world) are not appropriate for inclusion in this subgroup.

As minimum criteria, students who complete a course in Studies in Cultures Outside of the Anglo-American Tradition are able to:

1. Describe the common features of a particular geographical, cultural, or political region or tradition as well as the diversity within that region or tradition;
2. Define, discuss, and illustrate the cultural values (social, political, religious, economic, etc.) or systems of values of the geographic, cultural, or political region or tradition under study;
3. Illustrate and discuss common perceptions and attitudes, including biases and stereotypes, concerning the particular geographical, cultural, or political region or tradition that is the subject of the course;
4. Demonstrate how, with respect to a given geographical, cultural, or political region or tradition, the past relates to the present (e.g. the French Revolution and contemporary French society) and the part to the whole (France and *la francophonie*);
5. Describe and illustrate the contributions (e.g. religious, artistic, scientific, etc.) of the geographical, cultural, or political region or tradition under study to the world at large and/or to American culture in particular;
6. Give evidence of an understanding of a cultural tradition other than one's own.
7. For foreign languages, communicate and comprehend effectively in the target language at the level appropriate for the particular course.

Applied Studies in Cultures Outside of the Anglo-American Tradition Coursework

Central Michigan University recognizes the potential for applied experiences to impart an understanding of diverse cultures. Therefore, three applied study-abroad options are available for meeting the requirement in Subgroup IV-B: Studies in Cultures Outside of the Anglo-American Tradition. Students planning to study abroad must register with the Study Abroad Office and complete the following:

1. at least three credits of study at any institution of higher education located outside the United States.
2. at least three credits of study in a CMU faculty-led course taught outside the United States. To have the course count for credit in Subgroup IV-B, the faculty member leading the course must have approval from the General Education Committee prior to the departure. Information on completing the General Education Application can be obtained on the Study Abroad Website (<http://www.studyabroad.cmich.edu>).
3. three credits from an applied course (e.g., internship, practicum, service-learning project) outside the United States. Students must sign up with a faculty member and, after completing the course, submit the proposal for credit in Subgroup IV-B Studies in Cultures Outside of the Anglo-American Tradition for evaluation by the General Education Committee. Information on completing the application can be found on the Study Abroad Website (<http://www.studyabroad.cmich.edu>).

Subgroup C: Studies in Racism and Cultural Diversity in the United States

Courses in this category will focus primarily on one or more of the major groups that experience both racism and invidious discrimination in the United States but may also include issues of gender, ethnicity, and sexual orientation. Such courses will at least emphasize the contributions of the group(s) to U.S. society; consider the roots, behavioral and institutional manifestations and consequences of racism, discrimination and stereotyping; and where appropriate, indicate the variation within the focus group.

As minimum criteria, students who complete a course in Studies in Racism and Cultural Diversity in the United States are able to:

1. demonstrate an understanding of the causes of racism and how stereotyping helps perpetuate racism and other forms of discrimination;
2. demonstrate knowledge of the history of at least one group that has experienced racism and invidious discrimination in the United States;
3. discuss the contributions to U.S. society of at least one group that has experienced racism and how these contributions compare with or relate to the contributions made by other groups;
4. define and give examples of how past and present institutional racism and discrimination advantage some people while disadvantaging others;
5. where applicable to the course, discuss the similarities and differences of racism and one other form of discrimination based on gender, ethnicity, and sexual orientation.

Applied Study of Racism and Cultural Diversity in the United States Coursework

Central Michigan University recognizes the potential for applied experiences to impart an understanding of racism and cultural diversity within the United States. Therefore, two Applied Study of Racism and Cultural Diversity in the United States options are available to obtain credit for Subgroup IV-C.

1. Complete at least three credits of study in a CMU faculty-led course that involves interacting with one or more of the major groups that experience both racism and invidious discrimination in the United States. To have the course count for credit in Subgroup IV-C: Studies in Racism and Cultural Diversity within the United States, the faculty member leading the seminar must have approval from the General Education Committee prior to the experience.
2. Complete three credits from an applied course (e.g., internship, practicum, service-learning project) working with one or more of the major groups that experience both racism and invidious discrimination in the United States. Students must sign up with a faculty member and, after completing the course, submit the proposal for credit in Subgroup IV-C: Studies in Racism and Cultural Diversity within the United States for evaluation by the General Education Committee.

E. ADDITIONAL GUIDELINES FOR THE UNIVERSITY PROGRAM

Content Requirements

While any course offered under University Program Groups I, II, or III may be rooted in a particular academic discipline and may be taught from that perspective, each course must also be representative of the relevant University Program group and subgroup. The fundamental assumption used by the course evaluation committee is that any course so

offered is presumed to be the only course taken by a student in that subgroup. As a result, it is suggested that each course emphasize the following elements:

1. techniques common to its discipline, and to the extent possible, those techniques common to its subgroup;
2. value premises commonly recognized as arising from the various issues, theories and methodologies within the coverage of the course;
3. Limits of any single discipline's approach to the subject at hand.

Each course offered under the University Program, in addressing its own subject matter, must be a complete statement in and of itself. In Groups I, II, and III, courses may not require specific course prerequisites. In the case of Group IV, submission of 300- and 400-level courses is encouraged, and courses with prerequisites are allowed.

Writing Requirements

University Program courses must derive at least 20% of the final grade from an assessment of meaningful writing. University Program courses may be exempt from the writing requirements if they derive 20% of the final grade from meaningful computation or public speaking.

When offered as a Writing Intensive, the course evaluation must meet the minimum requirements of at least 18 pages of writing or have at least 70% of the course grade derived from an evaluation of student writing. At least three to five pages of writing will be graded as formal products that have undergone revision. For University Program courses offered in the writing-intensive format, a major goal is to use writing to help students learn course content and methods. Writing-to-learn assignments are expected to vary from one discipline to the next; however, they should support course objectives, intensify student engagement, increase writing fluency, and help prepare students for future, more formal writing assignments. Writing-to-learn assignments also promote writing in discipline-specific contexts so that students can continue to develop as writers and thinkers. Conversely, a learning-to-write focus uses writing to introduce students to or give students practice with the language conventions, writing styles, and formats of a specific discipline or profession.

Relevant student learning outcomes for Writing Intensive UP courses require that students demonstrate their ability to:

1. use writing as a tool for learning course content;
2. engage in a process of drafting, revising, and editing assignments that integrates feedback into a graded final product;
3. select, analyze, and evaluate information/data from sources;
4. draw valid conclusions from information.

The complete Writing Across the University Program document is appended to this document set.

Extracurricular Requirements

Each course offered as part of the University Program is expected to include a requirement, where practicable, that students attend at least one relevant out-of-class

university event and provide a report or reflection on that experience as one component of their grade. Instructors may select an appropriate event or events from lists provided each semester by sources such as the campus calendar (<http://events.cmich.edu/>), the Office of Institutional Diversity (<http://www.diversity.cmich.edu/mss/calendar.htm>), etc.

Instructors will be permitted to augment the lists to include university, department, or community speakers, events, etc., that are determined by the instructor to be particularly valuable to our students and the goals of general education and diversity awareness. It is expected that instructors will make alternative assignments or suggestions to students who, because of class or other conflicts, are absolutely unable to attend any of the recommended events. In the case of a time conflict, a class that a student is registered for must take precedent over an assigned event.

Options for Receiving Credit in Subgroup IV-B: Studies in Cultures Outside of the Anglo-American Tradition

Several unique options are available for awarding credit in Subgroup IV-B: Studies in Cultures Outside of the Anglo-American Tradition:

1. Students who meet the Subgroup IV-B: Studies in Cultures Outside of the Anglo-American Tradition requirement by completing an approved foreign language course that carries a course number 102 or above can opt to meet the University Program requirements by taking only 24, as opposed to the typical 27, credits. That is, by taking one course from each of the seven remaining subgroups.
2. Students who receive IV-B: Studies in Cultures Outside of the Anglo-American Tradition credit for an applied study- abroad experience can opt to meet the University Program requirement by taking only 24, as opposed to the typical 27, credits -- that is, by taking one course from each of the seven remaining Subgroups.
3. International students enrolled in an undergraduate degree program meet the University Program Subgroup IV-B: Studies in Cultures Outside of the Anglo-American Tradition requirement after successfully completing one semester of full-time study at Central Michigan University.

Limitations on Student Course Selections

Several limitations on student course selection are detailed below:

1. In general, students must satisfactorily complete at least twenty-seven hours of University Program courses in order to fulfill University Program requirements. At least three hours must be satisfactorily completed in each subgroup of each of the four University Program groups. Additional hours to complete the University Program may be taken from any group.
2. Students must complete a laboratory experience equivalent to at least one laboratory credit hour in order to meet the Group II –Natural Sciences requirement.
3. Unless the degree specifically prohibits it, courses that are required under Other Degree Requirements may also be used to satisfy University Program requirements, provided that the courses are also on the list of University Program courses. University Program courses may also be taken as part of a major or minor unless otherwise restricted.
4. The University Program has been designed to encourage students to explore as many

different disciplines as possible; therefore, students must choose their University Program courses from different designators. Students are required to take nine courses with eight different designators.

5. Students must earn a minimum cumulative grade point average of 2.0 in University Program courses in order to graduate.
6. Students may not take more than two courses or seven hours of CR/NC in the University Program.
7. CLEP General Examination credit is not accepted for University Program credit.

Instructor Requirements

Only persons with faculty rank, with the exceptions designated below, may deliver instruction and assign grades in University Program courses. Laboratory sections may be taught by graduate teaching assistants. Doctoral students on teaching assistantships who have been granted admission to candidacy for the doctoral degree may also be assigned to deliver University Program courses. In these cases, the students must be approved through the normal hiring processes of the department for faculty teaching University Program courses. University Program courses involving unusual pedagogies or teaching methods will be considered by the General Education Subcommittee on a case-by-case basis for possible exception to this rule.

Criterion 4 Evidence
Graduate Transfer Credit Policy

promptly submit a written response thereto, a copy of which shall be made available to the student. If, upon the basis of these papers, the dispute appears to be attributable to inadequate or incomplete communication between the parties, the committee may arrange to meet individually or together with the student and instructor to discuss the problem. A teleconference may be arranged for a student who does not reside in proximity to the main campus.

Step 3:

- If such a meeting is not held or, if held, the meeting does not result in a mutually agreeable solution, the committee shall proceed to hold a fact-finding session concerning the allegations set forth in the appeal. Both the student and the instructor shall be entitled to be present throughout the session and to present any relevant evidence, including testimony by other persons. The student and the instructor both may be accompanied by a person to assist them in presenting evidence. The session shall not be open to the public.
- At the close of the session, the committee shall deliberate privately. If a majority finds the allegations of capricious grading to be supported by substantial evidence, the committee shall determine the most appropriate remedy. The committee may direct the instructor to grade the student's work anew, give the student a new examination in the course, or take such other action as will bring about substantial justice in the individual case. However, except in the most extraordinary circumstances, the committee itself should not award the student a new grade in the course. The decision of the committee shall be final and shall be reported in writing to the student, instructor, and the departmental office.

The College Committee on Review of Change of Grade may also resolve complaints involving suspected violation of grading policies for incomplete and deferred grades, dropping a class, or withdrawal from the university. The same procedures as outlined above for review of alleged capricious grading shall be followed.

*If the instructor of the course is a member of the Committee, he/she shall be disqualified from considering the appeal.

Courses of Unspecified Content or Variable Credit

Variable credit courses are identified by a semester hour designation such as 1-3 (Spec). The maximum hours that a student may earn in a variable credit course to apply toward graduation is the highest number in the semester hour designation for the course (i.e., 3 hours maximum in the example listed above).

Unspecified content courses are defined to be courses in which the student or department is not restricted by the course description in the graduate Bulletin to a specific area or subject matter to be included within the course.

It is up to each graduate advisor to ensure that a student's authorized program plan has sufficient university-approved coursework to provide the student with a solid grounding in the academic discipline. In order to assist advisors, a list of variable credit and unspecified content courses is given before the course listings of each department.

Independent Study and Thesis

Not more than a total of ten hours of independent study and thesis shall be allowed on any master's degree program. Exceptions to this regulation may be granted by the Vice President/Dean of the Office of Research and Graduate Studies.

Graduate Transfer Credit Policy

This policy relates to non-CMU coursework being considered for transfer into a CMU graduate degree program plan.

Transferable Credit:

- **Graduate Certificate:** maximum of 6 semester hours from a previous or concurrent graduate degree or certificate may be transferred toward a graduate certificate.
- **Master's Degree:** maximum of 50% of the semester hours (exception: maximum of 30 semester hours on the 54 credit hour joint master's degree in history are transferable).
- **Specialist's Degree:** maximum of 12 semester hours beyond the master's degree if the master's degree was earned at CMU (exception: maximum of 9 semester hours beyond the master's degree if the degree was **not** earned at CMU).
- **Doctoral Degree:** maximum of 50% of the post-baccalaureate semester hours. Minimum percentage that must be earned at CMU can vary among academic programs.
- **Maximum of 6 semester hours** may only once be transferred from one earned degree program to another master's or higher degree program.
- **Military coursework:** coursework with a grade of outstanding or excellent is transferable.

A separate policy exists for the following: Students entering the Au.D. with a master's degree in Audiology and significant, relevant professional experience. See the Au.D. program description for details. Global Campus students are limited to six semester hours or prior learning according to California regulations.

Graduate transfer credits must be appropriate to the student's program, recommended by the student's academic advisor for use on the program plan, and approved by the Vice President/Dean of the Office of Research and Graduate Studies. Transfer credits are not considered in the computation of the student's graduate grade point average. Graduate transfer credit must meet the following criteria:

1. Credits must have been earned at a regionally accredited higher education institution or one of the recognized standing (at the time the credits were earned) as defined by the Office of Research and Graduate Studies;
2. The credits are not in violation of any pertinent university or Office of Research and Graduate Studies regulation, procedure, or policy;
3. The credits do not correspond to a course previously taken at CMU;
4. The credits were earned within the time limit for program completion. Credits from a prior graduate degree or certificate that are to be applied to a doctoral degree may be exempt for the time limit for doctoral degree completion (see individual program description);
5. The credits are appropriate to the student's program and are not in conflict with credit limitation specified elsewhere in the *Graduate Bulletin*;
6. As certified on the official graduate transcript, courses must be at the graduate level.
7. The grade for the credits must be B or higher. Ungraded coursework will not be accepted in transfer unless accompanied by evidence that the work was of B or higher quality; Military coursework with a grade of outstanding or excellent is transferable.
8. The student is in good standing (3.0 cumulative graduate GPA or higher) at the institution at which the credit was earned.
9. Doctoral degree students must have regular admission to their degree program;
10. The student is responsible for having official graduate transcripts sent by the institution in which the credit was earned directly to Graduate Student Services at CMU and for completing the most recent version of the Graduate Transfer Credit Request form (available online at www.grad.cmich.edu under *New and Current Students: Applications and Forms*).

(continued)

11. The credits must be approved by the student's academic advisor (for graduate certificates and Master's degrees) or Program Director (doctoral degrees) and the Vice President/Dean of the Office of Research and Graduate Studies.
12. Courses earned by correspondence will be eligible for graduate transfer credit unless otherwise stipulated in department admission requirements.
13. Transfer credits must be earned within the time limit for program completion. Transfer credits **are not** eligible for extension of time consideration.

Transfer credits are not included in the computation of the student's CMU graduate grade point average.

Waiver of a Program Requirement

An advisor/program director has the authority to waive a program requirement only if the proposed waiver is not in violation of any pertinent university regulation, procedure, or policy. Circumstances under which a course might be waived include:

1. The student has already met the required course objectives through some experience which was not in the form of a transferable course;
2. The student has not met the objectives of the course, but the advisor/program director determines that the student would derive greater benefit from a different course.

If a program requirement is waived, the minimum number of hours required for the program is unaffected.

A separate policy exists for students entering the Au.D. with a master's degree in Audiology and significant, relevant professional experience. See the Au.D. program description for details.

Additional Master's Degrees

A student who holds a master's or higher degree may earn an additional master's degree in another discipline. With the approval of the department chairperson and the graduate dean, a student holding a degree in a discipline may earn another master's degree in the same discipline, provided it is on a different published option. In any case, a maximum of six semester hours submitted in fulfillment of the prior degree program at CMU or elsewhere may subsequently be transferred to another master's degree program, provided the hours apply to the stated requirements of the subsequent program and were earned within seven years of the student's completion of the additional degree.

Credit by Examination

A student who has been admitted to a graduate degree program and who has had experience or background comparable to a course at this university may file for a maximum of 12 semester hours of Credit by Examination under the following conditions:

1. No credit transferable to CMU has been earned in the course requested by examination;
2. No advanced placement has been given for the course requested by examination;
3. No higher level course in that subject area was taken prior to requesting credit by examination;
4. Credit by examination may not be used to repeat any course previously taken, either to remove a failure or to improve a grade, as provided in the Repeat Course Policy;
5. Graduate credit by examination is available as Credit/No Credit only, and is not included in the computation of the student's grade point average.

At the time of the request, the student must have an Authorization of Degree Program signed by the advisor on file in Graduate Student Services. Approval may be granted for the number of credits requested or any portion of the credits requested. The student should submit the signed application for credit by examination to the Registrar's Office to register for the number of credits approved. The *Credit by Examination Request* form may be found on the Graduate Studies website.

General Course Information

Course Numbers

Courses numbered 500 through 599. A student who has been admitted to graduate studies and who takes courses numbered 500 and higher will receive graduate credit.

Courses numbered 600-699. Graduate courses open only to students who have been admitted to Graduate Studies, and to students in the Honors Program who present appropriate identification.

Courses numbered 700-799. Graduate courses open only to students who have been admitted to Graduate Studies.

Courses numbered 800-899. Graduate courses open only to students who have been admitted to Graduate Studies and who are at the post-master's level or are completing a full-time internship at the specialist's level.

Courses numbered 900-999. Graduate courses open only to doctoral students who are in the last years of their program.

600-Level Course Policy for Undergraduate Students. Open only to students who have been admitted to Graduate Studies, to students on the Honors Program who present appropriate approval, and to students who are approved by their advisor, course instructor, chairperson of the department offering the course, and Graduate Studies. In granting approval, Graduate Studies will rely on the criteria for admission to the Honors Program.

Cognate Courses

A cognate course is one outside of but related to the principal discipline.

Substitutions

Course substitutions appropriate to the student's program may be authorized by the advisor.

Prerequisites

A student may register for a class only if he or she has met the prerequisites prescribed or the requirements stated in this *Bulletin*. Procedures for granting exception vary by graduate program. Students should check with their department chairperson or graduate program coordinator to determine waiver procedures for their program.

In general, only immediate prerequisites for courses are listed. Some courses listed as prerequisites may have their own prerequisites. You may need to plan more than one semester in advance when deciding which semester to take a particular course.

Students seeking to substitute prerequisite courses with equivalents or permission of instructor may do so only with departmental permission. Such substitutions are not automatic.

Definitions

- Prerequisite – Any course(s) and/or other requirement(s) that must be completed prior to enrolling in a particular course.
- Pre/Co-requisite(s) – Any course and/or other requirement(s) that students may take prior to, or concurrently, with the particular course.
- Co-requisite – Any course and/or other requirement(s) that students must take concurrently with a particular course.
- Recommended – Any course and/or other requirement(s) that might be useful for students to complete prior to enrolling in a particular course.

Syntax Guidelines

- Multiple Course Requirements are separated by a comma. Example: ART 105, 115.
- Compound requirements are separated by a semi-colon. Example: ART 105, 115; Admission to the Teacher Education Program.
- Alternative courses are separated by "or." Example: ART 105 or 115.
- Multiple alternative courses are preceded by the use of "One of:." Example: One of: ART 105, 115, 215.

Welcome to the family!

The months leading up to your first day at Central Michigan University will be exciting and busy. Here are a few things to explore as you join the CMU community.

- **STAY ON TRACK:** Use our **enrollment checklist** to make your transition to CMU smooth.
- **JOIN THE FUN:** The Band Perry performs live February 28 at McQuirk Arena. Use promo code 'cmich2019' at cmich.edu/ticketcentral for special pricing.
- **GET FIRED UP:** Experience CMU's championship culture by going to an athletic event. Take your pick. Men's and women's basketball, gymnastics, wrestling and indoor track are in season. Browse cmuchippewas.com for schedules.

#cmich2019

Share why you are fired up to be a Chippewa.

Post by January 28 to qualify to win some cool prizes.

MTA and MACRO Agreements

Community College Transfer Agreements

<https://www.cmich.edu/ess/registrar/Pages/Community-College-Transfer-Agreements.aspx>

As a transfer student interested in attending Central Michigan University (CMU), we welcome you. Central Michigan University honors both the Michigan Transfer Agreement (MTA) and the Michigan Association of Collegiate Registrars and Admissions Officers (MACRAO) Agreement. Details on these agreements are as follows:

MICHIGAN TRANSFER AGREEMENT (MTA)

CMU is a participant in the Michigan Transfer Agreement. The Michigan Transfer Agreement (MTA) is the newest agreement and was designed to facilitate the transfer of general education requirements from one institution to another. The MTA is effective for students starting at a community college fall 2014 or later. If you have met the MTA and it is stamped on your official transcript, it will be applied to meet the following General Education requirements at CMU:

- University Program Requirement (27 hours)
- 1 or more of the following competency requirements:
 - Freshman Composition
 - Intermediate Composition
 - Oral English (speech)
 - Mathematics
 - Quantitative Reasoning

In addition, each course will be individually evaluated and could also be used to meet major/minor or degree requirements.

The **Michigan Transfer Agreement** requires you to complete the courses from the following areas as specified by your community college.

- 1 course in English Composition - CMU recommends that you take the equivalent of our ENG 101 – Freshman Composition.
- A second course in English Composition or 1 course in Communications.
- 1 course in Mathematics
- 2 courses in Social Sciences (from two disciplines)
- 2 courses in Humanities and Fine Arts (from two disciplines and excluding studio and performance classes)
- 2 courses in Natural Sciences including one with laboratory experience (from two disciplines)

If the total hours for these courses do not equal at least 30 semester credit hours, you must take an additional course from one of the areas.

To view additional information for transfer students including a link to "What will transfer" please click [here](#).

MACRAO AGREEMENT

CMU has been a participant in the MACRAO Agreement since it originated back in the 1970's. The MACRAO Agreement was designed to facilitate the transfer of general education requirements from one institution to another. If you have met the MACRAO Agreement and it is stamped on your official transcript, it will be applied to meet the following General Education requirements at CMU:

- University Program Requirement (30 hours)

In addition, each course will be individually evaluated and could also be used to meet competency, major/minor, or degree requirements.

The **MACRAO Agreement** requires you to complete a minimum 30 semester hours of college-level credit in the following areas as specified by your community college:

- English Composition (6 semester hours)
- Natural Science (8 semester hours in more than one discipline, At least one science course must include a laboratory)
- Social Science (8 semester hours in more than one discipline)
- Humanities (8 semester hours in more than one discipline)

Please note that this agreement is being replaced by the Michigan Transfer Agreement (MTA) for students starting at a community college fall 2014 or later. A student currently pursuing the MACRAO agreement may choose to instead complete the MTA. Please see the details for this agreement above.

The National Survey of Student Engagement (NSSE) collects information from first-year and senior students about the characteristics and quality of their undergraduate experience. Since the inception of the survey, more than 1,500 bachelor's-granting colleges and universities in the United States and Canada have used it to measure the extent to which students engage in effective educational practices that are empirically linked with learning, personal development, and other desired outcomes such as persistence, satisfaction, and graduation.

NSSE data are used by faculty, administrators, researchers, and others for institutional improvement, public reporting, and related purposes. Launched in 2000 with the support of a generous grant from The Pew Charitable Trusts, NSSE has been fully sustained through institutional participation fees since 2002. After two years of pilot testing and extensive analysis, 2013 marked the first year of NSSE's updated survey instrument and new customization options. This document provides an overview of NSSE 2015, the third administration of the updated NSSE.

Survey Data and Methodology

Nearly 1.4 million first-year and senior students from 585 institutions (564 in the US and 21 in Canada) were invited to participate in NSSE 2015. Of this population, 315,815 students responded to the survey. Less than half (43%) of these were first-year students and 57% were seniors.

NSSE's sampling methodology calls for either a census of all first-year and senior students or a random selection of an equal number of students from each group, with the sample size based on total undergraduate enrollment. Census administration is available only via the email recruitment method, in which students receive a survey invitation and up to four reminders by email. For NSSE 2015, all but four participating institutions opted for this method. Sampled students at the four remaining institutions received up to three messages by postal mail and up to two reminders by email.

Unless noted otherwise, the results presented below are from 561 institutions—541 in the US and 20 in Canada—that participated in NSSE 2015. Due to nonstandard population files or survey administrations, 24 institutions are not represented. In these summary tables, as in each *Institutional Report 2015*, only data for census-administered surveys and randomly sampled students are included.

NSSE 2015 Overview

U.S. Participating Institutions

NSSE 2015 U.S. respondents profiled here include 300,543 first-year (43%) and senior (57%) respondents from 541 institutions. NSSE 2015 participating institutions and students reflect the diversity of bachelor's-granting colleges and universities in the US with respect to institution type, public or private control, size, region, and locale (Table 1).

Simon Fraser University

Institutional Response Rates

The average response rate for U.S. NSSE 2015 institutions was 29%. The highest institutional response rate among U.S. institutions was 89%, and three out of five institutions achieved a response rate of 25% or higher. Higher average response rates were observed for smaller institutions, and for institutions that offered incentives (Table 2).

Note: A searchable list of participating institutions by year is on the NSSE website at nsse.indiana.edu/html/participants.cfm.

Table 1**Profile of NSSE 2015 U.S. Institutions and Respondents and Bachelor's-Granting U.S. Institutions and Their Students**

City	48	47	61	61
Suburban	24	26	20	22
Town	23	21	17	15
Rural	5	6	2	2

Notes: Percentages are unweighted and based on U.S. postsecondary institutions that award baccalaureate degrees and belong to one of the eight Carnegie classifications in the table. Percentages may not sum to 100 due to rounding.

- U.S. percentages are based on the 2013 IPEDS Institutional Characteristics data.
- For information on the Carnegie Foundation's Basic Classification, see carnegieclassifications.iu.edu.

Table 2**NSSE 2015 U.S. Participation and Response Rates by Undergraduate Enrollment and Use of Incentives**

Institution Characteristics	Number of Institutions	Average Institutional Response Rate (%)
Undergraduate Enrollment^a		
2,500 or fewer	242	35
2,501 to 4,999	110	28
5,000 to 9,999	97	22
10,000 or more	89	20
Incentives Offered^b		
Offered incentives	332	31
No incentives	209	25
All Institutions	541	29

- Three institutions had no enrollment information in the IPEDS data.
- Some institutions used recruitment incentives, such as small gifts or raffles, to encourage students to complete the survey.

Survey Customization

Participating institutions may append up to two additional question sets in the form of Topical Modules (NSSE-created) or consortium questions (for institutions sharing a common interest and participating as a NSSE consortium) (Table 3). Of the nine modules available in 2015, the most widely selected module was Academic Advising, followed by First-Year Experiences and Senior Transitions (Table 4). Another customization option—including a question about sexual orientation in the demographic section of the core survey—was elected by 30% of participating institutions.

Table 3**Summary of Participation in Additional Question Sets in NSSE 2015**

Selection of Additional Question Sets	Number of Institutions	Percentage of Institutions
None	78	13
One module only	125	21
Two modules	240	41
Consortium items only	17	3
Consortium items plus one module	125	21

Notes: These data include both U.S. and Canadian institutions and 24 institutions with nonstandard population files or administrations. Percentages do not sum to 100 due to rounding.

Table 4**Participation in Topical Modules in NSSE 2015**

Topical Module	Number of Institutions	Percentage of Institutions
Academic Advising	197	34
Civic Engagement	57	10
Development of Transferable Skills	53	9
Experiences with Diverse Perspectives	45	8
Experiences with Information Literacy	61	10
Experiences with Writing	69	12
First-Year Experiences and Senior Transitions	138	24
Global Perspectives–Cognitive and Social	51	9
Learning with Technology	59	10

Notes: These data include both U.S. and Canadian institutions and 24 institutions with nonstandard population files or administrations. Percentages sum to more than 100 because many institutions participated in two modules.

U.S. Respondent Profile

Table 5 displays selected demographic and enrollment characteristics of NSSE 2015 U.S. respondents alongside all U.S. bachelor's degree-seeking students, for comparison. Among NSSE respondents, female, White, and full-time students were overrepresented in varying proportions. NSSE reports use weights as appropriate to correct for disproportionate survey response related to institution-reported sex and enrollment status at each institution. Table 6 provides additional details about U.S. respondents.

Canadian Respondent Profile

Canadian respondents profiled here include 10,816 students (53% first-year, 47% fourth-year) from 20 institutions in 8 provinces, including 8 institutions in Ontario; 4 in Alberta; 2 each in British Columbia and New Brunswick; and 1 each in Manitoba, Nova Scotia, Quebec, and Saskatchewan. Female students and full-time students accounted for about 64% and 92% of Canadian respondents, respectively. The average response rate for Canadian NSSE 2015 institutions was 44%, with the highest institutional response rate being 86%. Nine out of ten Canadian institutions achieved a response rate of 25% or higher.

About 13% of Canadian respondents were at least 24 years old. The majority of students providing ethnocultural information identified as White (74%), while 9% identified as Chinese; 7% South Asian; 4% Black; and at least 2% each Arab, Latin American, and North American Indian. Less than 2% of respondents identified with other categories.

Table 5**Characteristics of NSSE 2015 U.S. Respondents and Undergraduate Population at All U.S. Bachelor's-Granting Institutions**

Student Characteristics	NSSE 2015 Respondents ^a (%)	U.S. Bachelor's-Granting Population ^b (%)
Sex		
Male	35	45
Female	65	55
Race/Ethnicity^c		
African American/Black	9	12
American Indian/Alaska native	1	1
Asian	5	6
Native Hawaiian/other Pacific Islander	<1	<1
Caucasian/White	65	60
Hispanic/Latino	13	14
Multiracial/multiethnic	3	3
Foreign/nonresident alien	4	4
Enrollment Status		
Full-time	89	84
Not full-time	11	16

Note: Percentages are unweighted and may not sum to 100 due to rounding.

- The NSSE 2015 sampling frame consists of first-year and senior undergraduates. Data were provided by participating institutions.
- U.S. percentages are based on data from the 2013 IPEDS Institutional Characteristics and Enrollment data. Includes all class years.
- Institution-reported, using categories provided in IPEDS. Excludes students whose race/ethnicity was unknown or not provided.

Table 6**Additional Characteristics of NSSE 2015 U.S. Respondents**

	%
At least 24 years old	25
First-generation college student ^a	46
Transfer student	31
Expects to complete a master's degree or higher	66
Living on campus ^b	36
Taking all classes online	7

Note: Percentages are unweighted.

- Neither parent (or guardian) holds a bachelor's degree.
- Dormitory or other campus housing, fraternity, or sorority.

NSSE 2015

Administration Summary

Central Michigan University

Administration Summary

This report provides an overview of your NSSE administration, including details about your population and sample, response rates, representativeness of your respondents, survey customization choices, and recruitment message schedule. This information can be useful for assessing data quality and planning future NSSE administrations.

Population and Respondents

The table at right reports your institution's population sizes, how many students were sampled (whether census-administered or randomly selected), and how many completed the survey.

Survey completions	First-year	Senior
Submitted population	4,542	5,796
Adjusted population ^a	4,536	5,783
Survey sample ^b	4,522	5,767
Total respondents ^b	968	1,581
Full completions ^c	757	1,227
Partial completions	211	354

- a. Adjusted for ineligible students and those for whom survey requests were returned as undeliverable.
 b. Targeted, experimental, and locally administered oversamples were not included.
 c. Completed at least one demographic question after the core engagement items on the survey.

Response Rate and Sampling Error^a

The table below summarizes response rates and sampling errors for your institution and comparison groups. For more information see NSSE's Response Rate FAQ: nsse.indiana.edu/pdf/Resp_Rate_FAQ.pdf

	First-year				Senior			
	CMU	Peer Institutions	Carnegie Class	All Other NSSE	CMU	Peer Institutions	Carnegie Class	All Other NSSE
Response rate	21%	16%	21%	22%	27%	18%	24%	25%
Sampling error ^b	+/- 2.8%	+/- 1.2%	+/- 0.7%	+/- 0.2%	+/- 2.1%	+/- 1.1%	+/- 0.6%	+/- 0.2%

- a. Comparison group response rate and sampling error were computed at the student level (i.e., they are not institution averages).
 b. Also called "margin of error," sampling error is an estimate of the amount the true score on a given item could differ from the estimate based on a sample. For example, if the sampling error is +/- 5.0% and 40% of your students reply "Very often" to a particular item, then the true population value is most likely between 35% and 45%.

Representativeness and Weighting

The first table at right reports on variables submitted in your population file. Respondent and population percentages are listed side by side as a convenience to see how well the characteristics of your respondents reflect your first-year and senior populations. For more respondent characteristics, refer to your *Respondent Profile* report.

NSSE weights results by institution-reported sex and enrollment status so institutional estimates reflect the population with respect to these characteristics. The second table at right provides the respondent and population proportions used to calculate your 2015 weights. For more information, see nsse.indiana.edu/html/weighting.cfm

Representativeness

	First-year		Senior	
	Respondent %	Population %	Respondent %	Population %
Female	69	55	65	55
Full-time	99	99	91	88
First-time, first-year	85	82	N/A	N/A
Race/ethnicity ^a				
Am. Indian or Alaska Native	0	1	0	1
Asian	1	1	1	1
Black or African American	5	7	3	4
Hispanic or Latino	4	4	2	3
Native Hawaiian/Other Pac. Isl.	0	0	0	0
White	82	79	85	84
Other	0	0	0	0
Foreign or nonresident alien	3	4	1	1
Two or more races/ethnicities	3	4	1	1
Unknown	1	1	5	6

- a. Based on the IPEDS categories (not available for Canadian institutions) submitted in the population file. Results not reported for institutions without full (at least 90%) race/ethnicity information in the population file.

Weighting

	First-year		Senior	
	Respondent %	Population %	Respondent %	Population %
Full-time, female	69	54	59	50
Full-time, male	30	45	32	38
Part-time, female	0	0	6	5
Part-time, male	0	1	4	7

Population File

Your institution provided a population file for survey administration and was afforded an opportunity to update it.

Population file options

Included "group" variables ^a	No
Identified an oversample ^b	No
Updated to identify ineligible students ^c	No
Identified students who completed BCSSE 2014 ^d	BCSSE not administered

- a. Institutions had the option to include additional variables in their population files for oversampling or for their own *post hoc* analyses. Up to five "group" variables were allowed; If formatting specifications were met, Group 1 can be used in the Report Builder–Institution Version.
- b. Institutions that did not survey all first-year and senior students (census) had the option to oversample a segment of their population. Oversamples may also be used to survey students in other class years.
- c. Institutions had the option to update their population files to identify students who did not return to campus in the spring or otherwise did not meet NSSE eligibility criteria.
- d. Institutions that participated in the Beginning College Survey of Student Engagement (BCSSE) can identify BCSSE survey respondents in their NSSE population file. This information is required to receive the longitudinal results in the *BCSSE-NSSE Combined Report*.

Survey Options

The options at right were available to customize the content of your NSSE survey and to collect complementary data from companion surveys.

Administration features

Sample type	Census
Recruitment method	Email
Incentive offered	Yes
Survey version	U.S. English
Institution logo used in survey	Yes

Additional question sets and companion surveys

Asked optional sexual orientation question	No
Topical module(s)	Learning with Technology, Writing Experiences
Consortium	None
BCSSE 2014	No
FSSE 2015	No

Recruitment Messages

Students received up to five direct contacts. Your institution had the option to customize message content and timing.

Message schedule

	Date	Cumulative response rate	
		<i>First-year</i>	<i>Senior</i>
Invitation	02/10/2015	7%	9%
Reminder 1	02/18/2015	13%	15%
Reminder 2	02/26/2015	17%	21%
Reminder 3	03/04/2015	19%	24%
Final reminder	03/16/2015	21%	27%

Report Customization

Your institution had the option to customize the comparison groups used in reports. The group selected for the *Snapshot* comparisons is identified with an asterisk.

Comparison groups for NSSE core survey reports

Group 1	Peer Institutions* (customized)
Group 2	Carnegie Class (default)
Group 3	All Other NSSE (default)

Comparison groups for additional question set report(s)

Topical Module: Learning with Technology	Learning with Tech (default)
Topical Module: Writing Experiences	Writing Experiences (default)

A Summary of Student Engagement Results

Student engagement represents two critical features of collegiate quality. The first is the amount of time and effort students put into their studies and other educationally purposeful activities. The second is how institutional resources, courses, and other learning opportunities facilitate student participation in activities that matter to student learning. NSSE surveys first-year and senior students to assess their levels of engagement and related information about their experience at your institution.

Comparison Group
The comparison group featured in this report is

Peer Institutions
See your *Selected Comparison Groups* report for details.

This *Snapshot* is a concise collection of key findings from your institution’s NSSE 2015 administration. We hope this information stimulates discussions about the undergraduate experience. Additional details about these and other results appear in the reports referenced throughout.

Engagement Indicators

Sets of items are grouped into ten Engagement Indicators, organized under four broad themes. At right are summary results for your institution. For details, see your *Engagement Indicators* report.

Key:

- ▲ Your students’ average was significantly higher ($p < .05$) with an effect size at least .3 in magnitude.
- △ Your students’ average was significantly higher ($p < .05$) with an effect size less than .3 in magnitude.
- No significant difference.
- ▽ Your students’ average was significantly lower ($p < .05$) with an effect size less than .3 in magnitude.
- ▼ Your students’ average was significantly lower ($p < .05$) with an effect size at least .3 in magnitude.

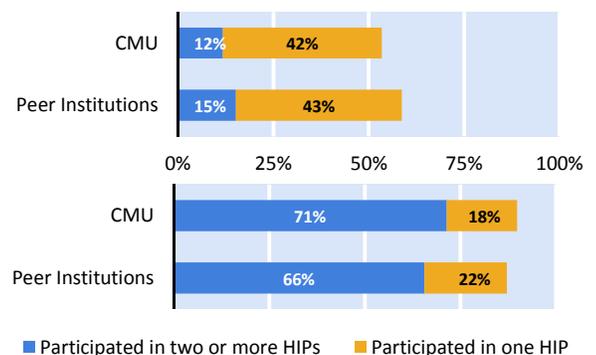

Theme	Engagement Indicator	Your students compared with Peer Institutions	
		First-year	Senior
Academic Challenge	Higher-Order Learning	▽	--
	Reflective & Integrative Learning	--	--
	Learning Strategies	--	--
	Quantitative Reasoning	--	--
Learning with Peers	Collaborative Learning	--	△
	Discussions with Diverse Others	▽	▽
Experiences with Faculty	Student-Faculty Interaction	--	△
	Effective Teaching Practices	▽	▽
Campus Environment	Quality of Interactions	--	--
	Supportive Environment	--	--

High-Impact Practices

Due to their positive associations with student learning and retention, special undergraduate opportunities are designated "high-impact." For more details and statistical comparisons, see your *High-Impact Practices* report.

First-year
Learning Community, Service-Learning, and Research w/Faculty

Senior
Learning Community, Service-Learning, Research w/Faculty, Internship, Study Abroad, and Culminating Senior Experience

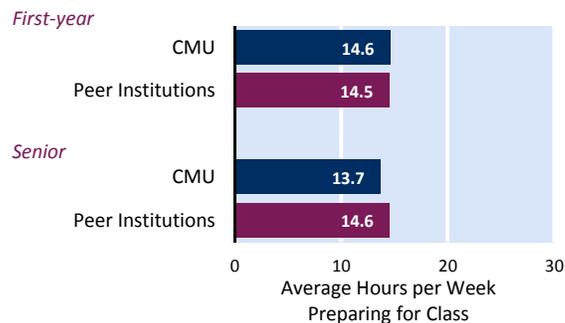

Academic Challenge: Additional Results

The Academic Challenge theme contains four Engagement Indicators as well as several important individual items. The results presented here provide an overview of these individual items. For more information about the Academic Challenge theme, see your *Engagement Indicators* report. To further explore individual item results, see your *Frequencies and Statistical Comparisons*, the *Major Field Report*, the *Online Institutional Report*, or the Report Builder—Institution Version.

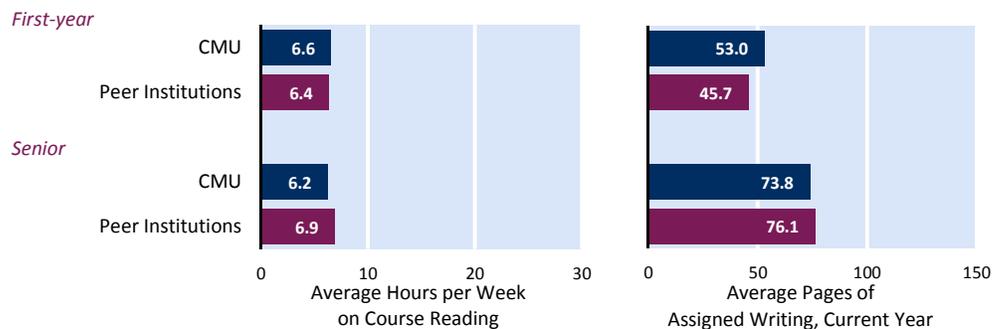

Time Spent Preparing for Class

This figure reports the average weekly class preparation time for your first-year and senior students compared to students in your comparison group.

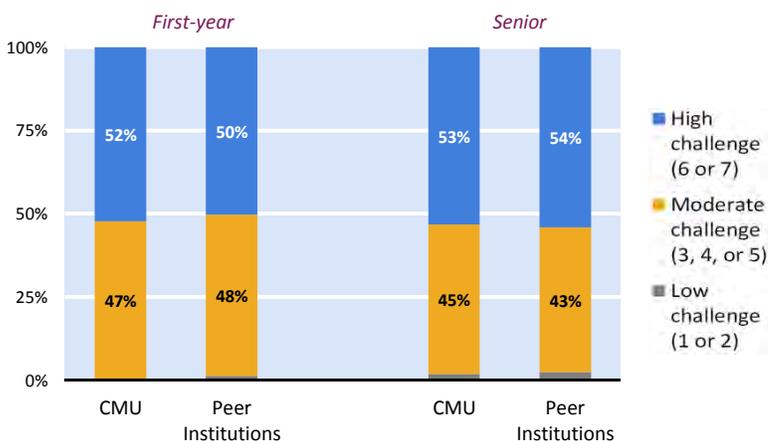

Reading and Writing

These figures summarize the number of hours your students spent reading for their courses and the average number of pages of assigned writing compared to students in your comparison group. Each is an estimate calculated from two or more separate survey questions.

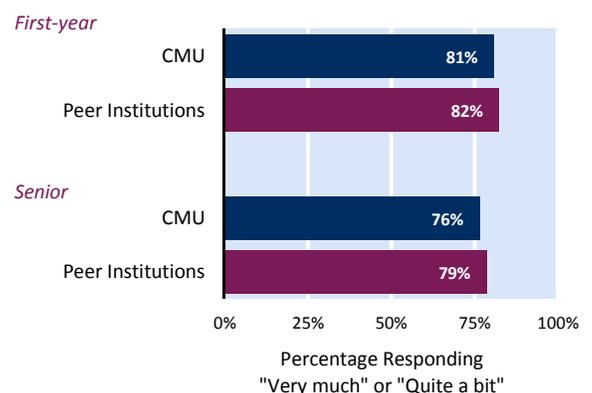

Challenging Students to Do Their Best Work

To what extent did students' courses challenge them to do their best work? Response options ranged from 1 = "Not at all" to 7 = "Very much."

Academic Emphasis

How much did students say their institution emphasizes spending significant time studying and on academic work? Response options included "Very much," "Quite a bit," "Some," and "Very little."

Item Comparisons

By examining individual NSSE questions, you can better understand what contributes to your institution's performance on Engagement Indicators and High-Impact Practices. This section displays the five questions^a on which your first-year and senior students scored the highest and the five questions on which they scored the lowest, relative to students in your comparison group. Parenthetical notes indicate whether an item belongs to a specific Engagement Indicator or is a High-Impact Practice. While these questions represent the largest differences (in percentage points), they may not be the most important to your institutional mission or current program or policy goals. For additional results, see your *Frequencies and Statistical Comparisons* report.

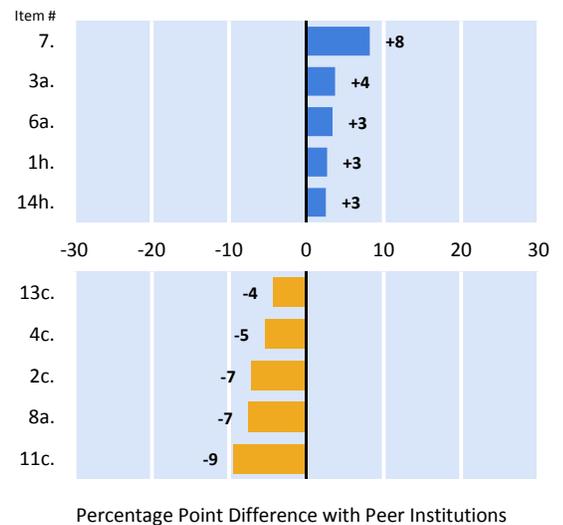

First-year

Highest Performing Relative to Peer Institutions

- Assigned more than 50 pages of writing^g
- Talked about career plans with a faculty member^b (SF)
- Reached conclusions based on your own analysis of numerical information (...) ^b (QR)
- Worked with other students on course projects or assignments^b (CL)
- Institution emphasis on attending campus activities and events (...) ^c (SE)

Lowest Performing Relative to Peer Institutions

- Quality of interactions with faculty^d (QI)
- Analyzing an idea, experience, or line of reasoning in depth by examining its parts^c (HO)
- Included diverse perspectives (...) in course discussions or assignments^b (RI)
- Discussions with... People of a race or ethnicity other than your own^b (DD)
- Participated in a learning community or some other formal program where... (HIP)

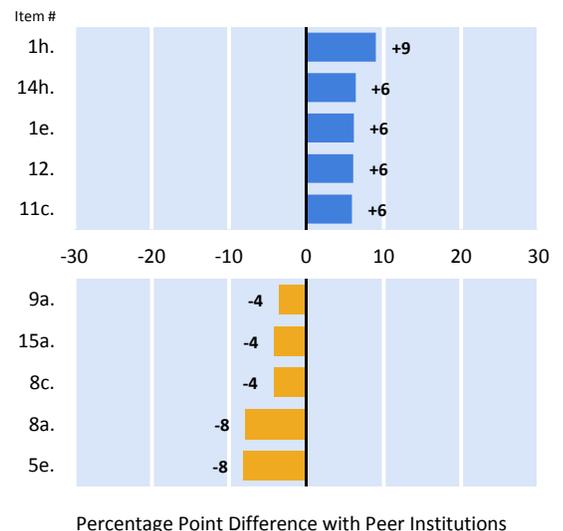

Senior

Highest Performing Relative to Peer Institutions

- Worked with other students on course projects or assignments^b (CL)
- Institution emphasis on attending campus activities and events (...) ^c (SE)
- Asked another student to help you understand course material^b (CL)
- About how many courses have included a community-based project (service-learning)^e (HIP)
- Participated in a learning community or some other formal program where... (HIP)

Lowest Performing Relative to Peer Institutions

- Identified key information from reading assignments^b (LS)
- Spent more than 15 hours per week preparing for class
- Discussions with... People with religious beliefs other than your own^b (DD)
- Discussions with... People of a race or ethnicity other than your own^b (DD)
- Instructors provided prompt and detailed feedback on tests or completed assignments^c (ET)

a. The displays on this page draw from the items that make up the ten Engagement Indicators (EIs), six High-Impact Practices (HIPs), and the additional academic challenge items reported on page 2. Key to abbreviations for EI items: HO = Higher-Order Learning, RI = Reflective & Integrative Learning, LS = Learning Strategies, QR = Quantitative Reasoning, CL = Collaborative Learning, DD = Discussions with Diverse Others, SF = Student-Faculty Interaction, ET = Effective Teaching Practices, QI = Quality of Interactions, SE = Supportive Environment. HIP items are also indicated. Item numbering corresponds to the survey facsimile included in your *Institutional Report* and available on the NSSE website.

b. Combination of students responding "Very often" or "Often."

c. Combination of students responding "Very much" or "Quite a bit."

d. Rated at least 6 on a 7-point scale.

e. Percentage reporting at least "Some."

f. Estimate based on the reported amount of course preparation time spent on assigned reading.

g. Estimate based on number of assigned writing tasks of various lengths.

How Students Assess Their Experience

Students' perceptions of their cognitive and affective development, as well as their overall satisfaction with the institution, provide useful evidence of their educational experiences. For more details, see your *Frequencies and Statistical Comparisons* report.

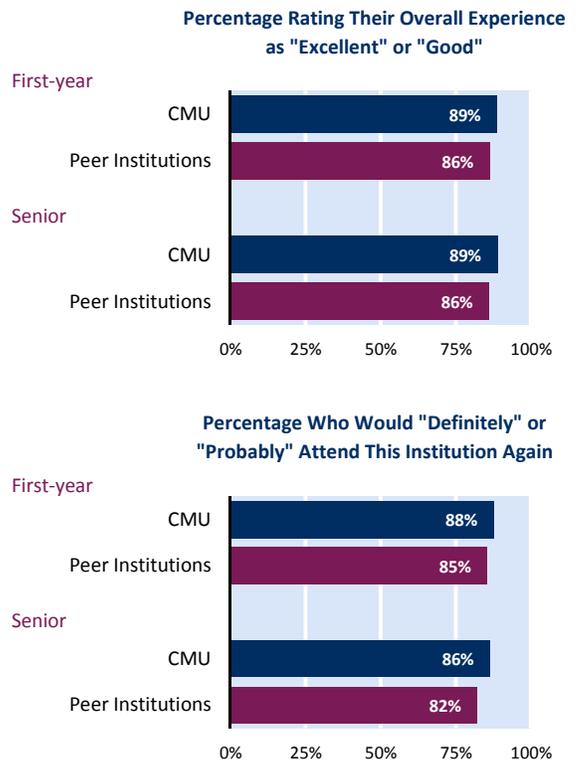

Perceived Gains Among Seniors

Students reported how much their experience at your institution contributed to their knowledge, skills, and personal development in ten areas.

Perceived Gains (Sorted highest to lowest)	Percentage of Seniors Responding "Very much" or "Quite a bit"
Thinking critically and analytically	85%
Working effectively with others	78%
Acquiring job- or work-related knowledge and skills	72%
Writing clearly and effectively	69%
Speaking clearly and effectively	68%
Solving complex real-world problems	64%
Developing or clarifying a personal code of values and ethics	61%
Understanding people of other backgrounds (econ., racial/ethnic, polit., relig., nation., etc.)	60%
Analyzing numerical and statistical information	58%
Being an informed and active citizen	55%

Satisfaction with CMU

Students rated their overall experience at the institution, and whether or not they would choose it again.

Administration Details

Response Summary

	Count	Resp. rate	Female	Full-time
First-year	968	21%	69%	99%
Senior	1,581	27%	65%	91%

See your *Administration Summary* and *Respondent Profile* reports for more information.

Additional Questions

Your institution administered the following additional question set(s):

- Learning with Technology
- Experiences with Writing

See your *Topical Module* report(s) for results.

What is NSSE?

NSSE annually collects information at hundreds of four-year colleges and universities about student participation in activities and programs that promote their learning and personal development. The results provide an estimate of how undergraduates spend their time and what they gain from attending their college or university. Institutions use their data to identify aspects of the undergraduate experience that can be improved through changes in policy and practice.

NSSE has been in operation since 2000 and has been used at more than 1,500 colleges and universities in the US and Canada. More than 90% of participating institutions administer the survey on a periodic basis.

Visit our website: nsse.indiana.edu

NSSE 2015

Engagement Indicators

Central Michigan University

About Your Engagement Indicators Report

Engagement Indicators (EIs) provide a useful summary of the detailed information contained in your students' NSSE responses. By combining responses to related NSSE questions, each EI offers valuable information about a distinct aspect of student engagement. Ten indicators, based on three to eight survey questions each (a total of 47 survey questions), are organized into four broad themes as shown at right.

Theme	Engagement Indicator
<i>Academic Challenge</i>	Higher-Order Learning Reflective & Integrative Learning Learning Strategies Quantitative Reasoning
<i>Learning with Peers</i>	Collaborative Learning Discussions with Diverse Others
<i>Experiences with Faculty</i>	Student-Faculty Interaction Effective Teaching Practices
<i>Campus Environment</i>	Quality of Interactions Supportive Environment

Report Sections

- Overview (p. 3)** Displays how average EI scores for your first-year and senior students compare with those of students at your comparison group institutions.
- Theme Reports (pp. 4-13)** Detailed views of EI scores within the four themes for your students and those at comparison group institutions. Three views offer varied insights into your EI scores:

 - Mean Comparisons**
Straightforward comparisons of average scores between your students and those at comparison group institutions, with tests of significance and effect sizes (see below).
 - Score Distributions**
Box-and-whisker charts show the variation in scores *within* your institution and comparison groups.
 - Summary of Indicator Items**
Responses to each item in a given EI are summarized for your institution and comparison groups.
- Comparisons with High-Performing Institutions (p. 15)** Comparisons of your students' average scores on each EI with those of students at institutions whose average scores were in the top 50% and top 10% of 2014 and 2015 participating institutions.
- Detailed Statistics (pp. 16-19)** Detailed information about EI score means, distributions, and tests of statistical significance.

Interpreting Comparisons

Mean comparisons report both statistical significance and effect size. Effect size indicates the practical importance of an observed difference. For EI comparisons, NSSE research has concluded that an effect size of about .1 may be considered small, .3 medium, and .5 large (Rocconi & Gonyea, 2015). Comparisons with an effect size of at least .3 in magnitude (before rounding) are highlighted in the Overview (p. 3).

EIs vary more among students within an institution than between institutions, like many experiences and outcomes in higher education. As a result, focusing attention on average scores alone amounts to examining the tip of the iceberg. It's equally important to understand how student engagement varies within your institution. Score distributions indicate how EI scores vary among your students and those in your comparison groups. The Report Builder—Institution Version and your *Major Field Report* (both to be

How Engagement Indicators are Computed

Each EI is scored on a 60-point scale. To produce an indicator score, the response set for each item is converted to a 60-point scale (e.g., Never = 0; Sometimes = 20; Often = 40; Very often = 60), and the rescaled items are averaged. Thus a score of zero means a student responded at the bottom of the scale for every item in the EI, while a score of 60 indicates responses at the top of the scale on every item.

For more information on EIs and their psychometric properties, refer to the NSSE website: nsse.indiana.edu

Rocconi, L., & Gonyea, R. M. (2015). Contextualizing student engagement effect sizes: An empirical analysis. Paper presented at the Association for Institutional Research Annual Forum, Denver, CO.

Engagement Indicators: Overview

Engagement Indicators are summary measures based on sets of NSSE questions examining key dimensions of student engagement. The ten indicators are organized within four broad themes: Academic Challenge, Learning with Peers, Experiences with Faculty, and Campus Environment. The tables below compare average scores for your students with those in your comparison groups.

Use the following key:

- ▲ **Your students' average** was significantly higher ($p < .05$) with an effect size at least .3 in magnitude.
- △ **Your students' average** was significantly higher ($p < .05$) with an effect size less than .3 in magnitude.
- No significant difference.
- ▽ **Your students' average** was significantly lower ($p < .05$) with an effect size less than .3 in magnitude.
- ▼ **Your students' average** was significantly lower ($p < .05$) with an effect size at least .3 in magnitude.

First-Year Students

<i>Campus Environment</i>	Quality of Interactions	--	--	--
	Supportive Environment	--	--	--

Academic Challenge: First-year students

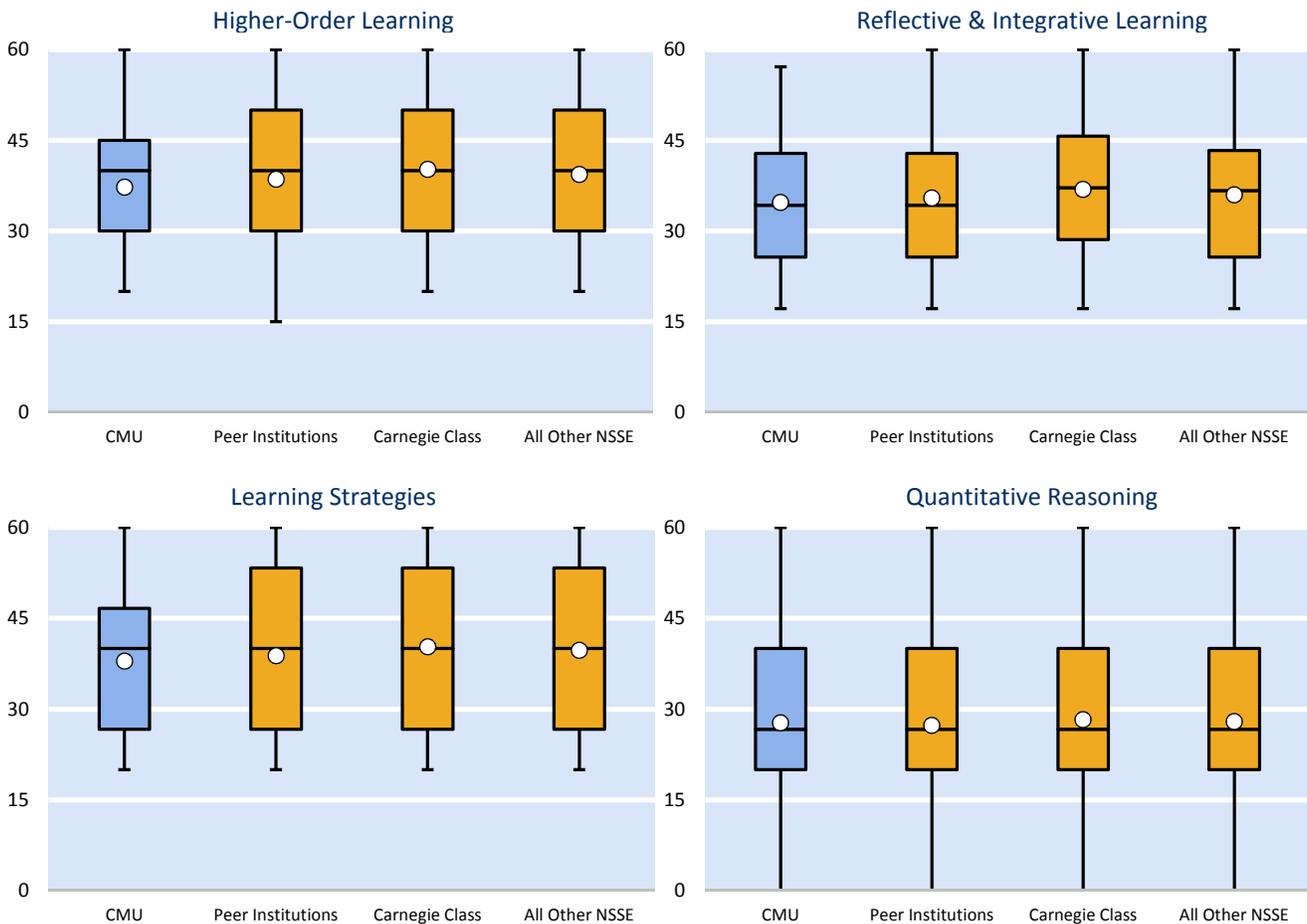

Challenging intellectual and creative work is central to student learning and collegiate quality. Colleges and universities promote student learning by challenging and supporting them to engage in various forms of deep learning. Four Engagement Indicators are part of this theme: *Higher-Order Learning*, *Reflective & Integrative Learning*, *Learning Strategies*, and *Quantitative Reasoning*. Below and on the next page are three views of your results alongside those of your comparison groups.

Mean Comparisons

Engagement Indicator	CMU Mean	Your first-year students compared with					
		Peer Institutions		Carnegie Class		All Other NSSE	
		Mean	Effect size	Mean	Effect size	Mean	Effect size
Higher-Order Learning	37.2	38.6 **	-.10	40.2 ***	-.21	39.4 ***	-.15
Reflective & Integrative Learning	34.7	35.5	-.06	36.9 ***	-.17	36.0 **	-.10
Learning Strategies	38.0	38.9	-.06	40.3 ***	-.17	39.7 ***	-.12
Quantitative Reasoning	27.7	27.3	.02	28.2	-.03	27.9	-.01

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and p before rounding; * $p < .05$, ** $p < .01$, *** $p < .001$ (2-tailed).

Score Distributions

Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25th (bottom of box), 50th (middle line), 75th (top of box), and 95th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

Academic Challenge: First-year students (continued)

Summary of Indicator Items

	CMU	Peer Institutions	Carnegie Class	All Other NSSE
Higher-Order Learning				
<i>Percentage responding "Very much" or "Quite a bit" about how much coursework emphasized...</i>				
	%	%	%	%
4b. Applying facts, theories, or methods to practical problems or new situations	71 	72 	74 	73 
4c. Analyzing an idea, experience, or line of reasoning in depth by examining its parts	66 	72 	74 	73 
4d. Evaluating a point of view, decision, or information source	67 	69 	74 	71 
4e. Forming a new idea or understanding from various pieces of information	65 	66 	71 	69 
Reflective & Integrative Learning				
<i>Percentage of students who responded that they "Very often" or "Often"...</i>				
2a. Combined ideas from different courses when completing assignments	56 	57 	57 	56 
2b. Connected your learning to societal problems or issues	50 	53 	57 	54 
2c. Included diverse perspectives (political, religious, racial/ethnic, gender, etc.) in course discussions or assignments	42 	49 	56 	52 
2d. Examined the strengths and weaknesses of your own views on a topic or issue	58 	61 	65 	63 
2e. Tried to better understand someone else's views by imagining how an issue looks from his or her perspective	64 	66 	69 	68 
2f. Learned something that changed the way you understand an issue or concept	64 	64 	67 	66 
2g. Connected ideas from your courses to your prior experiences and knowledge	78 	77 	78 	77 
Learning Strategies				
<i>Percentage of students who responded that they "Very often" or "Often"...</i>				
9a. Identified key information from reading assignments	75 	78 	82 	81 
9b. Reviewed your notes after class	65 	63 	67 	66 
9c. Summarized what you learned in class or from course materials	62 	63 	66 	64 
Quantitative Reasoning				
<i>Percentage of students who responded that they "Very often" or "Often"...</i>				
6a. Reached conclusions based on your own analysis of numerical information (numbers, graphs, statistics, etc.)	54 	51 	53 	53 
6b. Used numerical information to examine a real-world problem or issue (unemployment, climate change, public health, etc.)	37 	38 	41 	39 
6c. Evaluated what others have concluded from numerical information	37 	38 	40 	39 

Notes: Refer to your *Frequencies and Statistical Comparisons* report for full distributions and significance tests. Item numbering corresponds to the survey facsimile included in your *Institutional Report* and available on the NSSE website.

Academic Challenge: Seniors

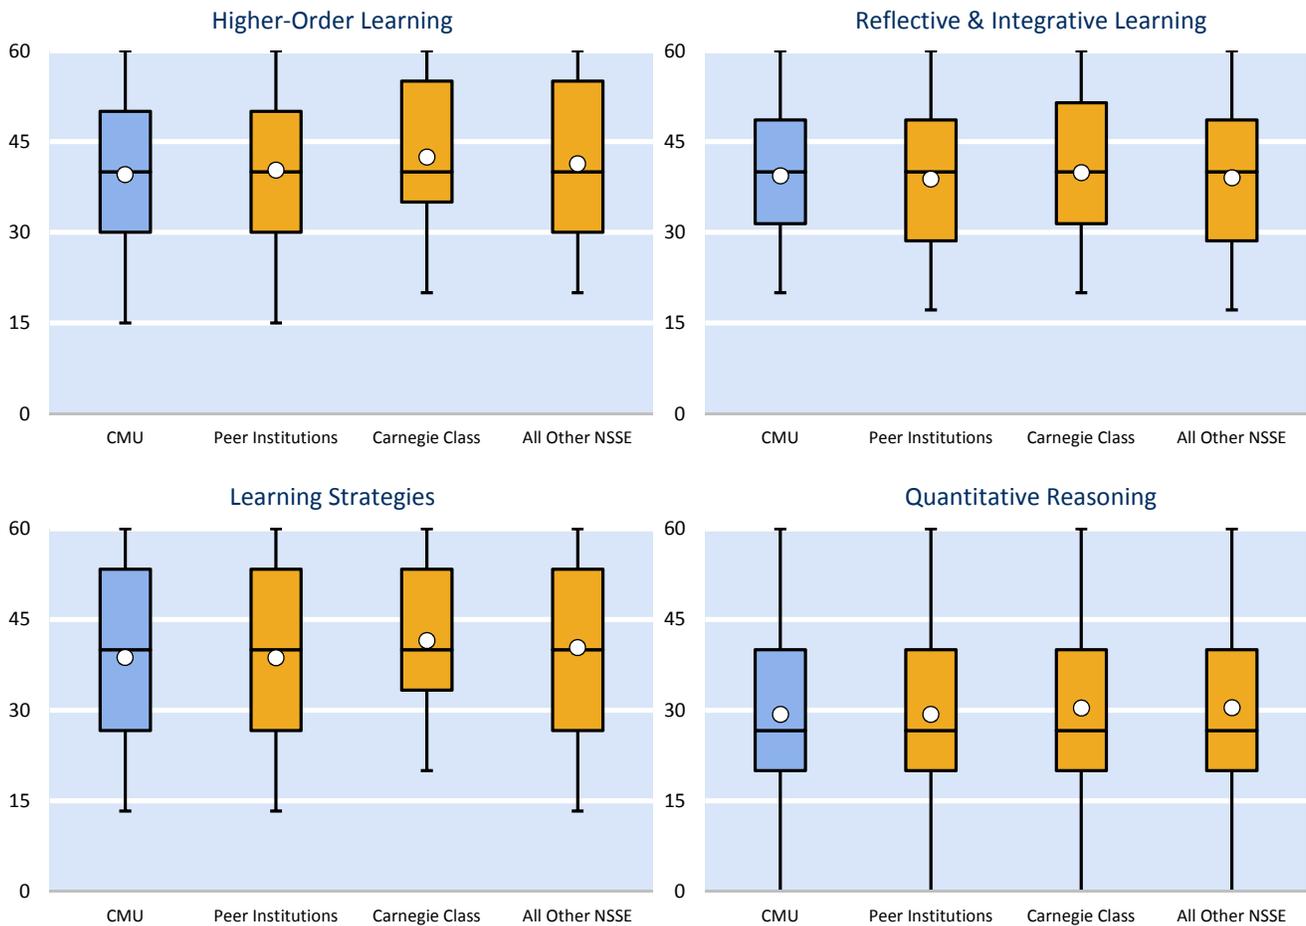

Challenging intellectual and creative work is central to student learning and collegiate quality. Colleges and universities promote student learning by challenging and supporting them to engage in various forms of deep learning. Four Engagement Indicators are part of this theme: *Higher-Order Learning*, *Reflective & Integrative Learning*, *Learning Strategies*, and *Quantitative Reasoning*. Below and on the next page are three views of your results alongside those of your comparison groups.

Mean Comparisons

Engagement Indicator	CMU Mean	Your seniors compared with					
		Peer Institutions		Carnegie Class		All Other NSSE	
		Mean	Effect size	Mean	Effect size	Mean	Effect size
Higher-Order Learning	39.5	40.3	-.06	42.5 ***	-.21	41.4 ***	-.13
Reflective & Integrative Learning	39.4	38.8	.04	39.8	-.04	39.0	.03
Learning Strategies	38.7	38.7	.00	41.5 ***	-.19	40.3 ***	-.11
Quantitative Reasoning	29.3	29.3	.00	30.4 *	-.06	30.4 *	-.06

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and p before rounding; * $p < .05$, ** $p < .01$, *** $p < .001$ (2-tailed).

Score Distributions

Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25th (bottom of box), 50th (middle line), 75th (top of box), and 95th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

Academic Challenge: Seniors (continued)

Summary of Indicator Items

	CMU	Peer Institutions	Carnegie Class	All Other NSSE
Higher-Order Learning				
<i>Percentage responding "Very much" or "Quite a bit" about how much coursework emphasized...</i>				
	%	%	%	%
4b. Applying facts, theories, or methods to practical problems or new situations	78 	79 	81 	80 
4c. Analyzing an idea, experience, or line of reasoning in depth by examining its parts	74 	76 	80 	78 
4d. Evaluating a point of view, decision, or information source	68 	69 	75 	72 
4e. Forming a new idea or understanding from various pieces of information	69 	71 	75 	73 
Reflective & Integrative Learning				
<i>Percentage of students who responded that they "Very often" or "Often"...</i>				
2a. Combined ideas from different courses when completing assignments	79 	74 	73 	72 
2b. Connected your learning to societal problems or issues	66 	64 	67 	64 
2c. Included diverse perspectives (political, religious, racial/ethnic, gender, etc.) in course discussions or assignments	53 	54 	58 	55 
2d. Examined the strengths and weaknesses of your own views on a topic or issue	64 	66 	69 	67 
2e. Tried to better understand someone else's views by imagining how an issue looks from his or her perspective	72 	71 	73 	71 
2f. Learned something that changed the way you understand an issue or concept	69 	69 	72 	70 
2g. Connected ideas from your courses to your prior experiences and knowledge	87 	84 	85 	84 
Learning Strategies				
<i>Percentage of students who responded that they "Very often" or "Often"...</i>				
9a. Identified key information from reading assignments	77 	81 	84 	83 
9b. Reviewed your notes after class	61 	59 	67 	64 
9c. Summarized what you learned in class or from course materials	64 	62 	69 	66 
Quantitative Reasoning				
<i>Percentage of students who responded that they "Very often" or "Often"...</i>				
6a. Reached conclusions based on your own analysis of numerical information (numbers, graphs, statistics, etc.)	52 	52 	55 	56 
6b. Used numerical information to examine a real-world problem or issue (unemployment, climate change, public health, etc.)	42 	43 	46 	46 
6c. Evaluated what others have concluded from numerical information	44 	43 	45 	46 

Notes: Refer to your *Frequencies and Statistical Comparisons* report for full distributions and significance tests. Item numbering corresponds to the survey facsimile included in your *Institutional Report* and available on the NSSE website.

Learning with Peers: First-year students

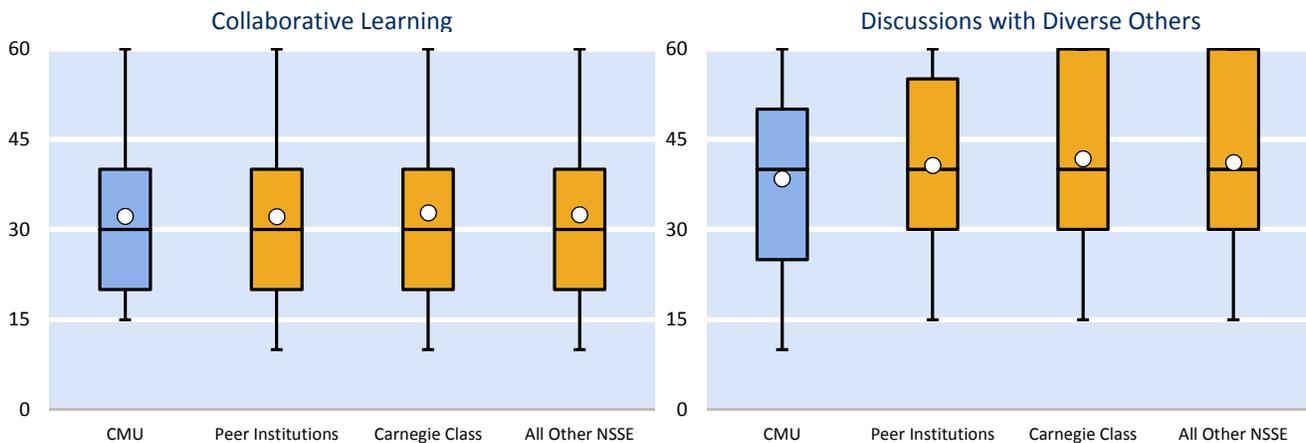

Collaborating with others in mastering difficult material and developing interpersonal and social competence prepare students to deal with complex, unscripted problems they will encounter during and after college. Two Engagement Indicators make up this theme: *Collaborative Learning* and *Discussions with Diverse Others*. Below are three views of your results alongside those of your comparison groups.

Mean Comparisons

Engagement Indicator	CMU Mean	Your first-year students compared with					
		Peer Institutions		Carnegie Class		All Other NSSE	
		Mean	Effect size	Mean	Effect size	Mean	Effect size
Collaborative Learning	32.2	32.1	.00	32.7	-.04	32.4	-.02
Discussions with Diverse Others	38.4	40.6 ***	-.14	41.7 ***	-.21	41.1 ***	-.17

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by pooled standard deviation; Symbols on the Overview page are based on effect size and *p* before rounding; **p* < .05, ***p* < .01, ****p* < .001 (2-tailed).

Score Distributions

Notes: Each box-and-whiskers chart plots the 5th (bottom of lower bar), 25th (bottom of box), 50th (middle line), 75th (top of box), and 95th (top of upper bar) percentile scores. The dot represents the mean score. Refer to Detailed Statistics for your institution's sample sizes.

Summary of Indicator Items

Collaborative Learning

Percentage of students who responded that they "Very often" or "Often"...

	CMU	Peer Institutions	Carnegie Class	All Other NSSE
1e. Asked another student to help you understand course material	50	50	49	50
1f. Explained course material to one or more students	58	57	57	57
1g. Prepared for exams by discussing or working through course material with other students	45	48	51	50
1h. Worked with other students on course projects or assignments	55	52	55	53

Discussions with Diverse Others

Percentage of students who responded that they "Very often" or "Often" had discussions with...

	CMU	Peer Institutions	Carnegie Class	All Other NSSE
8a. People from a race or ethnicity other than your own	62	70	75	73
8b. People from an economic background other than your own	70	73	75	74
8c. People with religious beliefs other than your own	67	70	70	69
8d. People with political views other than your own	65	69	68	68

Experiences with Faculty: First-year students

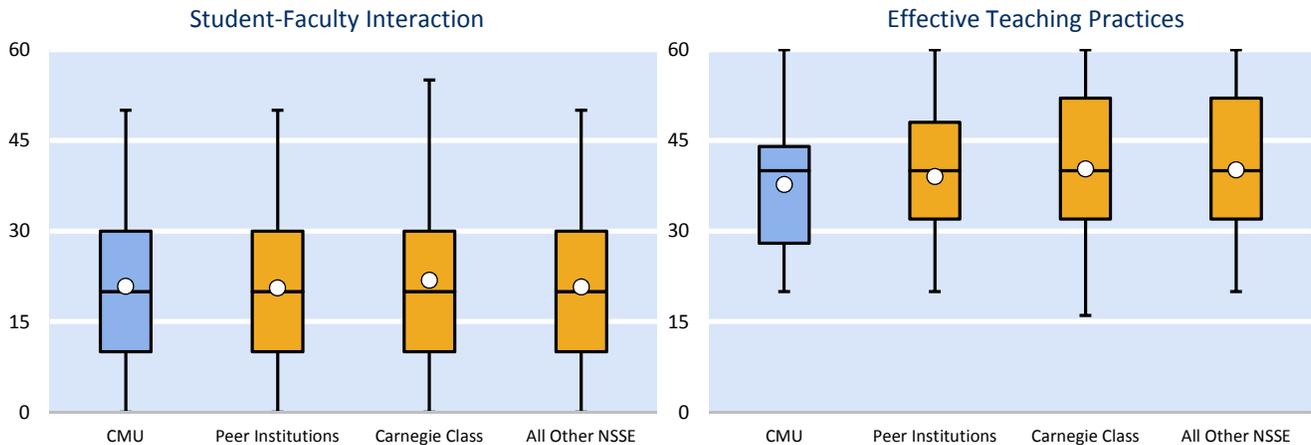

Students learn firsthand how experts think about and solve problems by interacting with faculty members inside and outside of instructional settings. As a result, faculty become role models, mentors, and guides for lifelong learning. In addition, effective teaching requires that faculty deliver course material and provide feedback in student-centered ways. Two Engagement Indicators investigate this theme: *Student-Faculty Interaction* and *Effective Teaching Practices*. Below are three views of your results alongside those of your comparison groups.

Mean Comparisons

Engagement Indicator	CMU Mean	Your first-year students compared with					
		Peer Institutions		Carnegie Class		All Other NSSE

Comparisons with Top 50% and Top 10% Institutions

While NSSE's policy is not to rank institutions (see nsse.indiana.edu/html/position_policies.cfm), the results below are designed to compare the engagement of your students with those attending two groups of institutions identified by NSSE^a for their high average levels of student engagement:

- (a) institutions with average scores placing them in the top 50% of all 2014 and 2015 NSSE institutions, and
- (b) institutions with average scores placing them in the top 10% of all 2014 and 2015 NSSE institutions.

While the average scores for most institutions are below the mean for the top 50% or top 10%, your institution may show areas of distinction where your average student was as engaged as (or even more engaged than) the typical student at high-performing institutions. A check mark (✓) signifies those comparisons where your average score was at least comparable^b to that of the high-performing group. However, the presence of a check mark does not necessarily mean that your institution was a member of that group.

It should be noted that most of the variability in student engagement is within, not between, institutions. Even "high-performing" institutions have students with engagement levels below the average for all institutions.

First-Year Students

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by the pooled standard deviation; **p* < .05, ***p* < .01, ****p* < .001 (2-tailed).

a. Precision-weighted means (produced by Hierarchical Linear Modeling) were used to determine the top 50% and top 10% institutions for each Engagement Indicator from all NSSE 2014 and 2015 institutions, separately for first-year and senior students. Using this method, Engagement Indicator scores of institutions with relatively large standard errors were adjusted toward the mean of all students, while those with smaller standard errors received smaller corrections. As a result, schools with less stable data—even those with high average scores—may not be among the top scorers. NSSE does not publish the names of the top 50% and top 10% institutions because of our commitment not to release institutional results and our policy against ranking institutions.

b. Check marks are assigned to comparisons that are either significant and positive, or non-significant with an effect size > -.10.

a. Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

b. Standard deviation is a measure of the amount the individual scores deviate from the mean of all the scores in the distribution.

c. Standard error of the mean, used to compute a confidence interval (CI) around the sample mean. For example, the 95% CI (equal to the sample mean +/- 1.96 x SEM) is the range that is 95% likely to contain the true population mean.

d. A percentile is the point in the distribution of student-level EI scores at or below which a given percentage of EI scores fall.

e. Degrees of freedom used to compute the *t*-tests. Values vary from the total Ns due to weighting and whether equal variances were assumed.

f. Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

g. Effect size is the mean difference divided by the pooled standard deviation.

b. Standard deviation is a measure of the amount the individual scores deviate from the mean of all the scores in the distribution.

c. Standard error of the mean, used to compute a confidence interval (CI) around the sample mean. For example, the 95% CI (equal to the sample mean +/- 1.96 x SEM) is the range that is 95% likely to contain the true population mean.

d. A percentile is the point in the distribution of student-level EI scores at or below which a given percentage of EI scores fall.

e. Degrees of freedom used to compute the *t*-tests. Values vary from the total Ns due to weighting and whether equal variances were assumed.

f. Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

g. Effect size is the mean difference divided by the pooled standard deviation.

NSSE 2015
High-Impact Practices
Central Michigan University

About Your High-Impact Practices Report

Due to their positive associations with student learning and retention, certain undergraduate opportunities are designated "high-impact." High-Impact Practices (HIPs) share several traits: They demand considerable time and effort, facilitate learning outside of the classroom, require meaningful interactions with faculty and students, encourage collaboration with diverse others, and provide frequent and substantive feedback. As a result, participation in these practices can be life-changing (Kuh, 2008). NSSE founding director George Kuh recommends that institutions should aspire for all students to participate in at least two HIPs over the course of their undergraduate experience—one during the first year and one in the context of their major (NSSE, 2007).

NSSE asks students about their participation in the six HIPs shown in the box at right. This report provides information on the first three for first-year students and all six for seniors. Unlike most questions on the NSSE survey, the HIP questions are not limited to the current school year. Thus, seniors' responses include participation from prior years.

High-Impact Practices in NSSE

- Learning community or some other formal program where groups of students take two or more classes together
- Courses that included a community-based project (service-learning)
- Work with a faculty member on a research project
- Internship, co-op, field experience, student teaching, or clinical placement
- Study abroad
- Culminating senior experience (capstone course, senior project or thesis, comprehensive exam, portfolio, etc.)

Report Sections

Participation Comparisons (p. 3)

Displays HIP participation for your first-year and senior students compared with that of students at your comparison group institutions. Two views present insights into your students' HIP participation:

Overall HIP Participation

Displays the percentage of first-year and senior students who participated in one HIP and in two or more HIPs, relative to those at your comparison group institutions.

Statistical Comparisons

Comparisons of participation in each HIP and overall for your first-year and senior students relative to those at comparison group institutions, with tests of significance and effect sizes (see below).

Response Detail (pp. 5-7)

Provides complete response frequencies for the relevant HIP questions for your first-year and senior students and those at your comparison group institutions.

Participation by Student Characteristics (p. 8)

Displays your students' participation in each HIP by selected student characteristics.

Interpreting Comparisons

The "Statistical Comparisons" section on page 3 reports both statistical significance and effect size. Effect size indicates the practical importance of an observed difference. NSSE research has found that interpretations vary by HIP: For service-learning, internships, study abroad, and culminating senior experiences, an effect size of about .2 may be considered small, .5 medium, and .8 large. For learning community and research with faculty, an effect size of about .1 may be considered small, .3 medium, and .5 large (Rocconi & Gonyea, 2015).

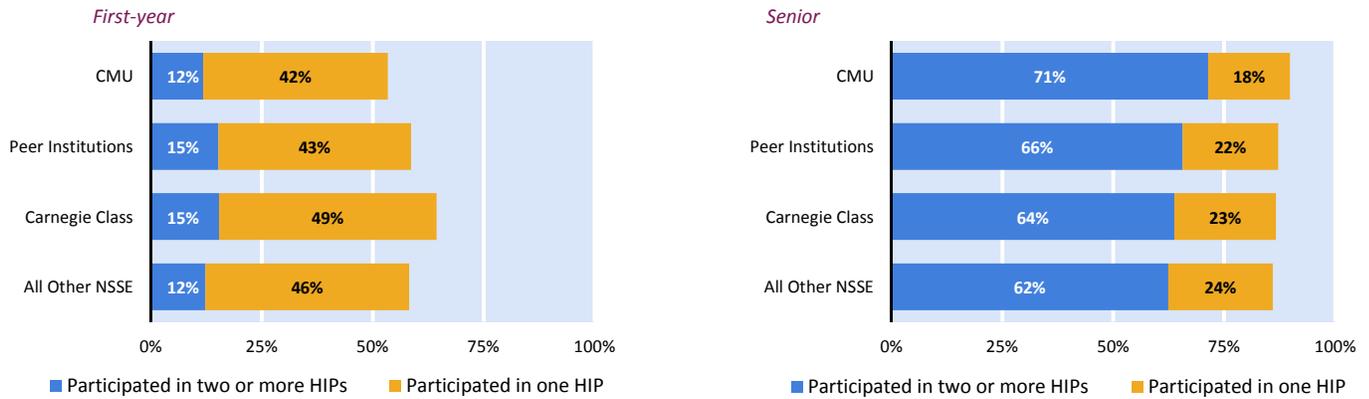

HIP participation varies more among students within an institution than it does between institutions, like many experiences and outcomes in higher education. As a result, focusing attention on overall participation rates amounts to examining the tip of the iceberg. It's equally important to understand how student engagement (including HIP participation) varies *within* your institution. The table on page 8 provides an initial look at how HIP participation varies by selected student characteristics. The Report Builder—Institution Version and your *Major Field Report* (both to be released in the fall) offer further perspectives on internal variation and can help you investigate your students' HIP participation in depth.

Kuh, G. D. (2008). *High-impact educational practices: What they are, who has access to them, and why they matter*. Washington, DC: Association of American Colleges and Universities. National Survey of Student Engagement (2007). *Experiences that matter: Enhancing student learning and success—Annual Report 2007*. Bloomington, IN: Indiana University Center for Postsecondary Research.

Rocconi, L., & Gonyea, R. M. (2015). Contextualizing student engagement effect sizes: An empirical analysis. Paper presented at the Association for Institutional Research Annual Forum, Denver, CO.

Overall HIP Participation

The figures below display the percentage of students who participated in High-Impact Practices. Both figures include participation in a learning community, service-learning, and research with faculty. The Senior figure also includes participation in an internship or field experience, study abroad, and culminating senior experience. The first segment in each bar shows the percentage of students who participated in at least two HIPs, and the full bar (both colors) represents the percentage who participated in at least one.

Statistical Comparisons

The table below compares the percentage of your students who participated in a High-Impact Practice, including the percentage who participated overall (at least one, two or more), with those at institutions in your comparison groups.

	CMU	Peer Institutions	Effect size ^a	Carnegie Class	Effect size ^a	All Other NSSE	Effect size ^a
<i>First-year</i>	%	%		%		%	
11c. Learning Community	14	23 ***	-.24	19 ***	-.14	16	-.05
12. Service-Learning	50	48	.03	58 ***	-.17	52	-.05
11e. Research with Faculty	4	5 *	-.08	6 **	-.13	6 **	-.10
Participated in at least one	53	59 **	-.11	64 ***	-.22	58 **	-.10
Participated in two or more	12	15 **	-.10	15 **	-.11	12	-.02
<i>Senior</i>	%	%		%		%	
11c. Learning Community	36	30 ***	.13	27 ***	.20	25 ***	.25
12. Service-Learning	67	61 ***	.13	66	.01	61 ***	.12
11e. Research with Faculty	24	26	-.05	24	.02	25	.00
11a. Internship or Field Exp.	56	53 *	.07	51 ***	.10	51 ***	.10
11d. Study Abroad	16	18	-.05	14	.04	15	.04
11f. Culminating Senior Exp.	53	49 **	.09	48 ***	.11	46 ***	.14
Participated in at least one	90	87 **	.08	87 **	.10	86 ***	.12
Participated in two or more	71	66 ***	.12	64 ***	.16	62 ***	.19

Note. Percentage of students who responded "Done or in progress" except for service-learning which is the percentage who responded that at least "Some" courses included a community-based project.

a. Cohen's h: The standardized difference between two proportions. Effect size indicates the practical importance of an observed difference. NSSE research finds for service-learning, internships, study abroad, and culminating senior experiences, an effect size of about .2 may be considered small, .5 medium, and .8 large.

For learning community and research with faculty, an effect size of about .1 may be considered small, .3 medium, and .5 large (Rocconi & Gonyea, 2015).

p* < .05, *p* < .01, ****p* < .001 (z-test comparing participation rates).

Note. All results weighted by institution-reported sex and enrollment status (and by institution size for comparison groups).

Rocconi, L., & Gonyea, R. M. (2015). Contextualizing student engagement effect sizes: An empirical analysis. Paper presented at the Association for Institutional Research Annual Forum, Denver, CO.

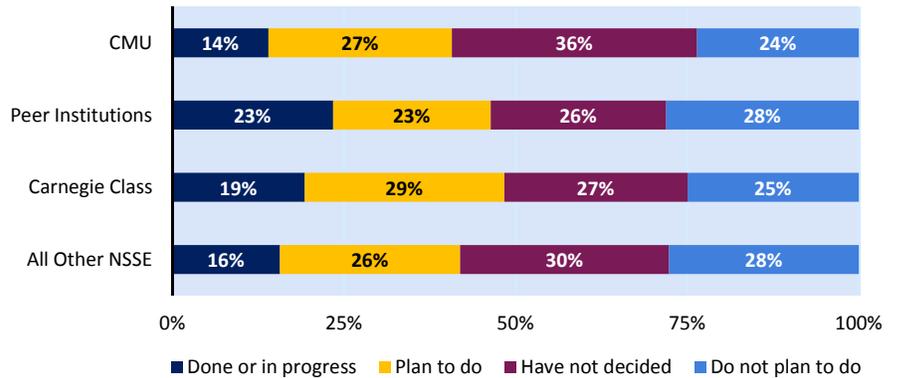

First-year Students

The figures below display further details about each High-Impact Practice for your first-year students and those of your comparison groups.

Learning Community

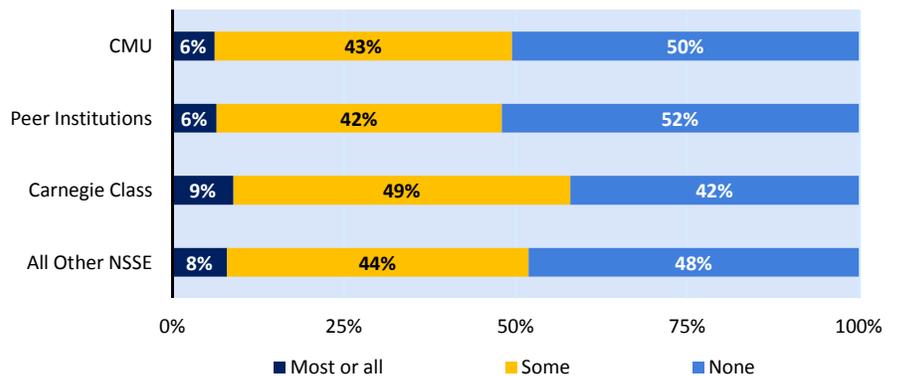

Which of the following have you done or do you plan to do before you graduate?

Participate in a learning community or some other formal program where groups of students take two or more classes together.

Service-Learning

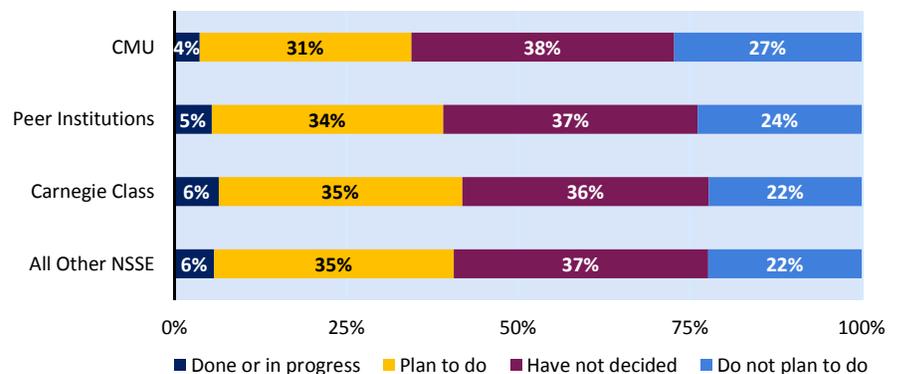

About how many of your courses at this institution have included a community-based project (service-learning)?

Research with a Faculty Member

Which of the following have you done or do you plan to do before you graduate?

Work with a faculty member on a research project.

Note: Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

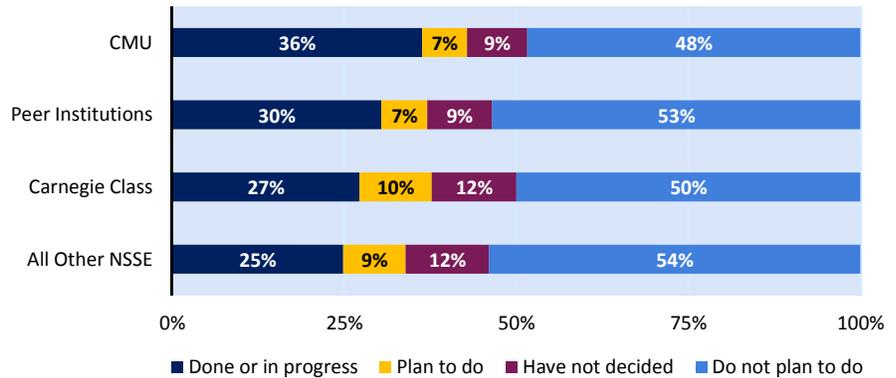

Seniors

The figures below display further details about each High-Impact Practice for your seniors and those of your comparison groups.

Learning Community

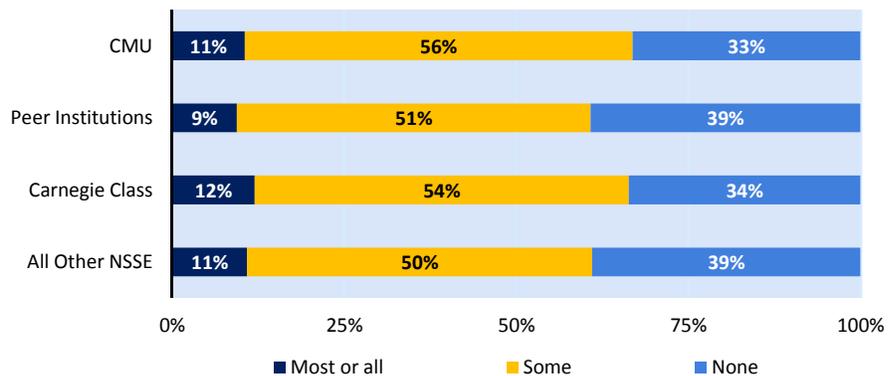

Which of the following have you done or do you plan to do before you graduate?

Participate in a learning community or some other formal program where groups of students take two or more classes together.

Service-Learning

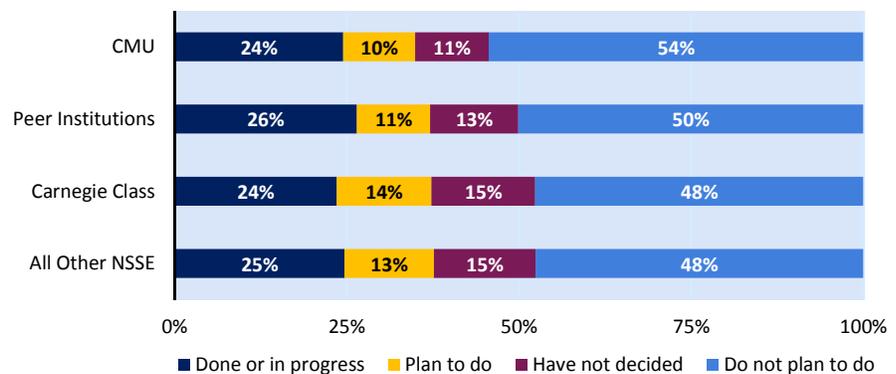

About how many of your courses at this institution have included a community-based project (service-learning)?

Research with a Faculty Member

Which of the following have you done or do you plan to do before you graduate?

Work with a faculty member on a research project.

Note: Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

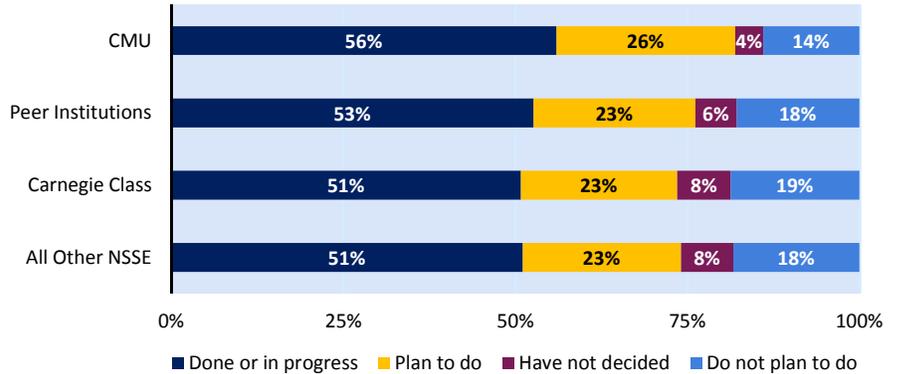

Seniors (continued)

The figures below display further details about each High-Impact Practice for your seniors and those of your comparison groups.

Internship or Field Experience

Which of the following have you done or do you plan to do before you graduate?

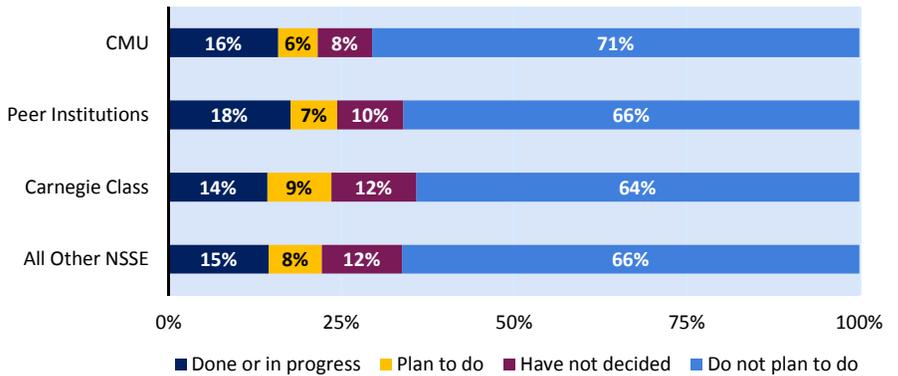

Participate in an internship, co-op, field experience, student teaching, or clinical placement.

Study Abroad

Which of the following have you done or do you plan to do before you graduate?

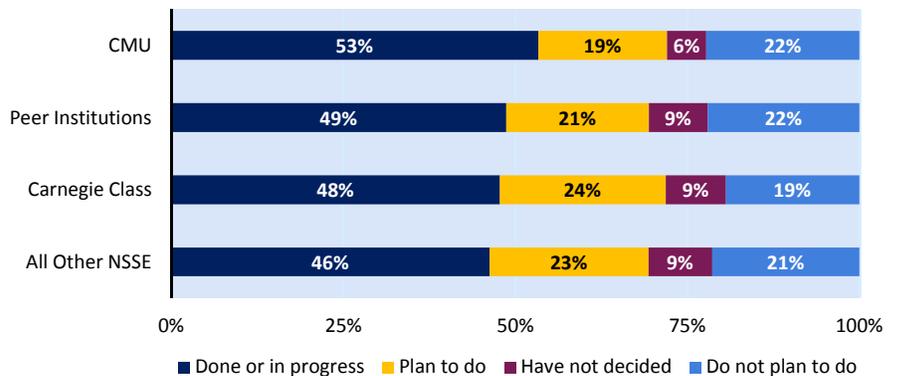

Participate in a study abroad program.

Culminating Senior Experience

Which of the following have you done or do you plan to do before you graduate?

Complete a culminating senior experience (capstone course, senior project or thesis, comprehensive exam, portfolio, etc.).

Note: Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

Participation in High-Impact Practices by Student Characteristics

The table below displays the percentage of your students who participated in each HIP by selected student characteristics. Examining participation rates for different groups offers insight into how engagement varies within your student population.

	First-year			Senior					
	Learning Community	Service-Learning	Research with Faculty	Learning Community	Service-Learning	Research with Faculty	Internship or Field Experience	Study Abroad	Culminating Senior Experience
Sex^a	%	%	%	%	%	%	%	%	%

Selected Comparison Groups

Central Michigan University

Customized Comparison Groups

The NSSE *Institutional Report* displays core survey results for your students alongside those of three comparison groups. In May, your institution was invited to customize these groups via the "Report Form" on the Institution Interface. This report summarizes how your comparison groups were constructed and lists the institutions within them.

NSSE comparison groups may be customized by (a) identifying specific institutions from the list of all 2014 and 2015 NSSE participants, (b) composing the group by selecting institutional characteristics, or (c) a combination of these. Institutions that choose not to customize receive default groups^a that provide relevant comparisons for most institutions.

Institutions that appended additional question sets in the form of topical modules or through consortium participation were also invited to customize comparison groups for the corresponding reports by choosing from the institutions where the question sets were administered. The default for these groups is all other 2014 (if applicable) and 2015 institutions where the questions were included. Please note: Comparison groups for additional question sets (topical modules and consortium questions) are documented within those reports.

Report Comparisons

Comparison groups are located in the institutional reports as illustrated in the mock report at right. In this example, the three groups are "GLC Peers," "Private Master's S," and "NSSE 2014 & 2015."

Reading This Report

This report consists of three sections that provide details for each of your comparison groups, illustrated at right.

Comparison Group Name

The name assigned to the comparison group is listed here.

How Group was Constructed

Indicates whether your group was drawn from a list, built based on criteria, or is the default group. If institutional characteristics were used to build your comparison group, they are listed here.

Institution List

The names, cities and states or provinces of the comparison institutions are listed for your reference. NSSE 2014 participants are identified with an asterisk.

Comparison Group 1: GLC Peers

This section summarizes how this group was identified, including selection criteria and whether the default group was used. This is followed by the resulting list of institutions in this group.

Date submitted	6/26/15
How was this comparison group constructed?	Your institution retained the default comparison group (region and sector). Your default group is: Region (Gr Lakes); Sector (Priv)
Group description	Our institution is satisfied with the default comparison for this group.

GLC Peers (N=106)

Adrian College (Adrian, MI)	Franciscan University of Steubenville (Steubenville, OH)
Albion College (Albion, MI)	Franklin College (Franklin, IN)
Alma College (Alma, MI)	Franklin University (Columbus, OH)
Alverno College (Milwaukee, WI)	Goshen College (Goshen, IN)
American InterContinental University Online (Hoffman Estates, IL)	Grace College and Theological Seminary (Winona Lake, IN)
Anderson University (Anderson, IN)	Greenville College (Greenville, IL)
Andrews University (Berrien Springs, MI)	Hanover College (Hanover, IN)
Aquinas College (Grand Rapids, MI)	Hiram College (Hiram, OH)

a. The default groups are:

- Comparison Group 1: For institutions not in a NSSE consortium, this group contains 2014 and 2015 NSSE institutions in the same geographic region and sector (public/private). For consortium institutions, it contains results for the other 2014 (if applicable) and 2015 consortium members.
- Comparison Group 2: All other 2014 and 2015 U.S. NSSE institutions sharing your institution's Basic Carnegie Classification. (Canadian institutions are not classified by the Carnegie Foundation, and must identify a comparison group.)
- Comparison Group 3: All other 2014 and 2015 U.S. NSSE institutions (2014 and 2015 Canadian participants are also included in this group for Canadian institutions).

Comparison Group 1: Peer Institutions

This section summarizes how this group was identified, including selection criteria and whether the default group was used. This is followed by the resulting list of institutions in this group.

Date submitted	5/18/15
How was this comparison group constructed?	Your institution customized this comparison group by selecting from the list of all 2014 and 2015 NSSE participants.
Group description	No description provided

Peer Institutions (N=9)

- Ball State University (Muncie, IN)
- Bowling Green State University (Bowling Green, OH)
- East Carolina University (Greenville, NC)
- Eastern Michigan University (Ypsilanti, MI)*

*2014 participant

From Benchmarks to Engagement Indicators and High-Impact Practices

Sets of related survey items are now organized into ten *Engagement Indicators*, which are grouped within four themes adapted from NSSE's former Benchmarks of Effective Educational Practice. Forty-seven survey items are included in the Engagement Indicators (see reverse side). In addition, six items from the former Enriching Educational Experiences benchmark are now reported separately as *High-Impact Practices*.

NSSE Benchmarks 2000 - 2012

**Level of
Academic
Challenge**

**Key
Changes**

Expanded to focus on distinct dimensions of academic effort, including new topics of interest. In addition, key items on reading, writing, and study time will be reported in this theme.

Engagement Indicators

Higher-Order Learning

Reflective & Integrative Learning

Learning Strategies

Quantitative Reasoning

Theme: Academic Challenge

**Active and
Collaborative
Learning**

Modified to emphasize student-to-student collaboration. Updated diversity items from Enriching Educational Experiences have been moved here.

Collaborative Learning

Discussions with Diverse Others

Theme: Learning with Peers

**Student-
Faculty
Interaction**

The updated Student-Faculty Interaction indicator is joined by a second measure about effective teaching practices.

Student-Faculty Interaction

Effective Teaching Practices

Theme: Experiences with Faculty

**Supportive
Campus
Environment**

Expanded to focus separately on interactions with key people at the institution and perceptions of the institution's learning environment.

Quality of Interactions

Supportive Environment

Theme: Campus Environment

**Enriching
Educational
Experiences**

Selected items are reported separately as *High-Impact Practices*. Items measuring discussions with diverse others were moved to the Learning with Peers theme.

High-Impact Practices

- ◆ Learning Community
- ◆ Service-Learning
- ◆ Research with a Faculty Member
- ◆ Internship or Field Experience
- ◆ Study Abroad
- ◆ Culminating Senior Experience

Engagement Indicators and Items

Academic Challenge

Higher-Order Learning

During the current school year, how much has your coursework emphasized the following:

- Applying facts, theories, or methods to practical problems or new situations
- Analyzing an idea, experience, or line of reasoning in depth by examining its parts
- Evaluating a point of view, decision, or information source
- Forming a new idea or understanding from various pieces of information

Reflective & Integrative Learning

During the current school year, how often have you:

- Combined ideas from different courses when completing assignments
- Connected your learning to societal problems or issues
- Included diverse perspectives (political, religious, racial/ethnic, gender, etc.) in course discussions or assignments
- Examined the strengths and weaknesses of your own views on a topic or issue
- Tried to better understand someone else's views by imagining how an issue looks from his or her perspective
- Learned something that changed the way you understand an issue or concept
- Connected ideas from your courses to your prior experiences and knowledge

Learning Strategies

During the current school year, how often have you:

- Identified key information from reading assignments
- Reviewed your notes after class
- Summarized what you learned in class or from course materials

Quantitative Reasoning

During the current school year, how often have you:

- Reached conclusions based on your own analysis of numerical information (numbers, graphs, statistics, etc.)
- Used numerical information to examine a real-world problem or issue (unemployment, climate change, public health, etc.)
- Evaluated what others have concluded from numerical information

Learning with Peers

Collaborative Learning

During the current school year, how often have you:

- Asked another student to help you understand course material
- Explained course material to one or more students
- Prepared for exams by discussing or working through course material with other students
- Worked with other students on course projects or assignments

Discussions with Diverse Others

During the current school year, how often have you had discussions with people from the following groups:

- People from a race or ethnicity other than your own
- People from an economic background other than your own
- People with religious beliefs other than your own
- People with political views other than your own

Experiences with Faculty

Student-Faculty Interaction

During the current school year, how often have you:

- Talked about career plans with a faculty member
- Worked with a faculty member on activities other than coursework (committees, student groups, etc.)
- Discussed course topics, ideas, or concepts with a faculty member outside of class
- Discussed your academic performance with a faculty member

Effective Teaching Practices

During the current school year, to what extent have your instructors done the following:

- Clearly explained course goals and requirements
- Taught course sessions in an organized way
- Used examples or illustrations to explain difficult points
- Provided feedback on a draft or work in progress
- Provided prompt and detailed feedback on tests or completed assignments

Campus Environment

Quality of Interactions

Indicate the quality of your interactions with the following people at your institution:

- Students
- Academic advisors
- Faculty
- Student services staff (career services, student activities, housing, etc.)
- Other administrative staff and offices (registrar, financial aid, etc.)

Supportive Environment

How much does your institution emphasize the following:

- Providing support to help students succeed academically
- Using learning support services (tutoring services, writing center, etc.)
- Encouraging contact among students from different backgrounds (social, racial/ethnic, religious, etc.)
- Providing opportunities to be involved socially
- Providing support for your overall well-being (recreation, health care, counseling, etc.)
- Helping you manage your non-academic responsibilities (work, family, etc.)
- Attending campus activities and events (performing arts, athletic events, etc.)
- Attending events that address important social, economic, or political issues

High-Impact Practice Items

Which of the following have you done or do you plan to do before you graduate?

- Participate in a learning community or some other formal program where groups of students take two or more classes together
- Participate in an internship, co-op, field experience, student teaching, or clinical placement

- Participate in a study abroad program
- Work with a faculty member on a research project
- Complete a culminating senior experience (capstone course, senior project or thesis, comprehensive exam, portfolio, etc.)

- *About how many of your courses at this institution have included a community-based project (service-learning)?*

Comparison Group 3: All Other NSSE

This section summarizes how this group was identified, including selection criteria and whether the default group was used. This is followed by the resulting list of institutions in this group.

Date submitted	5/18/15
How was this comparison group constructed?	Your institution retained the default comparison group (NSSE 2014 and 2015 U.S. institutions).
Group description	All other current- and prior-year NSSE institutions

All Other NSSE (N=963)

All other NSSE 2014 and 2015 U.S. participants

Dear Colleague,

Thank you for committing yourself to excellence in everything you do as a part of the Office of Student Success. The coming year represents an opportunity for us to support students as they explore, discover and come to understand themselves and the larger global community in which we live and work. As we listen and provide support and encouragement this year, let's remember to maintain some balance and focus on the essential reason our jobs exist – to empower progress.

Together, we help enhance the overall CMU experience for students. Professionalism, in the course of our pursuits, is of the utmost importance. From the tone and content of an email to the way we greet others as we walk across campus, our day-to-day attitude and behavior matters. Let's be a model of excellence and convey poise, passion and professionalism in the work we do together.

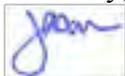

Our efforts should encourage meaningful personal connections – connections that support healthy decisions and engaged learning. While convenient, the use of technology, i.e. an email, is not always the best option to encourage these connections. There are innovative ways to utilize social networking, video chatting, instant messaging, wikis and applications like Skype to aid in our efforts. Relationship building, however, extends beyond viewing profiles or posting event reminders. We need to get personal with students. Ask about hopes, dreams and academic goals. Share their passion.

We are in the relationship business. Let's help students connect and actually feel connected! Help them put away phones, pause texting for a couple hours, take out the ear buds, log off Netflix and get involved in a personal discussion, campus event, or registered student organization or club sports team.

Our passion, positive outlook and integrity make all the difference in what others see, hear and feel about their own "CMU Experience." At the end of the day, it truly does matter what we chose to model and inspire. I hope we each continue to empower progress in ways that promote optimism, hope and possibility. Together, let's model excellence – a continual drive to be better than yesterday. When we see opportunities for a new or innovative practice, let's speak up. When we have a chance to help, let's stand out to help create what could be possible. If we can do this, we will empower progress.

Let's enjoy a year filled with challenge and the pride of completing meaningful work together!

Sincerely,

Talking Points

Who are we?

The Office of Student Success serves as an information and support center for CMU students, faculty, and staff to promote best practices, optimize the student experience, and increase student degree completion.

What do we do?

Collaboratively, we ***Empower Progress!***

- Assist students to set and achieve academic and personal goals,
- Identify and help improve conditions that slow or prevent student progress in earning a degree, and
- Aid university partners in promoting a culture of success.

What should parents/students know?

- We monitor and help support student progress with degree requirements for timely completion.
- We actively engage with students to support their achievement of academic and life goals, while offering critical feedback to aid progress.

AY 2014-2015 Annual Report
Respectfully submitted July 31, 2015
Jason M. Bentley

Empowering Progress

The OSS maintains collaborative relationships across campus, supports the enrollment goals of each college, encourages student use of educational resources, provides success coaching services, promotes best practices concerning student success and persistence, investigates potential barriers to student success, and recommends strategies to help optimize the CMU experience.

Mission

The Office of Student Success (OSS) supports the university's mission by (a) empowering students to achieve academic and personal goals, and (b) identifying and helping to mitigate conditions which slow or prevent progression to graduation, and (c) aid university partners in promoting a culture of success.

Vision

The Office of Student Success (OSS) serves as an information and support center for students, faculty, and staff to promote best practice, optimize the student experience, and increase degree completion.

Using a five-point focus, we...

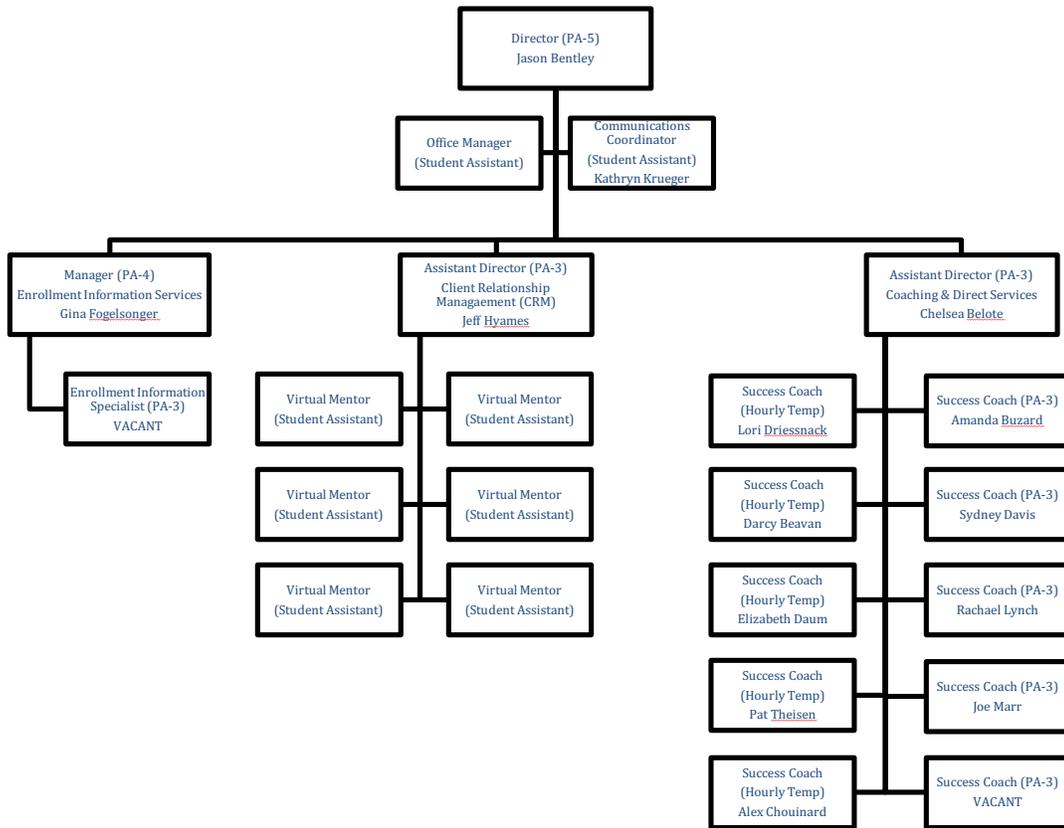

- Empower progress ***by college, department, office, individual***
- Identify at-risk students ***using predictive factors***
- Surface degree completion issues and opportunities ***utilizing progress markers***
- Hardwire intervention ***utilizing available and evolving technologies***
- Intervene with at-risk and off-course students ***through intentional communication initiatives and intensive coaching services***

Our Values

The Office of Student Success...

- Provides clear, concise, and timely information concerning student success and persistence to the university community.
- Helps new students acclimate to Central Michigan University.
- Assists all Mount Pleasant campus students in connecting with the appropriate resources in a timely and personal manner.
- Collaborates with colleges, advisors, and student service units to develop and maintain common tools to assist students with academic planning and progression to degree attainment.
- Partners with colleges, faculty, and student service units to identify and intervene with students who are not making good progress toward timely degree attainment.
- Provide educational opportunities and resources for students to sharpen academic skills.
- Help develop data-driven initiatives and programs meant to help recruit and retain students.
- Stay current with research and practices within the field of student success and retention.

Organizational Chart of Functional Reporting

Employee Compensation Information

Success Coaches:

Within the Office of Student Success, Success Coaches are considered temporary staff at Central Michigan University. This meaning, coaches are paid at an hourly rate and do not get compensated for holiday or leave of absence. Pay periods are released in accordance with the bi-weekly pay schedule (https://www.cmich.edu/fas/fsr/OAC/Payroll/Calendars_Schedules/Pages/Calendars_Payroll.aspx)

Weekly Hours:

As a part-time staff member, all employees are able to work the maximum amount of hours approved. Please see available hours in accordance with academic calendar.

- **July 1 – June 30** – 29hrs per week

***Note** - As an employee, if you feel your work load requires you to work more than the allotted amount of hours per week, please collaborate with your direct supervisor to negotiate additional compensation.

Vacation:

Personal, extended medical, or immediate family member leave of absence will not be compensated. You must request specific dates of absence with your direct supervisor at least 24 hours or 1-week prior time off.

***Note** - If an emergency, please contact your direct supervisor's cell phone number. All extended medical leave must be approved with diagnosis and expected length of disability to direct supervisor.

Pay Stubs & W2 Forms:

After your bi-weekly timesheet has been submitted, 3 days prior to your pay date you are able to access your online pay statement.

(https://www.cmich.edu/fas/fsr/OAC/Payroll/My_Pay/Pages/default.aspx)

Or

1. Login to CentralLink at cmich.edu
2. My Account
3. Scroll down, My Work Day
4. Click, My Pay Statement

My Work Day

My Pay Statement
View your current or previous pay statements.

Total Compensation
View your total compensation statement.

5. Select the date

6. **Timesheet:**

Time sheets must be manually calculated and submitted to your direct supervisor bi-weekly. Please see the timesheet sample and instructions below.

Add your name and campus ID#

Name: _____

Campus #: _____

Manually input when you arrive and leave for work on a daily basis.

You will need to manually calculate the total hours you worked each day.

	Date	In (Time)	Out (Time)	In (Time)	Out (Time)	In (Time)	Out (Time)	Total Hours
Sunday								
Monday	6/9/2014	8:00 AM	12:00 PM	1:00 PM	5:00 PM			8
Tuesday	6/10/2014	8:30 AM	12:00 PM	1:00 PM	5:00 PM			7.5
Wednesday	6/11/2014	8:00 AM	12:00 PM	1:00 PM	5:00 PM			8
Thursday	6/12/2014	8:00 AM	12:00 PM	1:00 PM	5:00 PM			8
Friday	6/13/2014	8:00 AM	12:00 PM	1:00 PM	5:00 PM			8
Saturday								
Sunday		8:00 am to 12:00 pm = 4 hours		1:00 pm to 5:00 pm = 4 hours				4 hours + 4 hours = 8 total hours
Monday	6/16/2014							8

Policies and Procedures

University Policies

- i. **FERPA-** FERPA stands for Family Educational Rights and Privacy Act (sometimes called the Buckley Amendment). Passed by Congress in 1974, the Act helps protect the privacy and accuracy of student educational records. Student educational records are considered confidential and may **not** be released without the written consent of the student. *****Note***** Please consult your direct supervisor and our FERPA guideline document for more information on regulations.
- ii. **News Releases**
- iii. **Affirmative Action / Equal Opportunity** – Central Michigan University affirms its continued commitment to equal educational and employment opportunity and to the elimination of prohibited discrimination within the institution. The University recognizes that nondiscrimination and equal opportunity are legally, socially and morally necessary and that it must take affirmative action to ensure that these concepts are realized. The University is especially committed to creating and supporting a campus composed of diverse and multicultural faculty, staff and students because doing so will benefit its faculty, staff and students. Some of these expected benefits include the following:
 - An educational curriculum that deals with diversity issues and thereby helps develop important skills such as flexibility, understanding, critical thinking, and teamwork.
 - A diverse University community, which has a positive effect on academic achievement and on over-all satisfaction with the University experience.
 - A diverse learning environment where students are more likely to feel comfortable interacting with people different from themselves, to become more aware of racial, ethnic and other cultural issues, and to promote tolerance in other aspects of their lives beyond the University.

Academic Policies

- iv. **Academic Probation-** At the end of each semester or summer session, a student whose cumulative grade point average falls within the range for the interval of credit hours shown in the following table is placed on academic probation. The range is determined by attempted hours or total hours; whichever is greater. Total hours include credits earned at CMU as well as transfer credits or hours earned in any other manner.

The university notifies students who are placed on academic probation, and encourages them to seek counseling and assistance. If a student is on academic probation for three consecutive semesters the student may be academically dismissed from the university.

Attempted/Total Credit Hours	GPA Range for Dismissal/Suspension	GPA Range for Probation
1-18	0.0-0.99	1.00-1.99
19-35	0.0-1.49	1.50-1.99
36-45	0.0-1.69	1.70-1.99
46-58	0.0-1.79	1.80-1.99
59-71	0.0-1.84	1.85-1.99
72-85	0.0-1.89	1.90-1.99
86 and over	0.0-1.94	1.95-1.99

Academic Suspension Policy- New freshmen and transfer students are subject to academic suspension if their first semester grade point average falls below the range for academic probation. Suspended students may re-enroll for the next academic session if granted permission by the Committee on Rematriculation. Permission to re-enroll for the next session is requested through the Academic Assistance Programs office. A written appeal and a personal interview are required, following the procedures outlined under Rematriculation in the Admissions section of the Bulletin.

Academic Dismissal Policy- A student is subject to academic dismissal if his or her point average falls below the point average range for probation, or when the student has been on academic probation for three consecutive semesters and has not made strong academic gains. The university reserves the right to cancel the matriculation of any student at the end of session when his or her total record indicates that such action is desirable. Likewise, a student whose total record shows considerable ability and marked improvement may be given special consideration. The university notifies students whose matriculation has been cancelled.

Rematriculation- A student whose eligibility to enroll (matriculation) has been cancelled for academic reasons may apply for rematriculation to the Committee on Rematriculation, in care of the Director of Academic Assistance Programs. Students who have been suspended (applies only to first semester freshmen or transfers) may apply for immediate rematriculation. Normally, petitions for rematriculation for students who have been dismissed will not be considered until 12 months after the student has been dismissed.

A student who has been dismissed twice will be rematriculated only under extraordinary circumstances and then not until 24 months after the student's second dismissal. Permission to return is not automatic, but is based upon

the merits of each case. Students may be expected to show academic improvement at the community college. Students will be expected to show solutions to the difficulties that prevented them from achieving academic competence.

A written application and a personal interview are required. Supporting documents may also be requested. Applications may be obtained from the Academic Assistance Programs office. Completed applications should be submitted at the time of the personal interview. Interviews for students seeking to return for the Fall semester will be held in June and July; interviews for students seeking to return for Summer semester will be held in March and April. Last minute interviews are not acceptable.

These are only a select few of the university's policies and guidelines. Please consult your direct supervisor or access the link below for more information.

<https://www.cmich.edu/fas/hr/HRAssociatedVicePresident/Pages/Policies.aspx>

Central Notification System- Central Michigan University is committed to the safety and well being of everyone in the University community. Under the leadership of its Crisis Core Group, CMU has implemented an emergency notification system - Central Alert - To provide emergency news alerts. All interested students, faculty and staff must register their direct contact information to participate in the Central Alert system. This emergency contact information may include: an alternate e-mail address, home phone number, cell phone number, and/or SMS (text).

To Register:

- Log into My Account in Centrallink.cmich.edu.
- Click on Central Alert
- Update the information fields on the screen and save your changes

Care Line- Individuals who wish to share a concern about a CMU student may call (989) 774-CARE (2273) and leave a brief voicemail regarding the nature of the concern. Callers will be encouraged to identify themselves and provide their contact information but will not be required to do so. Callers who identify themselves will be asked to provide the student's name and contact information. A student service professional will look into each concern regardless of whether the caller identifies him or herself.

Serve Weather/Fire- In the event CMU is forced to close because of severe weather, the University community will be notified via Central Alert and a listserv e-mail message to all faculty, staff, and students.

Information also will be made available on the CMU Information Line (989 774-7500), on the University's main website, the student and faculty portals, and will be broadcast on CMU Public Radio (89.5 FM in the mid-Michigan region).

- **Tornado Warning Issued:** Immediately WALK to the designated tornado shelter area. The location of the shelter in each building on campus has been selected based on tornado safety criteria. Please see the emergency action floorplan list for your building's strategy.
- **Fire-** Know what the fire alarm sounds like and the location of the fire alarm stations. Become knowledgeable about the closet exit and at least one other means of exiting out of the building. Leave the building immediately (WALK) when the fire alarm is sounded at ANY time. Please see the emergency action floorplan list for your building's strategy.
- **Emergency Action Floorplans-**
https://www.cmich.edu/fas/fsr/rm/EHS/Emergency_Action_Plans/Floorplans/Pages/default.aspx

These are only a select few of the university's emergency and safety procedures. Please consult your direct supervisor, call Kathy Litwiller at (989) 774-7398, or access the link below for more information.

https://www.cmich.edu/about/emergency_management/Pages/Emergency-Procedures-Flipchart%28old%29.aspx

Office Practices:

Workplace Collaboration

- (list of questions - appendix)

- **Meet and Greets-** New employees of the Office of Student Office are encouraged to introduce themselves and get to know colleagues in their direct working area. This can be done by consulting with your director supervisor or mentor about scheduling appointments. In any working area, it is important to work as a team to ensure student success. Getting to know your colleagues will enable trust and collaboration in which you can utilize when connecting students with diverse resources. Below are some examples of "Meet and Greet" appointments to schedule.

- Residential Life Hall Director (s) (RHD)
- Counselor in Residence (CIR)
- Assistant Hall Director (AD)
- Supporting offices in your buildings
- Academic Advisors
- Success Coaches
- Administrative Staff
- **Mentor/Mentee**

Ordering Office Supplies

Steps:

1. Check what office supplies you have in your office. Email administration staff or direct supervisor to see if the main office has any missing items in storage.
2. Decide what office supply items are missing or you need.
3. Go to **officedepot.com** and search the specific items you need.
4. Email administration staff or direct supervisor with links to specific items.
5. If there is professional justification on supply items, the office can order it!

Communications

- **Emails-**
- **Voicemail-** Throughout your position in the Office of Student Success, you will be using your phone for various reasons including collaborating with other departments on campus, connecting students to resources, schedule appointments, talking to students, and student outreach. Also, it is beneficial that a personalized voicemail is created or your phone is forwarded to main line when you are out of the office. Below are instructions on how to create a regular personalized voicemail and script. Please do not hesitate to contact your mentor or director supervisor with any questions.
 - **Set Up-**
 1. Dial 6000
 2. Enter the password (direct supervisor or previous employee with provide you with the code)
 3. Dial **U** (8) to change user options
 4. Dial **G** (4) to change greeting
 5. Dial **P** (7) to change primary personal greeting
 6. Dial **R** (7) to record your message
 7. Please follow the script below for your primary personal greeting.

*“Hi you have reached **(Name)** Success Coach **(Career Title)** at Central Michigan University. I am currently unavailable. Please leave a detailed message, phone number, and best time to reach you and I will return your call at my earliest convenience. If you need immediate assistance, please contact our main office at (989) 774-3401. Thank you, have a great day! “*

8. When out of the office, please repeat steps 1-7 and follow the script below.

*“Hi you have reached **(Name)** Success Coach **(Career Title)** at Central Michigan University. I am currently **out of the office and will return on (date)**. Please leave a detailed message, phone number, and best time to reach you and I will return your call **when I return at my earliest convenience**. If you need immediate assistance, please contact our main office at (989) 774- 3401. Thank you for your patience. Have a great day!*

9. When out of the office and you would like to have your phone forwarded to the main office in Ronan, please follow the steps below.

1. Dial *74 +main office 4-digit extension (3401)
2. Dial *75 to cancel call forward

- **Proofing-** Throughout the year, the office is organizing and updating documents to ensure an effective workplace. When given the opportunity to create new activities, handouts, or documents in which the whole office can utilize; the director or your direct supervisor must have final approval.
- **Responding to News Reporter Requests**

In the event of a news or reporter inquiry, OSS staff will manage the request for information or comment in the following manner:

- * Obtain the questions from the reporter (CM Life or any reporter)
- * Discuss request with OSS Director
- * Compile a written response (if deemed appropriate)
- * Consider what other offices or sources should be involved in the response and include these thoughts
- * Forward final written response to OSS Director for review and sharing with ESS and UCOM
- For any freedom of information act (FOIA) requests, OSS staff will forward the details to the OSS Director for compliance coordination with the Office of General Counsel

Professional Attire

Each department and office at CMU has different professional attire regulations. The Office of Student Success encourages employees to feel comfortable and professional. The main attire is business casual. Below, is a list of guidelines the office highly prefers all coaches and administrative staff to follow.

- No flip-flops (this includes dress flip-flops) open toe is okay but not preferred
- No leggings – leggings are not pants, please wear dress pants. - If you *want (not required)* to wear tights/nylons with dresses please do, but no leggings
- Dresses/skirts/capris should be **appropriate** lengths
- No shorts
- No exposed shoulders - if you're wearing a sundress please wear a cardigan when working with students, in the office or at professional meetings or events

Reporting-

- **Timesheet-** Bi-weekly, our timesheets need to be manually reported and hand submitted to your direct supervisor via email.
- **Google Doc.-** Each time you meet with a student or assist them, it is required to enter student information and meeting notes in the spreadsheet. Each coach has their own tab. This will allow you have notes to refer back to or keep track of the number of student appointments. It is strongly recommended that you try to meet 3x with each student to promote success.
- **Monthly Reports-** Monthly reports are due at the end of each month. Please reference the monthly report in the appendix or JET. You submit your monthly report to your direct supervisor via email.
- **Mid-year Report-**
- **Annual Summary Report-**
- **Student Reporting-** It is significant that you report each student meeting in the Google Doc and MAP-Works. However, you only log an activity in MAP-Works if the student is a freshmen or transfer. Doing so allows other staff on campus to see the type of outreach that has been done for the student. Also, in certain student situations it is viable information for parents to know if their son or daughter is utilizing resources available to them.

Quality Assurance (Staci and Pat)

Meetings-

- **1:1-** Your direct supervisor will schedule one-on-one meetings with you weekly or bi-weekly. You determine how often and where you would like these meetings to take place. The purpose of these meetings is for you to be open and honest to your direct supervisor. You can inform them of information, ask questions, seek advice or resources, and talk about

students you feel you are struggling with during appointments. This is an opportunity for you to obtain information and material to be a happy employee.

- **Weekly-**
 - **Coach's Meetings-** These are scheduled weekly with all the coaches and director supervisor. During coach's meetings the group will discuss house keeping details, student success stories, seek advice from other coaches, learn about a new coaching technique, and much more.
 - **Book Club-**

Programming- Success Events

These free events take place throughout the academic year and are open to all members of the CMU community.

Elevate Your Semester! *Climb the Mountain Series (Fall 2015)*

Climb the mountain and success this semester! These events provide the resources and practical support to help every CMU set and achieve their college goals. All events take place at **6:00pm** in the **Bovee University Center**.

TUESDAY, SEPTEMBER 22 - ISABELLA ROOM

STOP 1: SUCCESS BASECAMP - Elevation 0 ft.

Develop your strategy to climb the mountain.

TUESDAY, OCTOBER 13- MACKINAW ROOM

STOP 2: BE A TRAILBLAZER: MAP YOUR PATH - Elevation 188 ft.

Plan your climb!

TUESDAY, OCTOBER 27 - MACKINAW ROOM

STOP 3: ON BELAY! WHO'S GOT YOUR ROPE? - Elevation 377 ft.

Connect with CMU resources to help you soar.

TUESDAY, NOVEMBER 17 - ISABELLA ROOM

STOP 4: DIG DEEP, SURGE AHEAD - Elevation 564 ft.

Discover and use your top strengths to power ahead.

TUESDAY, DECEMBER 8 - ISABELLA ROOM

STOP 5: PREPARE FOR THE SUMMIT - Elevation 755 ft.

Make the final ascent and finish strong.

Conversations with Coaches

These conversations provide an opportunity to participate in weekly group coaching sessions throughout the semester. All events take place in the Bovee University Center.

- **Goal Setting** - Wednesday, September 9 - Lake St. Clair
- **Time Management** - Wednesday, September 23 - Isabella
- **Note Taking & Reading** - Wednesday, October 7 - Isabella
- **Study Skills** - Wednesday, October 21 - Isabella
- **Overcoming Obstacles & Being Gritty** - Wednesday, November 4 - Lake St. Clair
- **Test Taking & Test Anxiety** - Wednesday, November 18 - Lake St. Clair
- **Preparing for Finals** - Wednesday, December 2 – Isabella

4. Performance Review (use the language below)

PERFORMANCE REVIEW PROCESS Q&A

Q: How is the performance review form to be used throughout the year?

A: July-August (January - February for Special Olympics): Start the process by setting and documenting expectations and goals for the coming year in the areas of "Goals, projects, initiatives" and "Style and Behavior." The review may be started by either the employee or the supervisor.

August-December (February - June for Special Olympics): While not required, it may be used as often as desired to record any major points of discussion, progress, and any changes in the originally set goals and expectations.

December-January (June-July for Special Olympics): It is strongly recommended that you use it as a mid-year check in to document progress on the goals and expectations set at the beginning of the year. Hopefully you have had a lot of conversations throughout the year, and you can use this form as an opportunity to formally record progress at the mid-year point. Anytime we put things in writing is an opportunity to clarify communication.

January-June (July-December for Special Olympics): Again, it is not required, but it may be used as often as desired to record major points of conversation, changes, progress, etc.

June-August (December-February for Special Olympics): Complete the End-of-the-year review which should simply be a summary of the conversations that have been taking place throughout the year. A face to face meeting is held to discuss the final review, any edits can be made, and then the review is submitted to Human Resources by the supervisor using the online system.

Q: I am a faculty member who supervises staff positions - do I use this system?

A: Yes - all supervisors of staff positions need to use this system to process staff reviews.

Q: Who do I call if I have a question?

A: For questions, please call Professional Development Programs at 989.774.1073.

QUESTIONS REGARDING THE ON-LINE PERFORMANCE REVIEW SYSTEM

Q: Where do I go to log in to the system?

A: On Central Link, there are three ways to access the system. 1. Under My Favorites, you can click on "Customize your favorite links," and find Performance Reviews as an option, and check the box. In this way, you can add it to your favorites list and access it with one click in the future. 2. Go to the "My Account" link (upper right), and you will find the Performance Review link under My Work Day. 3. Go to the Professional Development Programs webpage, and click on the Performance Reviews link on the right. A link to the online system will display on the main part of this page.

Q: Where can I find step by step instructions for how to use the online system?

A: Under the Performance Reviews heading on the right of this page, click on the Training link. Here you will find several sources, including a guide that will walk you through the screen shots of what you will see when you enter the system.

Q: My employee list does not appear to be correct. What do I do?

A: This list is generated based on the organizational structure that is set up in SAP. The system looks at all employees who currently report to you within the fiscal year. If employees are showing up that should not be or are missing – due to an internal change of your reporting relationships within your department – please contact Human Resources to discuss.

Q: Why are employees showing twice on the My Employees list?

A: If an employee changes positions within the fiscal year but remains within your same department, they will show up on your list twice. For every position an employee holds, a performance review should be completed. In this way an employee receives feedback for each position he or she was in.

Q: If an employee terminates, why are they still showing on the My Employees list?

A: A performance review still needs to be completed on an employee after they terminate, therefore the employee will remain on your list. If an employee terminates prior to the end of the fiscal year, the supervisor should complete the performance review and submit it to HR. However, even after doing so, the employee will still remain on your list, until the next fiscal year list is

populated.

Q: How can I edit what I have already typed into a review, either mine or someone else's?

A: As long as the review is in your possession, and you haven't sent it forward to anyone else, you may go back and edit any information which you have entered at any time. You are never allowed to edit what someone else has entered for obvious reasons. **IMPORTANT NOTE:** However, once the review has been sent forward to the supervisor or employee, all the information which you have entered is "locked" and date stamped. Therefore, if at a later date something changes, or you notice an error in something that has been previously entered, you simply need to make note of the desired change in the next box. The positive side of this is that you have a record of original goals even if they get changed during the year due to shifting priorities. The down side is of course that if you make a serious mistake and then send it forward, there is a permanent record of it, even though you can correct it in a later explanation. In the event of a massive error, the entire review can be deleted and reset back to a blank review. Contact HR if you need this to happen.

Q: How do I submit a review to HR?

A: This option will appear at the end of the review UNLESS:

- The review was never sent to the employee. The employee must have at least seen the review and entered basic information and sent it to the supervisor for it to be able to be submitted
- The review has an incomplete required field. This is usually due to one of the "check boxes" being missed by either party (i.e. "We had a conversation about...").
- You are trying to submit it before July 1st. The option to submit it to HR will only appear after this date. This is to prevent accidental submission at mid-year or other period, which officially closes the review. Simply wait until after July 1st, and then submit it.

5. Use the attached monthly report example and continuity report example

Insert Central Michigan Branding PDF/Power Point

Attendance Log

The Office of Student Success needs documented attendance for each program. To find a blank attendance log within Jet, go to:

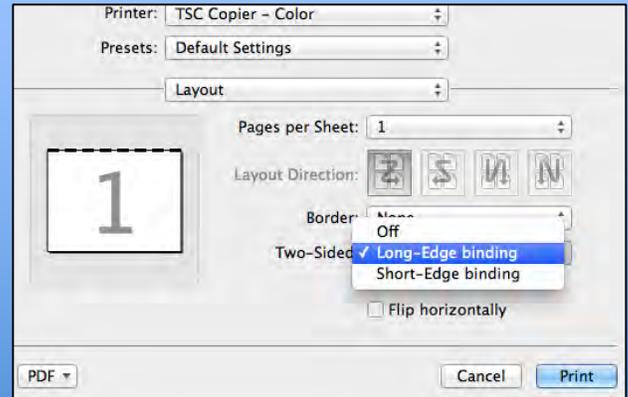

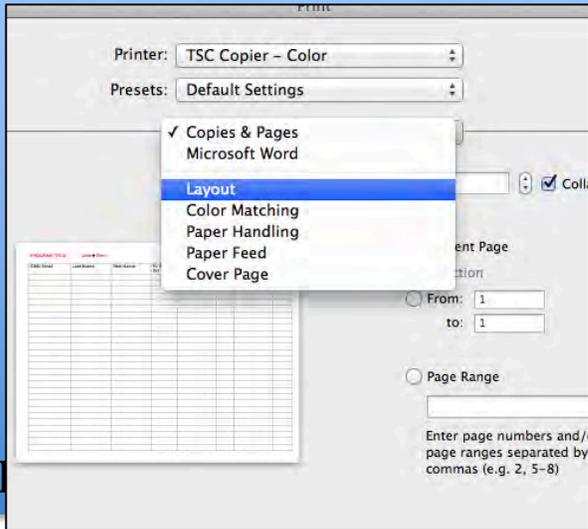

Success Coaching -> Programming -> Blank Programming Docs -> **Attendance Log**

Collect the information on the attendance log from all participants. To determine what to do with the attendance log after the program (i.e. log participants' information yourself or pass along to OSS office assistant), consult your direct supervisor.

When creating an attendance log for your program, be sure to change the program title, date and time.

PROGRAM TITLE		Date • Time

To print double-sided:

and Privacy Act (FERPA)

FACTS

What is FERPA?

FERPA stands for Family Educational Rights and Privacy Act (sometimes called the Buckley Amendment). Passed by Congress in 1974, the Act helps protect the privacy and accuracy of student educational records.

What rights does FERPA grant students with respect to their educational records?

1. The right to see the information that the institution is keeping on the student
2. The right to seek amendment to those records and, in certain cases, append a statement to the record
3. The right to consent to disclosure of his/her records
4. The right to file a complaint with the Family Policy Compliance Office, US Department of Education

What are the basic rules?

Student educational records are considered confidential and may **not** be released without the written consent of the student.

Who is protected under FERPA?

- Students who are, or were, registered in an institution of higher education... regardless of their age or status with regard to parental dependency.
- Students who have applied, but have not yet registered, as well as deceased students, **do not** fall under FERPA guidelines.

What is an Educational Record?

- Just about any information provided by a student to the university for use in the educational process is considered a student educational record:
 - Personal information
 - Enrollment records
 - Grades
 - Schedules
- Any records maintained by an institution that are directly related to a student or students are part of the educational record (a few exceptions exist). This record can contain a student's name(s) or information from which an individual student can be personally (i.e. individually) identified.

“Personally Identifiable” Defined

- Personally identifiable means data or information which includes:
 - The name of the student, the student's parent, or other family members
 - The student's campus or home address
 - A personal identifier (such as a social security number or student number)
 - A list of personal characteristics or other information which would make the student's identity easily traceable.

Formats of Educational Records

- These records include: files, documents, and materials in whatever medium (handwriting, print, tapes, disks, film, microfilm, microfiche) which contain information directly related to students and for which students can be personally (individually) identified.
- The storage media in which you find this information does not matter. Student educational record may be:
 - A document in the registrar's office
 - A computer printout in your office
 - A class list on your desktop
 - A computer display screen
 - Notes you have taken during an advising session

An Educational Record is NOT...

- "Sole possession" – notes made by one person as an individual observation or recollection, are kept in the possession of the maker.
 - Once shared with anyone, they become educational records
 - Best advice – if you don't want it to be subject to review, don't write it down
- Law enforcement unit records
- Records maintained exclusively for individuals in their capacity as employees
 - Records of individuals who are employed as a result of their status as students (e.g. student employees) ARE educational records.
- Doctor-patient privilege records
- Alumni records

Public/Directory Information

- Some information is considered public (sometimes called "Directory Information"). This information can be released without the student's permission. The student may, however, opt to consider this information confidential as well.

What is directory information?

- Information contained in an educational record that generally would not be considered harmful or an invasion of privacy if disclosed.
- Items that may be included in publications or disclosed upon request without consent.

Directory Information Includes

- Name
- Address
- Place of birth
- Major
- Participation in officially recognized activities/sports
- Height and weight of athletes
- Dates of attendance

- Enrollment status (graduate or undergraduate, full-time or part-time) but not credit hours
- Grade level (e.g. freshman or junior)
- Candidacy for degree
- Degrees, honors and awards received (e.g. Dean's List)
- Most recent previous educational institution attended

What cannot be directory information?

- Directory information is determined by each institution, but may never include:
 - Race or country of citizenship
 - Religion
 - Gender
 - Social Security Number / CMU ID
 - Grades or GPA

Legitimate Need To Know

- You have access to information only for legitimate use in completion of your responsibilities as a university employee. "Need to know" is the basic principle.

For full legal information, see Appendix.

FERPA Quiz

1. If a student's parent calls asking how a student is doing in a class, can you give out that information?
 - a. Yes
 - b. No
2. You receive a call from a recruiting firm asking for names and addresses of students with a GPA of 3.0 or better. They say they have good job information for these students. Can you help these students by giving out this information?
 - a. Yes
 - b. No
3. A person comes up to the College Dean's Office with a letter containing a signature that gives consent to release the transcript of a student. Do you give the transcript to them?

- a. Yes
 - b. No
4. You receive a phone call from the local police department indicating that they are trying to determine whether a particular student was in attendance on a specific day. Since they are in the middle of an investigation, are you allowed to give them this information?
- a. Yes
 - b. No
5. You get a frantic phone call from an individual who says that he is a student's father and must get in touch with her immediately because of a family emergency. Can you tell him when and where her next class is today?
- a. Yes
 - b. No
6. Is it wrong for professors to leave exams, papers, etc. outside their office for students to pick up?
- a. Yes
 - b. No
7. An unauthorized person retrieves information from a computer screen that was left unattended. Under FERPA, is the institution liable?
- a. Yes
 - b. No
8. Educational records include only those records contained in a student's permanent file.
- a. Yes
 - b. No
9. Faculty have the right to inspect and review the educational records of any student.
- a. Yes
 - b. No
10. An adviser does not have to allow a student to inspect and review his/her personal notes about the student that are held in a file in the desk of the adviser's office.
- a. Yes
 - b. No
11. If a student discloses in an open forum that he has been suspended and that he feels the suspension is unwarranted, the school may infer that he has given implied consent for openly discussing the issue.
- a. Yes
 - b. No

12. We should provide data to an accounting firm who asks for a list of all of the College of Business accounting students who are in the top 10% of the graduating class.
- a. Yes
 - b. No
13. Admissions records are “educational records” and are covered under FERPA.
- a. Yes
 - b. No

Quiz Answers

1. NO – Even though the person inquiring may be the student’s parent, FERPA recognizes students in post-secondary education as adults, regardless of age. Therefore, you cannot give out grades, or any other non-directory information.

We must assume that the student is an adult who is entitled to privacy, even from parents. Parents may assert their rights to the records if the student is dependant according to the tax code, but that is determined by the Office of Records and Registration.

2. NO – While we all want to help students to get good jobs, that request should not be handled by an academic department.

Do not give out student information that pertains to GPA, or is based on GPA, to anyone without prior written consent of that student. In this case, the request should be forwarded to the Legal Affairs Office. ALL outside requests for any information such as Dean’s List should be referred to the Office of Legal Affairs. Information about the recruiting firm could be provided to students in the appropriate major and/or to the Office of Career Services.

3. NO – Transcripts and records information can only be released by the Office of Records and Registration.

4. NO – The police should be first directed to CMU General Counsel.

5. NO - For the safety of the student, you cannot tell another person where a student is at any time. Inform the caller they should contact the Office of the Ombudsman (734-487-0074) for more information.

6. YES – That is a violation of the privacy rule because it is inappropriate for students to have access to other students’ information.

You cannot leave personally identifiable materials in a public place.

7. YES – Information on a computer screen should be treated the same as printed reports.

The medium in which the information is held is unimportant. No information should be left accessible or unattended, including computer displays.

8. NO – With specific exceptions, “educational records” are those maintained by the institution in any formats that are identifiable to the student.

9. NO – All faculty and staff must show a “legitimate educational interest/need to know” within the context of their role to have appropriate access to education records.

10. YES – “Sole possession” records are an exception to the definition of “educational records” and are therefore not accessible by the student.

11. NO – There is no implied consent in FERPA, so you need to follow regular guidelines for releasing this student’s educational record information.

12. NO – Remember, grades and GPA can never be directory information. The question of top 10 percent of graduates falls under the release of “GPA information” as it is based on such non-directory information.

13. MAYBE – If the student has not yet registered for classes, there has not yet been an educational record created at the institution. If the student HAS registered for classes, all admission records are “folded into” the educational record.

Pre-Arrival Checklist

Prepare new employee onboarding checklist, review, revise, and customize	<input type="checkbox"/>
Confirm offer through CMU HR or OSS hiring manager	<input type="checkbox"/>
Confirm start date	<input type="checkbox"/>
Provide new employee with a contact in the event of a question or issue	<input type="checkbox"/>
Collect hire authorization (student employees only)	<input type="checkbox"/>
Prepare welcome packet	<input type="checkbox"/>
Request introductory meetings with partner offices	<input type="checkbox"/>
Send an announcement to the department and appropriate partner offices	<input type="checkbox"/>
Create an onboarding schedule for new employee (introductory meetings, online trainings, etc.)	<input type="checkbox"/>

COACHING 101

- Welcome & Overview
- Coaching Expectations
- Foundational Philosophies
- Meeting Processes

WELCOME & OVERVIEW

Welcome to the Office of Student Success team! We are excited to have you join us as a Success Coach. The purpose of this “Coaching 101” portion of the handbook is twofold. First, it is designed to give you key information regarding Success Coaching and working with students. These are key pieces of information that have been utilized by other coaches when thinking about their work within the position. Second, it is designed to aid in the development of your own personal style and comfort within the position. Each coach develops a unique coaching style over time, and this information is intended to give you ideas as you move forward to learn your style.

Success Coaches assist students in setting and achieving their academic and personal goals during their time at CMU. It is a holistic approach, in which each coach uses their distinctive personal style to help students identify their goals, develop and implement action steps to reach their goals, and overcome obstacles that may get in the way of their success.

Think of it this way: a student’s experience with a coach is like a GPS. At first, you help them to identify their destination/set their goal, and along the way, you are the GPS helping them to decide when to turn and/or make a pit stop, helping them to see the visible path to make it to their destination and, when necessary, assisting them with defining a clear destination should they choose to redirect their path. As a Success Coach, you are an accountability partner for students. They don’t have to try and reach the destination with no map or GPS – they just need to utilize their resources. Together, you will develop a clear picture of where they want to go and how to get there.

Success Coaching is a partnership with a student to design *their* desired future and meet them where they are. This means that what works for one student may not work for another, and as a coach, you get to adjust your style accordingly to meet the needs of each individual student. There is no “cookie cutter” or “right/wrong” way to coach; each coach is unique with his or her own personal style. You will attend trainings and be presented with additional materials during your tenure as a coach, which are intended to give you ideas and best practices for how to coach. But ultimately, the decisions regarding what works for you and the student are up to your discretion and may even change as you continue your growth and learning within the position. Included in this section is a framework for coaching, which you are encouraged to utilize and to adjust to your unique style.

COACHING EXPECTATIONS

As a Success Coach working with a student, ***you can expect to:***

- Build on and utilize strengths
- Be a partner in helping student develop and implement their ideal life
- Provide a sense of connection, belonging and significance
- Focus, challenge and motivate student to live intentionally
- Build a strong relationship of trust and confidence
- Provide support, accountability and positive regard
- Constantly adapt to the needs of the student (i.e. encourage, motivate, enlighten, hold accountable, listen to confession)
- Listen, clarify and ask questions
- Help students develop skills, mindset and strategies needed to succeed at CMU
- Provide accountability for goals
- Increase student's self-efficacy, autonomy and responsibility

As a Success Coach working with a student, ***you don't need to:***

- Solve their life issues
- Take responsibility for their success
- Rescue or fix
- Be the expert
- Find answers too quickly
- Have all the answers
- Know what is best for the student
- Bully

Credit to Dr. Sherene McHenry, Fully Engaged, LLC 2012

FOUNDATIONAL PHILOSOPHIES

There are many theories for student development that can and will assist you with the creation of your own unique personal coaching style. Much of coaching is trial and error – trying new things and approaching each student and each situation individually.

That being said, whichever style you choose to coach a student in, it is important to always keep the following philosophies in mind:

- ***Allow the student to take the wheel*** – The purpose of coaching is to help students develop and attain their academic goals, but also to push them toward a greater sense of independence and self-worth. By allowing them to “take the wheel” and take control of the situations they encounter, you give them the opportunity to see what they are capable of and expand their life skills. Additionally, this self-efficacy will help them to overcome obstacles on their own when they encounter them in the future and will give them the confidence to work through future situations with a growth mindset.
- ***Build a strong relationship, which encourages and challenges the student*** – Take the time to get to know each student individually. Everyone comes with unique challenges that they currently face or they have faced in the past. You build strong relationships through active listening and taking an interest in the students’ interests and goals. Once this relationship is established, it will be easier to provide honest, open feedback to the student without creating anger, fear or disappointment, and the student will be more dedicated to the process of coaching because they know that you are caring and non-judgmental.
- ***Meeting the student where they are at*** – As a coach, it is your job to help the student identify *their* goals and objectives, and assist them to develop the skills needed to reach those objectives. Reserving judgments and not pushing your values onto the students you work with is critical. For example, you may think that a marker of success academically is making the Honor’s List each semester regardless of the classes you take, but your student may be content with achieving C’s or just passing the course, particularly in classes that do not count toward their major. Each situation is unique, and should be approached as such.

For samples and detailed outlines of theories that fall in line with these foundational philosophies, see the Appendix section **“Coaching Approaches.”**

MEETING PROCESSES

First Meeting

- Create a safe environment
 - o Ensure student feels comfortable
- Build relationship/get to know student
 - o Ask questions and use positive body language throughout to show interest and engagement in the discussion
- Ask questions
 - o Get to know the students plans, desires and goals
 - o Find out what they would like to gain from coaching

- Outline success plan
 - o Help the student to identify their goals and how they would like to reach them
- Cover housekeeping details
 - o Identify how you will work together and what they can expect from coaching
- Other considerations
 - o Add any additional details that are relevant to the meeting

Ongoing Meetings

- Open-Ended Discussion
 - o Begin by discussing where the student is at and what has been going on since the last meeting
- Discussion of Progress
 - o Ask the student to identify where they are at currently with their progress
- Set Session Agenda
 - o Ask the student to decide how they would like to spend the session
- Help Student Identify Solutions
 - o Assist the student in creating their own solutions to reach their goals by asking open-ended, fact-based questions
- Set Concrete Action Steps
 - o Help the student commit to exactly what they would like to accomplish before you meet again
- Assess Motivation
 - o Gauge the student's level of motivation to complete the action steps and if needed, assist in identifying barriers to success

Encouraging Students To Function On Their Own

Once you've been working with a student for a few meetings and they are making the progress they desire to make toward their goals (i.e. completing action steps and making good progress toward attaining their goals), you should then encourage the student to meet with you less often and assist them with the transition toward functioning on their own.

Think of the GPS analogy again – there comes a point where the student will no longer need the step-by-step instructions of the GPS to guide them along. If they've made that trip enough times, they should be able to get to where they need to go on their own. Sure, you can meet with them once in a while to catch up and hear about their progress, but ultimately, the student is the most successful when they can take the lessons they've learned from success coaching and apply it on their own.

Remember – one of coaching’s biggest goals is to enable students to take control and gain independence. This is a skill that will be invaluable to them as they graduate from CMU and enter the workforce, and by encouraging them to function on their own, you are encouraging them to become more independent and intrinsically motivated.

End of Semester Wrap-Up

At the end of the semester, there are a few things to keep in mind as you wrap up student appointments and look ahead toward the next semester or academic year.

Last Meeting of the Semester:

- Reflect on goals with each student and wish them good luck on final exams.

After Finals:

- Follow up regarding how finals went.
- Follow through with remaining details from meetings (any action steps they still wanted to complete, etc.).
- Encourage goal setting for the future (on their own or with a coach).

You can wrap things up in person, through email or over the phone/Skype; whichever you and the student prefer.

For Students Transferring/Leaving CMU:

As each semester wraps up, you may have students notify you that they are not planning on attending CMU again in the upcoming semester/academic year. If this happens, there are a few housekeeping things you should do:

- Capture their information to see if they will provide any reasons for leaving and pass this information along to your OSS supervisor.
- Provide them with the contact information for the Registrar's Office (Warriner 212, (989) 774-3261) so the student can notify them of their leaving (this is not required).
- Talk the student through contacting Residence Life (all requests must be submitted in writing) to cancel housing agreement, if applicable.
- Assist them with ensuring their transfer is all set, including how to send transcripts to the new institution.

A student who leaves is eligible to return any time within three years. They remain an eligible student for six semesters if they want to register/return. If a student plans to transfer for a year and ultimately return to CMU, let them know that you can coach them during the time in which they are enrolled at another institution. Additionally, connect them with the appropriate academic advisor at

CMU to ensure the courses they are taking will transfer back to CMU and be applied to the degree they wish to seek.

In addition to the housekeeping details, you will also want to say goodbye to the student on a personal level. To do so:

- Ask the student to share where they were when they started meeting with you vs. where they are now and take a look back on their journey.
- Mention to the student the growth you saw within them over time and the progress you have seen them make.
- Wish the student luck on their future endeavors and keep the line of communication open.

Responding to Student Letter Requests

Occasionally, you will receive requests from students to write a letter confirming that they utilized success coaching to assist with an appeal process. If this happens, the guidelines for this process are as follows:

- Check dates of meetings.
- Write letter on OSS stationary (can be Word document with OSS logo as header).
- Document information requested by student in the letter.
- Within Word, save the document as a PDF.
- Attach the PDF to the email and send back to the student.

See the Appendix for a sample letter.

MEETING STUDENTS WHERE THEY ARE

All coaches come into the position with individual academic values and their own definition of what “success” means. Each person values certain academic outcomes – whether that is very high grades and GPA, average grades but lots of experience/opportunities – as “successful.” Keep in mind that levels of perceived success for each student can vary significantly; what means “success” to one student you work with may not mean the same thing to another.

Many students have had values pushed on them their whole lives by parents, siblings, and teachers. To encourage each student toward independence and determining their own values, your goal should be to meet them where they are by helping them to identify their goals and what they value in an educational experience to ultimately attain those goals and values.

There are times, however, when you may see a student is struggling and their actions do not match the goals they want to attain. At that point, it is your responsibility as the success coach to provide open, honest feedback regarding the student’s progress.

For example, if a student wants to major in a pre-professional program but has not done well in science courses, they will need to hear honest feedback about how they are progressing and their chances of being successful in the future from you. You can do this by bringing information to light, such as the GPA requirements to get into certain graduate (or even undergraduate) programs, and

having conversations regarding what they say they want vs. what they are currently doing.

There are times when students need that honest feedback in order to move forward with the most accurate information possible. It is up to them as independent adults whether they make the choice to change or not; you are simply there to support them with honest feedback and trust that they will make the best decision for themselves at that point in time.

WHAT TO EXPECT AS A MENTOR

Expect to...

- ***Be responsible for setting up initial communications with mentee***
 - You will be the first to reach out to your mentee to set up an initial meeting and begin training with the new hire checklist.
- ***Co-construct expectations and standards with your mentee***
 - Together with your mentee, you will construct the expectations and standards of your partnership, such as when/how long you'll meet, how you'll stay in communication between meetings, and preferred modes of communication.
- ***Cover the training checklist with your mentee***
 - In the initial meetings, you will be getting to know your mentee as well as covering the new hire checklist training items. Additional clarifications will be provided in the meeting with your supervisor prior to training.
- ***Encourage mentee to critically think and function autonomously within the position***
 - A large part of success coaching is encouraging students to function on their own and develop responsibility; this will be the same in working with your mentee. Encourage them to seek answers for themselves and develop their coaching "muscles."
- ***Assist your mentee with setting goals and provide gentle accountability***
 - You can be a great accountability partner for your mentee. Ask them to set goals in each of your meetings for what they would like to accomplish before you meet again, similar to what you would do with a student. Encourage them to work hard to reach those goals.
- ***Meet with your mentee and keep in contact***
 - Be sure to carve out time in your week to catch up with your mentee and ensure they have all they need to be successful. This can be via phone, email, chat or in person – but be sure they know your door is open and that you are there to help.

- **Observe your mentee's student meetings to provide feedback and have your meetings be observed to gain feedback**
 - A great way to encourage a new coach is to allow them to sit in on meetings and gain ideas for how the meeting structure works and you connect with students. Encourage your mentee to think critically about your meetings and provide feedback. In addition, you should sit in on meetings to offer constructive feedback as your mentee continues to develop their personal coaching style.
- **Take responsibility for documenting/relaying information from mentor meetings to supervisor**
 - After each meeting, you are required to document and submit notes to your direct supervisor regarding the mentee meetings. The highlights of this report will be covered in the training with your supervisor.
- **Participate in building a positive working relationship with your mentee**
 - Take the time to build a relationship with your mentee. Just as you would with a student, relationship building helps to develop a trusting, positive work partnership.

WHAT TO EXPECT AS A MENTEE

Expect to...

- **Co-construct expectations and standards with your mentor**
 - Together with your mentor, you will construct the expectations and standards of your partnership, such as when/how long you'll meet, how you'll stay in communication between meetings, and preferred modes of communication.
- **Have a "go-to" person to answer your questions**
 - Your mentor is a great resource if you have a quick question that you can't find the answer to. Additionally, there are many others on the team that are also willing to assist, including your coaching colleagues and supervisor.
- **Participate in additional training and go over the checklist with your mentor**
 - When you were hired, you were given a handbook with a new hire checklist for training. You will be going over those points with a supervisor, with your mentor, and on your own.
- **Be gently held accountable and encouraged to function autonomously**
 - One of the largest parts of the success coaching position is to function autonomously/independently. Due to this, there will be many times where your mentor encourages you to research and find the answers to your questions, in order to develop the skills you need to problem solve and determine answers on your own. This will not only assist in your personal development as an employee, but will assist in your development as a coach as you will learn skills to encourage students to do the same.
- **Engage in conversations to assist you in developing your personal coaching style**
 - Your mentor has a unique way of coaching, and you are encouraged to find your own unique style as well. Together, you will share ideas and discuss strategies to continue increasing your own success coaching toolbox and develop your style. You are encouraged to talk about your ideas and strategies with your mentor.

- ***Observe your mentor's student meetings to provide feedback and have your meetings be observed to gain feedback***
 - Sitting in on your mentor's student meetings is a great way to gain ideas for how the meeting structure works and how you can connect with students. You are encouraged to think critically about your mentor's meetings and provide feedback. In addition, your mentor will sit in on your student meetings to offer constructive feedback as you continue to develop your own personal coaching style.

- ***Share your goals and experiences***
 - Each semester, you create goals to report to your supervisor. Share these with your mentor and discuss your experiences throughout the semester to gain additional feedback and perspective.

- ***Come with ideas and questions to process during each meeting***
 - You are strongly encouraged to keep an ongoing list throughout the week of what you'd like to discuss with your mentor. There are many times where you might have a question, but it is not urgent and you may find the answer for yourself in the meantime before your mentor meeting. If you don't find the answer, go over that list with your mentor!

- ***Participate in building a positive working relationship with your mentor***
 - Take the time to build a relationship with your mentor. Just as you would with a student, relationship building helps to develop a trusting, positive work partnership.

SUCCESS COACH CONTINUITY REPORT

ANNUAL GOALS

Include a short summary about your annual goals and how they aligned with, and/or contributed to, the advancement of CMU's strategic goals and priorities, the Division of Enrollment and Student Services' goals, and the Office of Residence Life priorities.

Your Professional Goals

Describe your your goals for the year. Outline achievements related to each goal and any areas for continued focus in the coming year(s).

Insert details here.

- **Goal 1**
 - **Accomplishments**
 - **Area(s) for continued focus**
- **Goals 2**
 - **Accomplishments**
 - **Area(s) for continued focus**
- **Goals 3**
 - **Accomplishments**
 - **Area(s) for continued focus**

CONTINUOUS IMPROVEMENT

Current Practices

Describe any ideas or suggestions you have to help improve current practices, programs, etc.

Insert details here.

New Initiatives

Introduce any ideas you have for new initiatives, programs, etc., to support CMU students in the coming year(s).

Insert details here.

MAP-WORKS

Include a brief synopsis of your work to support early and often outreach to support student success and continuous enrollment. Discuss the strategies and initiatives that (a) supported student completion of both the Fall and Spring transition surveys, (b) engaged students with campus support services, and (c) empowered RAMA staff to actively utilize MAP-Works and effectively engage with you, other success coaches and programs and services offered by success coaches. Outline any areas for continued improvement including ideas that may enhance support for students in the coming year(s).

Insert details here.

SUPPORTING STUDENTS

Coached Students

Update the online log with final details for each student coached during the course of the academic term/year.

Students of Concern: "High Risk for Departure" and "Struggling Students"

Note the names and details of any students who you believe are at risk for departing or experiencing significant challenge in the next 6-8 months. These details will help support on-going outreach during the summer and through any personnel transitions.

<i>Student Name</i>	<i>Student ID #</i>	<i>Email & Phone #</i>	<i>Nature of the Concern or Struggle</i>

Residence Hall Outreach

Describe your strategies to create meaningful and ongoing connections with the staff in the residence halls. Include details about your work with the Assistant Director, RHD staff, RAMA staff, Peer Mentors, Success Center Colleagues, and Residential Colleges/Residential Communities.

Insert details here.

PROGRAMMING

Update the online programming log with details for all programs and program attendees for the year.

FILES AND OFFICE ORGANIZATION

Student Files

Where are the case files located in the office? (Make sure this is a secure location).

Insert details here.

Narrated Tour

Give a narrated tour of your office. Include information on the filing system, storage areas and any other necessary information.

Insert details here.

Office Computer

Provide the CMU asset tag number and background information on your office computer, including how the files are organized and the student staff use of the computer. If the computer is experiencing any technical issues, describe them here.
*Please make sure that all business files have been moved to Aux-Jet prior to the end of your current academic year appointment.

Insert details here.

Building Keys

Provide a comprehensive listing of the building keys in your possession and which locks they fit.

Insert a TABLE/LOG of key codes and what they open here.

Helpful Questions & Phrases

ADD/ADHD

Questions to ask:

- “If you have diabetes, would you take insulin?”
- “If you had a broken foot, would you get a cast?” or “If you had a broken foot, what would happen if you chose not to get a cast?”
- Meaning – If you knew there was a way to improve your current condition, would you take advantage of the resources available to do so?

Statements to use:

- “Walk to Utah” analogy – You could do it [could go without medication], but it would be faster to drive, and even more productive to hop on a jet and fly there.

Class Attendance

Questions to ask:

- If you were me, what would you say to you?
- What argument would you give to yourself if you were me, about going to class?

Statements to use:

- The way you approach your studies is going to be the way you approach the workforce.
- You [student] come up with an argument for why you should go to class.

Conflict resolution

Statements to use:

It _____ me (insert feeling: concerns, hurts, frustrates, angers...)
 When _____ (insert problematic behavior)
 I need you to/wish you would _____ (insert desired behavior)

Depression and/or struggling with life difficulties

Statements to use:

- The best way I can help you is to connect you with a trained and licensed professional that can talk with you about strategies to better cope with these life difficulties.
- It sounds like this is really bothering you because we’ve talked about it during several meetings.
- Counseling could provide you with a skillset so you’re not repeating the same patterns over and over.
- Putting a band aid on it is not going to fix it.

Questions to ask:

- Do the benefits of going to the Counseling Center outweigh the costs?
- Action provides more energy, so what can we do to get you moving and creating action?

Goals

Accomplishing goals/tasks:

Questions to ask:

- Do we want to keep this as a repeating behavior and/or move on to the next thing?
- If you devoted 100% to this, how would it work now?”

Struggling to accomplish goals/tasks:

Question to ask:

- “Let’s go back to how it will feel when you reach this goal. Is it worth doing (insert task) to get there?”

Disconnect between overall goals and current behaviors/actions:

Statements to use:

- (Using hand motions) here’s your reality, here are your dreams – something needs to change for your roads to intersect.
- Change your dream, change your direction, or change your willingness.
- You say you’re putting the time in and you are getting the same results – help me to understand how this is happening.
- Help me understand...
- Part of life and growing up is that we need to tell ourselves the truth.

Unrealistic goals and/or action steps (aiming too high or aiming too low):

Questions to ask/statements to use:

- It’s okay with me if this is where you want to aim. At the same time, I know you are capable of pushing yourself more.
- What do you think it’s going to take to get there?
- If on point: Is this something you’re willing to commit to at this point in life?
- If not on point: There’s a gap between what you think it’s going to take and the goal. We either need to raise standards/steps to reach that goal, or put the goal more within reach of what you are willing to do.
- Can I be frank with you? [Insert concern]

“I don’t know” – Unengaged/indifferent students

Statements to use:

- I appreciate your honesty that you don’t know; at the same time, not knowing is not helping!
- I need for you to dig deeper.
- It concerns me that you are not concerned.
- I’m worried I can’t be effective in helping and coaching you because the front that you bring into our meetings makes it seem like there are some underlying issues.
- I want to help you, but I can’t do that with your current level of engagement.

Low motivation/unsure why they’re here

Questions to ask:

- Are you jet skiing through life instead of deep-diving?
- What do you really want as a result of our time?; _____?

Statement to use:

- You’re bright enough to make it through, but research shows that when you have a solid goal, you’re far more likely to make it to your goal and do well over time.

Major(s)

Undecided?

Questions to ask:

- When you were happiest as a child, what were you doing?
- When are you happiest now?
- When are you most positively challenged?
- When do you feel most accomplished?
- How does this relate to your career goals/what you want to do with your life?

Statements to use:

- It's a lot easier to get places when you have a plan and know where you want to go.
- Meaning – It's easier to make your way through college and graduate if you have decided on a major and perhaps a post-graduation career goal, too.
- I want to offer you a reflective homework assignment to work on for next meeting:

Journaling (helpful for introverts, especially) and asking themselves...

*What makes me happy?

*Why does it make me happy?

Double (or triple) majoring and struggling to keep up?

Statements to use:

- The picture that comes to my mind is that you're on a highway, and right now, you're trying to switch lanes back and forth all of the time. This puts you at risk of accidents! In life, sometimes you need to pick one lane, and cruise to the exit, rather than driving between multiple lanes all of the time.
- I get the picture of you juggling cars, not balls – that's a lot to take on, and eventually, you will probably get crushed underneath them.

Failing or struggling in major classes but still want to continue on with major?

Questions to ask:

- It's like you're driving down the road and you see road signs that say "caution, bridge ahead, or detour, road closed." Would you follow these road signs that say "detour" or "caution?"
- Have them ask themselves, "Why is fear of what people might think driving my decisions?"
- Do you not want to let others down? Often times we say "yes" to others when we really want to say "no" because we don't want to let them down. I'm wondering how often you do that in life?

Statement to use:

- Wanting something and being willing to work for it are different.

Making appointments

Questions to ask/statements to use:

- I'm picking up some mixed messages. Do you want to set up another appointment?
- You don't sound sold on coming back.

- You seem hesitant to return.
- If student says no to setting up another appointment – I want to see you have a successful semester and I'd love to play a role in helping you. I encourage you, whether with me or with someone else – to please seek out someone that can assist you throughout the semester/year.

Reminder:

- Pay attention to nonverbal cues when setting up the next appointment(s).

No-shows

Questions to ask/statements to use:

- This pattern of behavior frightens me for you. We want you to become a high functioning adult and this behavior is not going to set you up for success and get you through college.
- What you're telling me by continuously not showing up is that these sessions are not effective/ not working for you.
- It frustrates me when you don't show up because you took another student's time as well as mine. I'd prefer if you could let me know in advance if you are unable to make an appointment.
- Can I count on you for our appointments from now on?

Reminders:

- When confirming appointments with students, use the word "confirm" instead of "remind" –This prevents us from over functioning for the student.
- "We teach people how to behave and we teach people how to treat us."

Over functioning

Statement to use:

- I know that you want me to do it for you, but I would be doing you a disservice.

Patterns

Reminder:

- If it happens twice, it's a pattern – It's not *if* it will happen again, it's *when* it will happen again.

Soft-pillowing

Statements to use:

- "At the same time" or "and" when contrasting a student's current behaviors with overall goal.
- Followed by, "help me understand."

Truth-telling

Questions to ask/statements to use:

- Can I be frank?
- Can I have your permission to tell you truth as I see it?
- Can I share with you the perception I'm getting?

- I just want to try something on for size – it’s been crossing my brain – do with it what you will...
- When you’re in a better spot, and when you are ready, willing, and able – I’d really like to have an honest conversation with you.
- I wonder if this is the point in the semester where we need to tell ourselves the truth?
- What would you tell yourself if you were me?
- Part of life and growing up is that we need to tell ourselves the truth.

Reminders:

- “The biggest gift we can give students is the truth.”
- Truth frees us to make a better decision(s).
- When to tell the truth: The minute we see ourselves caring more than the student appears to care.

Wingers

Questions to ask/statements to use:

- It’s like you’re at a buffet, and you keep seeing things that you want to add to your plate. Eventually, your plate is overflowing and things are going to start falling off the sides. What can you put down to ensure you are successful (i.e., plate 80% full)?

Reminders:

- Students are not realistic at telling themselves the truth about how long it takes to do something. The cost of this is stress. This is a possible topic to bring up when sensing a pattern.
- Key is facilitating wingers to tell themselves the truth.

Compiled by Rachael Lynch and Amanda Buzard

Coaching Testimonials

"Success Coaching is a unique partnership with students where you infuse advising, counseling, academic and life coaching into one package. We are charged with the awesome task of meeting each student where they are at in their life and academic career, and allowing them to discover their strengths while providing a support that they may otherwise not receive in life."

"Having a person you can trust to go to with questions is the biggest form of relief students receive from our office, in my opinion"

"Remember that each student has their own sets of needs. What worked for one student may not work for another. When a student tries something new like an improved study strategy, and it doesn't work for them, remind your self that it's not a failure on your part, nor is it theirs. It means you're that much closer to helping that student find out what strategies truly help them succeed."

"Being a Success Coach has been a wonderful, rewarding experience. I am able to co-construct plans for success with students, which helps them reach their goals. The best part is being able to connect with students and provide them with a safe place to voice their questions and concerns."

"It's not about the quantity of appointments you have each week or day, but simply about the quality of relationships you have developed with each student. There isn't a day I leave my office not feeling gratified. Even if it doesn't seem like you haven't made an impact on a student that day, you truly have offered a new perspective and provided encouragement that anything in life is achievable."

“Seeing a student cry with tears of JOY because she doesn't feel alone anymore as she pursues her education at CMU.”

Appendix

Monthly Summary Report:

The template below is to assist in preparing your monthly summary. Depending on the month and current initiatives, some items may not apply.

Management Culture

- Activities designed to improve relationships with students, faculty, staff, and other University stakeholders
- Specific meetings, training exercises, etc., geared towards staff development, evaluation, measurement, empowerment, succession planning, and accountability
- Challenging / Mitigating (Problem / Complex) issues, departmental responsiveness, personal/staff accolades, transparency, etc.
- Staff Climate-Observations, concerns, relevant feedback from staff

Measurement

- Production – i.e., execution, seamlessness, gap analyses, deadlines, failure points
- Service – i.e., satisfaction data, usage data
- Metrics – i.e., web access, calls, appointments, outreach efforts, campaign targets (unique emails, open rates, click rates, benchmarks, trends)

Activities supporting retention and recruitment

- Outreach
- Activities/events

Student/Customer Climate

- Behavioral Observations
- Interaction Observations
- Trends

Other (aligned into the larger goals and initiatives of CMU, ESS or OSS)

- Progress on YOUR strategic goals/initiatives
- Progress on OSS initiatives

Progress on CMU/ESS prioritie

Helping students with online classes

What Does Online classes Offered Through Global Campus Mean?

- Different course start and end dates from main campus courses
- Different registration dates
- No Spring Break
- Different drop and withdrawal policies and dates
- Online courses offered in three different lengths:
 - 8 weeks
 - 12 weeks
 - 16 weeks
- CMU Online offers (15) “terms” per year:
 - (3) 16-week semesters
 - (6) 8-week terms
 - (3) 12-week terms
 - (3) 8-week “1A” terms starting at the same time as 12-week courses
- Online courses always start on a Monday and end on a Friday
- Online course “run” during holidays
- Online courses do accommodate a winter break during Christmas holiday
- No Spring Break online
- The start of registration will always be the same day main campus registration begins
- End of registration differs from campus
 - Global registration ends 5 days before the start of class
 - Since online classes start on a Monday, registration ends at midnight the proceeding Tuesday
- Online courses are capped at 25 or less
- No bump card process
- Not allowed to enroll:
 - Once registration has ended
 - After course has started
- Registration Process
 - Use Course Search and Registration System to Register in CentralLink
 - Filters are the key!
 - Select “online”

- “Time” is course start and end dates
- Wait List Feature
 - Wait list feature in Course Search/Registration is the only way to obtain a seat in a full online class.
 - If seat becomes available, you will be automatically enrolled from the Wait List.
 - Use of Wait List lets CMU Online know if another section needs to be offered.
- Drop/Withdrawal Definitions
 - Drop” removes course from academic record
 - Withdrawal: course remains on record with a grade of “W” (does not impact GPA)
 - Monday (midnight) to Sunday (11:59) = CMU Online Week
 - Drop anytime prior to course start = 100% tuition refund, no fee
 - Week 1 drop = 100% tuition refund, \$50 fee
 - Week 2 to Mid-Point = Withdrawal with corresponding percentage of tuition lost, \$50 fee
- Proctored Exams
 - A Proctor is a person authorized by CMU to administer and oversee you while taking an online exam
 - Proctored exams are still taken online through Blackboard using a computer provided by the proctor.
 - Exams are taken at the proctor’s organization.
 - Some proctors charge a fee (not CMU proctors) which is the student’s responsibility to pay.
 - Some, but not all, online undergraduate courses will require proctored exams.
- Who Can Proctor?
 - CMU Online offers proctoring services free of charge at 2 locations
 - Park Library, Room 321
 - CMU North, located north of Meijer
 - CMU Global Campus centers also proctor
 - Libraries, teachers, counselors, administrators of colleges, universities and schools can proctor.
 - Everyone must be pre-approved by CMU Online to proctor
- How Do I Locate a Proctor?
 - Call local libraries and schools to see if they offer proctoring service, if so:
 - Do they charge a fee?
 - What hours are they available to proctor?
 - Can they provide a suitable, distraction free testing environment?
 - Can they provide a computer and reliable internet (not wireless)?

- Go to Proctor Designation Form, enter in your zip code to see list of previously approved proctors in area
- What Do I Do After I've Found a Proctor?
 - Submit proctor designation form
 - CMU Online will review and approve or reject
 - Once approved, CMU Online will email exam instructions to proctor
 - Schedule an Exam Appointment with proctor
 - Proctor designation will remain on file as is until you decide to change it
- What Do I Do on Exam Day?
 - Arrive on time
 - Bring photo ID
 - Leave personal belongings, including cell phone in car
 - Log into Blackboard, locate course and exam
 - Proctor will enter passcode to open exam for you
- Technical Issues
 - Your proctor can call:
 - CMU Online
 - CMU Help Desk
 - Send an email to your instructor "cc" CMU Online
- Using CMU Online As Your Proctor
 - If you designate CMU Online as your proctor, use the "online exam appointment scheduler" to arrange for your exams
- If you encounter issues of any kind with your online class, do NOT contact any department on CMU's main campus.
- Contact CMU Online ONLY!
- CMU Online Contact Info:
 - CMU Online – General Questions
 - (800) 688-4268, option 2
 - cmuonline@cmich.edu
 - Questions About Proctoring
 - (800) 688-4268, option 1
 - cmu.online.proctor@cmich.edu
 - CMU Help Desk
 - (800) 950-1144 ext. 3662

SAP Timesheet Production Process

The following steps must be taken in the event a student or temporary staff member must report time in hard copy for approval and payroll processing.

Log into SAP Campus Management Production.

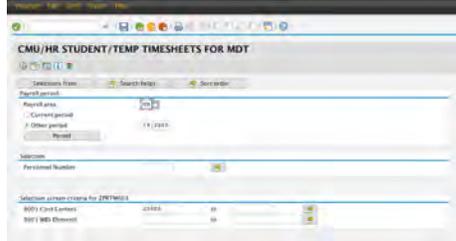

Type the following into the navigation window: [zpa_zprtm003](#)

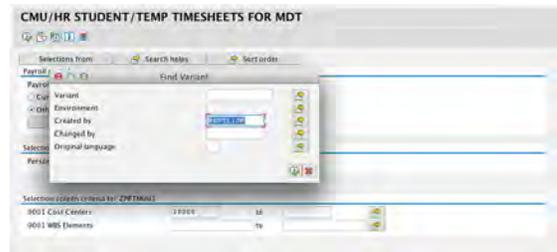

Click “Get Variant” (the icon that looks like a staircase).

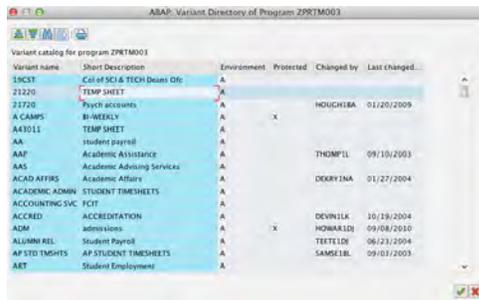

(the icon that looks like a staircase).

Remove the name in the “Created by” area and then, click “Execute” (the icon with the green check in front of a white circle).

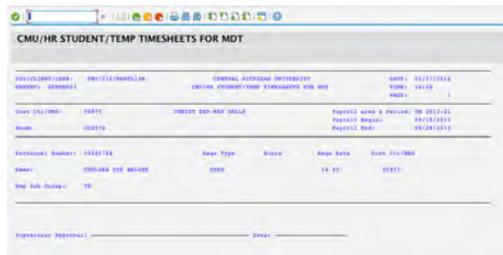

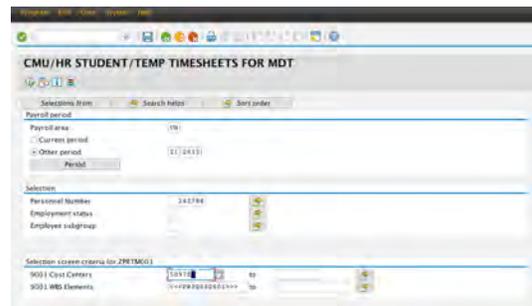

Click “TempSheet”

Enter the correct pay period and year, the personnel number for the employee and the correct cost center number.

Click “Execute” (the icon with the green check in front of a white circle) and then, print the timesheet.

Student Success Collaborative

This software program is utilized to look up **all students** at the university. This is another resource to check a student’s status and different risk indicators in more depth. The

Student Success Collaborative allows you to browse student majors, analyze risk scores, credits completed by term, a linear GPA progression chart, and much more. Below are some highlights of how to use this tool.

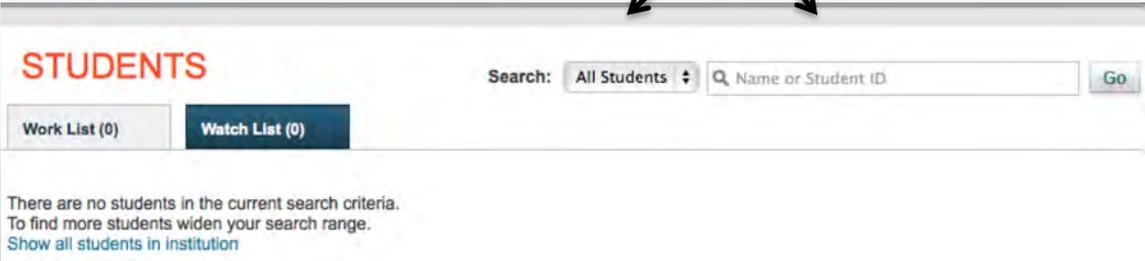

To access & log-in:

1. Go to Central-link and log into account
2. Go to “My Account”
3. Under “Academics”, you will find Student Success Collaborative

Student Success Collaborative
Access CMU's Student Success Collaborative system.

Click **“All Students”** to search for **any** student at CMU. Click **“Current List”** to look for a specific student from a working list.

To search for a student:

To create a new list:

Option: Select specific college/school to pull a group of students.

Option: Select specific major/interest.

Option: Select specific degree.

Option: Search by advisor or a selected predetermined groups at CMU i.e. AEP

Select to create a "New List".

Option: Select specific range of credit hours completed.
1-25= freshmen
26-55= sophomore
56-85= junior
86+ = senior

The screenshot shows a 'Refine List' interface with several sections:

- College/School Edit:** A list with a checked item 'Business Administration'.
- Major Edit:** A list with checked items 'Economics (Interest)' and 'Economics Major'.
- Degree Edit:** A list with the text 'No specific degree refinements.'
- Assignment:** A text input field labeled 'Advisor or group name'.
- # of Notifications:** Two input fields labeled 'At least' and 'At most'.
- GPA (0.00 - 5.00):** Two input fields labeled 'From' (2.3) and 'To' (2.49).
- Risk Stratification:** Four checkboxes: 'Low Risk', 'Moderate Risk', 'High Risk', and 'Unknown Risk'.
- Earned Credits:** Two input fields labeled 'At least' (0) and 'At most' (42).
- Enrollment:** Three radio buttons: 'Currently enrolled' (selected), 'Currently not enrolled', and 'No Preference'.
- Has Reminder:** Three radio buttons: 'Yes', 'No', and 'No Preference' (selected).
- Student Last Name:** Two input fields labeled 'From' and 'To'.
- Student Status:** A list of checkboxes: 'No action taken', 'Temp Status', 'RVW: No Contact Nee...', 'RVW: Contacted', and 'ADV: Status'.
- Student Classification:** A list of checkboxes: 'Freshman', 'Sophomore', 'Junior', and 'Senior'.

At the bottom, there are 'Apply Selections' and 'Cancel' buttons.

Reviewing work list profiles:

1. Once you have created a work list, you will be able to view each student's profile and look at his or her notifications of risk.

Risk	Student name ▲	Cum. GPA	Notifications	Last edit to profile
●	Bourne, Scott ID: 428117 Major: Accounting Major Add to watch list	2.35	! 1 current	Never Student Status: No action taken
●	Dozier, DaShanae' J ID: 451441 Major: Accounting Major Add to watch list	2.22	! 4 current	Never Student Status: No action taken
●	Foster, Matthew C ID: 273402 Major: Accounting Major Add to watch list	2.4	! 4 current	Never Student Status: No action taken

Option: You are able to add a student to your "Watch List". This allows you to closely track any progression.

Number of risk notifications that contribute to the level of risk.

Overview of student's profile:

2. Once you have created a work list, you will be able to view each student's profile and look at his or her notifications of risk.
3. Click on a student's name.

Linear GPA Graph:

MAP-Works is a tool in which the Office of Student Success utilizes to track FTIAC (Spell out) status students. As a Success Coach, the following key areas are how you will begin using this tool and campaign for your student appointments.

Linear GPA Graph:

Student Lists allow you to create a list geared towards a specific group of students. **Real- Lists** are usually “shared” lists that everyone can view or utilize. These lists are targeted for specific groups/ areas of students as well. It is easier to use the “Student Tracking” or “Individual Student” tab across the top of the page.

Click and drag mouse to zoom in

After you login, this is your main tool bar.

- **Home** tab- allows you to see high priority students (Red & Redx2), Referrals, and the number of students that did not respond to the MAP-Works survey.
- **Student Tracking** tab- allows you to see the large list of students including; their risk indicator, intent to leave, who logged recent activity, and more!
- **Individual Student** tab- allows you to see a smaller scale of the Student tracking list. You are able to view each profile individually.
- **Referrals** tab- Able to see who referred a student to what professional and their notes.
- **All Students** tab- more in-depth information on MAP-Works survey data and filtering.

Student Lists

Student Tracking tab is where you will find your large list of students. Make sure you choose the specific "Real-Time" list you would like.

You can search students individually by name or student ID number.

From this drop down menu, choose the list in which you would like to view. For example, if you are an "east campus" coach you want the "East Residence Halls - Shared"

View student risk indicator and level of intent to leave.

View the **date** of when the profile was last logged/updated

View **who** contacted or logged activity in profile last.

Readings:

APPRECIATIVE ADVISING

When working with students, one approach that has been found to be effective by coaches and advisors is Appreciative Advising. In a nutshell, it emphasizes the process of communication and the intentional practice of asking positive, open-ended questions. Appreciate Advising is centered on Appreciative Inquiry and positive psychology literature. That is, finding the positive and utilizing this energy to create change.

Appreciate Advising has been proven to positively affect academic performance, academic success and retention. It is intended to facilitate strong relationships and rapport between the coach and the student, as well as enhance the student's perception of self-knowledge, academic preparedness, interdependence, social behavior and confidence. Appreciative Advising promotes student development of cognitive, metacognitive and affective skills as it fosters academic decision-making skills (such as comprehension, analysis, application, creation and evaluation), encourages student's self-reflection and monitoring, and addresses feelings and attitudes in order to influence student motivation and goals.

Appreciative Advising is comprised of a six-phase model, which is intended to empower the student and the coach working with them. This model is outlined below.

Six Phases of Appreciative Advising

(Note – these phases can be completed in a different order and/or revisited, and not all are always covered in one meeting)

1. ***Disarm – Welcome student and make them feel comfortable***
 - Begins before the first meeting – Involves previous communications via email, welcoming office setting, user-friendly website
 - Alleviate any fear student may have coming into meeting
 - Convey a charismatic & personal introduction, and positive verbal & nonverbal behaviors
 - Ask introductory questions to “break the ice” and learn about student’s life
 - Build connections with student through self-disclosure
2. ***Discover – Uncover student’s strengths***
 - Use positive, open-ended questions to encourage student’s self-reflection
 - Discuss and highlight student’s abilities, accomplishments, and achievements
3. ***Dream – Identify students’ goals, hopes and dreams for the future***
 - Remind student of their purpose
 - Encourage motivation and goal setting
4. ***Design – Partner with student to develop a plan of action***
 - Connect back to goals identified in dream phase
 - Student must participate in creation of their action plan (in order to create “buy-in” and ownership)
 - Identify potential resources and experiences (academic, social) necessary to carry out plan
 - Create concrete steps
5. ***Deliver – Carry out plan created in design phase***
 - Convey confidence in student’s ability to follow through
 - Remind student of their priorities
 - Set expectations for follow up, schedule continued meetings, etc.
 - Address potential obstacles and discuss strategies to overcome them
6. ***Don’t Settle - Encourage student to continue to strive for self-improvement (positive restlessness)***
 - Assess progress made since last meeting
 - Help students set higher expectations and challenge themselves
 - Serve as role model by continuing to better self through reading, professional development, etc.
 - Update plan created in initial design phase as needed

See “Appreciative Advising Sample Questions” in Appendix for sample questions to use in student meetings for each phase. Additional supplemental materials can be found within the Jet drive.

Advising As Coaching

Coaching as a profession, likely emerged as an outgrowth of the use of professional development counselors hired to assist executives in the workplace and life coaches in adult education programs as well as leadership development programs.

Since coaching is a one-on-one development process, the goal involved the change in one's behavior to improve their performance in a professional setting. Outcomes have resulted in a diverse array of philosophical and practical approaches. The varieties of many coaching styles have a numerous amount of autonomy in the methods used to support their clients. Typically the process begins with some form of relationship building and initial needs assessment followed by more formal assessment and feedback. After discussing feedback with the client, both participants engage in goal orientated planning to address concerns or build strengths. Implementation, or active learning, and follow up complete the process.

Kampa-Kokesch and Anderson found coaching benefited the organization and the client by contributing to increased skills, learning, productivity, sustained behavior change, awareness, and performance improvement. Coaching practices can be applied successfully to any philosophical approach to academic advising. Advising-as-teaching approach and coaching share extremely similar theoretical, procedural, and technical aspects. Both are ground to an eclectic blend of theoretical concepts drawn from the social sciences. Both are practice orientated as well.

Three Levels of Advising as Coaching

Level 1: The Developmental Program

This level focuses on the ongoing relationship of the advisors and students. Over time, students progress through their degrees to the completion of their long-term educational goals. The process initiates when participants make contact. The nature of the first conversation may impact the characteristics of the relationship building. The first few moments of initial encounter prove to be the most important and the

advisor/coach should make a significant effort to make good impression, build trust, and break down barriers.

This level should concentrate on striving to understand the student, specifically the abilities and resources they possess or lack in the relation to the pursuit of educational and life goals. This stage can require multiple meetings. The participants should also focus on specific goals and thereby generate a clear direction on how to proceed. Action planning is next. The advisor/coach begins developing career and educational plans. Then they work on implementation such that the student pursues personal goals in accordance with these plans. Advisors/coaches follow up with the student to evaluate progress and revisit the plans.

Level 2: The Individual Session

The second level represents the process through which advisor-student interaction unfolds in an individual advising session. The immediate needs of a student come into focus as they relate to the pursuit of long-term goals. The advising/coaching session process begins with careful preparation. The advisor/coach should adequately get ready by reviewing previous session notes and gathering materials based on any pre-session conversation with the student. First, greet the student initiate rapport or relationship building. Second, make inquiries to ascertain and clarify the student's needs. When the session reaches the advising-as-coaching phase, this includes provision of guidance through the facilitation of student decision-making. It is critical to follow up prior to the next session. The student's goals, plans, and past experiences should guide decision making about actions for addressing immediate needs. Immediate challenges may alter the coach's and client's focus for a time, making each session ultimately moving in the direction of long-term objectives.

Level 3: The Decision Facilitation Process

This level represents the short-term decision-making process and action planning of the individual. This level of engagement, advisors/coaches can draw most on coaching practices. Focus primarily on facilitating decision-making and promoting accountability for clients. After clarifying these aspects of the student's life, the advisor/coach encourages the student to articulate attempts already made to address challenges or achieve the dream as well as the impact of any actions taken to date. The goal is to develop as many alternatives as possible.

Once the advisor/coach and client list possible alternatives, the advisor as coach asks the student to select options most likely to achieve the desired dream or resolve the problem. The pair then establishes specific goals and develops an action plan for achieving these goals. The advisor/coach encourages the student to seek support from others to implement the plan. Finally, the student implements the plan and the advisor/coach follows up to monitor progress and ensure accountability.

GRIT RESEARCH
Angela Duckworth

The notion of “grit” is an idea presented by Angela Duckworth, based on her own research and the findings of Carol Dweck about mindset. The question “Why do some individuals accomplish more than others of equal intelligence?” is the basic foundation of her research and findings.

What is grit?

“We define grit as perseverance and passion for long-term goals. It entails working strenuously toward challenges, maintaining an effort and interest over years despite failure, adversity and plateaus in progress. The gritty individual approaches achievement as a marathon; his or her advantage is stamina. Whereas disappointment or boredom signals to others that it is time to change trajectory or cut losses, the gritty individual stays the course.”

Duckworth’s Research

- *West Point Military Academy* – Which cadets would stay in military training and which would drop out?
 - Findings: Grit, over all other qualities including physical strength, was the highest predictor of students who made it through the “Beast Barracks” training.
- *National Spelling Bee* – Which children would advance the farthest in competition?
 - Findings: Gritty finalists outperformed their less gritty peers because they studied longer. Gritty children work harder and longer than their less gritty peers and, as a consequence, perform better – above those who scored higher on verbal IQ and self-control scales.
- *High school students in urban Chicago public schools* – Students at junior standing took grit questionnaires and were studied to see who would graduate.
 - Findings:
 - Grittier kids were significantly more likely to graduate, even when they were matched on every characteristic Duckworth could measure, including family income, standardized achievement test scores, and how safe they felt at school.
 - Grit matters especially for kids at risk for dropping out.

Key Points

- Grit was the *key factor* that predicted success in all points of Duckworth’s research – above social intelligence, good looks, physical health, and I.Q.

- Grit and talent are inversely related – “If you’re just trying to get an A or an A-, just trying to make it to some threshold and you’re a really talented kid, you may do your homework in a few minutes, whereas other kids take much longer. You get to a certain level of proficiency, and then you stop. So you actually work less hard. If, on the other hand, you are not just trying to reach a certain cut point but are trying to maximize your outcomes—you want to do as well as you possibly can—then there’s no limit, ceiling or threshold.”
- Much like Dweck’s research on mindset, Duckworth found that talented people often live in the fixed mindset and believe that their talent alone will help them achieve their goals. People with a growth mindset (and therefore, grit) may have talent but more so use their effort to achieve their goal. Effort is a key difference between people who are gritty and people who are not.
- “There are people who have no limit to how much they want to understand, learn or success – and those are the people who are both talented and gritty. This isn’t to say that all talented people are un-gritty, but the most successful people in life are both talented and gritty in whatever they’ve chosen to do.”
- Oftentimes, those labeled “gifted and talented” are fragile in the sense that they do not know how to fail.
- Grit encompasses two qualities: Having resilience and a positive response in the face of failure or adversity (growth mindset), and having consistent interests – focused passions – over a long time.
- When you consider individuals of equal talent, the grittier ones did better in all of Duckworth’s findings.

How To Build Grit

- Growth Mindset vs. Fixed Mindset
 - The ability to learn is not fixed and it can change with effort.
 - When people live within a growth mindset, they do not believe failure is a permanent condition and are much more likely to continue trying, despite failures and setbacks.
 - The growth mindset attitude of “I can get better if I try harder” helps to make people more tenacious, determined, hard-working and “gritty.”
- Failing Forward & developing resiliency
 - Understanding and building a belief in the philosophy of “failing forward” – that is, changing your perception of and response to failure to a more positive, problem-solving approach rather than defeatist attitude.
- Understand and begin “deliberate practice.”
 - “Deliberate practice” is very effortful practice on things you can’t do yet.
 - Understand that deliberate practice is not easy, and will likely make you confused, frustrated or bored as you make mistakes from continuously doing things over and over again. However, this is designed to give you practice with developing your grit.

Grit & Success Coaching at CMU

It is critical for success coaches to help students learn and develop a growth mindset and grit so they can be successful during their time at CMU and beyond. Many students in the millennial generation are used to immediate gratification due to the use of technology and helicopter parents who, often times, will not let them fail and will shield them from what it feels like to fail. Due to this, there will be many students who do not understand how to move beyond failure and sustain effort; if they don't get it the first time, they find it easier to give up.

Coaching students to see the benefits of delayed gratification – that is, reaching their long-term goals even if they cannot see the direct results of their hard work at this moment – is one way to help them build grit and resilience. Another way is to discuss the growth mindset and grit, and talk about areas where they can grow and begin to change their mindset, if needed. Additionally, know the strategies from “Failing Forward” to help students develop resilience in the face of failure and understand that there will be roadblocks along the way on their path to their goals – and rather than trying to avoid those roadblocks, assist them to grow their mindset so they can respond to those failures in a positive, productive way and keep moving forward.

POSITIVE PSYCHOLOGY TRAINING

Dr. Dina Battaglia, FaCIT

What is Positive Psychology?

“Positive Psychology is the scientific study of the strengths and virtues that enable individuals and communities to thrive. This field is founded on the belief that people want to lead meaningful and fulfilling lives, to cultivate what is best within themselves, and to enhance their experiences of work, love and play.”

GROW Coaching Model

- Goals
 - Help client identify goals.
- Reality of Current Circumstances, Resources, Obstacles
 - Help client to see current circumstances and what resources they have/obstacles they face in an objective, clear way.
- Options
 - Help client establish options for how to move forward.
- Will/Way Forward
 - Help client to see the way forward and begin making steps.

Positive Psychology Principles for Success

- Mindfulness
 - Paying attention to one's ongoing experience in a way that allows openness and flexibility. It is being full present and aware during our daily activities.
- Flow
 - When you get so involved with something so deeply that nothing else seems to matter and you lose track of time.
- Learned Optimism
 - Learning to be more optimistic by focusing on the positive and what is possible.
- Savoring
 - Involves an awareness of pleasure along with quite deliberate attempts to focus attention on the sensation at hand and delight in it.
- Hope Theory
 - Hope is the result of two processes: 1) Pathways or believing one can find ways to reach desired goals and 2) Agency or believing that one can become motivated enough to pursue those goals.
- Resilience
 - A broad array of abilities for constructively and positively adapting to risk, adversity, or some monumental negative event. Resilient people "bounce back" from difficult situations.
- Grit
 - Self-disciplined people with strong persistence and passion toward their goals.
- Hardiness
 - Characteristics of hardy people include their sense of control over their lives, the stress they are facing is perceived as a challenge rather than a crisis, and a sense of commitment Hardy people cognitively interpret life events in adaptive ways through transformational coping.
- Signature Strengths

- The most important strengths for each individual. Twenty-four strengths are measured by the Values in Action (VIA) inventory.

PERMA Theory of Well-Being

- Positive Emotions
 - Thinking in a positive way helps with motivation and ownership for success.
- Engagement
 - Finding something that you're really good at and that you'd love doing, even if you didn't get paid, so you can enter a state of "flow."
- Positive Relationships
 - Nurturing positive relationships helps with self-esteem, successful coping skills, better physical health and fewer psychological problems.
- Meaning
 - Finding your meaning and significance in the world and realizing that individuals can have an impact on family, friends and the community.
- Accomplishments
 - Goal setting helps to feel a sense of personal challenge, intrinsic motivation and a sense of competency/mastery of something.

Positive Psychology in Success Coaching

To create a positive education, one must develop skills of achievement in addition to skills of well-being.

Introduction

The Office of Institutional Research conducts an on-going study of persistence and graduation rates of on-campus undergraduate students at Central Michigan University. This report includes a summary of the results along with tables that present the persistence and graduation rates for new transfer students. The tables present data on overall persistence and graduation rates, as well as rates broken down by students' entry class.

For this study, a student is defined as having persisted into a given semester if he or she attended CMU during that semester or had previously graduated from CMU with a baccalaureate degree. Non-persisters include transfers (students who have transferred to other colleges/universities), stopouts (those who have dropped out temporarily and who will return to college in the future), and dropouts (those who no longer will continue with their education).

Summary

This report contains information about the persistence and graduation rates of Central Michigan University new transfers entering CMU in the fall semesters between 2006 and 2014.

The major findings over the most recent three cohort years, on average, are:

- About 78.7% of new transfers entering CMU in the fall semester began their second year at CMU.
- Second-year persistence rates by class, in ascending order are:
 - Freshman (68.6%)
 - Senior (79.3%)
 - Sophomore (79.5%)
 - Junior (84.7%)
- Of a typical new transfer class, 65.8% graduate from CMU with a bachelor's degree within six years. Also, 31.3% graduate in three years or less, 53.8% graduate in four years or less, and 61.7% graduate in five years or less.
- six-year graduation rates by class, in ascending order are:
 - Freshman (50.8%)
 - Sophomore (69.1%)
 - Junior (75.9%)
 - Senior (79.1%)

Re-Evaluations	54

What is Prior-Learning Credit?

Prior-Learning credit can be awarded for college-level learning students have already acquired. College credit for prior learning is not a new idea. College Level Examination Programs (CLEP) and other testing programs allow students to receive college credit for prior learning in a specific course or subject area offered by the college or university. (Contact your advisor for more information about these programs.) CMU's Prior-Learning credit option is based on a portfolio rather than a test, and it can result in more credits than you might receive from a test.

CMU recognizes the value of adult experiential learning and offers the opportunity for students to obtain academic credit for that learning. Our prior-learning model is based on "competencies" rather than on course "equivalents," but the credit awarded may be applied to students' degree program, usually elective credits. The competency model allows students to earn credit in various areas of learning, regardless of whether CMU offers any specific courses in those areas. The competency model allows students to have their college-level learning recognized, regardless of whether we offer specific courses pertaining to what they have learned.

As an adult, much of your personal and professional development has probably occurred outside the traditional academic classroom. Through such experiences, you may have acquired skills and knowledge that could satisfy some of your CMU degree requirements. For assessment purposes, we categorize students' prior-learning experiences into three areas:

- **Work Experiences** (based on employment positions)
- **Training Experiences** (e.g., workshops, seminars, or classes taken to enhance learning and professional development)
- **Life Experiences** (other, less-formal, volunteer-type interests and activities that are of substantial duration and have resulted in college-level learning)

The above experiences also represent how the body of the Prior-Learning portfolio is organized. For any of your learning from these experiences to be considered for credit, you will need to assemble a portfolio that explains and documents the experiences and what you learned from them (i.e., what competencies you have acquired). Key in this process is your "self-assessment," which explains the learning that occurred through the experiences. Your portfolio will then be evaluated to determine whether credit can be awarded, and if so, how much and at what level.

Prior-Learning credit at CMU had its beginning in the early 1970s when we began offering courses on military bases in the United States. Military personnel sought credit for the learning they achieved through professional experiences. CMU developed a Prior-Learning Assessment (PLA) process and assembled a team to evaluate portfolios submitted for college credit. CMU now serves undergraduate and graduate students in the United States, Canada, and Mexico. Since the program's inception, the Prior-Learning Assessment Team (PLAT) has evaluated over 10,000 portfolios.

How Do I Know if I Qualify for Prior-Learning Credit?

All graduate and undergraduate students admitted to CMU and enrolled in a degree program offered through CMU Global Campus are eligible for Prior-Learning credit. However, a portfolio is evaluated only after transfer credits have been evaluated. A Transfer Credit Evaluation form, transcripts from each college or university attended, and a CMU transcript showing all transfer and earned credits must be submitted with the portfolio.

You should meet with your academic advisor before beginning the portfolio-development process. The advisor may be able to help you identify the experiences that would be most applicable to your degree program if Prior-Learning credit is awarded.

- **For undergraduate credit:** You can include experiences from the completion *date on your high school diploma*.
- **For graduate credit:** You can use experiences only from the *previous 7 years or the completion date of your latest undergraduate degree*, whichever is more recent.

However, prior learning does not work for everyone, and there is no easy answer as to whether you should spend the time and energy involved in developing and submitting a portfolio. Individuals have had different experiences, for differing lengths of time, and will explain these experiences in different ways, all of which can affect the amount of credit received.

To download a short questionnaire that might help you decide whether the portfolio approach will benefit you in pursuing your degree, go to the page in the Prior-Learning Credit web site titled "Worksheets, Charts, and Fillable Forms."

What Kinds of Learning Can I Get Credit for?

You have the opportunity to obtain credit for your previous work, training, and life experiences. CMU's policies and procedures for awarding Prior-Learning credit have been influenced by the standards for assessing learning published by the Council for Adult and Experiential Learning (CAEL) and the American Council on Education (ACE).

1. Credit is awarded only for *learning* and not simply for *doing*. You will not receive credit for having had the experience; you must be able to explain what you learned from the experience and how you have applied that learning. Experience provides the setting in which potential learning may take place; however, individuals respond to similar experiences differently, which affects the learning that actually takes place. Thus, two people may hold similar jobs requiring the same responsibilities, and yet they may learn quite different things, depending on such variables as what a person already knew or didn't know when starting a position, the learning that a special project may have afforded, and/or the changes in an industry that resulted in a person needing to learn new concepts and skills.
2. Credit is awarded only for *college-level* learning, which is based upon the premise that college learning provides a balance between theory and practical application. Many worthwhile experiences may take place in employment, training, and other life settings, but they may not provide the blend of theoretical and practical knowledge that college credit requires. Experiences that qualify for *college-level* credit are those that provide the learner with the general principles and concepts of a field, which in turn enable the learner to apply that learning to other settings.
3. Prior-Learning credit will not be given if credit has already been granted through other courses, whether CMU transfer, examination credit (including CLEP) or some other venue. If you have transferred any courses to CMU, then you must include in your portfolio a current CMU transcript along with a copy of your Transfer Credit Evaluation (TCE) form.

Note: Courses taken at other regionally-accredited academic institutions but not accepted for CMU transfer credit (usually because CMU has no equivalent course) may be submitted for Prior-Learning credit as "Training" experiences.

Prior-Learning credits may be used in place of required or elective courses in your major or minor, or as elective credits, as determined by your academic advisor.

However, Prior-Learning credits may *not* be used for

- University Program courses;
- Competency courses, including math, oral speech, writing and writing-intensive, and quantitative reasoning (QR); or
- the 30-semester-hour residency requirement (see the *Global Campus Bulletin*).

Your academic advisor will assist you in determining how the Prior-Learning credits may be applied toward your degree.

The Prior-Learning Assessment Team (PLAT) can award undergraduate credit at the lower (UNV 297) or upper (UNV 497) levels; graduate credit is awarded only as UNV 697. The following describe the qualities and assumptions about the levels:

Undergraduate Lower-Level (UNV 297): Skills and knowledge acquired at the lower division level are comparable to those that could be learned in the first two years of college. This includes basic concepts, procedures, and terminology that apply to a job and that show a good grasp of the fundamentals as well as

codes, rules, or regulations that govern on-the-job behavior. Learning at this level can be categorized as at the information, comprehension, and application level. The person uses and gains skills and operates independently or with a minimum of direct supervision.

Note: Learning at the vocational level, which is derived primarily from practical training in a trade and represents predominantly non-analytic skills (e.g., auto body repair, cosmetology, dental assistant, barber) is not generally considered college-level.

Undergraduate Upper –Level (UNV 497): Experiences awarded credit at the upper level represent more advanced learning. This level presupposes that basic knowledge has already been acquired. Instead, the emphasis is on in-depth learning. The person demonstrates the ability to analyze relationships and to understand underlying or organizing principles. The person operates more or less independently, is involved in the application of concepts at an advanced level, is able to solve problems and implement ideas in a creative manner, and has some research skills that can be applied to decision making.

Graduate (UNV 697): Graduate-level credit is available only to students enrolled in graduate degree programs offered through CMU Global Campus. Graduate learning reflects complex competencies that go beyond those that are upper-level undergraduate. The person operates largely in a world of concepts and policies that assumes a foundation of baccalaureate degree knowledge. Whether the experiences are quite narrow in focus (e.g., suicide prevention) or very broad (e.g., developing educational programs), the person demonstrates considerable practical and theoretical understanding of the field. Work elements include activities and learning in areas such as planning, research, forecasting, organizing, etc. The person would be likely to apply learning systematically across situations and share knowledge with others in the field.

How Many Credits Can I Earn for Prior Learning?

The maximum number of credits students can apply to an undergraduate degree is 60. The maximum number for graduate students is 10. However, the number of credits actually awarded depends on a number of factors:

- the length and duration of the experiences submitted for consideration
- the quality of the student's self-assessment of learning
- whether the learning is college-level (undergraduate or graduate)
- whether sufficient and appropriate documentation has been provided in support of the student's claims
- whether the portfolio includes all the required components in the correct order and meets all other requirements

The Prior-Learning Assessment Team (PLAT) uses the chart on the next page to determine the *potential* number of credits for each work and training experience submitted in the portfolio (i.e., each IV and V-Tab). In determining the number of potential credits for life experiences (VI-Tabs), the Team looks at whether the experience is at least two years of in-depth and sustained duration. Generally, though, life experiences receive the least amount of credit, in most cases, no more than 1 to 3 credits.

Work Experiences

As can be seen in the chart on the net page, experiences of fewer than 10 months in a single position would not result in any credits, while 16 to 25 months could result in three credits, assuming that the self-assessment and documentation are strong. On the other hand, eight years or longer in *one position* would have a maximum potential of 15 credits. Because the time is calculated per IV-Tab, submitting different positions as separate tabs can generate more potential credit hours. In some cases, evaluators might be able to combine short but related experiences to award credit. For example, military personnel may have a 6-month assignment and then be reassigned to another position. In this case, it is appropriate to submit the short work experience, as it may be possible for evaluators to combine it with another experience to generate credit.

Training Experiences

Workshops and seminar-type training experiences require 45 hours in-class clock hours to generate 1 credit, assuming that the self-assessment reflects college-level learning. For non-transferred course completed at a regionally-accredited institution, credits are generally awarded based on the number of semester hours completed, assuming that the grade in the class was a C or higher.

Life Experiences

Experiences must have occurred over a sustained span of time (2 years/24 months) and show substantial involvement to be eligible for any credit. Even though evaluators can combine multiple experiences and various Tabs to award credit, Life Experiences generate the least amount of credit, are not required for undergraduate portfolios, and generally are not included in graduate portfolios.

Easy-Reference Guide for Determining Number of Potential Credits for *Each* IV and V Tab

Work Experiences (IV Tabs)

Undergraduate Credit for each position (IV tab)	
Months on Job	Max potential credit hours
0 - 9	0
10 - 12	1
13 - 15	2
16 - 18	3
19 - 22	4
23 - 28	5
29 - 33	6
34 - 38	7
39 - 43	8
44 - 50	9
51 - 57	10
58 - 64	11
65 - 71	12
72 - 80	13
81 - 89	14
90 - 99+	15

Graduate Credit for each position (IV tab)	
Months on job	Max potential credit hours per job
0 - 9	0
10 - 15	1
16 - 20	2
21 - 25	3
26 - 30	4
31 - 35	5
36 - 40	6
41 - 45	7
46 - 50	8
51 - 55	9
56 - 84+	10

Training Experiences (V Tabs) (Undergraduate & Graduate)

Courses from Regionally- Accredited Schools that did not transfer to CMU*	
Class Hours	Credit Hours
0 - 14	0
15 - 29	1
30 - 44	2
45 - 60	3
and so on	

*Every 15 class hours = 1 credit. The number of credits for a course as reflected on the school's transcript is how much we award.

Trainings, Workshops, Seminars*	
Class Hours	Credit Hours
0 - 44	0
45 - 89	1
90 - 134	2
135 - 180	3
and so on	

* Every 45 hours = 1 credit. For Vehicle Design students with trainings from Batavia or Philpott Automotive Engineering School, every 40 hours = 1 credit.

10 CEUs (Continuing Education Units) = 1 credit

A downloadable copy of this chart can be found on the Prior-Learning Credit web site on the page titled "Worksheets, Charts, and Fillable Forms."

When Should I Apply for Prior-Learning Credit?

We encourage students to submit their portfolio *early* in their academic program, before they take courses that might duplicate their Prior-Learning experiences. Portfolios are evaluated continuously throughout the year, but expect an *8-to-10 week turnaround time* for processing your portfolio from the time it is received at CMU's Prior-Learning Office until you receive your award-notification letter. Students who are awarded Prior-Learning credit early in their academic careers have a much more accurate timeline for planning and meeting degree requirements, which also alleviates some of the stress that many students feel as graduation nears.

While portfolios can be submitted at any time, consider the following dates as guidelines for receiving Prior-Learning awards in time for graduation:

May 1 for August graduation
September 1 for December graduation
February 1 for May graduation

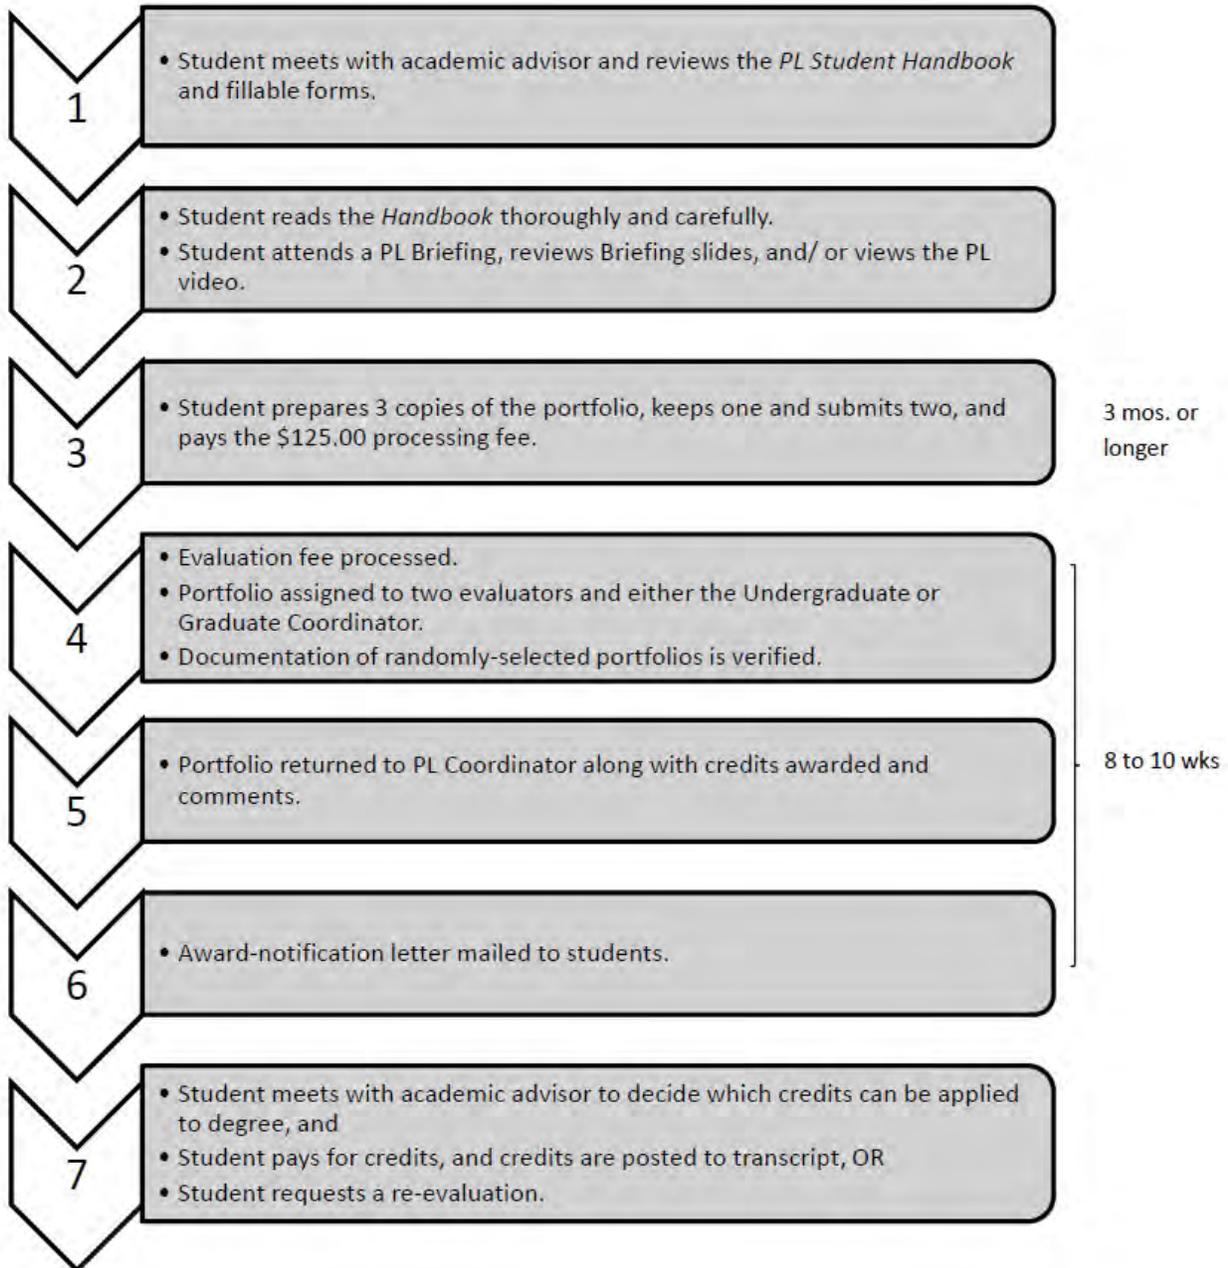

What is Involved in Preparing a Prior-Learning Portfolio, and How Long Will it Take?

Developing a Prior-Learning portfolio requires organizing and collecting documents; writing self-assessments of the learning acquired from various work, training, and/or life experiences; and completing the fillable forms according to the guidelines explained in this handbook.

The process of preparing a portfolio varies substantially from one student to the next. The time involved will depend on your work responsibilities, family obligations, volunteer activities, community involvement, and the number of courses you are taking during the time the portfolio is being prepared. Other factors include the number of years to be covered, the number of experiences submitted, and the availability of verification documents. Occasionally, a student will prepare a portfolio in as little as three months, but most take six months or longer. The sooner you begin, the better.

A diagram depicting the Prior-Learning portfolio process is on the next page.

Prior-Learning Portfolio Process

Components of a Prior-Learning Portfolio

Your completed portfolio will have at least six sections (i.e., Tabs) but may have as many as eight, depending on whether you include all three of the body sections (Tabs IV, V, and VI), instead of only one or two. For example, a student who is only interested in obtaining credit for learning from work experiences would include only the section pertaining to work experience (Tab IV) and wouldn't bother to include the sections pertaining to training (Tab V) or life experience (Tab VI). On the other hand, a student only interested in obtaining credit for courses from regionally-accredited schools that didn't transfer to CMU would only include the section pertaining training (Tab V) and not the sections pertaining to work or life experiences (Tab IV and Tab VI).

The chart on the next page shows the order in which the sections (Tabs) must be arranged in the portfolio. All the Tabs (except Tab VII) are fillable PDF forms.

Thereafter, each of the following steps is explained:

Step 1: Preparing

Step 2: Planning

Step 3: Completing the Fillable Tab Forms and Writing the Self-Assessments of Learning

Step 4: Assembling the Portfolio

Arrangement of Portfolio Components

Tabs I and II: Personal & Educational Information (a one-page fillable form; required)
Copies of all transcripts and, if applicable, a CMU Transfer Credit Evaluation are placed after this form.

Tab III: Tables of Contents (a multi-page fillable form)

- **Tab III-1:** Table of Contents for Tab IV (Work Experience).
- **Tab III-2:** Table of Contents for Tab V (Training Experience).
- **Tab III-3:** Table of Contents for Tab VI (Life Experience).

Tab IV: Work Experience (one or more multi-page fillable forms for each job/position)

- **Tab IV-1** for most recent position (fillable form, self-assessment, and documentation)
- **Tab IV-2** for next most recent position (fillable form, self-assessment, and documentation)
- and so forth

Tab V: Training Experience (a multi-page fillable form for each training)

- **Tab V-1** for most recent training (fillable form, self-assessment, and documentation)
- **Tab V-2** for next most recent training (fillable form, self-assessment, and documentation)
- and so forth

Tab VI: Life Experience (a multi-page fillable form and self-assessment for each experience)

- **Tab VI-1** for most recent activity (fillable form, self-assessment, and documentation)
- **Tab VI-2** for next most recent activity (fillable form, self-assessment, and documentation)
- and so forth

Tab VII: Signature Block & Notarization (a one-page *non-fillable* form; required)

Tab VIII: Portfolio Checklist (a multi-page fillable form; required)

Note: Your portfolio must contain at least one of the experience tabs: IV (Work Experience), V (Training Experience), or VI (Life Experience). It could contain all three, just two, or only one.

Step 1: Preparing

1. Review the Prior-Learning video and Briefing slides (PDF) available on the Prior-Learning Credit web site to determine if submitting a portfolio is right for you and to develop an understanding of the overall development process and submission guidelines. You can return to these materials for additional review as you work on your portfolio. If you decide to develop and submit a portfolio, then complete the tasks below and on the next several pages.
2. Download and save to your computer the required fillable forms from the Prior-Learning Credit web site. These forms, called “Tabs forms,” are what you will use during each step of the writing process. You will only need one copy of each for Tabs I & II, III, VII, and VIII, but you will likely need multiple copies of the forms for Tabs IV, V, and perhaps VI, because *each* experience in these sections submitted for credit in your final portfolio will require a separate completed Tab form and documentation. Save each copy of the form with a different filename, e.g.,

YournameIV-1.pdf JaneDoeIV-1.pdf

YournameIV-2.pdf JaneDoeIV-2.pdf

and so on.

Then, save all copies of the same forms in a folder on your computer, e.g.,

IV forms (Work Experiences)

V forms (Training Experiences)

VI forms (Training Experiences)

3. Download the worksheets available on the Prior-Learning Credit web site. These will help you plan and organize information.
4. Purchase manila folders or develop some other system for organizing your information as you gather required documents and complete the various Tab forms and self-assessments.
5. Purchase three 3-ring binders and Tab dividers. You will need these for assembling and submitting the portfolio. All pages will need to be 3-hole punched. *Do not use plastic page protectors* for any materials.

Downloadable PDFs of all worksheets, charts, and fillable forms are available on the Prior-Learning Credit web site.

Step 2: Planning

1. Begin to gather information by reviewing the fillable Tab forms, making notes, and considering what forms of supporting documentation you will need and how you will obtain it.
2. Review the worksheets and fillable forms for Tabs IV, V, and VI. As you complete the worksheets, consider the following:
 - All part- and full-time employment positions you have held for at least 10 months, including military service, or other self-employed activity that generated income and resulted in college-level learning. For each job/position, you will need to submit a fillable IV-Tab form and include supporting documentation.
 - All trainings (workshops, seminars, and/or courses) attended for the primary purpose of increasing or maintaining current skills, knowledge, or certification, whether required by the employer or attended for other professional reasons. For each training, you will need to submit a fillable V-Tab form and include supporting documentation.
 - **Workshops/Seminars:** Employer, agency, or other sponsored-training sessions may be eligible for credit if they resulted in college-level learning and consisted of at least 45 in-class clock hours or resulted in 10 Continuing Education Units (CEUs). A self-assessment of learning is required.
 - **College/university courses:** If CMU denied transfer credit for a course you took at a regionally-accredited institution, you may submit that course for Prior-Learning credit. Each course must be submitted on a separate fillable V-Tab form with a copy of the transcript, but no self-assessment of learning is required.

Undergraduate courses: A minimum grade of C or higher is required.
Graduate courses: A minimum course grade of B and a minimum overall GPA of 3.0 or higher are required.
 - Any other activities (i.e., life experiences) that represent college-level learning and substantial time involvement and depth. Life experiences can be difficult to self-assess and typically receive the least amount of credit. For each experience, you will need to submit a separate fillable VI-Tab form and include supporting documentation.
3. Consider the amount of *time* spent in each work, training, and/or life experience. Time spent is important in considering the number of credits you could earn and how many experiences you need to submit. For example, if you are only seeking a few credits, then you won't want to waste your valuable time developing a portfolio that covers decades of employment experiences or a large number of trainings. Focus on the experiences that are most likely to lead to credits you can apply to your degree. Your advisor can help you decide which experiences to focus on in your portfolio.
4. Begin identifying the supporting documentation you will need and where and from whom you will get it, e.g., employment-verification letters or other documents, completion certificates for workshops, transcripts from other schools you've attended, etc.
5. Complete a worksheet for **each** work experience (employment position), each training experience, and each life experience that you think you might include in the final portfolio. Use the worksheets as the basis for developing and drafting your self-assessment for each work, training, and life experience. Do not include the worksheets in your portfolio—they are simply to help you develop content for the IV, V, and VI Tabs.

Step 3: Completing the Fillable Tab Forms and Writing the Self-Assessments of Learning

As was explained earlier, your portfolio will consist of at least six sections but perhaps as many as eight, depending on whether you include all three of the body sections (Tabs IV, V, and VI) or only one or two. You will compile all sections of the portfolio by completing several different fillable PDF forms and, after each form, including copies of the required documentation (e.g., letters from current and previous employers, transcripts, copies of certificates of achievement for trainings, etc.)

All the fillable forms are PDF files, so to download and complete, you need access to a computer with a recent version of Adobe Acrobat Reader installed (it's free). Formatting standards, such as typeface and size, have already been set for the forms. After you have completed the forms, you will print them out and assemble them in your portfolio along with your supporting documentation.

In writing your self-assessment of learning in Tabs IV, V, and VI, your primary purpose is to develop arguments to persuade evaluators to grant credit for your prior learning from work, training, and/or life experiences. For *each* specific learning competency for which you want credit, you must develop an argument, and the best approach is to use a three-part structure for each competency: claim, supporting evidence, and reasoning. (**Note:** Later in this section, we explain how to complete the fillable IV and V-Tab forms, including how to figure out how many competencies for which you may request credit in each IV and V-Tab form.)

Evaluators do not grant credit simply for the amount of time you spent working, training, or engaging in various other activities, although the duration of the experience is used to determine the maximum number of credits *possible* for each work, training, or life experience form. When deciding whether to grant credit and, if so, at what level, evaluators will consider the extent to which each self-assessment you have included for a specific competency is equivalent to 3-credit hours of college-level learning. For undergraduate students, evaluators will also decide whether the learning reflected by the self-assessment merits lower- or upper-level credit; for graduate students, they will decide whether the learning reflected by the self-assessment merits graduate-level credit. If it doesn't, then no credit will be awarded.

If you want feedback on the quality of your written self-assessments, you may submit them to the CMU Writing Center at <http://global.cmich.edu/writingcenter/submission/>.

In what follows, we take you through each of the fillable forms, and in most cases, we have included a copy of the form with explanatory comments inserted.

All portfolios are subject to the university policy on Academic Integrity. Portfolios are to be the students' own work, and all self-assessment responses are to be in the students' own (English) words. For additional information, see CMU's Academic Integrity Policy.

Tabs I and II: Personal and Educational Information

This one-page form will require just a few minutes to complete. The Tabs I and II form requires your identifying information, dates for previous degrees (high school or undergraduate), the degree currently being pursued, and a list of institutions from which you earned college credit.

For Tabs I and II, complete the form and include copies of transcripts for all institutions on your list. Unofficial (“student”) copies are fine, but you will need to obtain these for each institution on your list. Most schools now have electronic transcript files/academic histories for students to access and print off their records, if needed. Also include the Transfer Credit Evaluation (TCE) form that is completed by the CMU Registrar’s Office for any courses taken at another institution. Place the transcripts and the TCE (if required) in the portfolio immediately following the completed Tabs I & II form. Do not include any additional materials or information in this Tab section.

Two samples of the Tabs I and II form are shown on the next two pages. The first is for undergraduate students and the second is for graduate students. Marginal explanations have been inserted but are not included in the actual PDF forms which are a bit larger and can be downloaded from the Prior-Learning Credit web site on the page titled “Worksheets, Charts, and Fillable Forms.”

Tab III: Tables of Contents (III-1, III-2, and III-3)

The fillable Tab-III PDF form for the Tables of Contents is divided into three sections:

- Tab III-1 is for listing each of the individual *work* experiences submitted in the IV Tab section of your portfolio (a separate IV-Tab form for each position held for at least 10 months, e.g., IV-1, IV-2, and so on).
- Tab III-2 is for listing each of the individual *training* experiences submitted in the V Tab section of your portfolio (a separate V-Tab form for each training of at least 45 in-class clock hours or 10 CEUs, e.g., V-1, V-2, and so on).
- Tab III-3 is for listing each of the individual *life* experiences submitted in the IV Tab section of your portfolios (a separate VI-Tab form for each activity of 24 months or longer, e.g., VI-1, VI-2, and so on).

In each of the three Table of Contents Tabs, list information in reverse chronological order (most recent at the top, oldest at the bottom). The column for documentation should list only *actual* documents submitted.

Each of the three parts of the Tab-III form has plenty of space for entering information for multiple experiences (i.e., the individual experiences being submitted in the Tab-IV, V, and VI sections. Use however many spaces as you need and leave the rest blank.

Include a Table of Contents for each Tab section for which you are submitting experiences for credit. For example, if you are submitting only IV-Tabs for work experiences, then include the Table of Contents Tab III-1 but not the ones for Tabs III-2 and III-3. Likewise, if you are submitting only V-Tabs for training experiences or courses from regionally-accredited schools that did not transfer to CMU, then include the Table of Contents Tab III-2 but not the ones for Tabs III-1 and III-3.

Sample copies of the Tabs III-1, III-2, and III-3 Tables of Contents are included on the next few pages. The actual fillable PDF forms are a bit larger and can be downloaded from the Prior-Learning Credit web site on the page titled "Worksheets, Charts, and Fillable Forms."

Copy of Tab III-1: Portfolio Table of Contents for IV Tabs

Tab III-1: Portfolio Table of Contents for IV-Tabs

Use this form to prepare a table of contents that briefly outlines all information included in the IV-Tab section of your portfolio. List your work experiences in reverse chronological order, i.e., the most recent experience first, then the next most recent, and so forth. Be sure each experience is documented.

IV-Tab #	Position & Dates of Employment	Name of Employer	Documentation
IV-1			
IV-2			
IV-3			
IV-4			
IV-5			

Comment [MLK1]: Include a copy of the Tab III-1 only if you are submitting IV-Tabs in your portfolio (i.e., if you are requesting credit for any learning acquired from work experiences). If you are not submitting any IV-Tabs, then omit Tab III-1.

Comment [MLK2]: If you are requesting credit for learning from any work experiences, then you will have at least one IV-Tab in the IV-Tab section of your portfolio. These you will number in the fillable IV-Tab forms, one form for each experience (e.g., IV-1 will be your current or most recent experience, IV-2 your next most recent, and so on). Here in the Tab III-1 Table of Contents, you will enter some of the same information as you will enter in the top section on the first page of each of those IV-Tab forms.

Some students find it helpful to complete the Tab III-1 Table for Contents form *before* completing the individual IV-Tab forms, but some students do it the other way around. The important thing is for the information reported in the Tab III-1 Table of Contents to agree with the information you've included in the individual IV-Tab forms. When evaluators perceive inconsistency, they tend not to award credits.

Comment [MLK3]: One of the most common mistakes students make is not including consistent dates of employment here in the Tab III-1 Table of Contents, the individual IV-Tabs, and in the verification letters from employers. If these dates don't agree, evaluators may not award any credit or may decide to award credit based on whichever dates reflect the shortest duration of employment. Double check all dates for consistency. For example, if your employment-verification letter states that you worked in the IV-1 position from June 2005 to August 2011, then those are the dates you must include in your IV-1 form and in the IV-1 entry in the Tab III-1 Table of Contents. If the dates in the employment-verification letter are incorrect, then it's up to you to get the employer to send you a revised letter with the correct dates *before* you complete the portfolio.

Comment [MLK4]: Regarding "Documentation," be sure to list in the Documentation spaces *only* the supporting documentation included in your portfolio after each IV-Tab form, and list the items in the order in which they are arranged in the portfolio.

Comment [MLK5]: The actual fillable PDF form includes space for students to include information for up to 15 IV-Tabs. To save space in the handbook, we've only included the first page of that form here. We've never had anyone use all 15 spaces, but there's always a first time!

Copy of Tab III-2: Portfolio Table of Contents for V Tabs

Tab III-2: Portfolio Table of Contents for V-Tabs

Use this form to prepare a table of contents that briefly outlines all information included in the V-Tab section of your portfolio. List your training experiences in reverse chronological order, i.e., the most recent experience first, then the next most recent, and so forth. For each course, workshop, or seminar, indicate whether you have included (1) an outline or class description; (2) information on instructor's credentials; (3) verification of completion; (4) specific documentation of in-class and out-of-class hours. Do not submit training experiences that are not or cannot be specifically documented by a source other than you or a relative.

V-Tab #	Title of Session/Course & Dates	Content Outline or Description	Instructor Qualifications	Certificate of Completion or Transcript	Exact # of Class Hours
V-1					
V-2					
V-3					
V-4					
V-5					
V-6					
V-7					
V-8					
V-9					
V-10					

Comment [MLK6]:
Include a copy of the Tab III-2 *only* if you are submitting V-Tabs in your portfolio (i.e., you are requesting credit for learning acquired from training experiences or for courses taken at regionally-accredited schools that did not transfer to CMU). If you are not submitting any V-Tabs, then omit Tab III-2.

Comment [MLK7]:
If you are requesting credit for learning from any training experiences, then you will have at least one V-Tab in the V-Tab section of your portfolio. These you will number in the fillable V-Tab PDF forms, one form for each experience (e.g., V-1 will be your current or most recent experience, V-2 your next most recent, and so on). Here in the Tab III-2 Table of Contents, you will enter some of the same information as you will enter in the top section on the first page of each of the V-Tab forms.

Some students find it helpful to complete the Tab III-2 Table for Contents form *before* completing the individual V-Tab forms, but some students do it the other way around. The important thing is for the information reported in the Tab III-2 Table of Contents to agree with the information you've included in the individual V-Tab forms. When evaluators perceive inconsistency, they tend not to award credits.

Comment [MLK8]:
Regarding "Title of Session/Course & Dates": If you are submitting one or more V-Tabs for courses from a regionally-accredited college that did not transfer to CMU, then place the name of the course in this space exactly as it appears on the transcript. The only checkboxes you will need to check are the last two, i.e., transcript and class hours. (See the instructions later in this section of the handbook about how to complete the V-Tab forms.)

However, for any other types of training—e.g., workshops, seminars, courses taken at non-accredited schools, etc.—you will need additional forms of supporting documentation.

Comment [MLK9]:
In the actual fillable PDF form, you will see checkboxes in these last four columns. Simply click on the appropriate boxes. This is sort of a mini-checklist to make sure you've included all the required information in your V-Tabs.

Comment [MLK10]:
The actual fillable PDF form includes space for students to include information for up to 25 V-Tabs. To save space in the handbook, we've only included the first page of the form here. Rarely has a student submitted more than 25 V-Tabs; in fact, most submit fewer than 10.

Copy of Tab III-3: Portfolio Table of Contents for VI Tabs

Tab III-3: Portfolio Table of Contents for VI-Tabs

Use this form to prepare a table of contents that briefly outlines all information included in VI-Tab sections of your portfolio. List your life experiences in reverse chronological order, i.e., the most recent experience first, then the next most recent, and so forth. Do not submit life experiences that are not or cannot be specifically documented by a source other than you or a relative.

VI-Tab #	Title of Experience & Dates	Experience Provider or Location	Documentation
VI-1			
VI-2			
VI-3			
VI-4			
VI-5			

Comment [MLK11]:
Include a copy of Tab III-3 only if you are submitting any VI-Tabs in your portfolio (i.e., you are requesting credit for learning from life experiences). If you are not submitting any VI-Tabs, then omit Tab III-3.

Comment [MLK12]:
If you are requesting credit for learning from any life experiences, then you will have at least one VI-Tab in the VI-Tab section of your portfolio. These you will number in the fillable VI-Tab PDF forms, one form for each experience, e.g., VI-1 will be your current or most recent experience, VI-2 your next most recent, and so on. Here in the Tab III-3 Table of Contents, you will enter some of the same information from the top section on the first page of each of those VI-Tab forms.

Some students find it helpful to complete the Tab III-3 Table for Contents form *before* completing the individual VI-Tab forms, but some students do it the other way around. The important thing is for the information reported in the Tab III-3 Table of Contents to agree with the information you've included in your individual VI-Tab forms. When evaluators perceive inconsistency, they tend not to award credits.

Comment [MLK13]:
Regarding "Documentation," be sure to list in the Documentation spaces *only* the supporting documentation included in your portfolio after each VI-Tab form, and list the items in the order in which they are arranged in the portfolio.

Comment [MLK14]: Again, the actual fillable PDF form includes space for students to include information on up to 10 VI-Tabs. To save space in the handbook, we've only included the first page of that form here. Rarely has a student submitted more than 10 VI-Tabs; in fact, most submit just a couple or none at all.

Tab IV: Work Experience (Employment Positions)

Tab IV refers to the entire work-experience section of your portfolio, which will consist of one or more separate IV-Tab forms. You will include an IV-Tab form for each job/position (full- or part-time) you held primarily for the purpose of supporting yourself financially (e.g., direct wages, housing for compensation, etc.) and for which you are seeking to obtain credit for the learning you acquired from the job/position.

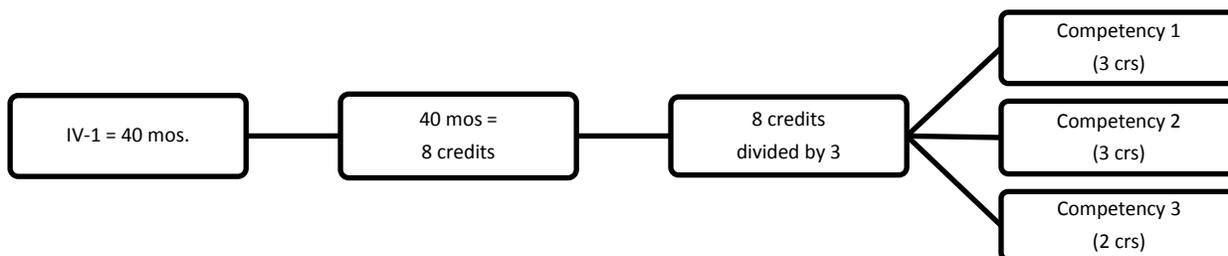

However, as noted earlier, the number of potential credits for each position/job depends, in part, on how many months you spent in the job/position: You must have held the job/position for at least 10 months for 1 credit). From there, though, the potential number of credits differs between undergraduate and graduate students. For example, to be eligible for 3 credits, an undergraduate student must have worked in the position for at least 16 months, whereas a graduate student must have worked in the position for 21 months.

The IV Tabs typically account for most (75-85%) of the total credits awarded for an undergraduate portfolio, and they account for nearly all credits for graduate portfolios.

If you don't plan to submit for credit any of the learning you acquired from work experiences, then omit this section and move on to Tab V and/or Tab VI.

Generally, students benefit most from credits awarded in 3-credit blocks, although 1- and 2-credit awards are also possible. Thus, you should think strategically about how many credits you need and for what competencies. Thus, for each work experience you submit on an IV-Tab form, you need to determine how many months you worked in the position, how many credits those months are worth (by looking at the chart on the form), and the maximum number of competencies for which you may request credit (assuming your self-assessment of learning is written effectively and the learning is college level).

The diagram below illustrates this process for an undergraduate student submitting her most recent work experience (IV-1 Tab), from July 2010 to November 2013, which is 40 months (each July through June is 12 months x 3 = 36 months, and July to November = 4 months, and 36 + 4 = 40 months).

Thus, in her IV-Tab form for this position, the students may include self-assessments for up to *three* competencies, two of which would count for 3 credits and one for credits. She may not submit more than three competencies.

Evaluators do not award more than 3 credits for a single competency, so you need to make sure that your competency titles do not overlap within or among your various IV, V, and VI Tabs. For example, you would not want to request 3 credits for Customer Service in IV-1 and another credit for Customer Service in V-2.

Be sure to review the section of this handbook pertaining to how many credits you can earn from prior learning; included there is a copy of the “Easy Reference Guide for Determining Number of Potential Credits for Each IV and V Tab.” A downloadable copy of the guide is available on the Prior-Learning Credit web site. A truncated version of the guide is included in the fillable IV and V-Tab forms. Length of employment alone does not guarantee any credit, though. The self-assessment of learning for each competency must also be written effectively, and the learning assessed must be college level (undergraduate, upper or lower level; or graduate).

A sample copy of the IV-Tab form is included on the next page. The actual fillable PDF form is a bit larger, and longer, and can be downloaded from the Prior-Learning Credit web site on the page titled “Worksheets, Charts, and Fillable Forms.” Many students find it helpful to complete the Worksheet for IV Tabs before completing the individual IV-Tab fillable forms. The worksheet can be downloaded from the same web page.

Copy of an IV Tab Form

Tab IV—Work Experience

IV- |

Dates of employment (mm/yy)

From: To: Months on job:

Full-time?

Part-time? # of hrs/wk:

Exact title of position, rank, and salary:

Name of employer (firm, organization, etc.) and address including Zip Code:

Name and title of immediate supervisor:

Address of supervisor:

Phone #: ()

Comment [MLK1]: Enter the number 1 in this space for your most recent job/position; this will be your Tab IV-1. Number sequentially each subsequent form you complete for each job/position, i.e., IV-2 for your next most recent job, IV-3, for the one before that, and so on. You may submit as many IV tabs as jobs you've held as long as you were employed in each position for at least 10 months (for 1 credit) and the learning was college level.

Comment [MLK2]: In the spaces for dates of employment, round to the nearest month. For example, if you started this job on August 14, 2010, then enter 08/10, and if you began work on August 16, 2010, enter 09/10. Do likewise for end dates. Notice also that we request the dates from and to, not from and through. So if your end date is August 16, 2010, you would enter September 2010 in the "To" space. Most employment verification letters report start and end dates by month and year, and they sometimes report dates as from and through, not from and to. But make sure the dates you enter here match logically the dates in your employment-verification letter or other documentation. Then count up the months of your employment, and enter that number in the space provided for months on the job.

One of the most common mistakes students make is not providing consistent dates of employment for each position listed in the Tab-III Table of Contents for the IV Tabs, the individual IV-Tab forms, and the documentation. If evaluators detect inconsistency that can't be resolved easily or logically, they might not award any credits.

Comment [MLK3]: Make sure the position title or rank (for military personnel) and salary entered here match the title/rank and salary in your supporting documentation.

Comment [MLK4]: Be sure to read these instructions carefully and follow them thoroughly.

STOP!

Before completing Parts A through C of this IV-tab form, look at the appropriate chart below to determine the number of potential credits you are eligible to receive for the learning you acquired in this position (if your self-assessment is effective). For every 3 credits for which you are eligible, you will write a self-assessment of ONE competency. For example, if you worked 45 months in this position and are eligible for 9 credits, then you will write a self-assessment for three (3) competencies and no more. If you worked more than 99 months and are eligible for 15 credits, include no more than five (5) competencies.

Undergraduate Credit for each position (IV tab)	
Months on Job	Max potential credit hours
0 - 9	0
10 - 12	1
13 - 15	2
16 - 18	3
19 - 22	4
23 - 28	5
29 - 33	6
34 - 38	7
39 - 43	8
44 - 50	9
51 - 57	10
58 - 64	11
65 - 71	12
72 - 80	13
81 - 89	14
90 - 99+	15

Graduate Credit for each position (IV tab)	
Months on job	Max potential credit hours per job
0 - 9	0
10 - 15	1
16 - 20	2
21 - 25	3
26 - 30	4
31 - 35	5
36 - 40	6
41 - 45	7
46 - 50	8
51 - 55	9
56 - 84+	10

Comment [MLK5]: You are welcome to submit an IV-Tab form for each position at which you worked at least 10 months, but most students prefer to apply credits received in 3-credit block, which would require more months on the job (16 for undergraduate students and 21 for graduate students).

To determine the number of competencies for which you will need to develop titles and write self-assessment in Part B of this form, divide the number of credits the position is potentially worth by 3, and add another competency for any remainder. For example, if you are an undergraduate who worked 40 months in the position and could potentially receive up to 8 credits, you would develop three competency titles and self-assessments, two worth 3 credits each and one worth 2 credits. If you only want to submit the two 3-credit competencies, that's fine, too. (See also the diagram in the Tab IV section of the *Prior-Learning Student Handbook*.)

Tab IV—Work Experience

Part A. Job Description:

Identify and give a full description of the responsibilities you had while in this position. Your description should relate to your official job title/rank and description.

Comment [MLK6]: in the actual fillable form, a space is provided here for you to enter your job description. We suggest you compose the description in MS Word, proofread and edit it carefully, and then paste it into the space. The default format in the form is 10-point Times Roman.

Part B. Competencies and Self-Assessments

Using the chart on the previous page to determine of how many credits your months on the job are worth, complete one of the competency self-assessment sheets on the next few pages for *each 3-credit competency* you for which you are requesting credit. Do NOT submit more than five (5) competency self-assessment sheets, and do NOT submit more sheets than you are entitled to (e.g., if your number of months on the job is worth only 9 credits, then include no more than three (3) self-assessment sheets, one for each 3-credit competency).

Comment [MLK7]: in this sample, we've provided only one competency section for Part B, but the actual fillable form contains a sufficient number of pages for up to 5 (five) competencies, which is the maximum any student may submit for a single work experience, assuming the student has worked a sufficient number of months on that job to be eligible for credit for that many competencies.

Tab IV—Work Experience

Competency Title 1:

What did you learn about this competency? Provide a 750 to 1,000-word self-assessment of your learning, i.e., write an argument to support of your claim about what you learned. Be sure to provide specific examples and reasoning to support your claim about what you learned and how you applied what you learned. Do not just tell us what you *did*; tell us what you *learned* and how you applied it.

Comment [MLK8]: In the space provided, enter the title of the first competency you plan to address. If number of months on the job makes you eligible for only 3 or fewer credits, then address only one competency.

Comment [MLK9]: In the actual fillable form, two pages of space is provided for each competency for you to enter your self-assessment of learning. We suggest you compose the self-assessment in MS Word, proofread and edit it carefully, and then paste it into the space. The default format in the form is 10-point Times Roman.

Be sure to review the sections of the Portfolio Checklist (Tab VIII) titled "Tab IV: Work Experience" and "Quality of Writing in Tabs IV, V, and VI."

Tab IV—Work Experience

Part C: Documentation

In the rest of this section, include copies of your supporting documentation from the employer regarding this work experience. It must include

- your position/rank and job description(s) and
- verification of your dates of employment in the position.

All letters of verification must have

- an inked or electronic signature;
- be on letterhead or clearly indicate that the letter was received electronically; and
- provide a means of contacting the writer of the letter, e.g., a current postal address, phone, and/or e-mail address.

In addition to the above, you may include

- copies of annual performance evaluations, and
- any other relevant information, such as certificates of achievement or for trainings not included in any V-Tabs.

If any of the specific documentation listed above is not included, please explain in the space below:

Comment [MLK10]: Part C is as important as Parts A and B, so provide accurate and credible documentation.

Comment [MLK11]: We don't mind looking at a few additional forms of documentation, such as those listed here. But some students mistakenly believe that stuffing their portfolios with irrelevant documentation will impress evaluators. The opposite is more likely, because an overabundance of documentation tends to make evaluators suspicious, as if the student is attempting to distract us from the relevant information, of which we actually need very little. In other cases, students simply try to overcompensate, as if they think a 20-pound portfolio will lead more credits. It won't, because we evaluate based on the quality of the portfolio, not its weight.

Save yourself a lot of time and effort by including only the minimum amount of documentation necessary to support your claim about the job you held and the dates you held it. Focus your energies on writing effective self-assessments of learning for each competency.

Tab V: Training Experience (Workshop/Seminars and Non-Transferred Course Work)

Tab V refers to the entire training-experience section of your portfolio, which will consist of one or more separate V-Tab forms. You will include a V-Tab form for each training for which you are seeking to obtain credit for the college-level learning you acquired.

V Tabs typically account for 25-15% of the total credits awarded for an undergraduate portfolio, and a bit less for most graduate portfolios.

If you don't plan to submit for credit any of the learning you acquired from training experiences, then omit this section and move on to Tab VI.

The number of potential credits for each training depends on how many in-class clock hours you spent in or Continuing Education Units (CEUs) you received for the training.

To be considered for credit, the self-assessment for each training experience must reflect college-level learning, with advanced college-level learning needed for graduate credit.

Be sure to review the section of this handbook pertaining to how many credits you can earn from prior learning; included there is a copy of the "Easy Reference Guide for Determining Number of Potential Credits for Each IV and V Tab." A downloadable copy of the guide is available on the Prior-Learning Credit web site. Note the two categories of training experiences and the differences in terms of how they are submitted:

- *For workshops and seminars, or courses taken at non-regionally accredited schools, at least 45 class hours or 10 CEUs are needed for every 1 credit, assuming that the self-assessment and documentation reflect learning at the appropriate level (undergraduate or graduate). Additional supporting documentation is also required.*
- *For courses completed at other regionally-accredited colleges, universities, or trade schools that did not transfer to CMU, no self-assessment of learning is required, and the only documentation needed is a copy of the transcript from the school where you completed the course.*

To be considered for credit, *each* training or non-transferred course must be submitted as a separate V Tab. However, if you have several shorter trainings *on the same subject* that, combined, total at least 45 class hours, you can submit them in a single V-Tab form. For example, if you completed several trainings related to various software applications that, combined, equaled at least 45 class hours, you could submit them as a single training experience using the competency title "Computer Applications."

A sample copy of the V-Tab form is included on the next page. The actual fillable PDF form is a bit larger and can be downloaded from the Prior-Learning Credit web site on the page titled "Worksheets, Charts, and Fillable Forms." Many students find it helpful to complete the Worksheet for V Tabs before completing the individual V-Tab fillable forms.

Copy of a V Tab Form

Tab V—Training Experience

V-

Title of Training	Sponsor	Start Date(s)	End Date(s)	In-Class Clock Hours

STOP! Before completing the remainder of this V-tab form, look at the charts below to determine the number of potential credits you are eligible to receive for the learning acquired from this training (if your self-assessment is effective). If the training you are submitting in this V tab does not meet the minimum number of class hours listed in the chart, then don't submit the training as a V tab. However, if you can combine it in a single V Tab with the several other short trainings on a related subject that, together, total at least 45 class hours (for 1 credit), then do so. However, all college courses, regardless of the number of class hours, must be submitted individually as separate V tabs.

Class Hours	Credit Hours
0 – 14	0
15 – 29	1
30 – 44	2
45 – 60	3
and so on	

*Every 15 class hours = 1 credit. The number of credits for a course as reflected on the school's transcript is how much we award.

Class Hours	Credit Hours
0 – 44	0
45 – 89	1
90 – 134	2
135 – 180	3
and so on	

* Every 45 hours = 1 credit. For Vehicle Design students with trainings from Batavia or Philpott Automotive Engineering School, every 40 hours = 1 credit.

10 CEUs (Continuing Education Units) = 1 credit

Comment [MLK1]: As with the Tab IV forms, enter the number 1 in this space for your most recent training; this will be your Tab V-1. Number sequentially each subsequent form you complete for each training of at least 45 class hours, i.e., V-2 for your next most recent training, V-3 for the one before that, and so on.

Comment [MLK2]: In the space for the title of the training, enter the title as it appears on your supporting documentation. If the V Tab you are submitting is for a course from a regionally-accredited school that did not transfer to CMU, enter the title of the course here exactly as it appears on the transcript from the school.

In the space for the sponsor, enter the name of the company, agency, or school that provided the training.

In the space for start and end dates, be sure the dates entered here match the dates on your supporting documentation.

In the space for in-class clock hours, if you are submitting the V Tab for a training, workshop, seminar, or course from a non-regionally-accredited school, enter the number of hours you sent in class on the training. Be sure that the number of hours reported here agrees with the number reported in your supporting documentation, which you will include in your portfolio after this form.

However, if you are submitting this V tab form for a course taken at a regionally-accredited school that did not transfer to CMU, then enter in the clock hours space the number of credits for the course as indicated in the transcript, which you will include in the portfolio, not only after Tabs I and II but also after every V Tab you are submitting for a course that did not transfer.

Comment [MLK3]: Be sure to read the instructions thoroughly and follow them carefully.

Comment [MLK4]: As you can see, you won't be eligible to receive credit for individual trainings of fewer than 45 class hours, but if you have several trainings on the same topic that, combined, add up to at least 45 hours, you may submit them together in a single V-Tab form.

Part A: Self-Assessment: The next section is required for all types of trainings EXCEPT a college course taken at regionally-accredited school that did not transfer to CMU. In that case, move on to Part B.

Comment [MLK5]: In this sample, we've provided only one competency section for Part A, but the actual fillable form contains a sufficient number of pages for up to 3 (three) competencies.

Tab V—Training Experience

Competency Title 1: _____

What did you learn about this competency? Provide a 750 to 1,000-word self-assessment of your learning, i.e., write an argument to support of your claim about what you learned. Be sure to explain why you took the training(s); what you learned from the training(s), including underlying principles, concepts, and skills; and how and where you have applied the learning in your professional/personal life.

Comment [MLK6]: In the space provided, enter the title of the first competency you plan to address. If the number of months on the job makes you eligible for only 3 or fewer credits, then address only one competency.

Comment [MLK7]: In the actual fillable form, two pages of space is provided for each competency for you to enter your self-assessment of learning. We suggest you compose the self-assessment in MS Word, proofread and edit it carefully, and then paste it into the space. The default format in the form is 10-point Times Roman.

Be sure to review the sections of the Portfolio Checklist (Tab VII) titled "Tab V: Work Experience" and "Quality of Writing in Tabs IV, V, and VI."

Tab V—Training Experience

Part B: Supporting Documentation

For a course taken at a regionally-accredited college, university, or trade school: Include a copy of the transcript from the school, and circle or highlight on the transcript the course for which you are requesting credit. No additional documentation is necessary.

Comment [MLK8]: Part B is as important as Part A, so provide accurate and credible documentation.

Comment [MLK9]: No self-assessment is necessary in this case, only a copy of the transcript.

For all other trainings (e.g., workshops, courses, seminars, etc.): Include the following:

1. An outline, syllabus, or description of the training provided by the instructor(s) to the participants
2. Identification of each instructor along with her/his credentials or qualifications
3. Verification of the requirements for admission to the course (e.g., high school diploma, associate degree, other training experiences, or employment status)
4. Verification of the number of in-class clock hours
5. Verification of the type and time of preparation outside the classroom
6. Verification of the method of testing or evaluation of the students
7. Verification of the grade or evaluation received
8. Verification of course completion (e.g., a signed certificate or transcript)

If any of the specific documentation listed above is not included, please explain in the space below:

Tab VI: Life Experience

Tab VI refers to the entire life-experience section of your portfolio, which will consist of one or more separate VI-Tab forms. You will include a VI-Tab form for each life experience for which you are seeking to obtain credit for the college-level learning you have acquired. Life experiences are usually unpaid volunteer-type experiences, special-interest projects, hobbies, or service activities.

Life experiences can be difficult to self-assess and typically receive the least amount credit, even at the undergraduate level and are not usually included in graduate portfolios.

The number of potential credits for each life experience depends on the duration and depth of your engagement in the activity (usually, for 1 credit, several hours per month for at least 24 months). In addition, to be considered for credit, all self-assessment for life experiences must reflect college-level learning, with advanced college-level learning needed for graduate credit.

A list of sample competency titles for life experiences can be downloaded from the Prior-Learning Credit web site on the page titled “Worksheets, Charts, and Fillable Forms.” From there, click on the link to “Sample Competency Titles.”

Copy of a Tab VI Form

Tab VI—Life Experience

VI-|

Activity	Dates of Activity (mm/yy) From: To:
Organization (if applicable)	Estimated Hours Per Month

Comment [MLK1]: As with the Tab IV and V forms, enter the number 1 in this space for your most recent experience; this will be your Tab VI-1. Number sequentially each subsequent form you complete for each training of at least 45 class hours, i.e., VI-2 for your next most recent training, VI-3 for the one before that, and so on. Few students include more than two and tend to receive only one or two credits per activity.

Comment [MLK2]: In the space for the activity, enter a descriptive title.

Comment [MLK3]: In the space for dates, be sure that the dates entered here agree with the dates in your supporting documentation.

Comment [MLK4]: In the space for organization, if the activity is sponsored by or performed on behalf of an organization, agency, or other entity, identify it here. If the activity is one you engage in for yourself or a family member, then enter "Self."

Comment [MLK5]: In the space for estimated hours per month, be sure the number you enter here agrees with the number in your supporting documentation.

Part A: Self-Assessment

In the spaces provided on the next page, provide a competency title and self-assessment of the learning you acquired during this experience. Usually, credit for only one competency is requested for each life experience and worth between 1 and 3 credits, depending on the depth and duration of the experience.

Comment [MLK6]: In this sample and in the actual fillable form, space for only one competency section for Part A is included, because no more than three credits is awarded for life experiences and usually only 1 or 2.

Tab VI—Life Experience

Competency Title: _____

What did you learn about this competency? Provide a 750 to 1,000-word self-assessment of your learning, i.e., write an argument to support of your claim about what you learned. Be sure to explain why you engaged in the experience; what you learned from it, including underlying principles, concepts and knowledge (e.g., social, civic, technical, artistic), mental and physical skills and knowledge; and how and where you have applied the learning in your professional/personal life.

Comment [MLK7]: In the space provided, enter the title of the competency you will address.

Comment [MLK8]: In the actual fillable form, two pages of space is provided for you to enter your self-assessment of learning. We suggest you compose the self-assessment in MS Word, proofread and edit it carefully, and then paste it into the space. The default format in the form is 10-point Times Roman.

Be sure to review the sections of the Portfolio Checklist (Tab VIII) titled "Tab VI: Work Experience" and "Quality of Writing in Tabs IV, V, and VI."

Tab VI—Life Experience

Part B: Documentation

Include the following:

- A detailed description of the activity and your involvement in it
- Letters from two persons, who are not your relatives, stating their qualifications and verification of the experience
- Evidence of your involvement in the activity (e.g., photographs, non-proprietary documents, etc.).

All letters of verification must

- have an inked or electronic signature
- be on letterhead or clearly indicate that the letter was received electronically; and
- provide a means of contacting the writer of the letter, e.g., include a current postal address, phone, and/or e-mail address.

If any of the specific documentation listed above is not included, please explain in the space below:

Comment [MLK9]: Part B is as important as Part A, so provide accurate and credible documentation.

VII Tab: Signature Block & Notarization Page

The notarized signature should be done *after* the portfolio is fully developed and *immediately before* you submit the portfolio for evaluation.

- The date of the notary signature is considered the end date for the portfolio.
- Take one copy of your completed portfolio and one copy of the VII-Tab form with you to the Notary Public. (Remember: Don't include the original signed VII-Tab form in your three portfolios; include copies instead.)
- Most banks or credit unions will have a Notary Public available to complete the form; also check with your employer to see if a Notary Public is available where you work.

The VII-Tab form (PDF) can be downloaded from the Prior-Learning Credit web site on the page titled "Worksheets, Charts, and Fillable Forms." It is *not* a fillable form; you and the Notary Public must **handwrite your names, signatures, and dates.**

Tab VIII: Portfolio Checklist

The fillable Portfolio Checklist is designed as a final review to ensure all materials are included and placed within the correct Tab sections. The checklist also encapsulates the criteria used by evaluators.

Include the completed Portfolio Checklist at the end of your portfolio, *after* the Tab VII Signature Block & Notarization Page.

The fillable Tab VIII Portfolio Checklist (PDF) can be downloaded from the Prior-Learning Credit web site on the page titled “Worksheets, Charts, and Fillable Forms.”

Step 4: Assembling the Portfolio

Review the diagram in the section of this handbook pertaining to what is involved in preparing a portfolio, and then do the following:

1. Print out *three sets* of all your completed Tab forms and documentation:
 - Tabs I & II, including your transcripts and, if applicable, your Transfer Credit Evaluation;
 - Tab III-1 Tab III-2, and/or Tab III-3 (Tables of Contents);
 - All your IV-Tab forms (if any) with supporting documentation placed at the end of each form;
 - All your V-Tab forms (if any) with supporting documentation at the end of each form;
 - All your VI-Tab forms (if any) with supporting documentation placed at the end of each form;
 - Tab VII (signed and notarized); and
 - Tab V-III (Portfolio Checklist)
2. Assemble each set of the above in a regular 3-ring binder. DO NOT use any plastic page protectors for any of the pages. You will have three binders with identical contents.
3. Insert tab dividers to separate *each section* in the portfolio (e.g., Tab I & II, Tab III, Tab IV, etc.). Within each Tab IV, Tab V, and Tab VI, also section insert Tab dividers in between each of the individual Tab forms and documentation (e.g., between VI-1, IV-2, IV-3; V-1, V-2, V-3; VI-1, VI-2, VI-3).
4. Be sure that the dates in the Table of Contents match the dates on each IV, V, and VI-Tab form and on the documentation submitted with each Tab form included in those sections.
5. Be sure that the documentation listed in the Table of Contents for Tabs IV, V, and VI are actually included after each Tab form you submit in those sections.
6. Use your CMU student ID number for identification. *Do not* include your Social Security number anywhere in the portfolio, and black it out on all documentation.
7. For documentation that applies to more than one experience, be sure to make copies and include a copy at the end of each relevant IV, V, and V Tab form. For example: a Human Resources form may document multiple trainings or positions. If so, make copies and include a copy, with relevant information highlighted, at the end of each V Tab form to which it pertains. Likewise, if you are submitting V Tabs for courses taken at the same regionally-accredited school but that did not transfer to CMU, then include a copy of the transcript from that school at the end of each V Tab you are submitting for one of the courses (and highlight or circle on the transcript the title of the course in question for that V Tab). In other words, each Tab form within the IV, V, and VI Tab sections should present a complete segment of information relevant for that experience.

To see sample portfolios, go to the page on the Prior-Learning Credit web site called “What is Involved in Preparing a Prior-Learning Portfolio, and How Long Will it Take?”

How Do I Submit My Prior-Learning Portfolio for Review?

The Prior-Learning portfolio consists of completed forms, responses/explanations to questions on the forms, and documents that verify the length of experiences and support the learning claimed. The forms and self-assessments (explanations of learning) must use Standard Written English and be typed, single spaced, with a space in between paragraphs. Use the default font in the fillable PDF forms, which for the self-assessment portions, is 10-point Times Roman. Handwritten self-assessments are unacceptable and will receive a “zero” award.

- *Make three portfolios:* Submit *two copies* for evaluation and *keep the original* for your records. Never send original copies of any documents, as the two submitted portfolios will not be returned to you.
- *Mail two copies* of the portfolio and the *\$125.00* portfolio-processing fee to

Prior-Learning Assessment Office
Central Michigan University, Global Campus Programs
802 Industrial Drive
Mount Pleasant MI 48858

How Will My Prior-Learning Portfolio Be Evaluated, and How Long Will it Take?

Members of the Prior-Learning Assessment Team (PLAT) evaluate learning based on the content and quality the student's self-assessment in the portfolio, not on its applicability to a specific degree program. Each portfolio is evaluated independently by three PLAT members, who are graduate faculty at CMU. Faculty must apply for membership and are selected based on their backgrounds and knowledge. They serve for 3-6 years and participate in extensive initial and on-going training for evaluating portfolios.

Evaluators use the "Portfolio Checklist" (which students are required to include at the end of the portfolio as Tab VIII). In general, though, they do the following:

1. They first look at the duration of each experience (i.e., the IV, V and/or V Tabs), because the length of the experience determines the maximum number of potential credits for the experience. (See the section above titled "How Many Credits Can I Earn for Prior Learning?")
2. Evaluators then look at the supporting documentation for each experience submitted. If any documentation is missing, incorrect, inconsistent, or in some other way problematic, evaluators will not review further that section of the portfolio.
3. Evaluators then decide whether the self-assessment for each experience demonstrates *college-level* learning. They do not grant credit simply for the amount of time you spent working, training, or engaging in various other activities, although the duration of the experience is used to determine the maximum number of credits *possible* for each IV Tab. When deciding whether to grant credit and, if so, at what level, evaluators will consider the extent to which each self-assessment you have included for a specific competency is equivalent to 3-credit hours of college-level learning. For undergraduate students, evaluators will also decide whether the learning reflected by the self-assessment merits lower- or upper-level credit; for graduate students, they will decide whether the learning reflected by the self-assessment merits graduate-level credit.
4. Evaluators also consider the quality of your writing. They must be able to quickly and easily read and understand what you have written. If they have to work too hard to figure out what you mean, they are unlikely to grant credit. Reviewers also are unlikely to be persuaded by writing that contains numerous errors in grammar, spelling, punctuation, and usage. Not only do such errors slow down evaluators' reading time, but they also reflect poorly on students who are asking for college-level credit (especially upper-level or graduate-level credit). Bottom line? As in most professional contexts, the quality of your writing matters.
5. Evaluators will not be identified to students. If an evaluator personally knows the student submitting a portfolio, that student's portfolio will be assigned to another evaluator.

Evaluation takes about 8-10 weeks from the date the portfolio is received by the Prior-Learning Assessment Office. However, if we must postpone reviewing or must return a portfolio due to missing components or information or for inconsistent or conflicting information, then the review process will take longer.

The characteristics evaluators look for in a portfolio are reflected in the "Portfolio Checklist," which is the final section (Tab VIII) of your portfolio. A fillable PDF copy of the "Portfolio Checklist" is available on the Prior-Learning Credit web site under the page link titled "Worksheets, Charts, and Fillable Forms."

How Will I Be Notified of My Award?

After the portfolio has been evaluated by the three PLAT members, you will receive an award-notification letter indicating the specific competencies awarded, the experiences from which they came, and the level of credit (e.g., UNV 297, UNV 497, or if graduate, UNV 697). You will also be informed of the cost to transcript all the credits, but you will be charged only for the credits you actually decide to include on your transcript (\$85/credit hour). Your advisor will work with you to decide which and how many credits you can use.

A sample letter and notification are shown on the next two pages. The student had submitted a portfolio containing only V Tabs (11 of them), requesting credit for nursing courses that did not transfer to CMU (because CMU does not have a nursing program). She received 22 credits, most at the lower level (UNV 297) and 5 at the upper level (UNV 497).

The final section of the award notification includes the total cost of the credits awarded, but, again, you will pay only for the credits you decide to apply to your degree.

May 23, 2013

[REDACTED]

[REDACTED]

The evaluation of your Application for Prior Learning Credit (notarized April 29, 2013) has been completed and the semester hours of credit awarded are listed on the attached Award Notification.

It is important you realize, although all of the awarded credits may be added to your transcript, only those credits approved and placed on your Program Plan by your advisor will meet requirements for graduation. Your advisor may accept a maximum of 60 credit hours and may reject any or all of the awarded credits toward your degree. The payment due date is listed on the Award Notification.

Prior Learning fees are nonrefundable. Therefore, you should meet with your advisor **before you pay for any credit**. Credits paid for will be added to your transcript after you have successfully completed five (5) semester hours with Central Michigan University.

REEVALUATION REQUESTS: If you do not agree with your evaluation, you may appeal by forwarding a written request for reevaluation within **45 days of the date of this letter**. You are permitted only **one** request for reevaluation. Thus, you should make every effort to prepare a complete, substantive appeal.

ADDITIONAL SUBMISSIONS: A processing fee is not required for additional submissions. Tabs submitted must have a personal information page, and have been notarized.

If you have any questions, please feel free to contact the Prior Learning Office (1 866-774-1018, Option #1).

Sincerely,

Al Zainea
Prior Learning Administrator
CMU Global Campus

THE EVALUATION SUMMARY REPORT INDICATES:

Inadequate Documentation:
Non-Collegiate Level:
Limited Time:
Comments: Correction on V-3 and V-4 tabs, awarded 497 level.

Fee to record Prior Learning credit is \$85.00 per credit/hour.	
TOTAL AMOUNT DUE (22.00 Credits):	\$1,870.00
PAYMENT DUE DATE:	5/23/2014
PAYMENT IS DUE WITHIN ONE YEAR.	CREDITS NOT POSTED WILL BE LOST.

How Will Prior-Learning Credits Be Applied to My Degree, and How Much Do They Cost?

Your advisor will work with you to determine which Prior-Learning credits listed on the award-notification letter may be used toward your degree. Thus, after you receive your award letter, meet with your academic advisor right away. Your advisor is responsible for determining whether and how the awarded credits may be used in your degree program, based on the following policies:

- You may complete and submit a portfolio at any time (after becoming a CMU student and meeting with your advisor). However, you must have completed 5 semester hours of CMU course work *before* Prior-Learning credit can be recorded on your transcript.
- You will pay only for the credits you actually use for your degree (i.e., credits posted to your CMU transcript), whether these are all or only some of the credits awarded.
- You have one year from the date of the award letter to pay for and transcript your Prior-Learning credits. Credits not paid for and transcribed within one year are lost; however, you can start the process over by submitting a new portfolio.
- Prior-Learning credits may count toward major, minor, and concentration requirements, or as free electives, in accord with the specific degree program, *except for the following*:

Undergraduate degrees

- A maximum of 60 Prior-Learning credits may be applied toward a degree; however, only 20 of the credits can be used to fulfill requirements for upper-level (400-level) coursework.
- Prior-Learning credits may not count toward the 30-semester-hour residency requirement (see the *Global Campus Bulletin*).
- Prior-Learning credits may not be used to fulfill General Education requirements (i.e., not University Program and not competency courses, such as math, oral speech, writing, or quantitative reasoning).

Graduate degrees: A maximum of 10 Prior-Learning credits may be applied. (In compliance with state regulation, graduate students in California may use only up to 6 semester hours of Prior-Learning credit on their degree program.)

If I'm Not Satisfied with the Amount or Level of Credits Awarded to Me, Can I Appeal?

Yes. Students may request a re-evaluation. They may also submit additional material or an entirely new portfolio.

Re-Evaluation Requests

Students are allowed *one* request for re-evaluation of their original award. However, such re-evaluations should not be needed very often. The Prior-Learning Assessment Team (PLAT) assumes that students have thoroughly considered all experiences, explained the learning effectively, and completed the portfolio carefully according to the specifications and directions in this handbook. In turn, Team members carefully apply CMU's guidelines in awarding Prior-Learning credits.

However, if, after reviewing your award and discussing it with your advisor, you feel that the awards should be different in the competency titles given, in the level of credits awarded, or in the amount of credit, you may request a "Re-evaluation."

A re-evaluation could be beneficial, if, after reviewing your notification letter, you find that

- More documentation has become available since submitting the portfolio.
- The competency title of the award does not seem to match the learning described.
- The number of credits awarded seems too low for the duration of an experience (as indicated in the chart on the IV and V-Tab forms).
- The level (200 or 400) of the award does not appear to reflect the level of the experience described. (**Note:** For graduate portfolios, if the evaluators feel that the learning described in the self-assessment does not reflect graduate-level learning, they simply won't award any credit.)

Submissions for re-evaluation are most beneficial when they show careful thought, clearly explain why the request is being made, and provide additional explanation and/or documentation that supports the request. You are permitted only one re-evaluation, and you have 45 business days from the date on the award-notification letter to request a re-evaluation of the credits awarded.

Re-evaluations must include

- a letter explaining what is being requested, for which experience; and
- a complete, substantive rationale for re-evaluation along with supporting materials and documentation.

In considering whether to request a re-evaluation, you should remember that your portfolio was examined by three members of the Prior-Learning Assessment Team: a) two members of the Team independently evaluated your portfolio in detail and submitted separate recommendations; and b) the Team's Undergraduate or Graduate Coordinator completed a third, detailed, independent review and combined it with information from the first two evaluators in formulating the final award recommendation.

In formulating your request for a re-evaluation, pay special attention to the award-notification letter. In addition to describing the recommended credits, this letter indicates which parts of the portfolio (if any) were not used or not used fully, as a basis for the initial credit award. This information may indicate whether the maximum credit possible was awarded or whether the portfolio lacked some elements and in

which areas. For example, it may indicate that

- documentation of learning was insufficient;
- the learning described was not college level; and/or
- time spent in an experience was insufficient for an award, and evaluators could not identify a basis for combining experiences to grant credit.

A fourth section of the award-notification letter allows the evaluators to comment on other issues relevant to your recommendation. For example, a comment might indicate that the self-assessment (explanation of learning) was weak and did not warrant full credit. Another comment might indicate that all or part of the experience described learning included in a transfer or CMU course for which you already received credit.

Occasionally, concerns about the award recommendation are related to the specific competency title used or, in the case of undergraduate portfolios, the level of the award (e.g., 297 versus 497 level). These are also legitimate reasons for requesting a re-evaluation. For such re-evaluations, you should clearly explain why you believe a different title or level is warranted. It is not useful to request re-evaluation of parts of the portfolio for which you can provide no information.

Review the award form comments and the portfolio sections to which the comments refer before requesting a re-evaluation. To be effective, a request for re-evaluation needs to

- specify the sections that you wish to have re-evaluated, and
- include additional information (i.e., further explanation/self-assessment or documentation) that addresses any comments/concerns indicated in the award letter.

Note: Because re-evaluations are complete reviews of the entire portfolio, a re-evaluation request could result in additional credit, no additional credit, or a reduction in the original award.

If you have any questions, please call or email the PLAT Hotline at priorlrn@cmich.edu (preferred) or call (866) 774-1018, option #1.

Requests for re-evaluation should be made in writing and be addressed to

Coordinator, Prior Learning Assessment Team
Central Michigan University, Global Campus Programs
802 Industrial Drive
Mount Pleasant MI 48858

Additional Portfolio Submissions

Students may submit an unlimited number of additional portfolios for evaluation until the degree is earned as long as

- submissions do not duplicate any experience assessed in previous portfolios, and
- the original portfolio is available to the evaluators. The Prior-Learning Assessment Office will keep one copy of your portfolio for one year. After one year, you will need to submit two copies of the original portfolio along with two copies of the new one.

An additional portfolio might be beneficial if, after receiving some Prior-Learning credit, a student takes several years to complete the undergraduate or graduate degree requirements and has additional

experiences and learning that might warrant college credit. In another situation, a student may have submitted only a few of his/her experiences, but his/her advisor suggests that more Prior-Learning credit could be obtained and used. The student could then submit another portfolio for additional credit.

Procedures in applying for an additional portfolio are the same as used in submitting an original one. However, no additional application fee is required.

Where Can I Learn More About Prior-Learning Credit?

- View the Prior-Learning video. (The link to the video is available on the Prior-Learning Credit web site under the link “Where can I learn more about Prior-Learning Credit?”)
- Attend a Prior-Learning Briefing. (See the list of upcoming briefings on the Prior-Learning Credit web site under the link “Where can I learn more about Prior-Learning Credit?” Registration is required, and an online form is available on the web site.)
- Review the presentation slides from previous Prior-Learning Briefings. (These are available as a downloadable PDF on the Prior-Learning Credit web site under the link “Where can I learn more about Prior-Learning Credit?”)
- Complete the online form on the Prior-Learning Credit web site to request additional information.
- Contact your academic advisor. If you don’t yet have an advisor, contact Linda Bailey, the Prior-Learning Assessment Coordinator by e-mail priorlrn@cmich.edu (preferred) or by calling toll-free **866-774-1018, Option #1.**

Other Frequently-Asked Questions (FAQs)

Please review the following questions before contacting the Prior-Learning Coordinator.

General

- Q1: What exactly is a “portfolio”? Are there samples that I may look at and use for a model to create my portfolio?

A portfolio is a 3-ring binder that contains all of the “Tabs” and their contents. You will create three copies of the portfolio, keeping one and submitting two.

- Q2: What format is the portfolio written in?

Use Standard Written English for your self-assessment in response to the questions listed for each Tab; “bullet point” responses are not appropriate (except for the job description on the Tab IV form). For additional details, see the sections this handbook pertaining to how to prepare the portfolio and complete the fillable Tab forms.

- Q3: Am I required to submit official transcripts with my portfolio?

No. Unofficial transcripts are acceptable from CMU and any other schools where credit was granted. Your academic advisor can help you access copies of your transcripts from other institutions. If you have transferred any credits to CMU, a CMU Transfer Credit Evaluation (TCE) must be included in your portfolio.

- Q4: How will I know how many credits were awarded for my portfolio?

You will receive a letter indicating the credits awarded, the course competency titles, and the level of the award. For example, UNV 497A Leadership (3) indicates three credits for Leadership at the 400 level (undergraduate upper level). See your advisor as soon as possible to discuss the award.

- Q5: Is any Prior-Learning credit possible for credits earned at other institutions that did not transfer to CMU?

Yes. Two of the reasons that credits do not transfer are that the program does not exist at CMU or that the credits were issued from a

non-accredited school. If the courses that did not transfer are from a regionally-accredited school, then they may be submitted as a Training (Tab V) without any self-assessment. However, if the courses are not from a regionally-accredited school, they may still be submitted as a Training (Tab V) but must include a self-assessment and other required documentation.

- Q6: I am planning on graduating in two months. May I request to have my portfolio evaluated immediately? Is there a fee to have my portfolio evaluated quickly?

All portfolios are evaluated in the order in which they are received. You may request to have your portfolio evaluated in a short time, but we cannot guarantee that your request will be granted. Thus, no additional fee is charged for expedited review.

- Q7: I am planning on graduating at the end of the semester. How do I know if I need to take any more classes or if my Prior-Learning credits will be enough to graduate?

Until the Team has an opportunity to evaluate the portfolio, there is no way to know how many credits will be awarded. You should work with your advisor to plan your potential course schedule including when to submit your Prior-Learning portfolio.

- Q8: Should I request credit for a specific course in my degree plan?

No. Credits are awarded for competencies learned through the various work, training, and life experiences. In the fillable IV-Tab forms, you will need to identify the competency title(s) for what you are claiming to have learned and want credit. Be sure to include a full explanation and examples to show what you learned. Once a competency is awarded, your academic advisor will determine if a substitution for a required or elective course on the degree plan is possible.

Q9: How do Prior-Learning credits affect my GPA?

They don't. No grades are attached to the Prior-Learning credits and, thus, they do not affect your GPA.

Q10: Can Prior-Learning credits be applied to another institution?

Generally, Prior-Learning credits are not transferable to or from CMU. You would need to check with non-CMU institutions for any transfer policies regarding transfer of Prior-Learning from CMU to another school.

Q11: Is there anyone who would be able to help me if I get stuck on how to do something?

Yes. Contact Linda Bailey, the Prior-Learning Assessment Coordinator, by phone at 1-800-774-1018, Option #1 or by e-mail at priorlrm@cmich.edu.

Q12: Will my portfolios be returned to me after they are evaluated?

No. CMU retains the portfolios for one year. You should make a separate portfolio to keep for your records. Reminder: Original certificates and other documentation should not be included in the submitted portfolios, as these will not be returned.

Work Experience (Tab V)

Q1: Should I include all of my work experiences from high school until now?

For undergraduate portfolios, include any work experiences since high school of at least 10 months' duration that you can document and for which you can explain the college-level learning you acquired.

For graduate portfolios, include any work experiences of at least 10 months' duration since you completed your most recent undergraduate degree OR in the past 7 years, whichever more recent. Thus, if you graduated 5 years ago, you may include only work experiences for the past 5 years; if you graduated 8 years ago, you may include work experiences only for the past 7 years.

Q2: Some of my work experiences were over 20 years ago. How can I provide adequate verification after that length of time?

This may be the most difficult part of documenting prior work experiences. If the employer is still operating, you should contact the human resource department and ask about their policies and process regarding providing documentation for previous employees. If the employer has closed or if there is no one currently employed who knew you during the time you worked there, you may need to seek out former co-workers and ask for brief letters from them verifying your dates of employment and the position(s) you held. Other sources for documentation of the dates of employment include W-2 statements or personnel evaluations. If you cannot verify the employment dates, the job responsibilities, or the learning described in the self-assessment, then evaluators cannot award credit, and you should omit this job from your portfolio.

Q3: As the self-employed owner of a business, how can I document my work experiences and learning?

As with any work experience, you must document time in the position, job responsibilities, and the learning acquired. An accountant or attorney employed by your business or involved with the establishment of the business may be able to provide some of the documentation. Vendors and clients to whom you have sold products, purchased products, or provided services should also be able to provide some evidence of your responsibilities. Legal documents, such as Articles of Incorporation or tax documents, are helpful in verifying that the business exists and your position in it.

Q4: Do I group all part-time experiences together as one full-time work experience?

*No. **Each** full and part-time work experience is to be presented in a separate IV-Tab form, with experiences placed in **reverse chronological order** (i.e., most recent first). Be sure to indicate which positions were full or part-time by checking the appropriate box on the first page of each IV-Tab form.*

- Q5: What if the timelines for some of my work experiences overlap? How should I place these in my portfolio?

List all work experiences in **reverse chronological order**. If dates overlap, always place a full-time work experience before the part-time work experience for that period.

- Q6: If I was employed during high school and kept that job after I graduated, may I count all of the time I was employed for my work experience? If I am a graduate student who was employed during college and kept the job after graduation, may I count all of the time I was employed for my work experience?

No. For undergraduates, only the months of employment **after you graduated** from high school may be counted towards the undergraduate degree. For graduate students, only work experiences since completion of the undergraduate degree OR the past 7 years, whichever is more recent, may be included.

- Q7: If two jobs are very similar, may I place both of them in one IV-Tab form?

No. Each work experience must be submitted as a separate IV-Tab form.

- Q8: I was paid while completing an apprenticeship/ or internship. Is this considered a work experience or a training experience?

For undergraduates, if the apprenticeship or internship was completed after you graduated from high school and did not count for academic credit on your college transcript, then you may submit it for Prior-Learning credit as a training (V-Tab). But be sure to include a complete self-assessment and documentation for the experience. If you are a graduate student and completed an internship or apprenticeship after obtaining your undergraduate degree or within the last 7 years, whichever is more recent, and if you did not receive academic credit for it, you may submit the experience as a training (Tab V).

- Q9: What if my name has changed and many of my work experiences are documented under another name?

List the name change(s) early in Tab I, and explain at the end of the relevant Tab IV, V, or VI forms.

Training Experience (Tab V)

- Q1: Are we required to complete this section?

No. Each student may choose to include or disregard this portion of the portfolio.

- Q2: I have multiple related trainings covering a 5-year period. Should I group them together as one Tab V in my portfolio, or treat each one separately?

It depends. Usually, each training experience should be submitted separately to ensure that the self-assessment addresses the learning that occurred within each of the trainings and that all trainings are properly documented. Keep in mind that a minimum of 45 class hours is required for 1 credit.

However, if you have completed several shorter trainings on a similar subject (e.g., various forms of computer applications) that together equal at least 45 class hours, then you should combine them into a single Tab V form. You will still need to include a self-assessment of learning and provide documentation for each training.

On the other hand, if all you have are several small trainings on unrelated subjects, then don't spend time addressing them in the Tab V section of your portfolio, because you will not receive any credit for them.

- Q3: May I submit a training that is not related to my current job? Is it possible to earn credit for trainings that are unrelated to work experiences?

Yes. Any training may be submitted on a Tab V form. Trainings do not have to be related to a current or former work experience, but they must reflect college-level learning.

Q4: Should I include the original certificates and awards in the portfolio as documentation of trainings?

No, original documents should never be submitted, as portfolios are not returned to students. Make copies of documentation and insert the copies at the end of the relevant V-Tab form.

Life Experience (Tab IV)

Q1: Are we required to complete this section?

No. Each student may choose to include or disregard this portion of the portfolio. Generally, these experiences are the most difficult to self-assess, because the student enjoys the experience, but describing the learning that occurs is often difficult. Also, documentation must come from two non-relatives and the experience must be for at least two years.

Q2: What kinds of life experiences are applicable? Can personal experiences, job change/layoff, death, healing, travel, care giving, or hobbies be considered?

Yes. The above list, although not complete, includes good examples of possible areas of life experiences. You must include a thorough self-assessment, documentation, and evidence that this experience was in-depth and that you acquired college-level learning from it.

Re-Evaluation

Q1: If I am not satisfied with the credits awarded for my portfolio, either the number of credits or the level, may I request to have my portfolio re-evaluated?

Yes. One re-evaluation is permitted, so be sure to read carefully the award-notification letter and follow all of the recommendations for re-submission of your portfolio.

Q2: If I am submitting my portfolio for a re-evaluation, do I need to send two more complete copies of the portfolio?

No. Do not send the entire portfolio again. Send only two copies of the sections (Tabs) that are to be re-evaluated and any documentation needed. Be sure to include a cover letter that addresses why you are requesting a re-evaluation, what you are submitting, and how the materials improve on the initial submission.

Q3: If I request a re-evaluation, do I need to pay the processing fee again?

No. The portfolio-processing fee is charged only once. There is no additional fee for the re-evaluation or for additional portfolio submissions.

The Prior-Learning Assessment Team wishes you the best in developing an excellent portfolio that will result in the maximum credits possible for you to complete your degree program.

Criterion 4 Evidence
Policy on Transfer Credit Applied to the UP

POLICY ON TRANSFER CREDIT APPLIED TO THE UNIVERSITY PROGRAM

MACRAO Agreement/Michigan Transfer Agreement (MTA)

In order to insure equal treatment of students transferring to CMU, all students transferring from a Michigan community college accredited by the North Central Association of Colleges and Schools, who present coursework equivalent to the basic general education requirements of the MACRAO Articulation Agreement or the MTA, are not required to complete any additional courses in the CMU University Program.

Undergraduate Academic Services, an adjunct of the Registrar's Office, is responsible for auditing the transcripts of all undergraduate transfer students at the time of transcript evaluation to insure compliance with the MACRAO Agreement or MTA. Transfer students are required to present a minimum of 30 semester hours distributed in the following fashion:

MACRAO

- a. English Composition (6 semester hours)
- b. Natural Science - 8 semester hours in more than one discipline from:
Astronomy (AST), Biology (BIO), Chemistry (CHM), Computer Science (CPS), Earth Science (ESC), Geology (GEL), Mathematics (MTH), Physical Science (PHS), Physics (PHY), General or Natural Science (SCI, NSC), Statistics (STA).
- c. Social Science - 8 semester hours in more than one discipline from:
Anthropology (ANT), Economics (ECO), Geography (GEO), History (HST), Political Science (PSC), Psychology (PSY), Social Work (SWK), Sociology (SOC), General Social Science (SSC)
- d. Humanities - 8 semester hours in more than one discipline from: Art (ART), English (ENG) other than English composition, Foreign Languages (FRN GER, GRK, JPN, LAT, OJB, SPN, RUS), Music (MUS), Philosophy (PHL), Religion (REL), Speech (IPC, SDA, TAI), General Humanities (HUM)

*Note: The MACRAO designation, if posted on or before December of 2019, will be recognized by CMU. The MTA, which became effective August 2014, will replace the MACRAO agreement.

MTA

To fulfill the Michigan Transfer Agreement, students must successfully complete at least 30 credits, with at least a 2.0 in each course. These credits, which will be certified by a Michigan Community College, should be met according to the following distribution:

- 1 course in English composition
- A second course in English composition or 1 course in Communication
- 1 course in Mathematics
- 2 courses from Social Sciences (from two different disciplines)
- 2 courses from Humanities and Fine Arts (from two different disciplines and excluding studio and performance classes)
- 2 courses in Natural Sciences including one with laboratory experience (from 2 different disciplines)

If these classes do not add up to 30 credits, then the student must take an additional course from one of these groups.

University Program Transfer Block Option

Alternatively, a transfer student who is unable to present the required 30 semester hours distributed as outlined in the MACRAO agreement may meet the CMU University Program requirements as approved by the Academic Senate on April 26, 1977 and amended on October 30, 1984 and February 22, 2000 using the Transfer Block Option. This requires that each transfer student present, upon graduation, 24-27 hours of coursework (27-30 hours of coursework prior to the 2014-15 Bulletin) distributed among Humanities, Natural Sciences, Social Sciences and Integrative and Area Studies. A total of six semester hours must be taken in each area. When all transfer credit has been applied to the University Program Transfer Block the student may have no more than 12 hours remaining to fulfill the University Program Transfer Block Option requirements.

Courses used to fulfill the University Program Transfer Block may transfer from any two-or four-year institution accredited by one of the regional institutional accrediting associations or from a foreign university or college approved by the government or the official regulating agency of the country in which the university or college is located.

GROUP I: HUMANITIES (A complete description of University Program Group I may be found in *The University Program: A Basic Documents Set* available online at: academicsenate.cmich.edu)

A minimum of six but not more than nine semester hours of course work from at least two of the following disciplines:

ART (Art), ENG (English, not including composition courses), BCA (Broadcasting), HST (History), MUS (Music), PHL (Philosophy), REL (Religion), TAI (Drama), HUM (General Humanities)

GROUP II: NATURAL SCIENCES - (A complete description of University Program Group II may be found in *The University Program: A Basic Documents Set* available online at: academicsenate.cmich.edu)

A minimum of six but not more than nine semester hours of course work from at least two of the following disciplines: One course must include a laboratory section.

AST (Astronomy), BIO (Biology), CHM (Chemistry), ESC (Earth Science), GEL (Geology), HSC (Health Promotion and Rehabilitation), MTH (Mathematics), PHY (Physics), PHS (Physical Sciences), SCI (General or Natural Sciences)

GROUP III : SOCIAL SCIENCES - (A complete description of University Program Group III may be found in *The University Program: A Basic Documents Set* available online at: academicsenate.cmich.edu)

A minimum of six but not more than nine semester hours of course work from at least two of the following disciplines

ANT (Anthropology), CDO (Communication Disorders), HEV (Human Environmental Studies), PSC (Political Science), PSY (Psychology), SOC (Sociology), ECO (Economics), GEO (Geography), JRN (Journalism), SSC (Social Science)

GROUP IV: INTEGRATIVE AND AREA STUDIES - (A complete description of University Program Group IV may be found in *The University Program: A Basic Documents Set* available online at: academicsenate.cmich.edu)

This is identical to the CMU University Program. The student must transfer 3-6 hours (6-9 prior to the 2014-15 Bulletin) of course work on a course-by-course basis. Three hours must apply to Subgroup A (only prior to 2014-15 Bulletin), and three hours must apply to Subgroup C of Group IV of the University Program. The requirement for subgroup B may be met by the transfer of 3 hours of course work or demonstrated completion of any of the approved alternative experiences described in the current *CMU Bulletin*.¹

ELECTIVES (if necessary to make 24-27 hours (27-30 prior to 2014-15 Bulletin))

Any additional coursework needed to meet the distribution requirements outlined above and to reach the minimum total hours must be taken from any of the University Program groups. One English composition course may be used as an elective to the Transfer Block option only if not used to satisfy CMU university competency requirements.

¹ Students who receive credit for an approved study abroad experience or whose first college-level foreign language course is at an advanced level (102 or higher) may satisfy the University Program requirements with a minimum of 24 hours (or 27 hours prior to the 2014-15 Bulletin. All other students must satisfy their University Program requirements with a minimum of 27 hours (or 30 hours prior to the 2014-15 Bulletin.)

Notes:

1. Transfer students who have no more than 12 semester hours remaining to complete the University Program Transfer Block Option with completed courses as distributed above (and prior to their first full-time enrollment at CMU) may use the University Program Transfer Block Option. For purposes of this rule, full-time means at least 12 hours attempted in a single semester. Any additional courses needed to meet the distribution requirements outlined above and to reach a total of 24-27 credit hours (or 27-30 prior to the 2014-15 bulletin) must be chosen from the appropriate categories within the list of CMU University Program courses in the current CMU *Bulletin*. For example, any deficiency in Group I transfer credit must be remedied by taking CMU University Program courses listed under Group I in the current *Bulletin*. Any deficiency in Group IV Subgroup B must be remedied by taking a course from Group IV Subgroup B; and any deficiency in Group IV Subgroup C must be remedied by taking a CMU course from Group IV Subgroup C. In choosing CMU courses to complete their total hours, students must also follow the rules stated in the current CMU *Bulletin* that govern selection of more than one course with the same designator.
2. In the event that a student can not transfer 18 semester hours of course work as distributed above, the student will be required to complete the entire University Program. Comparable course work at another college or university may be transferred into the CMU University Program on a course by course basis when (a) it transfers as an equivalent to a CMU course previously approved as a University Program course or (b) it transfers without a course number and has a content congruent with the goals of the University Program and the CMU courses approved on the University Program.
3. Competency requirements apply to all students regardless of transfer status. Six hours of English composition courses used to satisfy CMU competency requirements may not be used as elective hours on the CMU University Program.
4. Transfer students who have no comparable course work at another college or university are required to meet the CMU University Program requirements as outlined in the current CMU *Bulletin*.

As new courses are approved for inclusion in the University Program the categories within the above groups may be adjusted. To insure consistency in the development of new

categories and to monitor the actual allocation of transfer courses to the various groups and subgroups a review of this process will be undertaken each Fall Semester by an appropriate Academic Senate committee, such as the General Education Subcommittee of the Undergraduate Curriculum Committee. Such a review will allow for revision if necessary in operating guidelines used by the office of Undergraduate Academic Services.

Approved by the Academic Senate 12-12-78; revised 10/30/84.

Prior Learning Assessment Briefing

CMU/GLOBAL CAMPUS

Prior Learning Assessment Briefing

For Portfolio Development

Global
Campus

November 2013

Agenda

- **Welcome**
- **Introduction to PLA**
- **Developing a Portfolio**
- **Tips & Hints**
- **Submission**
- **Evaluation Process**
- **Awards & Applying Credits**
- **Summary**

Introduction to PLA

Prior learning assessment (PLA) is a process whereby college credit is awarded for knowledge gained through employment, training, and life experiences, as self-assessed and documented in a portfolio

History

- CMU began *offering* prior learning credit in the 1970's for military personnel throughout the world
- Approximately 9,000 portfolios evaluated
- CMU uses a competency model, not a course challenge model

PLA Philosophy

- **College level learning can occur in many settings, including work, training, and/or life experiences**
- **Students write an analysis of what they learned and how they applied this knowledge in the work environment at a level that merits undergraduate or graduate credit**

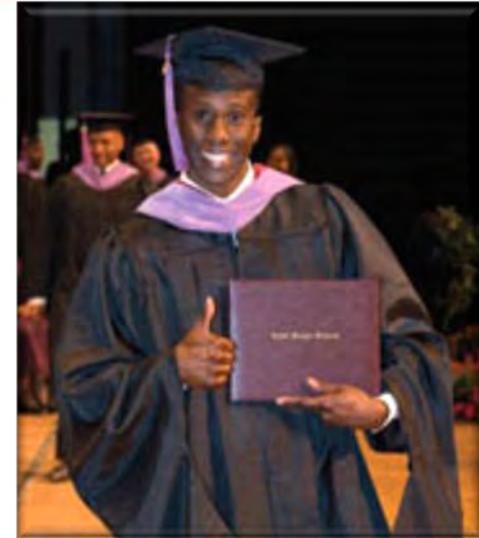

Global
Campus

CMU
CENTRAL MICHIGAN
UNIVERSITY

Eligibility

- **Undergraduate:** from date of high school graduation to date which the portfolio is notarized
- **Graduate:** from date of the undergraduate degree or 7 years prior, whichever is shorter, to the date of notarization

Portfolio Overview

- **Tabs I and II: General information, transcripts and transfer credit evaluation (TCE) forms**
- **Tab III: Table of Contents**
- **Tab IV: Work Experience - if requesting credit**
- **Tab V: Training Experience - if requesting credit**
- **Tab VI: Life Experiences - if requesting credit**
- **Tab VII: Signature block – notarization required**
- **Portfolio Checklist**

Developing a Portfolio

Preliminary Steps

- Meet with an academic advisor to discuss potential use of prior learning credits towards a specific degree plan
- Download the Prior Learning Student Handbook and forms from the web site:
<http://global.cmich.edu/prior-learning/>
- Begin by reading the student handbook
- Review the on-line briefing session, as needed
- View the sample portfolio for examples of good self-assessments

- **Think about the various skills and knowledge gained through the work experiences as well as the type of credits desired**
 - **Emphasize the aspects of the job/training that correspond with the type of credits needed**
 - **Owner of a plant store may focus on botany, small business management, and/or customer service**
- **Limit the number of areas for self-assessment to a maximum of 5 per Tab**
 - **Depth and quality of the self assessment is more important than an exhaustive list of every small area of increased knowledge**

Quality of the writing

- **Focus on the learning, not the act itself**
- **Poor self-assessment:**
 - “I was a landscaper. I planted trees.”
 - This indicates what the person did, not what they learned
- **Good self-assessment:**
 - “As a landscaper I developed the ability to analyze soil moisture content and select appropriate plants for the environment.”
 - The focus of the writing is on what the person learned and the application of new knowledge to the job responsibilities
 - Examples and details are important

Presentation

Use a three-ring binder (no folders, etc)

3 binders: submit 2 and keep 1

Use tabbed dividers

between each major segment

between each required section

(I/II, III, IV, V, VI, and VII tabs)

Do not use plastic page protectors

Use the required forms (do not revise the forms)

Organization

- **Use separate header sheet for each work, training, and life experience**
- **Start with most recent experiences** (work, training, and/or life), **then proceed backwards** (reverse chronological order)
- **Fully assess the learning for each tab**

Self-Assessment

- **Experiences must be supported by self-assessment of learning** (No credit for observations, experiences, or trainings without self-assessment)
- **Must reflect college level learning**
- **Self-assessment must explain learning with adequate details and examples, i.e., show analysis and synthesis of learning** (in standard written English)
- **Learning claimed must be supported in the documentation** (i.e., that you held the job, attended the training, or had the life experience)

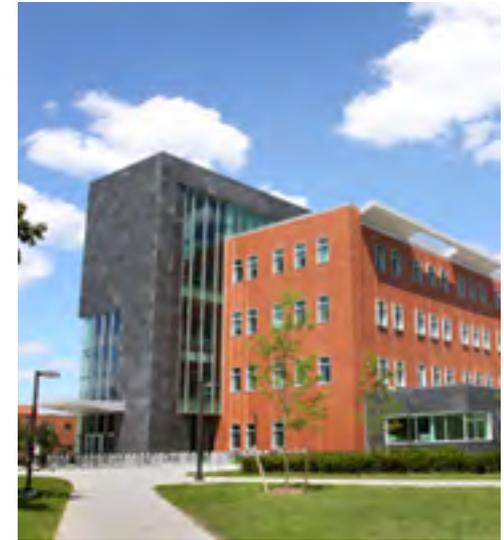

Tab I: General Information

- **Be sure your name is same as it appears on your CMU transcript**
- **Include your student ID number**
- **Do not include your social security number in any of the documents (black out)**

Tab II: Education Background

- **Indicate degree or certificate desired**
- **Indicate the date of high school graduation (undergraduate students) or bachelor degree completion (graduate students)**
- **Include a transcript for all college course work (CMU & other institutions, unofficial copy is ok)**
- **Include a copy of your CMU Transfer Credit Evaluation (TCE) form, if applicable**

Tab III: Table of Contents

- **Very important!**
 - basis for organizing materials
 - overview of contents to follow
- **Identify all Tabs:**
 - List most recent (current) experience first
 - List different positions with the same employer as separate experiences
 - List ALL documents included for each Tab

IV-Tabs: Work Experiences

- **WORK EXPERIENCE ID: IV-1** (number EACH, with current or most recent job first)
- **Dates of employment** (month & year, e.g., 10/94 – 6/99)
- **Exact title of position** (and rank if applicable)
- **Full time / part time: # hours/week: ___**
- **Name and title of immediate supervisor**
- **Name of employer (firm, organization, etc.) and address including zip code**
- **Address of supervisor** (if different than company address)

IV-Tabs: Work Experiences

- Create a separate IV Tab for each position held, even when working for the same employer
- Use reverse chronological order; list the current/most recent position as Tab IV-1
- Typically, the majority of credits awarded come from work experiences (spend time developing the self-assessment for these)
- If jobs overlap, be sure to explain the hours/time for each position
- Self-assessment - explaining the *learning* that occurred during a work experience

Instructions for the Worksheet

- A1a & b - list key job responsibilities
 - A2 – list new skills that you learned while doing this job (no more than 5 total)
 - A3 – list skills that you improved while doing this job
 - A4a & b – list any recognition or training
- **Convert each listed item into a paragraph and expand on the knowledge, description of learning, and skills acquired**

Documentation

- Possible sources for verification of employment include HR records, letter from supervisor, pay stubs, W-2 form, and/or performance evaluations
- Supervisor's letter should verify dates of employment and the accuracy of the self assessment; it should not be a letter of recommendation

Documentation

- **Copy documents relevant to more than one experience (work or training); highlight information and insert with relevant tab**
For example, if you have one letter from an employer verifying three positions held, include a copy of the letter with each of the three tabs
- **List documents only after they have been acquired, organized, and placed in the correct section(s) of the portfolio**
- **Cross-check all dates for accuracy**

V-Tabs: Training Experiences

- Include required training as well as courses and workshops attended to gain new skills or knowledge beyond those directly associated with job
- May include course(s) that did not transfer from an accredited or non-accredited **institution** (include TCE form to verify denial of transfer credit)

Courses from a non-accredited institution must include a full self-assessment

V-Tabs: Training Experiences

- **Time will vary from a few hours to over 200 hours for a training**
 - **Details in the self-assessment should correspond to the length of the time for the training**
- **Submit each training separately**
- **Be sure to answer all of the questions: V-A1 through V-A3**
 - **Use the worksheet to outline responses to the questions, then convert the lists/statements into paragraphs**

VI-Tabs: Life Experiences

- Any experience that does not fit into work or training may be fit here
- Must be for a significant amount/ duration of time, e.g., minimum 2 years for leisure activities
- Typically receive least credit
- This category tends to be the most difficult for the student to self-assess because one focuses on their passion and the quality of the experience, rather than college level learning

VII-Tab: Signature Block

- Re-check for accuracy between the Table of Contents and the work, training, and life experience tabs
- Be sure all copies of transcripts and documentation are inserted in the correct portfolio sections
- Include Portfolio Checklist; be sure to indicate if any documentation is missing and why
- Notarization is the final step

Tips & Hints

- **Complete the self-assessment for one experience/tab, then take a break from writing; use this time to collect documentation and have others read/give feedback**
- **Have a friend (not a co-worker or spouse) read the self-assessment for clarity**
- **Have a co-worker read the self-assessment to provide suggestions for additional responsibilities and/or learning**
- **Use the CMU Writing Center**
(see handout, brochure or web site)
- **Read and revise again**

- **Forms**
 - **Interactive forms are posted on the web site**
 - **Complete interactive forms as instructed**
 - **Forms are required, do not edit or submit any self-created header pages**
- **Be sure all information in the Table of Contents matches each of the header sheets and the documentation**
- **Proofread everything – twice!**
- **The signature block must be signed, dated, and notarized, and include the notary stamp, or seal**

- Evaluators look for learned competencies (what you learned) not for CMU course equivalency
- Skills and competencies are identified based on documents AND quality and thoroughness of self-assessment
- Competencies awarded are based on the quality and thoroughness of the self-assessment, as well as the nature of the work, training, and/or life experience
- PLA guidelines determine the maximum number of credits possible for time on the job, training experiences, or life experiences

Submission

- **Complete the portfolio checklist**
- **Enclose the processing fee**
 - This is a one-time fee for evaluation, re-evaluation, and additional submissions per degree
 - Any credits used towards your degree will be charged at the current prior learning rate
 - For current rates, go to <https://bulletins.cmich.edu/2012/ug/pdflinks.asp> -page 18
- **Prepare 3 complete portfolios; send two, along with the processing fee; keep one original**
- **Portfolios will not be returned: make 3; send 2; keep 1!!!**

- **Re-evaluation** (optional)
 - One within 45 days from date on award letter
 - Submit letter of request with additional information
 - Credits may increase, decrease, or stay the same depending on additional information and/or self-assessment
- **Additional Submissions** (optional)
 - Unlimited for undergraduate students
 - Within 7 year limit for graduate students

Awards & Applying Credits

Awards

- The length of employment, hours in training and/or time spent on life experiences determine the maximum possible credits, as established by the American Council on Education (ACE)
- The quality of the self-assessment is a key component in determining the level and number of credits awarded

Applying Credits

- Undergraduate: UNV 297 or 497
- Graduate: UNV 697
- 5 CMU credits must be posted on the transcript before prior learning credits may be applied
- Undergraduate: 60 credits max
- Graduate: 10 credits max; normally do not substitute for core courses
- It may not be possible to apply all awarded credits to your degree
- You only pay for credits posted to the transcript

Summary

- The time and effort put into developing a quality portfolio, especially a quality self-assessment, will be reflected in the number of credits and the level of the award
- A three credit hour college course requires work on the part of the student; a portfolio also requires time and effort
- You are a professional – show this in the quality of the self assessment and the overall portfolio

- **Competency titles are based on the nature of the experience and the quality of the self-assessment**
- **The number of credits and level of credits awarded (297, 497, 697) are determined by the duration of the experience and the quality of the self-assessment**
- **Documentation must be included with each tab**
- **Many people feel good about developing a portfolio and feel a real sense of accomplishment. Enjoy the process!**

Undergraduate Degree:

University/College:

Major:	Minor:	Date Awarded:
---------------	---------------	----------------------

Additional Graduate Work Completed (other than from Central Michigan University):

Specify courses by title and indicate *semester* or *quarter* hours credit

Title	Credit Hours	Institution	Date(s)
Organizational Behavior & Diversity	4 hrs Quarter	Davenport University	April 24, 2001- June 5, 2001
Global Economics	4 hrs Quarter	Davenport University	Sept. 4, 2001- Oct. 16, 2001

TAB III-1 — APPLICANT’S TABLE OF CONTENTS

Use this form and the next two forms to prepare a table of contents which briefly outlines all information included in parts 4, 5, and 6. These pages should preface all material submitted. You should provide the title of the experience, the *dates involved*, name of employer, and an inventory of the documentation included. You must be certain each experience is documented. List your current or most recent experience first, and place each subsequent entry in chronological order. Your earliest post-secondary school experiences will be listed last.

PART IV — LEARNING FROM WORK EXPERIENCE

<i>Title of Experience/Dates</i> <small>(e.g., Administrator – Aug. 1998 to Sept. 1999)</small>	<i>Name of Employer</i>	<i>Documentation</i>
IV-1 Clinical Manager Dec 2005 to current	St. Helen Medical Center	Letter of verification from employer; Job Description; Annual Performance Indicators, Customer Satisfaction Memo; Quality Improvement Plan.

TAB IV — LEARNING FROM WORK EXPERIENCES

Your self-assessment statement is the most important part of the portfolio. It is your personal demonstration of what you have learned through work experience (including self-employment).

WORK EXPERIENCE ID

IV-1

Dates of Employment (month, year, e.g., 10/94) From: 12/2005 To: current Full-Time: X Part-Time: <input type="checkbox"/> # of hours/week: 40+	Exact Title of Position, Rank or Salary Clinical Manager \$90,000
Name and Title of Immediate Supervisor Mary Black, RN Vice President, Patient Care Services	Name of Employer (firm, organization, etc.) and Address including Zip Code St. Helen's Medical Center 2378 Twenty Mile Rd Detroit, MI 48038
Address of Supervisor St. Helen's Medical Center 2378 Twenty Mile Rd Detroit, MI 48038 Phone Number 555 678-1234	

- A. Self-Assessment: Discuss fully the nature of the work experience and what you learned from it. A weak self-assessment will *not* support a grant of credit; graduate portfolios must show advanced graduate level learning. Write your responses to each of the following directly on this form.
1. Identify and give a full description of the responsibilities you had while in this position. Your description should relate to your official job description.
 2. Identify and fully discuss the NEW skills, concepts, principles, and/or ideas you learned. Be sure to include examples to show how you applied your learning. (Consider learning of technical, interpersonal, or organizational skills.) Your discussion should relate to the responsibilities you described for Question 1.
 3. Identify and fully discuss the skills, concepts, principles, and/or ideas that you **IMPROVED** while in this particular position. Be sure to include examples to show how you applied your learning. (Consider learning of technical, interpersonal, or organizational skills.) Your discussion should relate to the responsibilities you described for Question 1.
 4. Identify and briefly discuss:
 - a) Any recognition you received while in this position;
 - b) Any on-the-job training that you applied to this position. (If you are also submitting any of these trainings for credit as V-Tabs in this portfolio, identify the numbers of each.)

TAB IV — LEARNING FROM WORK EXPERIENCES

B. Supporting documentation from the employer regarding a work experience must¹ include:

1. Job description(s);
2. Verification of employment dates;
3. Letters from superiors;
4. Annual performance evaluations;
5. Any other relevant data.

A. 1. DESCRIPTION OF RESPONSIBILITIES INVOLVED IN THIS POSITION:

As Clinical Manager of a Surgical Telemetry unit, I am responsible for the planning, organizing, and directing of clinical and clerical personnel on a twenty-four hour basis, who are engaged in providing patient-care services to individuals requiring nursing care. I am accountable for the quality of care provided and the satisfaction of patients, families, physicians, and visitors on the unit.

My clinical responsibilities include the tracking of quality issues, and developing and implementing changes in order to meet compliance. Informal and formal visits with patients, families, and physicians are done in order to ensure satisfaction with services rendered. I am responsible for providing reports, statistics, and/or documentation upon request that accounts for unit activities, including but not limited to: staffing reports, quality indicator data collection and monitoring tools. Nursing protocols and standards of care utilizing evidence-based practice models are planned and administered directly through supervision of staff and the integration of clinical, technical, and clerical activities.

Operational responsibilities include developing a monthly staffing schedule for assigned personnel. Staffing needs are reviewed daily and adjusted by shift according to the census, bed availability, and staff available in a nursing pool or other units. Daily assignment sheets are prepared in coordination with the central staffing office and in collaboration with other Clinical Managers to maximize patient throughput and staff resource allocation. I am responsible for managing relations and negotiating with other hospital departments and professionals to ensure the smooth running of the unit.

Human Resource responsibilities include recruiting new staff; coordinating interviews and hiring processes with Human Resources Department; supporting the training of new associates by structuring a preceptor/new hire orientation process on the unit; preparing, writing and conducting staff performance evaluations; resolving staff conflicts; and preparing/delivering disciplinary actions as necessary.

Financially, I participate in the annual budget process and conduct periodic budget and productivity variance analysis. I am accountable for charge-capture, revenue reconciliation, and revenue error management. I am responsible for the charge-capture processes including charge reconciliations, monitoring and reconciling gross charges daily and monthly, identifying and

¹ If specific documentation is not included, an explanation for its absence must be provided on the portfolio Checklist form.

TAB IV — LEARNING FROM WORK EXPERIENCES

investigating variances, and ensuring resolution of the issues. The bi-monthly payroll and other operational expenditures, including but not limited to, minor equipment, reference materials, and training costs are my responsibility.

Staff development and retention activities include coaching, mentoring, education, and development of staff. Responsibilities include overseeing and following up on unit staff educational needs, monthly staff meetings, informal rounding of staff, and encouraging policies consistent with the advancement of nursing care and health promotion. I am accountable for integrating evidence-based practice into patient care, and supporting the development of associates by providing resources and delivering clear, open, and honest feedback.

Hospital-wide responsibilities include meeting with senior executives, the nursing leadership team, and department heads in order to develop and implement comprehensive, creative, and effective plans to support the overall mission and direction of the organization. I am responsible for adhering to hospital and departmental policies and procedures in order to comply with state and federal statutes and hospital accrediting agency regulations, and maintaining a regulatory readiness.

A. 2. DETAILED EXPLANATION OF NEW SKILLS AND KNOWLEDGE WHICH EVOLVED FROM THE EXPERIENCE:

The concepts and principles I have learned in this position fall into two major components of my responsibilities: clinical and hospital-wide. To speak of them separately would be difficult as they intertwine on a daily basis.

Clinical/Hospital-Wide

A haphazard approach to resolving issues and conflict can cause frustration, staff disengagement, and failure all around. An essential key to successful leadership is ensuring that problems are assessed properly, action plans are developed, objectives are defined, and goals are established. One must have a clear understanding of what needs to be achieved. In order to satisfy the national standards set for patient safety, Project Genesis was implemented. For three years, work groups planned, tested, reviewed, revised, and re-assessed the implications of converting to an electronic medical record. Customer service was incorporated into performance reviews and was measured by formal surveys. As part of the strategic plan, each department was accountable for core indicators that measured compliance to quality standards of patient care as defined by several regulatory agencies. Finally, faced with financial targets, everyone was challenged to do things in a smarter way.

Understanding is important, but the defining moment occurs when a methodical plan to attain a successful outcome is developed. In the process of formulating the plan, it is imperative that the outcome is aligned with the organization's strategic plan. Also, one needs to ask: Who or what will be affected by the plan? Are the resources available to accomplish the goal? What is the time frame for implementation, and is it realistic? Consideration must also be given to the culture of the organization rather than imposing personal values prior to placing the plan in motion. For each area Project Genesis demanded that, after policies and procedures were

TAB IV — LEARNING FROM WORK EXPERIENCES

developed or revised, job aids be available so that decisions could be made at the appropriate level. With the appropriate tools at hand, the employee's uncertainty was reduced, which made for the smooth transition. Customer service was to become a priority. Quality was no longer a subjective assessment, but a hard fact. Benchmarks were set.

In order for any change to stick, leaders must design and run an effective persuasive campaign. Persuasion promotes understanding, understanding leads to acceptance, and acceptance translates into action. This meant that significant work was needed up front to ensure that employees would actually listen to the tough messages being sent, question old assumptions, and consider new ways to work. Through collaboration and informal dialogue, understanding of what people value and hold as important can be gained. It also helps the staff understand the power of collective thoughts and skill. Exchanging ideas and gearing the conversation toward a common desire will lead to establishing an effective and achievable plan. By devising action steps in a formal, sequential format that provides structure while maintaining flexibility for creativity, leaders set the stage for acceptance.

It is extremely important to garner support by being very clear on the objective. Educating the staff on the goal through verbal and written communication will facilitate staff buy-in. As a nurse leader, it is important to provide an environment that consistently fosters open communication and collaboration with employees. Staff members need access to managers both through formal mechanisms such as staff meetings and through informal one-on-one conversations. Consistency is crucial. As time passes, leaders must pay close attention to the mood of the employees and manage them so their emotional states support implementation and follow-through. Employees need to feel that their sacrifices have not been in vain and that their accomplishments have been recognized and rewarded. Complacency cannot be an option. This will prove to be vital in preventing the backsliding that so often occurs with major change.

Once success is achieved, recognition must be shared. By acknowledging the hard work of the staff, the foundation for future success will be set. A thank-you goes a long way toward improving work performance. The goal is to change behavior, not just ways of thinking. A leader can talk about values, life/work balance, teamwork, communication, etc., but an effective leader provides opportunities for employees to practice desired behaviors repeatedly, while personally modeling new ways of working and providing coaching and support.

Even as they must set expectations and reinforce behaviors, effective leaders also recognize that many employees simply do not know how to make decisions as a group or work cooperatively. By delegating decisions and responsibilities, a leader can provide employees with the opportunities necessary to practice new ways of working. By insisting that employees work through difficult issues themselves, the employees learn not to rely on the leader to tell them what to do, but rather to engage in the critical learning process that is so vital to success. However, if the employee is lacking basic skills or knowledge, it is imperative for the leader to intervene personally to coach, mentor, and provide the education that is needed to ensure success. By scheduling computer classes for each employee, physician, and volunteer, computer skills were no longer unknown. Monthly reports for compliance to the core indicators are incorporated in each staff meeting and expectations are reinforced. Daily monitoring for compliance is

TAB IV — LEARNING FROM WORK EXPERIENCES

necessary so timely feedback on a one-on-one basis can be given. Doing patient rounds regularly allows me to hear and see the impact of customer service concepts first-hand and to assess family and patient perceptions regarding the quality of care.

A. 3. EXPLANATION OF IMPROVEMENT IN KNOWLEDGE AND SKILLS WHILE IN THIS POSITION:

Managers manage and leaders lead, but the best managers do both. As a result of my work experiences at St. Helen's Medical Center, in conjunction with my continuing education through graduate classes and seminars, I have learned how to be a better clinical manager. I have refined my communication and leadership skills and improved my abilities to lead and develop others. I have become a quality focused mentor, teacher, and advocate for excellence in patient care. I have absorbed the teachings of my director and put into practice an enormous amount of knowledge in the areas of clinical and hospital-wide administration.

Service excellence is essential for creating the best place for associates to work, physicians to practice, and patients and families to receive care. In order to satisfy our employees, physicians, patients, and families, a comprehensive approach was developed. As a manager, I recognize that healthcare is a business, and patients want satisfaction with services rendered in a facility. If patients or family members do not receive what they believe to be quality care, they will take their business elsewhere. Patients may also influence others to avoid a facility. Word of mouth can prove to be very powerful. In addition, the healthcare profession is currently engaged in a talent war, as employers face the challenge of creating professional workplaces that attract and retain staff. Crafting a positive, quality work environment is rapidly gaining priority status, and it is reaching the same importance as providing quality patient care.

As a manager, I already knew that I had a team of wonderful, skilled clinicians. However, customer service was never a required course in nursing. Somehow I needed to make everyone aware of the importance of customer service, to make it as important as passing medications. I enlisted the help of our Human Resource Department and arranged for a meeting with an outside source, Community Assessment Referral and Education (CARE). During a mandatory meeting, the participants were guided through an exercise that asked them to understand their personal priorities and to assess how those priorities affected interactions with others. The session helped staff members examine what motivated them in their jobs and how those motivations affected other colleagues and patients, and it offered insights on how they could make changes.

Knowing that communication is a key component to any success story, I have always encouraged open, honest discussion. This behavior was and is expected of the whole team. When tough issues arose, or conflict among co-workers surfaced, I required the parties to have private one-on-one discussions prior to my involvement. We adopted guidelines from those handed out at one of the leadership exchange meetings (middle and senior executive level), and I implemented a way to celebrate staff member's success and accomplishments by creating an "Employee-of-the-Month" bulletin board as well as an "Our Family" board for posting pictures of sons, daughters, and pets. The bulletin boards served as reminders that activities and interests both inside and outside of work are important, a snapshot of work/life balance. Even though healthcare requires

TAB IV — LEARNING FROM WORK EXPERIENCES

employees to work around the clock, 365 days per year, the need to promote a balance between work and personal life became increasingly important to staff. Also, I now keep a supply of thank-you cards available and send them to staff members who have gone the distance when at work. I usually send them to their homes after publicly acknowledging their efforts.

Surveys were randomly distributed to discharged patients, and the results were tallied and shared with the staff. Highs and lows of the patients' stay at the hospital were reported. At about the same time, Gallup surveys were introduced to the hospital and core indicators became the benchmark for patient care. It was apparent that customer service was moving toward a hospital-wide initiative. Trends were emerging and a challenge from our VP of Nursing to the nursing leadership team to "create quality, create change" was given. I raised my hand to ask a question and was given the task of facilitator of the new committee. What a work group, "Quality across the System," was formed with a goal of evaluating and improving quality.

In the ever-evolving world of health care, the only certainty is change. New benchmarks were being adopted by hospitals across the nation. Referred to as the "core indicators," certain criteria had to be met by which clinical performance/outcomes would be measured in relation to standards set by national trends and system-wide expectations. A committee was formed with representation from key departments. After several discussions, it was agreed upon to tackle a major portion of the core indicators, namely, the indicators for congestive heart failure. I decided to use five concepts for creating the change that was necessary to reach the benchmarks. "Promise small, deliver big" was a philosophy I adopted and that philosophy served to build rapport across committee members and prove to the VP that we could deliver what was promised. To implement the philosophy, we created a 30-day plan with three or four identified goals. As we met each goal, we made revisions to the plan and set higher standards. Enlisting the help of a physician who had a passion for quality was key in helping convince health-care staff who resisted the changes we were requesting. Finally, members of the committee changed as the goals changed: The committee determined who was needed at the table to accomplish the next goal. The committee's work was a precursor to some of the major changes that have since taken place and that have enabled us to reach compliance. Even though the standards are always being set higher, the concepts are now being applied at the unit level.

For example, at the unit level, comments received from a patient survey prompted review of the medical records. They demonstrated a lack of both patient and the nursing staff knowledge regarding a specific procedure. The result was frustration and confusion for doctors, nursing staff, patients, and family members. Improvement involved education of the nursing staff and patients. With the help of the unit educator, a multi-discipline team was assembled. Using the FOCUS-PDCA cycle approach, teaching tools were developed, and an audit tool was put into place. The end result was improved patient care, increased satisfaction, and less frustration for physicians, nurses, patients, and family members. What started out as comments on a customer satisfaction survey ended up being a quality project for the unit. The two proved to be related in more ways than one.

Every year Trinity Health System hosts a fall conference that includes presentations and awards. Each year also has a theme. In 2000, the theme was "Building on the Basics: Service, Quality,

TAB IV — LEARNING FROM WORK EXPERIENCES

and Lasting Relationships.” I will never forget that year. Having recently been given the responsibility of a second nursing unit, I was facing the fact that the pediatric unit was unable to sustain the daily census necessary to be financially solvent. I decided to visit a sister hospital in Battle Creek to see what changes they had made to increase the productivity of the unit. That visit gave birth to what is now referred to as the Rapid Treatment-Pediatric Unit. It also led to the “Rapid Replication Award,” which is granted by the Trinity Health Board of Directors for Quality Committee. It is now managed by a highly talented manager, and remains a financially solvent nursing unit.

Patient safety has always been a key component of providing the highest level of excellent patient care. It is measured and surveyed by many regulatory agencies throughout the year. In May of 2005, technological advances hit the hospital with laser speed. Project Genesis was three years in the planning. The implementation of the computerized medical record was a result of the demand for a reduction in the number of medical errors, cost containment, and overall improvement in patient care and safety. The Committee on Data Standards for Patient Safety published a report to provide a road map for the development and adoption of a comprehensive set of national healthcare information standards that support patient safety. The President’s Information Technology Advisory Committee began in 2005 with a report to the president outlining recommendations for a 21st century healthcare information infrastructure that would revolutionize medical records systems. We were already live and well, having set another standard in the community for excellence. Moving from paper to electronics proved to be more challenging than most expected. Process flows had to be developed to serve as guidelines and templates. The what-was had to become a what-is. Every department, every employee, every physician, and most importantly, every patient was directly affected by advances in technology. As a clinical manager, I was expected to be a mentor, resource, and champion for the changes to come. The implementation of the system demanded training, supporting, and preparing the users. We came face-to-face with organizational transformation and met it head on.

Because no one is an expert at everything, it is vitally important to know one’s own strengths and weaknesses and the strengths, weaknesses, and talents of the unit’s staff. As a leader and a manager, I try to capitalize on each person’s strengths and work around the weaknesses. The time that I have worked at St. Helen’s Medical Center has proven to be invaluable to me as a leader in health-care. It has helped me manage and cope with the many contingencies of clinical nursing and unit management. I no longer fear change, for it is inevitable. I know that my diligent efforts in problem solving, coordinating, and demonstrating commitment to organizational initiatives to provide high quality nursing services are a contributing factor to the success of the nursing department.

A. 4. A) HAS YOUR PERFORMANCE OF THESE TASKS BEEN RECOGNIZED BY OTHERS? PLEASE SPECIFY.

B) ON-JOB-TRAINING APPLIED.

I have received several department level awards, the Rapid Replication Award mentioned above (granted by the Trinity Health Board of Directors for Quality) as well as national recognition

TAB IV — LEARNING FROM WORK EXPERIENCES

through a grant from the American Institute for Pediatric Nurses. These awards support my ability to manage operations and supervise staff and to provide effective leadership that will assure quality services.

Supporting Documentation included with portfolio:

- 1) Job description**
- 2) Memo from Human Resources that verifies dates of employment**
- 3) Letter from superior documenting responsibilities and activities**
- 4) Annual performance evaluations (2 recent)**
- 5) Certificates of Awards (3 samples)**

TRAINING EXPERIENCE ID

V-1

Title of Session	Sponsor ¹	Dates		In Class Clock Hours
		From:	To:	
Advanced Health Care Administration Program	Smith-Richardson Health Administration Center at XXXXXXXX Univ.	Feb. 27, 2006 and May 1, 2006	Mar. 10, 2006 and May 12, 2006	155.75 (over four weeks)

- A. Self-Assessment: Discuss fully the nature of the training experience and what you learned from it. A weak self-assessment will *not* support a grant of credit; graduate portfolios must show advanced graduate level learning. Write your responses to each of the following directly on this form.
1. An explanation of why you took the training experience.
 2. A full description what you learned from this training experience, including underlying principles, concepts, and competencies.
 3. An explanation of how and where you have applied the learning in your professional or personal life.
- B. The supporting documentation² regarding a course or workshop or seminar must include:
1. An outline, syllabus, or description of the training provided by the instructor(s) to the participants;
 2. Identification of each instructor along with her/his credentials or qualifications;
 3. Verification of the requirements for admission to the course (e.g., high school diploma, associate degree, other training experiences, or employment status);
 4. Verification of the number of classroom hours
 5. Verification of the type and time of preparation outside the classroom;
 6. Verification of the method of testing or evaluation of the students;
 7. Verification of the grade or evaluation received;
 8. Verification of course completion (e.g., a signed certificate).

¹ Please include the name of the institution or organization actually providing the instruction/certification for the course, even though your employer or particular organization may have “sponsored” you by providing payment or facilities for instructions.

² If specific documentation is not included, an explanation for its absence must be provided on the portfolio checklist.

TAB V — LEARNING FROM TRAINING EXPERIENCE

A. 1. AN EXPLANATION OF WHY YOU TOOK THE TRAINING EXPERIENCE.

My selection as a 2006 Smith-Richardson Fellow included expenses-paid participation in the Advanced Health Care Administration Program (AHCAP) at XXXXXXXX University's Health Administration Center. The Health Administration Center is a venture of the Kellogg Graduate School of Management and the Smith-Richardson School of Health Administration at XXXXXXXX University. The Advanced Health Care Administration Program for senior managers has been described as "one of the country's most prestigious health executive development programs" and concentrates on "strategy, patient-care, marketing, critical decision-making and leadership." (V-1-A)

The opportunity to participate in the Advanced Health Care Administration Program motivated me to apply for the Smith-Richardson Fellowship. I saw AHCAP as a significant opportunity to interact with health administrators outside my institution while gaining strategic insights on the changes taking place in the health care industry.

The program was broken into two, two-week sessions held on the XXXXXXXX University campus. The program covered 155.5 classroom hours (V-1-C, D, E, F, J) and included health administrators from four countries (V-1-G). The faculty included top professors from both the Kellogg Graduate School of Management and Smith-Richardson School of Health Administration along with high-level consultants with ties to XXXXXXXX University.

What I envisioned from AHCAP was an opportunity to gain stronger understandings of the strategic leadership and implementation skills needed to be successful in an industry undergoing patient care and market realignment due to changing economic, insurance, and lifestyle forces and the growing presence of the internet as a source of information about health and health care practices.

I was familiar with many of the concepts initiated by the Richardson Institute, which is affiliated with the Health Administration Center. Still, I saw a chance to digest best practices taking place in health care worldwide and, perhaps, synthesize how those ideas would enrich efficient and effective patient care services.

I also hoped to receive a stronger understanding of the business side of health care. Although I have more than a decade of experience as a clinical manager and am familiar with patient care/profit management practices, AHCAP offered a chance to dig deeper into the economics of clinical units and health care institutions.

TAB V — LEARNING FROM TRAINING EXPERIENCE

A. 2. A FULL DESCRIPTION OF WHAT YOU LEARNED FROM THIS TRAINING EXPERIENCE.

AHCAP was a sobering and exhilarating experience. It was sobering in the sense that I realized the changes taking place in health care in 2006 were merely the tip on that proverbial iceberg, and that the iceberg has been melting quickly. Three years later, units similar to ours have closed in cities as large as Seattle, Denver, and Tucson, AZ, while nearly every one in the field has tried to downsize operations.

It was exhilarating in that I saw an opportunity to lead changes that would take place in health care services.

John King, dean of the Smith-Richardson School of Health Administration, told 2006 AHCAP participants that health care has morphed from “find the disease and cure it” to health care that provides lifestyle information and guidance as well as business choices in providing full service. King’s statement was part of a broader presentation on health care business strategies, which emphasized that leadership starts with understanding the market conditions.

There were two components of AHCAP, and both involved strategic planning: 1) How to provide strategic business leadership in a changing health care service environment; and 2) How to be strategic in implementing change.

Much of AHCAP’s Week One was based on leadership concepts, understanding client experiences and market trends, developing business and service strategies and relevance, and building personal leadership traits. One of the most fascinating sessions involved a Saturday session with Professor Mary Sturgis on the theories and practicalities of negotiation. (Without a doubt, this session on best-positioning oneself has proved beneficial in my personal and professional relationships, from dealing constructively with staff and health care providers to managing vendors and communicating with clients, hospital and insurance executives, and community leaders.)

Week Two was an intense and fascinating exposure to the business side of health care, particularly accounting concepts and how these apply to health care institutions, including clinical units. To be candid, the sessions were more complex and illuminating than what I gained from MSA 634. In addition, Week Two included planning and analysis, leadership networking, operational strategies, and quantifying care services.

Perhaps the most exhilarating sessions took place in Week Three, which focused on the implementation of strategic concepts. For instance:

- Professor Wendy March’s lectures on executive decision-making highlighted the start of Week Three. Using case studies and her flair for story-telling, she focused on the biases that diminish decision making. She noted that commitment bias can escalate if decisions are based on emotions, while the lack of emotions in applied

TAB V — LEARNING FROM TRAINING EXPERIENCE

health care can reduce patient satisfaction. Balanced judgment is crucial. Her sessions have continued to prove illuminating and frustrating (particularly when I see others making decisions based upon fractured biases).

- Professor Albert Thuro covered significant material about investment terms/programs, financial strategies, the cost of capital, and mergers/acquisitions from the bottom-line perspective. The group study on the Phoenix St. Mary's hospital acquisition of the Tucson Health Clinic was illuminating. Thuro's AHCAP groups determined that Phoenix St. Mary's made a bad deal in buying the Tucson clinic. Fast forward three years and the hospital is on the verge of closing down the Tucson Health Clinic.
- Professor Edgar Black detailed the importance of understanding core competencies when pursuing strategic alliances.
- I have written about the nanosecond culture related to health care issues, thanks in large part to Assistant Dean Rozland Harvey's lectures on marketing leadership.

In Week Four, AHCAP participants were given an option of attending the Sunday, May 7, session on gaming. I did and it proved illuminating, showing why traditional health care systems often struggle to stay economically stable and solvent, including the difficulties they encounter in hiring and keeping younger health professionals and staff.

Week Four continued with theoretical and practical implementations of strategic leadership, from Web best practices to organizational analyses to service force management. (Professor Steve Garber's commanding sessions on intra-preneurship – "the act of being entrepreneurial in an institutional setting" – was motivational for me, as I am a community-based clinical manager within a large, publicly owned hospital.)

A. 3. AN EXPLANATION OF HOW AND WHERE YOU HAVE APPLIED THE LEARNING IN YOUR PROFESSIONAL OR PERSONAL LIFE.

The Smith-Richardson Health Administration Center is considered one of the premier think tanks in the business, so participating in the AHCAP seemed like an ideal growth opportunity for my career. Indeed, it proved very influential.

When I started the program, I was clinical manager of the Warren, Michigan branch unit. During AHCAP's graduation ceremony, I announced my pending promotion as clinical manager of the St. Helen's Medical Center in Detroit, which was a larger clinic providing more diverse services than the Warren site.

At the St. Helen's Detroit metropolitan clinic, I took over a unit that hadn't responded quickly enough to its market needs. AHCAP offered substantial resources – from theories to best practices – as I went from working with a small unit to eventually managing the large metropolitan patient-care team. Progress shows in the numbers. Our most recent market study showed that patients and services have more than doubled since 2006. I'm also pleased that several of my team's service projects have earned national and regional awards.

TAB V — LEARNING FROM TRAINING EXPERIENCE

On a more practical level, one of AHCAP's benefits was PowerPoint presentations provided to participants. When my team is considering service changes, I routinely use the presentations to review best practices or seek inspiration.

Getting reacquainted with the latest health care service research was beneficial on many fronts. I believe clients are looking for positive experiences as well as positive outcomes to health problems. We pay attention to those experiences when shaping service plans for our clinic, and our efforts have paid off. Our most recent market study showed that both the clinic's service numbers and patient satisfaction have grown, and the clinic has become economically viable.

AHCAP also exposed me to the concepts behind strategic leadership, particularly the Level 5 qualities described in Jim Collins' best-seller "Good to Great." What I recognized after attending AHCAP was that the role of a health administrator goes beyond managing details; it involves understanding the intrinsic relationships that tie clients with their health care providers and communities. It involves being a compassionate skeptic, an avid listener, a skilled negotiator, a dispassionate decision-maker, a smart entrepreneur, and a detail demon – all qualities elaborated on in theory and practicality via AHCAP's top-notch faculty.

I've balanced a high-pressure job as manager of a clinical telemetry unit with the master's program at Central Michigan University. What connects both efforts – the job and the degree aspirations – has been the underlying concepts and ideas gained from AHCAP.

Supporting documentation included with portfolio:

1. An outline, syllabus, or description of the training provided by the instructor(s) to the participants

See V-1-A, B, C, D, E, F

2. Identification of each instructor along with her/his credentials or qualifications

Faculty came from Kellogg Graduate School of Management and Smith-Richardson School of Health Administration at XXXXXXXX University along with others associated with the Kellogg MBA program. For course information and details, see V-1-C, D, E, F. For faculty credentials, see V-1-L.

3. Verification of the requirements for admission to the course (e.g., high school diploma, associate degree, other training experiences, or employment status)

The Smith-Richardson School of Health Administration Center's Advanced Health Program is for "senior executives of the industry." (V-1-A) A current program

TAB V — LEARNING FROM TRAINING EXPERIENCE

description notes “The Advanced Health Care Administration Program will prepare high-potential employees, leaders across departments or unit platforms and high-level executives to lead their companies toward continued growth and success.” (V-1-B)

4. Verification of the number of classroom hours

Total classroom hours: 155.5. hours

5. Verification of the type and time of preparation outside the classroom

The program involved advance reading of three books:

- Anderson, C. (2006). *The Long Tail*. New York: Hyperion
- Christensen, C. M. (2005). *The Innovator’s Dilemma*. New York: Collins business Essential.
- Collins, J. (2001). *Good to Great*. New York: HarperCollins Publishers.

In addition, the AHCAP syllabus involved 33 articles or case studies that needed to be read prior to the program days. The amount of prework ranged from 10 minutes for short articles to a full day for books to complete the assignments.

See the bottom portion of pages of the syllabus/schedules (V-1-C, D, E, F) for details on prework and readings needed to be completed for each session.

(I would be happy to provide additional information and copies of articles and of the lecture PowerPoints, if needed. However, the four AHCAP program notebooks weigh a combined 22 pounds.)

6. Verification of the method of testing or evaluation of the students

AHCAP did not involve a formal grade. The testing/evaluation process was based primarily on group work, which included discussions and presentations. M. P. Smith, Ph.D, executive director of the Health Administration Center, outlined expectations for study groups in his opening session (V-1-I). Syllabus/schedules (V-1-C, D, E, F) detail group study topics; see V-1-H for the assigned study groups.

7. Verification of the grade or evaluation received

AHCAP did not involve a formal grade. See explanation B6 (above).

8. Verification of course completion (e.g., a signed certificate)

Graduates of the 2006 AHCAP were recognized in health care industry publications. See V-I-K for certificate verifying program completion.

PORTFOLIO CHECKLIST

Directions: Respond to each item by placing a check in the appropriate space.

Yes No

- Did you read **Chapter 1** and **Chapter 2** of the Prior Learning Student Handbook?
- Did you study the sample portfolios? (**Undergraduate** or **Graduate** Samples)
- Did you review the Prior Learning Briefing **PowerPoint**?
- Did you *attend* a Prior Learning Briefing session? Location: _____ Date: _____
- Did you submit your writing to the CMU Writing Center? (optional)

I & II: Personal Information and Education

Yes No

- Have you included your CMU transcript?
- Have you included transcripts from other colleges attended? (if appropriate)
- Have you included your CMU Transfer Credit Evaluation (TCE)? (if appropriate)

Explain any "no" responses: _____

III: Table of Contents

Yes No

- Have you included a Table of Contents form (III-1) for the Work Experiences submitted?
- Have you included a Table of Contents form (III-2) for all Training Experiences submitted?
- Have you included a Table of Contents form (III-3) for all Life Experiences submitted?

Explain any "no" responses: _____

IV: Learning from Work Experience

Yes No

- Have you discussed your present or most recent job first (IV-1)?
- Have you discussed each previous job and labeled it appropriately (e.g., IV-2, IV-3, IV-4, etc.)?
- Are the exact beginning dates (month, day, and year) and ending dates (month, day, and year) recorded consistently throughout?
- Have you indicated the hours per week for all part-time and full-time jobs?
- Have you included documentation that verifies, in writing, the exact dates and hours for each job? (This applies to both full-time and part-time jobs.)

Have you thoughtfully and completely explained each of the following in your own words?

Yes No

Tasks performed

Concepts learned

Yes No

Skills & competencies gained

Recognition of achievements

- Have you included a formal job description for each Work Experience submitted?
- Have you included documents that support what you claimed to have *learned* on the job, e.g., samples of work or a letter on official letterhead from a supervisor or other person in a position to know?
- Have you included one or more formal performance evaluations for each Work Experience submitted?

- Have you organized each Work "Tab" (e.g., IV-1, IV-2, IV-3, etc.) by including the cover form, a thorough self-assessment (response to A-section questions) and all relevant documents (listed in the B-section)?

Explain any "no" responses: _____

V: Learning from Training Experience (Courses, Seminars, Workshops)

Yes No

- Have you included documents that verify the dates and number of in-class hours and preparation for each Training Experience (V-Tab) submitted?
- Have you included a course outline or syllabus for each Training Experience submitted?
- Have you included the instructor's name and qualifications for each Training Experience submitted?
- Have you included a certificate, letter of completion or accomplishment, or transcript for each Training Experience submitted? (Please make copies; do not include your "original certificate.")
- Have you explained what you learned and responded to all of the questions on the Training Experience (V-Tab) form for each experience submitted?
- Have you organized each Training "Tab" (e.g., V-1, V-2, V-3, etc.) by including the cover form, a thorough self-assessment (response to A-section questions) and all relevant documents (listed in the B-section)?

Explain any "no" responses: _____

VI: Learning from Life Experience

Yes No

- Have you explained the learning and indicated dates for each Life Experience (VI-Tab) submitted?
- Have you discussed the most recent life experience first, followed by others in reverse chronological order?
- For each experience, have you submitted letters from at least two persons, who are not your relatives:
1) verifying the time involved; 2) supporting what you claimed to have learned; and 3) documenting that any products included were actually produced by you?
- Have you organized each Life "Tab" (e.g., VI-1, VI-2, VI-3, etc.) by including the cover form, a thorough self-assessment (response to A-section questions) and all relevant documents (listed in the B-section)?

Explain any "no" responses: _____

VII: Signature Block

Yes No

- Have you signed and dated the signature block (VII-Tab) and placed it at the end of the portfolio?
- Did you have the VII form, which includes the signature block, notarized?
- Have you provided two copies of your portfolio? (Keep the original; portfolios are not returned.)
- Have you included a check for the portfolio processing fee?

Explain any "no" responses: _____

Note: Please include this Checklist with your portfolio, placing the completed form at the end of the portfolio, directly after the Signature Block Form (Tab VII).

TAB I — PERSONAL INFORMATION

Student ID Number: 12345

Name: Louisa Bennett

Present Employer: Michigan Public Health Institute

Address: 4900 E. Woodward Ave
E. Lansing, MI 47001

Address: 1200 Wood Suite #150
Lansing, MI 47000

Telephone: (517) 101-5630 ext.

Telephone: (517) 123-4567 ext.

TAB II — EDUCATIONAL BACKGROUND / DEGREE SOUGHT

Degree Option Sought: Bachelor of Science with Major in Community Development

Area(s) of Concentration: Community Services

Center: Lansing, Michigan

Adviser: Nancy Long

Date of High School Graduation: 06/01/2001

If you have earned a degree from a junior or community college, please identify:

Degree:

College/Institution:

Location:

Major:

Minor:

Date Awarded:

List all additional colleges or universities you have attended, but from which you did not receive a degree:

1. Salt Lake Community College, Utah 2001-2002

TAB III-1 — APPLICANT’S TABLE OF CONTENTS

Use this form and the next two forms to prepare a table of contents which briefly outlines all information included in parts 4, 5, and 6. These pages should preface all material submitted. You should provide the title of the experience, the *dates involved*, name of employer, and an inventory of the documentation included. You must be certain each experience is documented. List your current or most recent experience first, and place each subsequent entry in chronological order. Your earliest post-secondary school experiences will be listed last.

PART IV — LEARNING FROM WORK EXPERIENCE

<i>Title of Experience/Dates</i> (e.g., Legal Secretary – Aug. 1996 to Sept. 1999)	<i>Name of Employer</i>	<i>Documentation</i>
IV-1 Community Health Assoc. 2/1/07 - Present	Michigan Public Health Institute	Letter from MPH Letter from supervisor Performance evaluation 12/2007 (only one available to date)
IV-2 Program Sec/Child Death Specialist 1/1/2003 – 1/10/2007	State of Utah, Dept. of Health	Letter from Utah Dept. of Health, Human Resources Dept. Letter from supervisor Performance evaluation from 2006. (This is the only one that I could find)

TAB IV — LEARNING FROM WORK EXPERIENCES

Your self-assessment statement is the most important part of the portfolio. It is your personal demonstration of what you have learned through work experience (including self-employment).

WORK EXPERIENCE ID

IV-1

<p>Dates of Employment (month, year, e.g., 10/94) From: 2/1/2007 To: Present</p> <p>Full Time: <input checked="" type="checkbox"/> Part Time: <input type="checkbox"/></p> <p># of hours/week: 40+</p>	<p>Exact Title of Position, Rank of Salary Community Health Associate Mid-level Salary for Company</p>
<p>Name and Title of Immediate Supervisor</p> <p style="padding-left: 20px;">Lisa Moore, MPA Specialist Child Death Review Program</p>	<p>Name of Employer (firm, organization, etc.) and Address Including Zip Code</p> <p style="padding-left: 20px;">Michigan Public Health Institute 1220 Wood, Suite 150 Lansing, MI 47000</p>
<p>Address of Supervisor 1500 Wood, Suite 280 Lansing, MI 47000</p> <p>Phone Number (517) 101-5630</p>	

A. Self-Assessment: Discuss fully the nature of the work experience and what you learned from it. A weak self-assessment will *not* support a grant of credit; graduate portfolios must show advanced graduate level learning. Write your responses to each of the following directly on this form.

1. Identify and give a full description of the responsibilities you had while in this position. Your description should relate to your official job description.
2. Identify and fully discuss the **NEW** skills, concepts, principles, and/or ideas you learned. Be sure to include examples to show how you applied your learning. (Consider learning of technical, interpersonal, or organizational skills.) Your discussion should relate to the responsibilities you described for Question 1.
3. Identify and fully discuss skills, concepts, principles, and/or ideas that you **IMPROVED** while in this particular position. Be sure to include examples to show how you applied your learning. (Consider learning of technical, interpersonal, or organizational skills.) Your discussion should relate to the responsibilities you described in Question 1.
4. Identify and briefly discuss: a) Any recognition you received while in this position; b) Any on-the-job training that you applied to this position. (If you are also submitting any of these trainings for credit as V-Tabs in this portfolio, identify the numbers of each.)

- B. The supporting documentation from the employer regarding a work experience must¹ include:
1. Job description(s);
 2. Verification of employment dates;
 3. Letters from superiors;
 4. Annual performance evaluations;
 5. Any other relevant data.

¹ If specific documentation is not included, an explanation for its absence must be provided on the portfolio checklist.

A. 1. DESCRIPTION OF RESPONSIBILITIES INVOLVED IN THIS POSITION:

The Child Death Review Program in Michigan is a locally based program with state-level staff at the Michigan Public Health Institute. I have worked in this program for over two and a half years and in that time, my role in the program has been that of community consultant. I work with 23 counties in the state of Michigan to provide technical assistance, training, and expertise in the area of child death investigation, review and surveillance.

A. 2. DETAILED EXPLANATION OF NEW SKILLS AND KNOWLEDGE WHICH EVOLVED FROM THE EXPERIENCE:

During this time, I have learned a great deal more about the ways that public health work influences the lives of everyone in the country. I have gained a greater knowledge of how, when, where, and why injury and other public health prevention initiatives can be implemented into a community. I have gained a greater knowledge of the problems and benefits of diversity within an area and have learned more about the systems that work together within the private and public sectors to enhance the lives of the people of an area. I have also learned a lot more about research, data collection, and technology and that it is necessary to apply the knowledge of the findings of these things to future social and community efforts to drive recommendations to become actual change.

COMMUNITY IMPLEMENTATION OF PUBLIC HEALTH RECOMMENDATIONS AND INITIATIVES

The Michigan Child Death Review Program is unlike the Child Fatality Review Program that I worked with in Utah in that the program in Utah is a state-based program with one team led by the state-level staff to review the deaths that occur in the state. The Michigan Child Death Review Program is a locally-based program with state-level staff assistance. Local teams are the ultimate decision makers in what happens in their areas when it comes to prevention initiatives, medical examiner rulings, and other issues. This has taught me a great deal more about the community implementation of recommendations and initiatives. The main reason for this new learning is that I have been able to be closer to the community level where all of the activity takes place. Through the different community initiatives that I have helped teams with, I have learned more about the psychological issues that affect people's behavior and how the knowledge of these factors is crucial to the formulation of appropriate community health initiatives.

I have learned that having an accurate assessment of community needs and current resources can increase the likelihood of success of the initiative being presented. Learning how and where to find community partners, organizations, and resources has taught me how to more effectively increase distributions of the message the team is trying to send. Not only can these resources function as a means for message distribution, they can also help with financial obligations as well. I have learned that there are endless ways that can be used to implement activities designed to make a change in the community. Some of these ways are: educational campaigns (including mass media, print, and word-of-mouth distribution), community discussions and forums, and public and agency change in policy.

TAB IV — LEARNING FROM WORK EXPERIENCES

I have also learned the importance of evaluation in these initiatives. These evaluations not only serve as data that can be used to prove or disprove a theory but can also be used in program guidance. Many times, evaluation of a program can include pre and post testing of the participants of the program. Other times, a simple feedback form can be used to measure the opinions of the participants as to what they feel they gained from the program or initiative.

CULTURAL DIVERSITY

The knowledge of cultural diversity and how to tailor messages to certain sub-sets of target populations is a great skill that learned about during this experience. Before coming to Michigan, I had never worked with a population that had a culturally different sub-set than that of our main target population. However, I had seen initiatives done by others that catered to a number of diverse groups, such as those with different ethnic or socioeconomic backgrounds.

Almost all of the initiatives I have worked with in Michigan have included one type of diversity or another. The need for culturally sensitive materials and messages is important if there is a high population of people of different cultures in an area. Not only does this affect the receiver of the initiative on a psychological level, but it makes it possible for the information exchange to actually occur when there is a difference in language between the message sender and receiver. Activities will also change depending on the type of population being worked with. I have learned this after coming to Michigan and being exposed to and working with a higher level of cultural diversity.

I learned that the type of diversity changes the world view of the population we were working with, and that there would be a difference in the behavior and parenting style of individuals with backgrounds other than my own. Also, this has taught me how having a different world view changes the psychological makeup of a child as well as the parents. These things must be taken into consideration when working with the public. Not only do messages need to be geared differently, but the circumstances surrounding the death of a child need to be looked at differently as well. Determining the cause and manner in which a child has died can be greatly affected by the knowledge of different cultural, religious, or socioeconomic backgrounds. What one culture considers normal could be construed as child abuse by another. Also, motives in homicides and suicides can change, depending on the child's background.

WEBSITE CREATION AND MAINTENANCE

After working in the Child Death Review Program for a few months, I was assigned the task of replacing the current program website with a more updated, visually appealing, and user friendly website. At the same time, the website had to give access to information that could be used by local teams, the public, and the press. I did this by completely redesigning the website using the software Microsoft FrontPage. This required me to learn the newest version of the software as well as the essentials of effective web page design. I learned how to use HTML and how to include Hyperlinks to outside sources of information, including other websites, .PDF files, and printer-friendly versions of each web page created. The use of image mapping, graphic design, and other multimedia tools made the new pages more appealing to site visitors. I learned how to not only tailor the page to the target audience but also to those with disabilities such as visual

impairment.

A. 3. EXPLANATION OF IMPROVEMENT IN KNOWLEDGE AND SKILLS WHILE IN THIS POSITION:

INTERPERSONAL COMMUNICATIONS

By working closely with professionals in various counties, which differ greatly in population make-up and needs, I have learned how to better my interpersonal communication skills to be able to work with each team. I have learned the difference between communication that occurs at a one-to-one level as compared to small group and large group communication. I have also learned that communication changes with the context of the situation, such as informally commenting during a meeting discussion with a small group as opposed to giving a data presentation to a large group at a conference. The psychological and sociological differences between these types of communication are great. Credibility is just one of the factors that changes with the type of interpersonal communication that is used in situations. Vocal tone and inflection, body language, and effective listening are all ways that I have learned to tailor to the audience I am communicating with. I have also learned that it is necessary to take into account the ethical implications that are at stake when communication happens. This particularly comes into play when talking about a person or group to others.

PUBLIC SPEAKING AND THE TRAINING OF INDIVIDUALS AND GROUPS

I have had to make a number of presentations to small and large groups since beginning this job. Because the bulk of my experience in public speaking in the past had been in the educational and/or religious areas, I have learned how to better tailor my public speaking skills toward professionals in different fields of work. Learning the practice and importance of audience analysis has been essential in my success with the speaking assignments I have been given. I have learned that I need to exhibit confidence and competence in the subject matter from the minute the listeners step in the door. I learned much about this as I presented Michigan suicide and other mortality statistics to a group at the annual meeting of the Michigan Association of Suicidology. Although many of the people in attendance at the session were much older and more highly educated than I, the confidence I had and the competence that I displayed in my presentation of the subject allowed them to look to me as knowledgeable on the subject.

The amount of research, preparation, and organization that must take place before a speech or training has been another skill I have enhanced while in this job. I have learned that instruction about a subject with which I am familiar needs less preparation and research, and the training is less formal, less organization is required. However, if the presentation or training is to be large and formal, a great deal of organization must go into my preparation because these will be less time or opportunity for clarification and questions and more emphasis on of the quantity and quality of the information being delivered.

TAB IV — LEARNING FROM WORK EXPERIENCES

COMMUNITY/PUBLIC HEALTH-RELATED ISSUES

During my time at the Michigan Public Health Institute, I have learned more about community/public health related activities and issues. I have learned more about the essential facets and programs of an effective public health department and how communities are affected by the presence of these things. My knowledge about epidemiology has deepened, and I have learned more about the importance of the presence of this practice in an effective public health system. By having a means to gather, track, store, analyze, and use information, epidemiology provides the foundation for effective public health practice. I have learned how this information is used to track trends in community mortality and morbidity and how such information is used to guide both public health policy and practice.

Community health promotion and disease prevention programs are developed based on epidemiological data, which is essential for measuring the health of a community. Since coming to Michigan, I have learned that maternal, infant, and child health measures are the most accurate indicators of the health of an area. When these groups are taken care of, the health of the community rises. Racial and ethnic minorities are also important to target in improving community health outcomes.

There are a number of things that can be done in the area of community health to improve the health of a population. I have learned more about these things firsthand since coming to Michigan because I have been able to work with team members who work at the community level. Health departments can distribute a great deal of information to the public and act as a health information fiduciary for the community. Needs assessments can be conducted to make sure the department is on track with what is truly needed within the community to increase health. Interdisciplinary teams, such as Child Death Review Teams, can be a very effective way to increase communication between agencies and ensure that the needs of the members of the community are being met. As I have watched this process in action during Child Death Review meetings, I have learned how beneficial this is to the communities. I have learned that this process can help identify barriers that exist in the community in regard to health care, usage, and education. The final way I have learned more about community health in action is the usage of home visits to aid families in bettering their physical and psychological health and provide for other needs.

MEDICAL TERMINOLOGY AND CONDITION IDENTIFICATION

In working with the various county Child Death Review Teams, I continue to learn more and more about medical terminology and the various methods physicians use to identify conditions. Through review and discussion of the individual child death cases and medical records, I have learned a great deal about disease names and processes. I have learned more about different types of diagnoses and conditions as well as increased my knowledge about the identification and definition of word parts that make up medical terminology. This has enabled me to analyze medical terms for myself and come up with the definition of many terms on my own, without the assistance of a medically-trained person.

TAB IV—LEARNING FROM WORK EXPERIENCES

ROLES OF COMMUNITY SOCIAL WORK, HUMAN SERVICES, AND CHILD PROTECTIVE SERVICES PERSONNEL

One of the representatives essential to a successful Child Death Review Team is someone from the field of community social work, usually a Department of Human Services Representative and/or a Child Protective Services Field Worker. Attending the meetings with these people has taught me about the system they work within, the constraints they are under when having to substantiate an allegation of abuse, and the methods their department utilizes for intervention. I have learned about prevention services offered to parents and sometimes mandated for parents to have in their homes. These services are meant to help families to improve their skills and keep them from needing to have child abuse allegations reported about them in the future.

I have learned that providing in-home prevention services does not always stop the cycle of abuse, and custody issues come into play. Statistics I have learned about show that the higher the number of allegations and substantiations of child abuse made on the family, the less likely it is that in-home services will help the family to cope in healthy ways. Many social workers have taught me about the laws in Michigan, and I have found that whenever possible Michigan encourages kinship placements (a relative not living with the child's parents) and family reunification instead of foster care or adoption.

LAW ENFORCEMENT PROCEDURES AND PERSPECTIVES

Another essential component of the Child Death Review Team is the representative from the law enforcement agency who is involved in the case being reviewed. When a child dies from anything unexpected or suspicious, law enforcement is called in to do a death scene investigation, make a report on their findings, and work with the prosecuting attorney's office if there is suspicion of foul play and/or homicide. I have learned a great deal about the profession of law enforcement and what these officers have to deal with every day by hearing them talk about cases at meetings and having them relate their personal reactions to situations and people. They are under a great deal of pressure in situations involving death because they are the people who will normally have the burden of proof in a case. They need to document as much as possible to help both the prosecuting attorney and the medical examiner with determining the cause and manner of death. I have learned how police reports are designed and the proper way to read and interpret them. I have also learned more about the techniques used by law enforcement to collect forensic information and/or evidence from a death scene.

ASPECTS OF DEATH SCENE AND CRIME INVESTIGATION

I had a small amount of experience and knowledge about death scene investigation in Utah. After working in the Michigan program, I have gained substantially more knowledge about deaths investigations, and I have been able to apply that knowledge in my work. The death scene investigation process used in Michigan is much more extensive than that done in Utah, and Michigan has a required standardized death scene investigation protocol for such cases.

TAB IV— LEARNING FROM WORK EXPERIENCES

A quality, thorough, death scene investigation, performed either by law enforcement and/or the medical examiner investigator, is essential for the medical examiner to accurately make the final decision as to the manner and cause of death of the child. It is also very important for any prosecution that might take place surrounding the case. The evidence can be lost within minutes or hours after death, and it is essential to investigate the scene thoroughly as soon as possible after the death occurs while still having respect and compassion for the family that has just lost their loved one. I have learned about this issue from responders who have been at death scenes and have studied the issue in great detail. Conduct toward families while still doing a complete investigation is a topic that we, as Child Death Review Program staff at the state level, have had to discuss with a number of teams, and we have provided training on conduct during investigations.

INNER WORKING OF THE MEDICAL EXAMINER SYSTEM

Since the Medical Examiner of the county is one of the key players on a Child Death Review Team, I have learned a great deal about the impact of this system on the case, the community, the state, and even the nation.

Utah has one State Chief Medical Examiner with a number of Assistant Medical Examiners. Therefore, the ultimate decision as to cause and manner of death rests upon a single person, the Chief Medical Examiner. The Medical Examiner system in Michigan is very different. Michigan has a county-based Medical Examiner system. This means, because Michigan has 83 counties, there are around 83 Medical Examiners. This makes the ultimate cause and manner of death vary more around the state, and the data concerning can cause state-wide and manner of death reflects the subjectivity that can exist within this system, which can cause state-wide data to be skewed. I have learned how to tailor prevention initiatives for an area, regardless of what death certificate data might state. This is done by looking at the circumstances surrounding the death, presenting factual data, and focusing on the data itself as opposed to the death certificate information.

Forensic evidence can be gathered from an autopsy. For unexpected or suspicious deaths, a forensic pathologist is the best person to perform this autopsy. Although this is not always possible, all death scene investigation pictures and evidence needs be presented to the medical examiner before or at the time of the autopsy to ensure that the medical examiner has a complete and accurate picture of the true cause and manner of death of the child. I have learned what is encompassed in a quality death scene investigation and can effectively point out risk factors and major contributing factors and causes of death from death scene investigation narratives and photos.

SUICIDE PREVENTION

Many of the cases reviewed by Child Death Review Teams are those of youths who have committed suicide. At the State Child Death Review Office, each of us specializes in and conducts added research on a type of death. I am the suicide specialist in the office. During my time in this job, I have learned more about the risk and protective factors for suicide as well as other contributing factors. I have learned how to identify behaviors that are out of the norm and indicative of possible suicidality. By seeing trends among the completers of suicide, I have been

TAB IV — LEARNING FROM WORK EXPERIENCES

able to learn a lot about the mindset that youth are often in before they complete suicide. I have effectively identified patterns in precipitating events to suicide and aided in identifying effective and non-effective interventions and prevention strategies for suicide.

I have been on the Michigan Suicide Prevention Coalition since its inception in 2003. This process taught me more about strategic planning, how to do a logic model, and how to develop initiatives that can be used by communities in different areas of the state. This Coalition is a multidisciplinary team of agency and public representatives who developed the Suicide Prevention Plan for Michigan. This plan has been endorsed by the governor's office and presented at the state capitol by the Michigan Surgeon General. In developing the plan, we identified the goals and objectives needed to prevent suicide in Michigan and made a logic model for each of the goals of the plan.

DATA REPORT WRITING

The Michigan Child Death Review Program is mandated to write an annual report on all data collected from local Child Death Review Teams. The data collected from review teams is centered into a national web-based database, and information is drawn from the variables in this database.

I have been responsible for entering data into this database as well as helping the program statistician verify existing data and clean the data set for the given year. Once these tasks are completed, cross-tabs are run, and a multivariate analysis is made for all of the major causes of deaths to children under age 18 in Michigan. Each staff member is assigned a specific type of deaths to write about for the data report. Since coming on board as a staff member, I have been involved in the writing of three annual reports. In each of these reports, I have been in charge of writing the section on youth suicide. I have learned how to take the statistics given to me in raw form and to analyze them to determine the statistical significance and measures of associations between the variables. I have learned how to read data in narrative format and translate this into graphs and tables that display the relationship between the different types of information found. In writing data reports, I also learned how to best report to the public what is being done statewide in regard to public health initiatives and prevention activities.

RESEARCH AND SURVEILLANCE METHODS

At the end of my time at the Utah Department of Health and the beginning of my time at the Michigan Public Health Institute, I was able to be on a team of professionals from around the country who worked together through conference calls and e-mails to develop a new web-based data collection system for the Child Death Review Teams around the country. This furthered my knowledge of research and surveillance methods. I learned more about the different issues happening around the country and gained a better understanding of the cultural diversity in this country and how tailoring public health initiatives to these populations can make for effective change. In working with this new database, I was able to assist one of the national staff members in creating a National Violent Death Reporting System and the Centers for Disease Control and Prevention Death Scene Investigation Protocol.

TAB IV — LEARNING FROM WORK EXPERIENCES

DATABASES

I have had to increase my knowledge of computer systems and programs, especially database programs. I have worked with the basic features of different types of software and the common uses for each type of software that is available. The majority of the work that I have done has been in the program Microsoft Access. However, I have also had experience with the program SPSS as well as the program SAS. This was limited experience, but I was able to learn the difference in each program as well as the advantages to using each program for different needs.

I have learned how to create and update a basic database and gained skills using the different functions of databases. The main thing that I have learned about databases that has been helpful is the use of queries to organize and retrieve the information needed.

Because accuracy is necessary in all program work that we do, I have come to understand the need for verifying data and checking the data heard by others when cleaning the data, I make sure all information is present and accounted for as well as correct.

PLANNING, ORGANIZATION, AND PROBLEM SOLVING

Since beginning my work with the Child Death Review Program in Michigan, I have learned a great deal about planning daily schedules as well as planning small and large group trainings. The Child Death Review Program provides annual training for all of its team members. More details about the topics of these trainings can be found in the training section of this manual. I am the primary person responsible for planning and executing the majority of the training. This has helped me to acquire skills in organization, interpersonal communication, event planning, agenda setting, and priority setting.

In addition to the yearly team member training, I also have been responsible for planning of the regional Child Death Review Teams coordinator's trainings. Approximately four to five trainings are conducted for coordinators yearly. I have learned how to gear presentations and materials toward different groups. I have also learned effective techniques for training professionals in coalition building and prevention initiatives planning. Site arrangements and other meeting details have been other responsibilities that I have had to learn about and master.

Organization is another skill that I have enhanced since becoming an employee of the Michigan Public Health Institute. I have learned how to better organize my schedule to fit in the appointments and meetings needed to fill my job requirements. I have also learned how to organize information in a manner that makes it easier for others to access. To help with this, I developed a new team member training handbook as well as a new coordinator handbook.

DESKTOP PUBLISHING AND THE USE OF COMPUTER GRAPHICS

My knowledge of desktop publishing and use of computer graphics has grown in this job. On a number of occasions, I have had to put together fliers, fact sheets, and other informational materials. I have put together program pamphlets and descriptions. I have learned the differences and similarities between the various programs used to edit computer graphics, and I

TAB IV — LEARNING FROM WORK EXPERIENCES

have had to learn the differences among image formats in order to attain the best type of image for the projects I have worked on. The difference between computer graphics programs and desktop publishing programs is another area of knowledge I have acquired over the past two years. Once computer graphics are edited in the computer graphics programs, desktop publishing programs are used to compile the various documents. I have used both for developing training materials as well as handbooks and other public documents.

A. 4. A) HAS YOUR PERFORMANCE OF THESE TASKS BEEN RECOGNIZED BY OTHERS? PLEASE SPECIFY.

B) ON-JOB-TRAINING APPLIED.

While I have not yet received any special recognition, my performance evaluation indicates “excellent” work. I have also participated in several training type sessions in this position.

CURRENT ACTIVITIES AND POLICIES OF COMMUNITY AND PRIVATE AGENCIES

The yearly CDR Team Member Training that our office sponsors always teaches me more about the systems within the government and private sector and keeps my knowledge of the laws, policies, activities and current developments in these areas up-to-date. Each year, the focus of the training remains the same, but an emphasis is put more on one overarching topic annually. This teaches me new things each year.

The training this year taught me much more about forensic evidence collection and death scene re-creation techniques. I have been able to use this new knowledge daily in my work as I help communities to ensure that a complete and thorough investigation is done on each case. This gives us good information for our database and drives additional community prevention programs.

I learned about what is happening around the state of Michigan in different areas, such as suicide prevention, which has taught me new ways of approaching prevention efforts.

CHILDREN AND THE SOCIAL WELFARE SYSTEM

The conference “Children’s Mental Health and the Child Welfare System” was an extremely eye-opening experience and taught me a great deal about the issues faced by not only the children who are in the child welfare system but the social workers and families of the children as well. By seeing a mental health piece focused on the custodial placement of children, I learned a great deal about the effects that can result from these incidents in the lives of the children and their families. Not only are their lives affected at the time of removal/intervention but the lives of all involved can be profoundly affected for years to come, and many times for their entire lives. This knowledge has helped me to understand the need of effective collaboration between mental health experts and the social welfare system in ensuring that the least traumatic actions are taken. Training helps make this a smoother transition.

TAB IV — LEARNING FROM WORK EXPERIENCES

Supporting Documentation included with portfolio:

- 1) Letter from MPHI verifying date of employment and position**
- 2) Letter from supervisor verifying job responsibilities**
- 3) Performance evaluation (12/2007) (only one available to date)**

TAB IV - LEARNING FROM WORK EXPERIENCES

Your self-assessment statement is the most important part of the portfolio. It is your personal demonstration of what you have learned through work experience (including self-employment).

WORK EXPERIENCE ID

IV-2

<p>Dates of Employment (month, year, e.g., 10/94) From: 01/01/2003 To: 1/10/07</p> <p>Full Time: <input checked="" type="checkbox"/></p> <p>Part Time: <input type="checkbox"/> # of hours/week: <input style="width: 50px; text-align: center;" type="text" value="40"/></p>	<p>Exact Title of Position, Rank of Salary</p> <p>Program Secretary and Child Death Review Specialist Lowest Range of Salary for Dept</p>
<p>Name and Title of Immediate Supervisor Tina Kellan Program Manager Violence & Injury Prevention Program</p>	<p>Name of Employer (firm, organization, etc.) and Address Including Zip Code</p> <p>State of Utah, Utah Department of Health Foster Building 212 Main Ave Salt Lake City, UT 84116</p>

A. Self-Assessment: Discuss fully the nature of the work experience and what you learned from it. A weak self-assessment will *not* support a grant of credit; graduate portfolios must show advanced graduate level learning. Write your responses to each of the following directly on this form.

1. Identify and give a full description of the responsibilities you had while in this position. Your description should relate to your official job description.
2. Identify and fully discuss the **NEW** skills, concepts, principles, and/or ideas you learned. Be sure to include examples to show how you applied your learning. (Consider learning of technical, interpersonal, or organizational skills.) Your discussion should relate to the responsibilities you described for Question 1.
3. Identify and fully discuss skills, concepts, principles, and/or ideas that you **IMPROVED** while in this particular position. Be sure to include examples to show how you applied your learning. (Consider learning of technical, interpersonal, or organizational skills.) Your discussion should relate to the responsibilities you described in Question 1.
4. Identify and briefly discuss: a) Any recognition you received while in this position; b) Any on-the-job training that you applied to this position. (If you are also submitting any of these trainings for credit as V-Tabs in this portfolio, identify the numbers of each.)

B. The supporting documentation from the employer regarding a work experience must¹ include:

1. Job description(s);
2. Verification of employment dates;
3. Letters from superiors;
4. Annual performance evaluations;
5. Any other relevant data.

¹ If specific documentation is not included, an explanation for its absence must be provided on the portfolio checklist.

TAB IV - LEARNING FROM WORK EXPERIENCES

A. 1. DESCRIPTION OF RESPONSIBILITIES INVOLVED IN THIS POSITION:

As Child Death Review Specialist, I had the responsibility for handling all of the activities related to child fatalities and the review team. I received death certificates monthly and organized them into a filing system. In the process, I made sure that information gathered from Child Protective Services; any Law Enforcement Agencies involved at the time of death; medical histories; hospital reports; medical examiner reports; and any other information was compiled for each individual case.

I then helped to create a new database and a new data collection form to collect the information for each case. When all of this was finished, I entered each case into the database, worked with the program epidemiologist to clean and analyze the data entered, and put this data into a data report to be distributed to collaborating agencies and the public.

I was also in charge of coordinating the meetings that took place to review each death. All deaths due to sudden or unexpected causes were reviewed biweekly at the medical examiner's office with a rapid response team, and all other deaths were reviewed monthly with a smaller team. I put together the agenda for each meeting, ensured all pertinent case information was present, took notes from the meetings, filled out the data forms for each case while at the meetings, and did any necessary follow-up needed after the meetings.

It is important to note that, although I did the duties listed above along with my job as program secretary, I did not receive a position change or upgrade for my work for the Child Death Review Committee (CFRC). This was mainly due to political issues, including the fact that I did not have a degree but was doing a job that Human Resources required a degree for. After doing the work for more than three years, the upgrade was finally going to be pushed through, and all of the paperwork was prepared and ready for the necessary signatures and approvals. This paperwork is attached as documentation. However, I received an offer for (and accepted) the position I currently hold at the Michigan Public Health Institute, and the position upgrade never occurred.

A. 2. DETAILED EXPLANATION OF NEW SKILLS AND KNOWLEDGE WHICH EVOLVED FROM THE EXPERIENCE:

COMMUNITY/PUBLIC HEALTH-RELATED ISSUES

Through working with the Child Death Review Committee (CFRC), I learned how much community and public health practices affect the lives and even the deaths of children. Many times, children die because of conditions that could have been prevented through effective public health measures or social service intervention. These initiatives could have included preventive measures for: psychological problems, exposure to poor environmental health conditions (such as filthiness of the home), and the improper supervision or neglect of children.

In coming to understand the factors related to community/public health, I learned about many of the techniques that can be used to improve children's situations and make their quality of life better. Depending on the condition that needs to be prevented, and after conducting a needs

TAB IV - LEARNING FROM WORK EXPERIENCES

assessment for the target population or area, a variety of initiatives can be used, including community education forums and trainings, printed material distribution that makes resource information available, and collaboration among existing coalitions and other organizations equipped to address the needs.

As the Child Death Review Specialist, I would at times need to act as information fiduciary for professionals, colleagues, and the general public when questions would arise regarding child deaths and their causes. This required me to learn how to best compile resources and resource information and how to assess the types and sources of information. I learned to use computers in retrieving this type of information and data. I still use these skills. The government has made information-sharing easier through online retrieval methods, and I learned how to use most of the methods in existence. The system that I used the most was the Centers for Disease Control and Prevention's Injury and Death Data Query System (WISQARS).

Another aspect of community health that I learned a great deal about was how information is coded in regard to both injury and death data. I learned where to find the definitions of these codes, and I learned to use the coded data to write data communications and reports as well as to analyze the specific causes of death for individual cases in greater depth.

CULTURAL DIVERSITY

I learned a great deal about cultural diversity. Most of the cultural diversity that I encountered had to do with either socioeconomic status or ethnicity. Previous to this, I had never worked with a population other than that of a white/Caucasian nature. While the African American population in Utah was small, they did enter the picture in a few instances. We served numbers of Hispanics who had immigrated to Utah from Mexico. This experience taught me how the difference in world views can change the difference in the behaviors and parenting styles of those individuals.

While in this position, I learned that the psychological makeup of a child as well as that of the parent is affected by life experiences, values, and belief systems. Knowledge of these differences had to be taken into consideration when examining cases of children who died at the hands of those from other cultures. What one person may see as therapeutic could be seen as abuse in the eyes of another person who does not understand the initial intent.

Socioeconomic status could be a risk factor in some cases as well. Stress and poor living conditions contribute to a number of physical and psychological health issues. Unfortunately many times we learned about cultural differences when child abuse and neglect, substandard supervision issues, youth suicide, and youth homicide cases crossed our desks.

CRIMINAL JUSTICE SYSTEM AND DEATH SCENE INVESTIGATION

A successful child death review team must include law enforcement and the Attorney General's office. These agencies help to gather information about the legal outcomes of a case. If the team felt that further investigation was needed, or that prosecution needed to occur, or if a child was still living in the home of the deceased child, these agencies would intervene.

TAB IV - LEARNING FROM WORK EXPERIENCES

I learned about the laws surrounding child endangerment and child abuse and neglect. In cases when a child died from a motor vehicle crash, I learned the liability of the drivers involved. This taught me the amount of responsibility that people take upon themselves when they get behind the wheel of a car. Many of these things are not generally known to the public, mainly because there are no initiatives in the community to spread the word about such issues. One of the things that the Child Death Review Committee did was to get the media involved in various initiatives, which helped the media understand the need for responsible and accurate reporting. It also encouraged news media to report on prevention measures that could be taken to help prevent future incidents from occurring.

The criminal and juvenile justice systems came into play when examining the circumstances surrounding the death of a child and when finding out more about the risk factors involved in the life of the child before the death occurred. I learned the processes that occur once charges have been filed against someone for committing a crime and how the type of crime affects the way the case is handled from case filing to trial and, if necessary, to conviction. The adult criminal justice system came into play when a child died because of the omission or commission of actions by a competent adult. In a number of cases, either law enforcement or the FBI enlisted the help of the Child Death Review Committee because of the committee members' expertise. During these reviews, I learned more about the restraints the legal system is under when it comes to the burden of proof and what it takes to prove someone is guilty of a crime. I also learned the way that expert witnesses could affect the outcome of the proceedings.

The juvenile justice system became especially important in cases where a child died at the hand of another child, and when a child who had died had a history in the justice system prior to death. I learned that involvement in the juvenile justice system was a risk factor for many deaths, particularly for suicides and homicides.

SOCIAL WORK

I also worked one-on-one with the Child Protective Services (CPS) Supervisor who reported on the CPS history of each child who had died in the state. If there was a child who had a number of referrals for possible abuse in the CPS system, the child's case was flagged to be looked at for other risk factors at a later time. I learned from the protective services history review how the number of substantiations in the system could often correspond to later events that eventually led to the death of the child.

Child abuse and neglect could potentially be perpetuated with the siblings of the decedent. A CPS could identify and help children who may have otherwise fallen through the cracks of the system at the time of their sibling's death. If there were any children still in the home who were at-risk, I learned that the review process could help keep the remaining live children in safe living situations, whether that is through placement into a different home or securing prevention services for the current home. While working with the CPS Supervisor, she taught me what it takes, legally and otherwise, for a social worker to be able to substantiate a complaint sent into CPS as a referral. I also learned how to complete the paperwork for referrals and what documentation and evidence is necessary for substantiation.

TAB IV - LEARNING FROM WORK EXPERIENCES

CHILD ABUSE AND NEGLECT

While working in this position, I was able to work with the community of physicians in Salt Lake City, UT who specialize in the field of child abuse and neglect detection and protection. The presence of the physicians on the CFRC taught me a great deal about the forensic medical evidence present in most child abuse cases. They taught me about the “signs and symptoms” present in the different types of abuse cases, such as physical and sexual abuse. They also taught me the classic physical evidence seen in cases of Shaken Baby Syndrome and abusive head trauma.

I learned about what happens once a child is injured or becomes ill and the ways that the Child Protection Team of a hospital can get involved with the social work system of a state and/or area when these cases present at the hospital. Medical personnel are mandated reporters of suspected child abuse and neglect, making them key players in the protection of children who are being abused.

SUICIDE PREVENTION

In working with child deaths, the CFRC saw many cases of youth suicide. This was a concern to the team members, so they formed a Youth Suicide Prevention Task Force. This group of professionals had started to formulate a state suicide prevention plan before I began my position at the Utah Department of Health. Once I began working with the Violence and Injury Prevention Program (VIPP), I was also able to work with the Utah Suicide Prevention Task Force to complete the Utah Youth Suicide Prevention Plan.

This task force looked at the risk factors and protective factors associated with youth suicide, assessed the problems facing the youth in Utah today, and formulated a plan to increase healthy ways of coping with the pressures of everyday life before it was too late. Through the meetings of the Task Force and my own research, I learned a great deal about all of the issues surrounding youth suicides and the factors behind them. I learned much more about the psychology of children and adolescents. Although there were more adolescents over age 10 that committed suicide, there were a number of children aged 10 years and under who had also taken their lives by suicide. I learned about the circumstances that affected these differences in age groups, particularly the role of caregivers in child suicides.

As a Task Force, we examined the means these children used to complete suicide (hanging, gunshot wounds, etc.) to discover areas needing further investigation for prevention activities. These areas included safe storage of firearms such as gun safes and cabinets as well as trigger locks. Another area identified in which to implement prevention strategies was getting youth and children to services such as mental health counseling in the early stages of the circumstances that can lead to suicide. This meant that we had to learn the early warning signs of suicidality as well as the precipitating factors already identified in previously completed suicides. Because the CFRC worked closely with the Suicide Prevention Task Force, I was able to see how effectively our research methods and data collection could lead to prevention initiative planning and implementation.

TAB IV - LEARNING FROM WORK EXPERIENCES

MEDICAL TERMINOLOGY AND CONDITION IDENTIFICATION

In working with the CFRC program, I handled the death certificate of every child aged 18 years and under. Monthly, I met with a smaller preliminary review team to discuss these death certificates. This death certificate review was done so that no child death would slip through the cracks. If there was anything that raised a red flag as being suspicious in the death, the case would be brought to the larger committee for review.

The smaller team included a physician from the state's largest children's medical center, an obstetrician/gynecologist, the supervisor of the state's CPS system, and ad hoc members as needed on a case-by-case basis. We met to discuss cause and manner of death as seen on the death certificate as well as to compare clinical notes of any child who had a history of significant medical problems. In going through this process monthly, my knowledge of medical terminology expanded greatly, and I was able to understand the terms used for everyday illnesses, conditions, congenital anomalies, and causes of death. These professionals taught me about the terms they used as we went along in the process of the review.

The obstetrician/gynecologist on the team was there to help us better understand the deaths of infants still in the prenatal stage of development. Because the deaths of these infants were highly specialized, I was able to learn a number of medical terms that helped me to understand and communicate better about the deaths of infants.

The doctors on this small team taught me about the different parts of the words being used to diagnose the condition, and I could soon figure out the meaning of the condition's terminology on my own by deconstructing the words and combining the meanings of each part of the word. This included both terms used to define natural conditions as well as conditions resulting from injuries.

DATABASE CREATION, PRINCIPLES, AND USAGE

At the time I was involved with the CFRC, changes needed to be made to the way data from the case reviews was collected, stored, and shared with other programs that were collecting similar data. I had the opportunity to participate in the creation of a new database and new data collection tools to be used in conjunction with a couple of other programs.

A small team of staff members, including me, the program manager, and a program epidemiologist, met and discussed what was needed in the new database. I then compiled the desired data that needed to be collected at each case review. In doing this, I reviewed a number of data forms from other states and learned the best practices used in collecting data. I learned how to most effectively set up a data form to get the data needed for the database as well as making the form user-friendly for the person filling it out during the case review.

Once the data form was developed and the new database was built using Microsoft Access, these new tools were used to enter the previous three years' worth of data collected at review meetings. This information came mainly from notes originally in narrative format. Once the data entry was complete, I learned how to do data queries in the Access database, allowing me to find simple statistics in a short amount of time. I learned to translate the narrative to the information needed

TAB IV - LEARNING FROM WORK EXPERIENCES

on the forms and then to enter the information into the database. The final data was compiled and cleaned by the program epidemiologist, and I was ready to compile another written data report.

Around that time, I received a job offer in Michigan, and I terminated my employment with UDOH to work with the Michigan Child Death Review Team. However, before this happened, I also got another learning opportunity in the area of database components and management. The National MCH Center for Child Death Review, housed in Michigan where I would later work, began the process of developing a national reporting tool to be used to enter data into a national web-based reporting system. The database for that system was also to be housed in Michigan.

I became a member of the national team that met via weekly conference call to formulate the data elements and variables that were to be included on the new data tool. This experience taught me more about the cultural diversity of that affects different parts of the country. It also taught me about the many problems that remain the same on a national level, and that many experiences are being shared by people in other places. I learned that although the prevalence of types of incidents and deaths can vary somewhat depending on the state and region of the country, the overall problems being faced in the area of mortality and morbidity around the country are very similar in nature.

DESKTOP PUBLISHING

Quarterly, we had a large group meeting of the CFRC advocacy members from many disciplines around the state. This larger group got together to discuss trends happening in the state. When it came to child death and other specific factors that had been prominent at the time in affecting the lives of Utah children, I would prepare fact sheets, including trend and data analysis before the meetings. Using this information, I learned how to prepare PowerPoint presentations as well as to compile data fact sheets to present to team members.

These products were used to discuss recommendations for implementing prevention efforts throughout the state by different agencies. Because the subjects were very solemn and audience attention was necessary in order to spur energy for community action, the presentations and fact sheets had to be visually appealing to make the points stand out. They also needed to include accurate and precise information. I learned how to accomplish this from a number of other bureau co-workers who had a lot of experience with desktop publications. They demonstrated the techniques they used in their own presentations and publications, and I learned how to apply the principles they used in my own products.

REPORT AND TECHNICAL WRITING

Through compiling the 1996 to 1999 Child Death Review Committee Data Report as well as the fact sheets discussed above, I had to learn a number of different skills about best practices in the format and content of data publications, depending on the type of publication as well as the target audience. I also learned how to use different types of software to properly format each type of document and which software was best to get the desired end product. In order to accomplish my goals for the report I was working on, I had to learn the most effective use of space and layout of a page so that I would convey the desired messages to the audience.

TAB IV - LEARNING FROM WORK EXPERIENCES

Through the entire process, I learned the difference between publishing a product for the general public as opposed to publishing a product for a professional audience. Different techniques and language needed to be used with each type of audience and the report and/or fact sheets needed to have the type of appeal that would best fit the audience.

In reporting the data collected from case reviews, I learned the importance of the use of graphs and tables in demonstrating data and to use narrative writing in a report. Effective use of spreadsheets in Microsoft Excel made this task much easier and allowed me to learn the best ways to add variety and style to a report without needing to use graphic pictures or elaborate designs to draw attention to the important information in the report.

A. 3. EXPLANATION OF IMPROVEMENT IN KNOWLEDGE AND SKILLS WHILE IN THIS POSITION:

MENTAL HEALTH

In examining types of death, I learned about the psychological issues surrounding different deaths. The psychological issues had to do with the decedents, their supervisor, their parents and/or others involved in the incident. Acts of homicide showed different types of mental disorders and psychopathology, which I did not fully understand before doing this job. Studying more about the psychological and circumstantial factors surrounding suicides taught me more of what was going through the head of a teenager before he or she contemplated suicide or any other risk-taking/violent act. While teenagers would complete suicide at what seemed completely unexpected times or means there was not one case in which there was not at least one risk factor present. I learned about these things as well as to what triggers someone to “spontaneously” commit suicide. Through a retrospective look at data, it is easier to see where the mental health of the youth first came to be “at risk.”

I learned about the grief process that each parent goes through with the loss of a child. I also learned how important it is to make sure families receive services such as bereavement counseling and regular visits from a public health nurse to check how everything is going with the family or if further services are needed. Providing these services and others to these families soon after the death of their child will, in many cases, help them cope with their loss and prevent further mental trauma for each member of the family.

Looking at the psychology and mental health of the adults caring for and in the life of the child who had died told a lot about the story in question. Seeing the general mental health of those involved in the everyday life of the decedent showed the influences on child’s own mental health. Many times, this would introduce even more risk factors and in some cases explain why the death occurred.

RESEARCH METHODS

Although I had done very basic research while in high school and college, I had little knowledge of the application of the principles I had learned about until I came in contact with a study being done by members of the VIPP. This study began with collecting narrative data by conducting

TAB IV - LEARNING FROM WORK EXPERIENCES

psychological autopsies on each of the youth who had completed suicide between the years of 1995 and 1999. I became involved with the process shortly after this phase of the study was complete.

The research methods used in the youth suicide prevention study showed me how the basic research terminology I have learned in the past could be applied to actual situations. This study involved the juvenile justice population. As adolescents who met the criteria came through the system, I learned some of the processes of the system, such as intake and court proceedings, which allowed our program to step in and do some mental health screening that could allow the youth to become part of the study. The control group and the group receiving the intervention services were given incentives to ensure that the participants continued to stay with the study and to complete the year that it took to meet the requirements of the study.

I learned evaluation measures such as pre-and post-testing, psychological testing, and other types of evaluation and how these results are used to measure the progress of those in the study, comparing those in the control group with those in the target population group. In this way, those doing the research were able to see whether services were effective or not effective and to identify whether the changes that were made in those receiving the services were statistically significant compared to those in the control group. By working with the senior epidemiologist of the program, I was able to see firsthand how analysis of the data and the results were used for doing needs assessments and for changing the program according to those needs. The epidemiologist included me when she did many of the analyses of the data and taught me specific things about the computer programs that are best to use when doing certain types of analyses. These programs included SPSS, Microsoft Access, and SAS.

LEADERSHIP SKILLS

I was called upon to chair the Child Death Review Committee team meetings on a number of occasions and was co-leader of the meetings when I was not chair. This experience taught me skills in small group communication and how to tailor meetings to focus on the cases being presented. I was able to understand the difference between leading a group and talking to a group. I also learned effective leadership skills outside of the meetings by doing effective meeting preparation through putting together agendas and meeting requests well in advance.

PLANNING, ORGANIZATION, AND PROBLEM SOLVING

I was the only person at the state-level who was responsible for the main functions and coordination of the Child Death Review Committee. This taught me how to be effective at organization and efficient with my time. I needed to ensure that each case had all of the necessary information required and that it was collected and stored in a secure place to ensure confidentiality of information, while still having the information readily accessible for when it was needed.

The planning of meetings also required a great deal of organization because the agenda of cases and the follow-up on each case had to be tracked carefully to ensure that each review was completed and each case could close at the proper time. Sometimes this would take a great deal of problem-solving because certain agencies were not willing to cooperate with the health

TAB IV - LEARNING FROM WORK EXPERIENCES

department, the CFRC, or anyone else outside their own agency. At times, creative planning and coordination with various networks and other outside contacts was necessary to accomplish the goals that needed to be met for each case.

A. 4. A) HAS YOUR PERFORMANCE OF THESE TASKS BEEN RECOGNIZED BY OTHERS? PLEASE SPECIFY.

B) ON-JOB-TRAINING APPLIED

I received a certificate of award for my help with the annual Summit. I also attended several on-the-job trainings.

EVALUATION OF RECOMMENDATIONS AND INITIATIVES

I gained valuable knowledge through attending the Injury Prevention Summit each year with the local health departments and especially during the I.P. Summit held on November 5-6, 2002. At this Summit, a national leader in developing recommendations and initiatives from evaluation presented for a full day. I was able to take the principles learned about proper evaluation methods and different strategies used to evaluate initiatives in public health and apply them directly to the work I was doing in the area of child death. I have since used this information a great deal in my new job in Michigan with the Child Death Review Teams. Using the proper evaluation techniques ensures efficacy of the program and can assist in proving whether or not an activity is a best or promising practice. Without the evaluation piece, this is not possible.

MEDICAL TERMINOLOGY AND CODING

The informal training I received in medical terminology was immediately applied on the job in working with child deaths. It was essential to understand what many of the causes of death meant and how to best word and categorize the types of death for reporting purposes.

Learning how to look up, read, and understand cause of death coding (i.e. ICD-9 or ICD-10 Coding) and type and cause of injury coding (i.e. E-Coding) proved beneficial in many instances. I used it to help write the data report and to ensure proper categorization of each death. I also used it at times to help me better understand the mechanism as well as cause of death, and the steps that occurred in the process of investigation, as reported to vital records through the death certificate.

Supporting documentation included with this portfolio:

- 1) Letter from Utah Department of Health, Human Resources Department verifying dates of employment, termination, and job description**
- 2) Letter from supervisor indicating responsibilities of my position**
- 3) Performance evaluation (one from 2006. This was the only one that I could find.)**
- 4) Certificate of award: Injury Prevention Summit.**

TAB V — LEARNING FROM TRAINING EXPERIENCE

Your self-assessment statement is the most important part of the portfolio. It is your personal demonstration of what you have learned through work experience (including self-employment).

TRAINING EXPERIENCE ID

V-1

Title of Session	Sponsor ¹	Dates		In Class Clock Hours
		From:	To:	
Real Choices – Mental Health Access and Transition Training for Parents of Children with Severe Emotional Disorders	Association of Children’s Mental Health (ACMH)	05/31/07	06/02/07	24

A. Discuss fully the nature of the training experience and what you learned from it. A weak self-assessment will *not* support a grant of credit; graduate portfolios must show advanced graduate level learning. Write your responses to each of the following directly on this form.

1. An explanation of why you took the training experience.
2. A full description of what you learned from the training experience, including underlying principles, concepts, and competencies.
3. An explanation of how and where you have applied the learning in your professional or personal life.

B. The supporting documentation regarding a course or workshop or seminar must** include:

1. An outline, syllabus, or description of the training provided by the instructor(s) to the participants;
2. Identification of each instructor along with her/his credentials or qualifications;
3. Verification of the requirements for admission to the course (e.g., high school diploma, associate degree, other training experiences, or employment status);
4. Verification of the number of classroom hours
5. Verification of the type and time of preparation outside the classroom;
6. Verification of the method of testing or evaluation of the students;
7. Verification of the grade or evaluation received;
8. Verification of course completion (e.g., a signed certificate).

¹ Please include the name of the institution or organization actually providing the instruction/certification for the course, even though your employer or particular organization may have “sponsored” you by providing payment or facilities for instructions.

** If specific documentation is not included, an explanation for its absence must be provided on the portfolio checklist.

A. 1. EXPLANATION OF WHY YOU TOOK THE TRAINING EXPERIENCE:

I assist with these trainings as part of the volunteer work I do with the Association for Children's Mental Health (ACMH). Although I am part of the group that is putting on the trainings, I have also participated in the trainings to get more familiar with ACMH, the issues, and the systems they work with.

A. 2. FULL DESCRIPTION OF WHAT YOU LEARNED FROM THE TRAINING EXPERIENCE:

MENTAL HEALTH AND THE EDUCATIONAL SYSTEM

Through helping with the Association for Children's Mental Health trainings, Real Choices, I have learned much more about the application of the things I have learned in the area of sociology, social work, and psychological health. I have learned about many of the issues surrounding the lives and educations of children that have been classified as having severe emotional disability (SED) or developmental disability (DD). To be classified as having a severe emotional disability, a child must have at least a therapeutic diagnosis from the Diagnostic and Statistical Manual of Mental Disorders (DSM). These children and youths go through an individualized educational plan (IEP) each year to determine the future of their educational goals as well as their goals upon completing high school.

Through this training, parents are taught the basics of transition planning or, in other words, the plan made through the IEP to help their child transition from the child mental health system to the adult mental system. I have learned about the laws and legislation existing in Michigan protecting these individuals. These laws mandate transition planning within the IEP beginning at age 16.

ACCESS TO MENTAL HEALTH CARE

I have learned a great deal when it comes to access to care through the mental system of Michigan. Vocational rehabilitation and other programs also exist to help the disabled; whether it be physically, mentally, or emotionally. This is one facet of mental health systems that I had never learned about before. The systems set up within the government are there to help those in need of assistance financially as well as to provide systems of care for individuals with disabilities. There are many avenues that can be taken to ensure these individuals receive the care they need.

There is a major difference between the adult mental health system and the child mental system in Michigan. The adult mental system, I have learned, is driven on more of a crisis-basis and the person must advocate for themselves to receive the services they need. The child mental health care system is set up to have a plan and a number of individuals following the identified child to ensure proper care of the child from an early age.

PRINCIPLES AND PRACTICES OF PSYCHOLOGY

I have learned more about how to apply the principles I already know about psychology and social work to children and adolescents. The things I have learned prior to this experience have been put to the test and I have been able to have this knowledge become a working knowledge and apply it to everyday situations and individual lives. This training has shown me how these

TAB V — LEARNING FROM TRAINING EXPERIENCE

principles and theories work in the lives of children and adolescents. Through observation of parents and professionals working together, I have been able to learn how the application of the knowledge learned in classes about principles and practices can benefit those involved.

A. 3. EXPLANATION OF HOW AND WHERE YOU APPLIED THE LEARNING:

I have been able to use the knowledge I have gained from these trainings to assist me in doing my volunteer work with ACMH, to add another perspective to the table when deaths are reviewed at the Child Death Review meetings I attend for my job, and have also used the knowledge to enrich my understanding of the various subjects that arise in my personal study of psychology, social work, and sociological issues.

B. 1. OUTLINE, SYLLABUS, OR DESCRIPTION OF TRAINING PROVIDED BY THE INSTRUCTOR(S) TO THE PARTICIPANTS:

Please see attached flyer.

B. 2. IDENTIFICATION OF EACH INSTRUCTOR WITH HER/HIS CREDENTIALS OR QUALIFICATIONS:

Please see attached agenda and staff list.

B. 3. VERIFICATION OF THE REQUIREMENTS FOR ADMISSION TO THE COURSE:

No Requirements for admission.

B. 4. VERIFICATION OF THE NUMBER OF CLASSROOM HOURS:

Please see attached agenda.

B. 5. VERIFICATION OF THE TYPE AND TIME OF PREPARATION OUTSIDE THE CLASSROOM:

Please see attached letter from Andrea Watts, Executive Director, ACMH.

B. 6. VERIFICATION OF THE METHOD OF TESTING OR EVALUATION OF THE STUDENTS:

No testing done of the students.

B. 7. VERIFICATION OF THE GRADE OR EVALUATION RECEIVED:

No grading process is in place for this training.

B. 8. VERIFICATION OF COURSE COMPLETION:

Please see attached letter from Andrea Watts, Executive Director, ACMH and certificate.

TAB V — LEARNING FROM TRAINING EXPERIENCE

Your self-assessment statement is the most important part of the portfolio. It is your personal demonstration of what you have learned through work experience (including self-employment).

TRAINING EXPERIENCE ID

V-2

Title of Session	Sponsor ¹	Dates		In Class Clock Hours
		From:	To:	
Michigan Child Death Review Team Member Training	Michigan Child Death Review Program	08/3/07	08/5/07	24

A. Discuss fully the nature of the training experience and what you learned from it. A weak self-assessment will *not* support a grant of credit; graduate portfolios must show advanced graduate level learning. Write your responses to each of the following directly on this form.

1. An explanation of why you took the training experience.
2. A full description of what you learned from the training experience, including underlying principles, concepts, and competencies.
3. An explanation of how and where you have applied the learning in your professional or personal life.

B. The supporting documentation regarding a course or workshop or seminar must** include:

1. An outline, syllabus, or description of the training provided by the instructor(s) to the participants;
2. Identification of each instructor along with her/his credentials or qualifications;
3. Verification of the requirements for admission to the course (e.g., high school diploma, associate degree, other training experiences, or employment status);
4. Verification of the number of classroom hours
5. Verification of the type and time of preparation outside the classroom;
6. Verification of the method of testing or evaluation of the students;
7. Verification of the grade or evaluation received;
8. Verification of course completion (e.g., a signed certificate).

¹ Please include the name of the institution or organization actually providing the instruction/certification for the course, even though your employer or particular organization may have "sponsored" you by providing payment or facilities for instructions.

** If specific documentation is not included, an explanation for its absence must be provided on the portfolio checklist.

TAB V — LEARNING FROM TRAINING EXPERIENCE

A. 1. EXPLANATION OF WHY YOU TOOK THE TRAINING EXPERIENCE:

The Michigan Child Death Review Program, which is the program with which I am employed, sponsors this training annually for team members around the state as well as team coordinator and staff member professional enrichment. I am in charge of putting most of the details of the training together and assisting in the execution of the training each year.

A. 2. FULL DESCRIPTION OF WHAT YOU LEARNED FROM THE TRAINING EXPERIENCE:

DEATH SCENE RE-CREATION

At this year's Child Death Review Team Member Training, I learned more about the importance of death scene re-creation as a component of a child death scene investigation. This re-creation can give investigators valuable information and can sometimes be essential to getting accurate memories from the people involved in the incidence.

Using a death scene re-creation doll, investigators ask the people involved in incidence to set up the scene exactly the way it was at the time the incident occurred. They then asked the person finding the child unresponsive to position the death scene re-creation doll in the exact way the child was found. Pictures are taken and the information is given to law-enforcement as well as the medical examiner to aide in determining cause and manner of death, especially in infant sleep-related deaths.

SUICIDE PREVENTION

At this training I also learned new things happening around the state in the area of suicide prevention. Once the State Suicide Prevention Plan had been written, counties and teams took the plan and made local plans of their own, tailoring the goals and objectives to their individual areas. Activities were reported on at this training and research was presented. This taught me more about ways that are being used to prevent youth suicides around the State of Michigan and across the country.

A. 3. EXPLANATION OF HOW AND WHERE YOU APPLIED THE LEARNING:

The things I learned at this training could be immediately applied to my job both in the office and out of the office at local Child Death Review meetings.

B. 1. OUTLINE, SYLLABUS, OR DESCRIPTION OF TRAINING PROVIDED BY THE INSTRUCTOR(S) TO THE PARTICIPANTS:

See attached registration brochure.

B. 2. IDENTIFICATION OF EACH INSTRUCTOR WITH HER/HIS CREDENTIALS OR QUALIFICATIONS:

See attached speaker introductions sheet.

TAB V — LEARNING FROM TRAINING EXPERIENCE

B. 3. VERIFICATION OF THE REQUIREMENTS FOR ADMISSION TO THE COURSE:

See attached registration brochure.

B. 4. VERIFICATION OF THE NUMBER OF CLASSROOM HOURS:

See attached training agenda.

B. 5. VERIFICATION OF THE TYPE AND TIME OF PREPARATION OUTSIDE THE CLASSROOM:

Although I am in charge of coordinating many of the details of the training, including speakers and presentations, there is no actual "out-of-class" preparation specifically for the training.

B. 6. VERIFICATION OF THE METHOD OF TESTING OR EVALUATION OF THE STUDENTS:

No testing or evaluation is done of the students attending this training.

B. 7. VERIFICATION OF THE GRADE OR EVALUATION RECEIVED:

No grade or evaluation is given for the participants of this training.

B. 8. VERIFICATION OF COURSE COMPLETION:

See attached certificate of completion.

TAB VI — OTHER PRIOR LEARNING

Your self-assessment statement is the most important part of your portfolio. It is your personal demonstration of what you have learned through other college level experiences outside of normal job and training activities.

LIFE EXPERIENCE ID

VI-1

Activity	Dates of Activity (month, year)	
Vocal Instruction & Continued Development	From: July 2006	To: Present
Organization (if applicable)	Estimate Your Time Involvement Per Month During the Specified Period	
Nancy Stacker – Vocal Instructor, Community Church	Average of 5 Hours per Month	

- A. Self-Assessment: Discuss fully the nature of the life experience and what you learned from it. A weak self-assessment will *not* support a grant of credit; graduate portfolios must show advanced graduate level learning. Write your responses to each of the following directly on this form.
1. A detailed explanation of the experience; include your primary responsibilities and the tasks you performed.
 2. A full explanation of what you learned from the experience; consider social, civic, technical, mental and physical skills and knowledge.
 3. A discussion of how and where, you applied the learning in your professional or personal life.
- B. The supporting documentation¹ for a life experience must include:
1. A detailed description of the activity and your involvement in it
 2. Letters from two persons who are not your relatives containing their qualifications and verification of the experience
 3. Evidence (photographs, tapes, compositions, etc.) of your involvement in the activity

¹ If specific documentation is not included, an explanation for its absence must be provided on the portfolio checklist.

TAB VI — OTHER PRIOR LEARNING

A. 1. DETAILED EXPLANATION OF THE EXPERIENCE:

I took lessons in vocal techniques from a qualified professional vocal instructor. She taught me techniques for breath and voice control, public performance, and sight-reading music.

A. 2. FULL EXPLANATION OF WHAT YOU LEARNED FROM THE EXPERIENCE:

During the time I was involved in vocal lessons, I learned a number of new skills and was able to apply skills that I had learned in the past about music theory and technique. I have also been able to further this knowledge through participation in choirs as well as through general vocal opportunities, such as signing at various church meetings, for wedding, and for other events.

Harmonization

As a vocal student, I learned techniques for using Diction when singing, control over diaphragm muscles to sustain the voice, breathing techniques to extend the time for singing in general and for holding notes in particular. I was able to learn how to pronounce each word distinctively without making the song sound choppy or disjointed, making the song free-flowing as well as understandable to the listener. I also gained knowledge of techniques used to harmonize with the regular melody of a song. This included vocalizing by using a descant technique in a higher range than of the normal melody. The techniques I learned focused primarily on the harmonizing available for alto voice.

Sight-Reading Music

As a vocal student, I learned how to sight-read music in order to sing a song readily after first seeing it; I also learned to pick out the notes in which a song was written accurately.

Vocal Techniques

I learned how tempo, inflexion, loudness, softness, and voice quality all play together to create a personal interpretation in the singing of a song.

I was able to apply knowledge about techniques that I had learned during adolescence, and I furthered my knowledge in the theory and practice of basic and sheet music construction. This included reading musical notations such as tempo, repeat science, proper verse instruction, time signatures, note laying, and the structure of music.

I learned techniques for voice control such evidence sustaining notes as well as the loudness or softness of the voice by using the diaphragm muscles as well as properly using breathing techniques and quality of voice.

I learned how to use a distinct style for different types of music by reading what is required in the notation by the author of the music. I also learned the best techniques for choosing the right song for the right voice and vocal range to be able to perform the music effectively.

I learned different techniques for warming up the vocal cords and for practicing breathing as well as the ranges and scales to use in practicing for a lesson or a performance.

With learning to harmonize by ear, depending on the song, I have been able to continue this

TAB VI — OTHER PRIOR LEARNING

learning into my adult years, as I participate in various choirs through church. Mainly, I have been able to properly harmonize the alto part in him sun in church as well as other venues.

A. 3. DISCUSSION OF HOW AND WHERE YOU APPLIED THAT LEARNING.

I use the knowledge I learned through these voice lessons weekly as I sing in church. I also use this knowledge when I get the opportunity to do a musical performance of one kind or another such as funerals, weddings, parties.

B. 1. DETAILED DESCRIPTION OF THE ACTIVITY AND YOUR INVOLVEMENT IN IT:

I attended weekly vocal lessons as well as practices breathing techniques and singing techniques during the week at home. I have continued this study by practicing the same techniques in my home as well as in church choirs and other performances.

Following this should be documents that verify the above information. For example: letters from two non-relatives citing their qualifications and verifying the experience (B.2.); hard evidence (photos, tapes, certificates, etc.) of your involvement in the activity (B.3.).

Among items that might be included with this kind of experience:

B.2. (necessary)

Letter from the voice teacher

Letter from a church minster or choir master/leader (or from a bride or groom for whose wedding this person sang)

B.3 (more optional but helpful)

Copy of an announcement of a performance that included the student's name

TAB VI — OTHER PRIOR LEARNING

Your self-assessment statement is the most important part of your portfolio. It is your personal demonstration of what you have learned through other college level experiences outside of normal job and training activities.

LIFE EXPERIENCE ID

VI-2

Activity	Dates of Activity (month, year)	
Association Member	From: July 2005	To: Present
Organization (if applicable)	Estimate Your Time Involvement Per Month During the Specified Period	
National Alliance for the Mentally Ill (NAMI)	Average of 2-3 hours per month; more during peak conference activity times	

- A. Self-Assessment: Discuss fully the nature of the life experience and what you learned from it. A weak self-assessment will *not* support a grant of credit; graduate portfolios must show advanced graduate level learning. Write your responses to each of the following directly on this form.
1. A detailed explanation of the experience; include your primary responsibilities and the tasks you performed.
 2. A full explanation of what you learned from the experience; consider social, civic, technical, mental and physical skills and knowledge.
 3. A discussion of how and where, you applied the learning in your professional or personal life.
- B. The supporting documentation¹ for a life experience must include:
1. A detailed description of the activity and your involvement in it
 2. Letters from two persons who are not your relatives containing their qualifications and verification of the experience
 3. Evidence (photographs, tapes, compositions, etc.) of your involvement in the activity

¹ If specific documentation is not included, an explanation for its absence must be provided on the portfolio checklist.

TAB VI — OTHER PRIOR LEARNING

A. 1. DETAILED EXPLANATION OF THE EXPERIENCE:

As a volunteer for the National Alliance for the Mentally Ill in Utah (NAMI Utah), I was able to do a diverse number of activities to help the Association. I worked very closely with the executive director of the organization on a regular basis. I also used my graphic design skills on a number of different fliers, invitations, and reports.

A. 2. FULL EXPLANATION OF WHAT YOU LEARNED FROM THE EXPERIENCE:

ANNUAL REPORT WRITING

The organization sent out an annual report and, in my time as a volunteer, I worked on two of the reports; finishing one to completion. The reports contained the data analysis that I compiled from raw data given to me by the office. I analyzed the data and set it out in graphs, tables, and charts to make it as user-friendly as possible. I also added a great deal of narrative text to the report to explain the activities of the association during the year. I worked closely with the executive director of the organization on the contents included and the clarity of information. Because the executive director is a professional photographer in her spare time, I was able to use her photography for the graphic design elements of the report. This required me to learn how to manipulate graphic images, and how to place them into the documents. I also gained knowledge of using software, specifically Adobe PageMaker and Adobe Photoshop, to create effective layouts to make the report visually appealing and to serve its purpose as communication information as well.

COMMUNITY EDUCATION

As a volunteer, I became associated with the program BRIDGES, which is a consumer-based, consumer-taught program for those with mental illnesses. I learned the curriculum of this program and was able to assist in the training of BRIDGES teachers to help them better understand the most effective ways of teaching and researching the consumers they came in contact with.

GROUP THERAPY DYNAMICS

For quite some time, I was in charge of a group session in all four of their adult units at the University of Utah's Neuropsychiatric Institute. This group was geared toward resources available to patients after discharge from the Institute. I worked with the group as a whole to identify resources. I also worked with people on an individual basis to identify resources they needed.

Because my group session was not a regular part of the Institute's schedule, it was my responsibility to inform people and get them to the group each week. I learned how to best approach people on an individual basis. Some were in a mental health crisis or receiving different types of mental health treatments. The type of treatment I ran into most often was Electroconvulsive Therapy (ECT), and I learned how to interact with those people. Although this can be an extremely effective type of therapy for certain people, ECT is still a dramatic

TAB VI — OTHER PRIOR LEARNING

experience for a person's brain, and he/she needs to be approached in different ways during the hours and days following treatment.

In being in charge of this group, I learned a great deal about many of the issues facing those who were in the mental health system: What their rights were; what was available to them and what was not available to them. I was able to see things from a different perspective, and learned more about mental health and how it affects the individual, not only for the time they are struggling but for their entire lives.

During the time I conducted these groups, I not only conducted the group on the open adult unit but on the other three units of the Institute as well. Three of the four adult units were locked units, housing patients who had the most severe mental disorder and who were in the most danger to harm themselves or others.

ABNORMAL PSYCHOLOGY

While conducting these groups, I encountered a number of mental disorders; this helped me to apply the book knowledge that I had gained prior to this experience about abnormal psychology. I saw the manifestation of disorders firsthand; Axis I and Axis II disorders as well as co-occurring disorders of mental health with substance abuse issues, and how they affected people in a real-life way were mental disorders I encountered at this time. I also encountered patients with bipolar disorder, depression, suicidality, schizophrenia, delusions, hallucinations, and many other types of mental illnesses. I learned what people went through, some of the symptoms of withdrawal, and other things that happened when addicted people go through detoxification.

WORKING CONDITON ON PSYCHIATRIC INPATIENT UNITS

I learned the criteria that must be met for a person to be hospitalized because of a mental illness as well as the criteria for admission to the state psychiatric hospital, which houses the more severely chronic patients. As I observed staff deal with the patients of the hospital, I learned how much emotional distancing must take place as the coping skills that professionals need to be able to do their jobs every day. I learned the physical demands placed on the workers in these types of units including the demands of working with patients who are often unpredictable in their behaviors as well. Although take downs were not frequent, there were times when staff needed to restrain patients to get them under control physically. I learned some of the ways staff would restrain patients without harming themselves or the patients. I learned that at times patients were uncontrollable and needed to be physically restrained or separated from other patients. The separation would occur through the use of a separate room that would allow the patients to act out without harming themselves or others.

In time, my experience of doing the group alone evolved into my assisting the lead psychotherapist of the open adult unit of the Institute in conducting the weekly Family Education Group, which let family members as well as patients who wanted to attend know about resources available to them in their communities after discharge and taught them more about what mental illness is and is not and how to overcome much of the stigma that is attached to mental illness in our society. I learned more about how to effectively conduct a group therapy session by

TAB VI — OTHER PRIOR LEARNING

watching the lead psychotherapist conduct this group and assisted her in doing this.

A.3. DISCUSSION OF HOW AND WHERE YOU APPLIED THAT LEARNING.

My experience with NAMI Utah has been infused into everything I have done since then. I use it every day in my job as a direct extension and application from my study of psychology and related areas.

B.1. DETAILED DESCRIPTION OF THE ACTIVITY AND YOUR INVOLVEMENT IN IT:

I worked as assistant to the executive director of NAMI Utah as well as secretary of the board of directors for NAMI Utah. I used skills in graphic design in compiling the annual report for the association and worked in the community as an educator in schools and in the units of a psychiatric hospital.

Following this should be documents that verify the above information. For example: letters from two non-relatives citing their qualifications and verifying the experience (B.2.); hard evidence (photos, tapes, certificates, etc.) of your involvement in the activity (B.3).

Among items that might be included with this kind of experience:

B.2-B.3.

Documents:

- letters verifying my experience from two non-relatives citing their qualifications and indicating my involvement in NAMI Utah
- copy of minutes from a NAMI meeting
- copy of a NAMI annual report

PORTFOLIO CHECKLIST

Directions: Respond to each item by placing a check in the appropriate space.

Yes No

- Did you read **Chapter 1** and **Chapter 2** of the Prior Learning Student Handbook?
- Did you study the sample portfolios? (**Undergraduate** or **Graduate** Samples)
- Did you review the Prior Learning Briefing **PowerPoint**?
- Did you *attend* a Prior Learning Briefing session? Location: _____ Date: _____
- Did you submit your writing to the CMU Writing Center? (optional)

I & II: Personal Information and Education

Yes No

- Have you included your CMU transcript?
- Have you included transcripts from other colleges attended? (if appropriate)
- Have you included your CMU Transfer Credit Evaluation (TCE)? (if appropriate)

Explain any "no" responses: _____

III: Table of Contents

Yes No

- Have you included a Table of Contents form (III-1) for the Work Experiences submitted?
- Have you included a Table of Contents form (III-2) for all Training Experiences submitted?
- Have you included a Table of Contents form (III-3) for all Life Experiences submitted?

Explain any "no" responses: _____

IV: Learning from Work Experience

Yes No

- Have you discussed your present or most recent job first (IV-1)?
- Have you discussed each previous job and labeled it appropriately (e.g., IV-2, IV-3, IV-4, etc.)?
- Are the exact beginning dates (month, day, and year) and ending dates (month, day, and year) recorded consistently throughout?
- Have you indicated the hours per week for all part-time and full-time jobs?
- Have you included documentation that verifies, in writing, the exact dates and hours for each job? (This applies to both full-time and part-time jobs.)

Have you thoughtfully and completely explained each of the following in your own words?

Yes No

Yes No

- | | |
|--|--|
| <input type="checkbox"/> <input type="checkbox"/> Tasks performed | <input type="checkbox"/> <input type="checkbox"/> Skills & competencies gained |
| <input type="checkbox"/> <input type="checkbox"/> Concepts learned | <input type="checkbox"/> <input type="checkbox"/> Recognition of achievements |

- Have you included a formal job description for each Work Experience submitted?
- Have you included documents that support what you claimed to have *learned* on the job, e.g., samples of work or a letter on official letterhead from a supervisor or other person in a position to know?
- Have you included one or more formal performance evaluations for each Work Experience submitted?

- Have you organized each Work "Tab" (e.g., IV-1, IV-2, IV-3, etc.) by including the cover form, a thorough self-assessment (response to A-section questions) and all relevant documents (listed in the B-section)?

Explain any "no" responses: _____

V: Learning from Training Experience (Courses, Seminars, Workshops)

Yes No

- Have you included documents that verify the dates and number of in-class hours and preparation for each Training Experience (V-Tab) submitted?
- Have you included a course outline or syllabus for each Training Experience submitted?
- Have you included the instructor's name and qualifications for each Training Experience submitted?
- Have you included a certificate, letter of completion or accomplishment, or transcript for each Training Experience submitted? (Please make copies; do not include your "original certificate.")
- Have you explained what you learned and responded to all of the questions on the Training Experience (V-Tab) form for each experience submitted?
- Have you organized each Training "Tab" (e.g., V-1, V-2, V-3, etc.) by including the cover form, a thorough self-assessment (response to A-section questions) and all relevant documents (listed in the B-section)?

Explain any "no" responses: _____

VI: Learning from Life Experience

Yes No

- Have you explained the learning and indicated dates for each Life Experience (VI-Tab) submitted?
- Have you discussed the most recent life experience first, followed by others in reverse chronological order?
- For each experience, have you submitted letters from at least two persons, who are not your relatives:
1) verifying the time involved; 2) supporting what you claimed to have learned; and 3) documenting that any products included were actually produced by you?
- Have you organized each Life "Tab" (e.g., VI-1, VI-2, VI-3, etc.) by including the cover form, a thorough self-assessment (response to A-section questions) and all relevant documents (listed in the B-section)?

Explain any "no" responses: _____

VII: Signature Block

Yes No

- Have you signed and dated the signature block (VII-Tab) and placed it at the end of the portfolio?
- Did you have the VII form, which includes the signature block, notarized?
- Have you provided two copies of your portfolio? (Keep the original; portfolios are not returned.)
- Have you included a check for the portfolio processing fee?

Explain any "no" responses: _____

Note: Please include this Checklist with your portfolio, placing the completed form at the end of the portfolio, directly after the Signature Block Form (Tab VII).

Criterion 4 Evidence
Priority and Metrics Goal Report for 2015-2016

**Strategic Priorities, Initiatives and Metrics Goals
For the Year Ending June 30, 2016**

**Prepared for the Board of Trustees
by President George E. Ross
September 2015**

Central Michigan University (CMU) goals for 2015-2016 are reflected in the university's Strategic Plan – Advancing Excellence, specifically the university's five priorities and the sixteen corresponding initiatives. The initiatives clarify areas of emphasis and commitment. Progress toward achieving each priority is measured using multiple quantitative institution-wide measures. The status of the annual goals will be reported following the end of the fiscal year and tracked using the dashboard.

The Board of Trustees approved the university's priorities and initiatives for the five years ended on June 30, 2019 at its September, 2014 meeting. Progress towards those five-year goals is reported under separate cover titled, "University Vision, Mission, Priority Statements, Initiatives and Metrics, Year-end Metrics Report for 2014-2015."

The 2015-2016 goals report sets specific one-year metric goals for the year ending June 30, 2016, and is included in Appendix A.

In addition to the strategic priority metric goals included in Appendix A, there are more specific goals/tasks highlighted within each of the five priorities, which are included in Appendix B. These are compiled from each of the five divisions of the university and the various colleges, departments and administrative units, each of which has annual goals that will be measured against divisional metrics. It is expected that these various plans will support the university-wide priorities, in addition to completing specific goals and action steps that will further enhance the goals of their divisions.

The second year of the university-wide strategic plan metrics, like the first year reporting in 2013-2014, showed mixed results. Some of the measures were not available because of survey and other data that is only available on multiple year cycles, rather than annually. Several data collection instruments have changed since 2013 and data on which metric goals were originally set is now being reported in different formats.

Given the changing landscape of data collection, including the university's selection of a new peer institution comparison group during 2014-2015, the time has come for us to revisit the university's strategic plan. Therefore, an over-arching goal for 2015-2016 will be to recharge the university's

strategic planning team and revise and update the strategic plan. This update will include input from across the campus community, as we revisit priorities, initiatives, division-based goals and university-wide metrics.

It is critical in the revision of the strategic plan that the metrics we revise and develop focus on outcomes and impacts of our academic mission. The incorporation of peer comparisons, available consistent outcomes data, and the use of actual results versus planned results trigger mechanisms for change and improvement of university performance.

I look forward to your feedback and guidance as we proceed into the current and future years.

2015-2016

APPENDIX A

Strategic Priorities, Initiatives and Metrics Goals For the Year Ending June 30, 2016

Priority 1: Student Success - Challenge our students to develop the knowledge, skills and values to be successful and contributing global citizens.

Priority 1 Initiatives:

- 1.1 Educate students in a broad base of liberal studies and mastery of an academic discipline.
- 1.2 Enrich students' communication, inquiry, creative, and critical-thinking skills.
- 1.3 Engage students in relevant and responsive academic and co-curricular experiences with a focus on the value of diverse perspectives and personal responsibility.

Priority 1 Metrics: Successful students, both graduate and undergraduate, are those who complete their degree and are prepared for employment or additional postgraduate studies. Early retention, timely graduation and a positive undergraduate experience are key to success. Students must be competent in critical thinking, analytic reasoning, problem solving, and written communication skills to be successful.

Performance Indicator and Five-Year Goal by Fiscal Year 2020	Historical FY 2011	Actual 2013-2014	Goal for 2014-2015	Actual 2014-2015	Goal for 2015-2016
Graduates are employed in their field of choice or engaged in postgraduate studies. ¹	Employed = 80% PostGrad = 32%	Employed = 65% PostGrad = 52%	92%	Updated 2/15/2016	Employed=70% PostGrad=55%
Increase the six year graduation rate of first-time, full-time students to 63%.	58%	60%	60%	56%	59%
Increase the four year graduation rate of first-time, full-time students to 25%.	21%	21%	21%	21%	21%
Improve freshmen to sophomore retention rate to 80%.	76%	76%	77%	78%	79%
95% of graduating seniors rate their educational experience as good or excellent on the Graduate Student Exit Survey.	86%	86%	88%	85%	86%
CMU students demonstrate competence in critical thinking, analytic reasoning, problem solving, and written communication, as indicated by the Collegiate Learning Assessment, that exceed peer institutions (as indicated by mean scores).	2009 CMU = 1124 Peers = 1222	2012 CMU = 1073 Peers = 1055	Exceed mean score of peers	Given in Fall 2015 and Spring 2016	Exceed mean score of peers

¹ – Previous data were from the Alumni Survey. Alumni Survey replaced with First Destination Survey in Dec 2013, with similar and comparable questions. All data are collected 6 months post graduation and are reported in the fiscal year of graduation.

Priority 2: Research and Creative Activity - Promote excellence in research and creative activities.

Priority 2 Initiatives:

- 2.1 Enhance and improve incentives, infrastructure, and support services for research and creative activities.
- 2.2 Support field-defining areas of research and creative activities across the university.
- 2.3 Enhance efforts to promote the active involvement of students in research and creative activities.
- 2.4 Support emerging areas of interdisciplinary, international, and cross-cultural research and creative activities that build on the university's strengths.

Priority 2 Metrics: Research and creative endeavors at all levels and in all disciplines is critical to promoting excellence at CMU. The result of the university investment in research is demonstrated in the quality of the research and creative activities of the faculty and students. The sciences and business use journal impact factors as indicators of excellence, while creative activities juried at the national and international levels validate excellence. External funding is an endorsement of excellence and is essential for growth in research and creative endeavors. As research gains increasing importance at CMU, more faculty will become research active and more students will be participants in research and creative activities.

Performance Indicator and Five-Year Goal by Fiscal Year 2020	Historical FY 2011	Actual 2013-2014	Goal for 2014-2015	Actual 2014-2015	Goal for 2015-2016
Impact factors in the sciences, social sciences, and business rank in the top 50% of our peer institutions.	Calendar Year 2010 CMU = 3.78 Peers = 4.55	CMU = 3.46 Peers = 4.64	Top 50%	CMU = 3.61 ² Peers = 5.08	Top 50%
Increase faculty participation in invited, peer-reviewed/juried performances and exhibitions in national or international venues by 5% annually.	Faculty = 30 Performances & Exhibitions = 70	Faculty = 20 Performances & Exhibitions = 72	5% Annually	Faculty = 23 Performances & Exhibitions = 62 ³	5% Annually
Increase research and creative endeavors external funding to \$25 million.	\$14,089,970	\$13,754,281	\$15 million	\$10,448,370	\$11 million
Increase percent of faculty engaged in research or creative endeavors to 65%.	47%	57%	59%	43% ⁴	48%
Increase number of students engaged in regional, national, and international research and creative activities (publications, presentations, and exhibits) by 5% annually. ⁵	Pub = 161 Pres = 88 Exhib = 1	Pub = 202 Pres = 111 Exhib = 1	5% Annually	Pub = 178 Pres = 66 Exhib = 0 ⁴	5% Annually

²Peer group changed in 2015 to include medical schools. Peer mean increased.

³Data reflective of only CCFA and is taken from that annual report. Previous data were from OFIS, but the 2015 numbers for performances and exhibitions in OFIS were zero.

⁴Faculty may not be entering data into OFIS.

⁵NSSE (National Survey of Student Engagement) asks seniors who have worked with a faculty member on a research project (no creative activity): 2012 = 21%; 2015 = 24%.

Priority 3: Quality Faculty and Staff – Foster a vibrant, innovative, intellectual community of high quality faculty and staff who value inclusiveness, diversity, shared governance and respect.

Priority 3 Initiatives:

- 3.1 Invest in the recruitment, development, and retention of an outstanding, diverse faculty and staff.
- 3.2 Provide professional support for the ongoing development of faculty and staff in the areas of teaching, leadership, research, and cultural competence.
- 3.3 Support the exchange of diverse viewpoints in order to develop timely and informed university policies, procedures, and practices that promote inclusiveness and facilitate shared governance.

Priority 3 Metrics: High quality faculty and staff are the essence of an institution of excellence. In order to build an outstanding workforce, CMU must offer competitive recruitment packages to our top candidates, provide ongoing professional development to all faculty and staff, and support a welcoming and inclusive culture. Evidence of the positive environment will be faculty and staff survey responses.

Performance Indicator and Five-Year Goal by Fiscal Year 2020	Historical FY 2011	Actual 2013-2014	Goal for 2014-2015	Actual 2014-2015	Goal for 2015-2016
Hire first-choice faculty finalists 85% of the time and first-choice staff finalists 92% of the time.	Fac = 77% Staff = 89%	Fac = 87% Staff = 91%	Fac = 87% Staff = 91%	Fac = 81% Staff = 93%	Fac = 84% Staff = 93%
At least 86% of staff agree or strongly agree that CMU is a good place to work.	84%	88%	88%	Next survey conducted Fall 2015	88%
Foster and maintain a welcoming and inclusive campus environment for all CMU community members, based on the National Survey of Student Engagement (NSSE). ⁶ Five-year goal: faculty=80%; staff=85%; students=75%	Fac = 79% Staff = 47% Students = 86%	Next NSSE survey given every 3 years	Fac = 60% Staff = 70% Students = 55%	Fac = 82% Stu Serv=61% Admin Staff=63% Students = 88%	Next NSSE survey given in 2018
At least 86% of fixed-term faculty and graduate assistants agree or strongly agree that CMU is a good place to work, based on results of the New Faculty Survey.	No historical data	No survey this year	84%	No survey this year	No survey expected next year
Provide bi-annual faculty and staff professional development opportunities to all faculty and staff.	Administration is stressing to supervisors and campus leaders that employees have opportunities for training both on- and off-campus. The Strategic Planning Team will revisit this priority when the Strategic Plan Initiatives and Priorities are re-evaluated.				

⁶NSSE question changed slightly. In 2012 question asked senior students about the quality of their relationships with other students, faculty members, and administrative personnel and offices. In 2015 question asked senior students about the quality of their interactions with other students, faculty, student services personnel, and other administrative staff.

Priority 4: Community Partnerships - Develop and strengthen learning experiences through collaboration with local, national and global partners to enhance cultural awareness, the natural environment, health and wellness and local economies.

Priority 4 Initiatives:

- 4.1 Generate opportunities for community involvement through academic experiences, performances, speakers, athletics, civic engagement, and volunteering.
- 4.2 Involve students, faculty, and staff with community members to support and sustain healthy environments.
- 4.3 Foster and enhance relationships with tribal, governmental, business, and non-profit entities.

Priority 4 Metrics: Building strong community partnerships requires an investment by CMU faculty, staff, and students through service-learning, internship, and volunteer opportunities. Health and wellness is a CMU strength that should be shared with the broader community as well as the faculty and staff. CMU’s economic impact helps maintain a vibrant local and state economy.

Performance Indicator and Five-Year Goal by Fiscal Year 2020	Historical FY 2011	Actual 2013-2014	Goal for 2014-2015	Actual 2014-2015	Goal for 2015-2016
At least 20% of students have enrolled in a service-learning course.	8-10%	10-12%	15%	11% ⁷	13%
At least 55% of graduating seniors have completed an academic internship, student teaching, or clinical experience.	51% (2012 NSSE)	Next NSSE survey in 2015	53%	56%	Next NSSE survey in 2018
At least 80% of graduating seniors have been involved with volunteering/community service, as reported on NSSE.	68%	Next NSSE survey in 2015	70%	53% of seniors volunteer weekly ⁸	Next NSSE survey in 2018
80% of the staff perceive health and wellness as an integral part of CMU’s culture, as reported on the bi-annual Staff Satisfaction Survey.	69%	74%	74%	Next survey conducted Fall 2015	76%
Increase CMU’s economic impact on the local and State economies by 2% annually.	\$837M	\$940M ⁹	\$1.02B	This survey has not been repeated	\$959M

⁷Previous data were estimates. With new SL designation, number reported is percent of all CMU students who were enrolled in a SL course in 2014-2015 academic year.

⁸NSSE question changed and collects different, non-comparable, data. In 2012 question asked senior students if they have done, plan to do, do not plan to do, or have not decided to engage in community service or volunteer work. We recorded students who had done community service. In 2015 question asked senior students about how many hours they spent in a typical week doing community service or volunteer work. 53% of CMU seniors spent time (>1 hr.) in community service or volunteer work on a weekly basis.

⁹The Economic Impact of Michigan’s Fifteen Public Universities published in 2013

(<http://www.pcsun.org/Portals/0/docs/The%20Economic%20Footprint%20of%20Michigan's%20Public%20Universities.pdf>)

Priority 5: Infrastructure Stewardship – Align university resources and infrastructures to support the university’s mission and vision.

Priority 5 Initiatives:

- 5.1 Enhance university financial, technological, and physical infrastructure.
- 5.2 Define and implement a long-term enrollment and retention strategy.
- 5.3 Increase ongoing investments in strategic environmental and sustainable energy optimization efforts and seek opportunities to share this knowledge and experience.

Priority 5 Metrics: The alignment of university resources with CMU’s priorities is the core of effective strategic planning. CMU’s financial base is dependent on external fundraising and a solid enrollment management plan. If the research priority is to be reached, facilities need to meet the needs of the faculty. Responsible fiscal management will result in a reduction of expenses, including a reduction in energy consumption. An excellent credit rating is essential to the financial health of the university.

Performance Indicator and Five-Year Goal by Fiscal Year 2020	Historical FY 2011	Actual 2013-2014	Goal for 2014-2015	Actual 2014-2015	Goal for 2015-2016
Increase fundraising revenues by 10% annually to \$29M.	\$12.7M	\$13.0M	\$15.8M	\$13.7M	\$14.9M
Implement a long-term enrollment and retention strategy to ensure appropriate growth and sustainability.	691,275 Student Credit Hours	642,505 Student Credit Hours	642,505 Student Credit Hours	656,299 Student Credit Hours	656,000 Student Credit Hours
Increase total available research space to meet or exceed peer average, as identified in the campus facilities master plan. Five-year goal=210,595 Sq. Ft.	136,641 Sq. Ft.	142,307 Sq. Ft.	142,307 Sq. Ft.	142,307 Sq. Ft.	142,307 Sq. Ft.
Reduce energy consumption per square foot by 5% by 2020.	148,358 BTU/Sq. Ft.	165,013 ¹⁰ BTU/Sq. Ft.	Reduce by 1.5%	164,092 BTU/Sq. Ft.	Reduce by 1.5%
Maintain the CMU credit rating (currently Aa3/Moody’s and A+ S&P), relative to our peer institutions.	Aa3/Moody’s A+/S&P	Aa3/Moody’s A+/S&P	Aa3/Moody’s A+/S&P	Aa3/Moody’s A+/S&P	Aa3/Moody’s A+/S&P

¹⁰Several factors had a significant impact on the 11.2% BTU/SF increase for Fiscal Year 2014: The addition of air conditioning to the Events Center with its high ceilings is equal to the volume in a building three times larger with normal ceiling heights; addition of air conditioning in the Student Activity Center fitness expansion; higher air conditioning demands in the Anspach Hall renovation due to ventilation codes requiring higher air volumes than when originally built in 1965; CMED addition with two cadaver labs requires very high ventilation rates and no air recirculation; Graduate Student Apartments have tenant controlled air conditioning; and research labs with different ventilation requirements. Most of the new space added this year is not “normal” space. In addition, heating degree days (HDD) and cooling degree days (CDD) vary from year to year. For FY 2014, the HDD was 9.8% higher and CDD was 1.8% lower compared to past six-year average.

**Central Michigan University
Priorities, Initiatives and Goals
For the Year Ending June 30, 2016**

Priority 1 – Student Success

- Major university accreditations will be successfully completed: the Higher Learning Commission (HLC) ten year reaffirmation of the university-wide accreditation; accreditation by the Council for the Accreditation of Education Preparation (CAEP); and accreditation by the Liaison Committee for Medical Education (LCME)
- Receive report of Online Programs Study Committee at December Board of Trustees meeting and decide on next steps, depending on the findings and recommendations within that report
- Proceed with implementation of the “One CMU” concept, starting with the functional integration of administrative functions from across all appropriate units of the university
- Academic Affairs and Enrollment and Student Services will re-engineer first-year experience programming beyond a single course; develop a program that incorporates a useful cross-section of information and knowledge to facilitate academic success and student retention
- University Communications in partnership with the Office of Information Technology (OIT) will complete the following projects:
 - A new widescreen design for go.cmich.edu
 - New designs for the College of Humanities and Social and Behavioral Sciences, College of Medicine and Office of Graduate Studies
 - A new Global Campus website, fully within CMU’s SharePoint environment for the first time
- In collaboration with the Academic Senate Oversight Committee, Academic Affairs will refresh the MSA Program, identifying challenges facing the program and proposing and implementing solutions

Priority 2 – Research and Creative Activity

- Increase research and creative endeavors external grant writing and funding by 5%
- Increase number of grants and contracts submitted in the College of Education and Human Services by 10%

- Design and implement a MakerBot Innovation Lab facility, incorporating research and design projects between the College of Education and Human Services and College of Communication and Fine Arts
- Expand clinical space for the Autism Center
- Redesign and implement strategies to increase clinical research opportunities for faculty members within the College of Medicine
- Enhance animal research facilities, particularly for mammalian species, primarily mice and rats

Priority 3 – Quality Faculty and Staff

- Provide professional support for the ongoing development of faculty and staff in the areas of research, teaching, leadership, and cultural competence. Strengthen leadership capability and capacity throughout the university to encourage high levels of performance, sustain excellence, and preserve leadership consistent with CMU's Core and Service Values
- Enhance faculty quality through an increase in CBA faculty AQ/PQ = > 95%
- Enhance the faculty mentoring program through the Center for Excellence in Teaching and Learning

Priority 4 – Community Partnerships

- Grow our Community Engagement performance as a preliminary step to resubmission of our application for certification by Carnegie Foundation (who maintain the Carnegie Classification of Higher Education™) as a university with specialization in this area

Priority 5 – Infrastructure Stewardship

- Develop and implement next iteration of the Strategic Enrollment Management Plan for 2016-2018. The plan will enhance existing enrollment management initiatives and in addition will:
 - Continue to transform the enrollment conversation from recruitment of a *number* to design of a *profile*
 - Meet or achieve new FTIAC on-campus enrollment goal of 3,500 (+/- 5%) and 1,100 new transfer students
 - Increase out-of-state enrollment by 3%
 - Create a Minority Student Recruitment Plan

- Reorganize the Office of Information Technology (OIT) to increase operational efficiency, system unification across the academic colleges and support and service units, and refine and increase system security
- Reorganize and implement new initiatives within the university's fundraising/advancement functions, including the recruitment and hiring of a Vice President for University Advancement
- Successfully complete the \$5 million Grawn Hall Renovation fundraising goal
- Appoint an Enterprise Risk Management Committee to identify and manage enterprise-wide risk and periodically report to the president and Board of Trustees
- Review and revise processes and procedures of the Responsibility Centered Management budget model, as appropriate, to incentivize innovation, strategic positioning, and brand/community outreach, and enable the university to respond more quickly to student success, faculty development, facility infrastructure and research needs
- Provide ongoing management of the CMU 2013 Campus Master Plan and the 2014 Campus Identity Plan:
 - Maintain dashboard metrics and ensure campus leadership is informed.
 - Maintain the Facilities Condition Assessment (FCA) database and all appropriate files
 - Update the 10 Year Capital Plan
- Study, prepare and implement a plan proposing the future footprint and need for Residence Life and campus housing operations going forward
- Provide Title IX updates and revisions to ensure compliance and enforcement of policies and procedures relating to sexual misconduct and gender equity related to intercollegiate athletics
- Appoint a Retirement Investment Committee to review the investments offered by Fidelity and TIAA and to revise the options available to employees to those with the best returns, lowest fees, and those deemed most appropriate in terms of type of investment

D. Program Review Criteria Crosswalk for Programs with Specialized Accreditation	

Purpose

The **primary purpose** of program review is to assess the educational quality of academic programs along a number of dimensions. This information is used to develop and then implement action steps to improve program quality. Although faculty continuously assess the effectiveness of a program when they teach and advise, program review is an opportunity for a more structured reflection that often results in changes to the program.

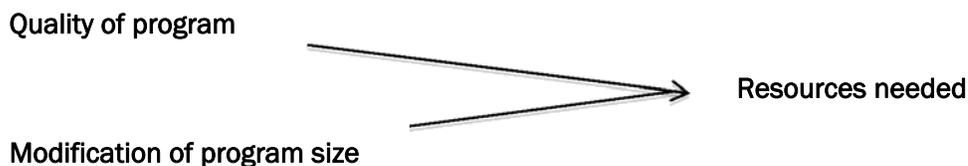

Assess the quality of program → Develop potential action steps →

Consider potential resources implications → Engage in action steps

A **secondary purpose** of program review is to provide information that informs decisions to alter the size of the program. Options include increasing, maintaining, or reducing the size of the program, consolidating the program, or deleting the program.

Develop recommendation(s) impacting program size → Consider potential resource implications → Engage in action steps

Program review results in three **summary ratings**: program quality, modification of program size, and need for additional resources. The recommendations regarding quality and program size directly affect the resources needed for program improvement or the resources that become available to build other programs when programs are reduced, combined, or eliminated.

Academic program review is one piece of a multi-faceted commitment to continuous quality improvement extending from institutional accreditation through specialized accreditation to the review of programs and the assessment of student learning. Program review is a primary vehicle CMU uses to evaluate and sustain high quality programs. If done well, program review can recognize quality and strengthen academic programs for the future.

Overview of the Program Review Process

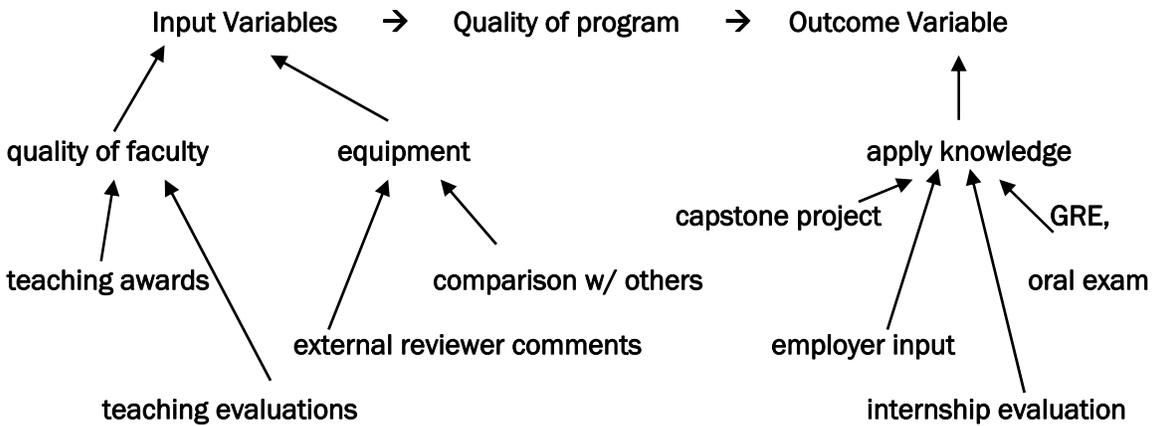

Program quality is a conceptual variable. To assess quality, we need to identify possible factors affecting quality and then operationally define the underlying indicators. Indicators of quality include both input and outcome variables. While both are important, greater weight should be assigned to outcome variables.

Input Variables → Quality of Program → Outcome Variables

For example, one program quality input is the quality of faculty. Teaching effectiveness is one measure of high quality faculty. Teaching effectiveness can be measured in many ways, and sources of data could include teaching evaluations and awards. Publication record is another possible measure of high quality faculty.

A second input that affects program quality is the availability of appropriate equipment. Assessment of this measure might include comparing equipment used at CMU with that used in similar programs at other institutions or evaluating the equipment through an external review process.

Outcomes must also be defined. One outcome might be the student's ability to apply their knowledge to new situations. Relevant data could include a project in a capstone experience, results of an oral exam, or scores on the GRE.

It is the reflective review of data that provides information on the quality of the program. Program faculty discuss the data through the self-study process and conduct an analysis of the internal strengths and weaknesses of the program, as well as the external opportunities and threats. An external review of the program occurs either as part of the specialized accreditation process or as part of program review. The program faculty then develop action steps for program improvement. The college dean(s) and graduate dean evaluate the self-study and external reviewer comments and provide ratings of program quality, size and resources. Following a discussion with the dean(s), department chair, and program leadership, the provost makes independent recommendations to address the quality and size of the program, as well as required resources. As a follow up to program review, the provost may ask for interim reports from the dean, the department or program leadership, and sometimes others, which summarize progress on recommended actions for program improvement.

Schedule

Program review is an ongoing process that has a focused discussion with the dean and provost approximately every five years. The program review schedule may be adjusted to

coincide with accreditation reviews and visits by outside organizations as agreed upon in advance by the dean, department, and vice provost for academic effectiveness. The program review schedule can be viewed on the website for the Office of Academic Effectiveness.¹ Requests for alterations in the schedule should be made by the dean to the vice provost for academic effectiveness. Although programs with a great deal of overlap may be reviewed concurrently, quality determinations and planning for the future must be distinct by program.

Programs Needing Review

The following are defined as programs that need to be reviewed as part of this process:

- Graduate programs: Each degree and each concentration constitute a separate program. For example, the MS in neuroscience is a separate program from the PhD in neuroscience. Special/early admission allowing for completion of an accelerated master's program does not constitute a program. However, this group of students should be analyzed and reported to determine the effectiveness of the early admission process and the successes achieved by these students.
- Majors: Each concentration constitutes a major, whether interdisciplinary, interdepartmental or within one department. Majors on varying degree programs are considered independent majors if the requirements are different. Differing requirements should lead to different outcomes. For example, the history major on the BS in Ed degree is reviewed independently of the history major on the BS and BA degrees. The history major on the BS and BA are reviewed together because the requirements are the same.
- All stand-alone minors
- Honors Protocol
- General Education Program

Programs that will not undergo independent review include minors that are part of a major, certificate programs, 2 + 2 programs, accelerated programs and programs on hiatus. The department or council should be discussing programs on hiatus so that when the hiatus period ends, the programs can be changed, deleted, or enter the program review cycle.

Responsible Department or Council

The home department is responsible for the program review process. If there are both on- and off- campus components to a program, the on-campus department is responsible for the process and must collect the appropriate data from their off-campus partner or Global Campus. Interdisciplinary councils are responsible for the program review of interdisciplinary programs and the Honors Protocol. They should work with their deans and the Office of Academic Effectiveness to secure the needed data and complete the process. Program review for interdepartmental programs is developed jointly by both departments. The General

¹ https://www.cmich.edu/office_provost/AcademicAffairs/Program_Review/Documents/2012-2017ProgramReviewSchedule.pdf

Education Committee working with the Office of Academic Effectiveness is responsible for program review of the General Education Program.

Program Review Components

The components of program review are summarized in Table 1. They are described in further detail in the pages that follow. This table presents an overview of all components, and program review documents should be organized in this order. When complete, provide one paper copy and one electronic copy to the provost's office.

Table 1. Program Review Components

Components	Brief Overview
Self-Study	Program faculty perform a self-study in response to criteria. Dean vets the self-study before it is sent for external review.
Library Resources	Program faculty in consultation with library staff evaluate adequacy of library resources.
Information Technology Resources	Program faculty in consultation with IT staff evaluate adequacy of information technology resources.
Program-level SWOT Analysis	Program faculty summarize program strengths, weaknesses, opportunities, and threats.
External Review	Dean selects external reviewer from list of academic leaders in the same discipline at similar or aspirational institutions provided by department.
Program Response to External Review	Program faculty respond to external review. Revise SWOT if necessary.
Action Plan	Program faculty develop an action plan to improve the program.
Ratings of Quality, Size, and Resource Funding	Program faculty rate program quality, size, and funding.
Dean-level SWOT Analysis, Next Steps, and Ratings	Responsible dean reviews all above materials and responds with a SWOT analysis, ratings of quality, size, and funding, and adds discussion of next steps. Graduate dean does the same for graduate programs.

Provost Review and Recommendation	Dean sends materials to provost and vice provost for academic effectiveness. Provost's office schedules a meeting with dean (including graduate dean when applicable) and department or council chair. Following discussion of the program review documents, SWOT analyses and potential for program improvement, provost makes recommendations for follow-up actions.
Follow-up Actions	Individuals identified in memo from provost provide updates on progress.

Self-Study Narrative

The self-study is the heart of the program review process as it is the vehicle for focusing conversations among faculty and other stakeholders on evidence relevant to the current status of the program and aspirations for its future. The self-study is most useful when it represents a serious process in which **all program faculty** are engaged in collecting the evidence, analyzing the evidence, discussing implications of the data, and planning for the future. Hence, the self-study process should be inclusive and evidence of that inclusivity should be documented in the self-study. **On the cover page, include a list of those who provided input as well as their roles in both the program and preparation of the materials.**

Designated and effective leadership of the program review process is key to high quality self-studies. A division of labor within departments or programs with clear expectations, frequent milestones for completion of work, and regular discussions of evidence at department and program meetings periodically during the year bring consensus among the program faculty. The vice provost for academic effectiveness will schedule a meeting with the department or program chairs in the year prior to the program review to suggest a timeline, address potential problems, and offer assistance.

The narratives in each section must be based upon accurate and verifiable data that is clearly presented to show trends or comparisons. The discussion must be specific to the program. It will not be appropriate to claim that all faculty participate equally in all programs. It will be helpful early in the program review process to identify faculty and other resources (such as temporary faculty, graduate students and facilities) with specific programs. The discussion of each criterion should include: (1) a summary of the evidence documenting the extent to which the program satisfied the criterion, (2) a narrative statement analyzing and interpreting the evidence, and (3) suggested next steps informed by these data that would lead to an improved curriculum, teaching effectiveness, student learning, etc.

Appendix A lists the criteria to be addressed, suggested questions to focus conversations among faculty, and sources of evidence. This table is not meant to be all encompassing. Rather, the intent is to emphasize the expectation that the criteria and evidence are the

starting points for analysis. Program faculty may wish to include discussion of other criteria and additional relevant data. The program review should be a true reflection of the program, its current state, and future potential. In all cases, the review should focus on the data and the narrative should be written as a very brief analysis of those data.

Suggested evidence for each criterion and potential data sources are included in Appendix A. Much of the data are available from the CMU data warehouse, summary data tables prepared by the Office of Institutional Research, and other data sources available to the deans and department chairs. The Online Faculty Information System (OFIS) will be used as the source for information on faculty activities. Thus, it is critical that information be up to date. Interdisciplinary council chairs should meet with the Office of Academic Effectiveness early in the process to identify the data they will need and request assistance collecting those data from Academic Effectiveness, the Office of Institutional Research, or their dean's office.

The assessment of student learning is an essential and significant piece of program review. Programs are to utilize the data from the previous five years as documentation of student learning or the need for program revision. Meet with your assessment coordinator early in the process to discuss the analysis of the assessment data. Expectations for graduate programs extend beyond those of undergraduate programs and should be carefully addressed in the narrative. Data on the effectiveness of accelerated masters programs should be included. Programs leading to the BS in Ed degree must analyze the MTTC results and other data relevant to teacher education. For programs offered both on- and off-campus, students and faculty at all locations should be included and clearly identified in the data and addressed in the narrative. Finally since effective programs are based on current course content, review the Master Course Syllabi and update them as needed.

It is advantageous for departments and interdisciplinary councils to determine early in the process what data they will use as evidence. The Office of Academic Effectiveness will help gather data for interdisciplinary programs.

Data for multiple programs within one department should be summarized in a reasonable and consistent manner. Some departments may wish to review their programs in sequence, while others may want to discuss and compare the data for a specific criterion for all programs. For example, in order to facilitate comparisons, a department may want to use a table to present enrollment/retention/graduation data, research productivity, or student learning outcomes across all concentrations of a major.

The entire program review document should reflect the use of data for continuous program improvement. Collecting data is of little value if it is not used. Clearly explain how data has been used to inform changes in the program. For example, alumni may report that graduates need more current information on a topic, which would result in changes to course syllabi. Assessment of student learning outcomes, such as results on a standardized test, might indicate a general weakness in a content area, resulting in altered areas of emphasis.

Library and Technology Resources

Programs going through review are asked to complete both library² and information technology³ resources surveys (Appendices B and C) in consultation with staff in those areas. The review of this evidence creates a prime opportunity to look at what will be needed in the future as the content, electronic learning tools, and pedagogies in the field change. Often, significant additions in this arena take years to implement. Therefore, being proactive in anticipating these needs will ensure that program quality can be sustained and improved across time. Conversations might center on questions that ask whether all students, faculty and staff are able to access the library or information resources they need and whether there are likely to be needs for training, professional development or technology in the near future. More specific directions regarding who to contact about this part of review are included on the survey forms.

SWOT Analysis

Most program faculty complete a preliminary, or draft, SWOT analysis as a final step to writing the self-study. This initial SWOT analysis is usually included with the self-study sent to the external reviewer, and describes the program's internal strengths and weaknesses, and external opportunities and threats. The preliminary SWOT helps direct the reviewer's attention to areas of particular interest to the program faculty. This is a program-specific analysis and not a description of the department strengths and weaknesses. After the visit and feedback from the external reviewer, program faculty may want to revise the SWOT analysis as they prepare an action plan. The SWOT analysis should lead directly to a discussion of opportunities for program improvement and growth.

External Review

Each program or set of programs undergoing review will obtain feedback from one or more external reviewers. For accredited programs, the external review conducted by the accrediting body will constitute this feedback. For non-accredited programs, the selection of the external reviewer is one of the first actions that should be taken in the program review process, although the actual visit by the reviewer does not take place until after the completion of the self-study. The external reviewer will be selected by the dean from a list of three or more qualified individuals provided by the department. A model reviewer contract is provided on the program review website and can be adapted to include additional stipulations the dean and department wish to include.⁴

²https://www.cmich.edu/office_provost/AcademicAffairs/Program_Review/Documents/LibraryProgramReviewSurvey2-12-13.docx

³https://www.cmich.edu/office_provost/AcademicAffairs/Program_Review/Documents/InformationTechnologySurvey3-1-2013.docx

⁴https://www.cmich.edu/office_provost/AcademicAffairs/Program_Review/Pages/default.aspx

Picking a knowledgeable and respected external reviewer who will provide candid, helpful feedback is one of the best ways to strengthen the program review and promote constructive follow-up actions. Reviewers should be recognized leaders in the discipline with recent experience in higher education institutions, possibly from CMU's benchmarking institutions, or if more appropriate, from strong programs at other institutions. Typically, individuals with CMU degrees, a real or potential conflict of interest, or who have close professional or personal relationships with CMU personnel or students are not appropriate external reviewers. A CV for the reviewer should be included as an appendix to the self-study.

The external reviewer should receive general information about the institution, department, and programs such as that provided on university websites. Also, a set of focus questions, a copy of the self-study, and supporting materials should be provided after they have been vetted by the program faculty and dean. The reviewer will provide an in-depth review of the self-study, travel to campus to conduct interviews with program faculty, students, dean and other stakeholders, and prepare a final report. The report should address the basic criteria of the self-study including program quality and processes supporting quality, program size, resources, and future opportunities for the program. A major purpose of the external review is to provide external comparators of quality. This evaluation of program quality should be addressed directly in the external reviewer's report.

The dates of the visit and submission of the final report should be included in the contract. It is highly recommended that the reviewer be expected to submit a written report within two weeks of an on-campus visit and payment be made contingent upon a timely submission of a written evaluation which satisfactorily addresses the conditions laid out in the contract. The provost will reimburse up to \$2000 of the reasonable expenses and an honorarium for an external reviewer. Expenses beyond \$2000 are covered by the dean or department. Typically, there will be just one reviewer. In some instances, given the complexity of the program (e.g., some interdisciplinary programs), challenges facing the program (e.g., seeking major reorientation), or a program review of multiple programs, more than one external reviewer may be used. Permission for multiple reviewers and responsibilities for covering all costs should be determined prior to inviting the reviewers and having reviewers sign any contracts.

Abbreviated Review Process

Most academic programs will participate in the full program review process. However, two alternative processes exist: 1) for programs that have recently gained specialized accreditation status, and 2) for small undergraduate programs.

Specialized Accreditation

Units that seek and maintain specialized accreditation with an organization that is a member of the Association of Specialized and Professional Accreditors⁵ will be allowed to engage in an abbreviated program review process. Programs that undergo another

⁵ See <http://www.aspa-usa.org/> for list of ASPA members.

external review process should contact the vice provost for academic effectiveness to determine if an abbreviated review process is appropriate. Accrediting bodies vary on their criteria and emphases; therefore, deans and chairs should engage in a conversation with the vice provost for academic effectiveness in the year preceding program review to determine what will be required in addition to the accreditation documentation. A Crosswalk Table is provided in Appendix D to structure data for this discussion. This abbreviated review process for accredited programs must include the following information. Additional information may be included as necessary.

- Submission of the self-study prepared for the specialized accrediting group
- Additional information required for program review but omitted from the accreditation process
- Submission of the letter documenting accreditation or reaccreditation and any reports from the site visitors. This group serves as the external reviewers.
- SWOT analyses carried out by both the program faculty and dean
- Rating for quality, recommendations of program size, and resource implications by program faculty and dean
- Culminating interview with and feedback from provost

The timing of program reviews for these programs will be aligned with the accreditation cycles whenever possible. If accreditation is obtained without a site visit, those programs should invite an external reviewer as described in this handbook.

Small Undergraduate Programs

Small undergraduate programs that graduate few students annually may request a modified review process. Having few enrolled or graduated students makes an analysis of student outcomes of limited value. Moreover, the question of whether it is possible to have a quality program that is very small and whether it is a sound use of resources (human and financial) to do so must be addressed. If there are plans to grow or refresh the program, those should be outlined and commitments made as part of the program review self-study. If there are plans to merge the program with another or to eliminate the program, those too should be detailed. Sometimes an external reviewer is brought in to provide advice on possible directions. Any modifications to the program review process must be discussed with the dean, the program and/or department leadership, and the vice provost for academic effectiveness well in advance of the scheduled program review.

Unusual Circumstances

In unusual circumstances, with prior approval of the vice provost for academic effectiveness, it is possible to modify the program review process. The nature of the modifications will be specified by the provost in consultation with the relevant dean and with consideration of the unique characteristics of the program under review.

Action Plan

After the visit and receipt of feedback from the external reviewer, a final program-level SWOT is prepared. It is followed by an action plan developed by the department that outlines steps for maintaining strengths and correcting weaknesses, as well as strategies for responding to opportunities and threats. The action plan must address the following questions:

1. Should the program be continued or eliminated? Should the program grow?
2. What should the department or council do to strengthen the program? When will these actions take place? What resources will be required?
3. Are there actions that could be taken by others that would improve the program? If so, what are they, when should they occur, and what resources are required?

Although the action plan should be program specific, it is difficult to isolate programs within a department or college. Therefore, this section of the document might summarize program actions as they relate to and influence other programs. This analysis will be most useful when it is realistic, and developed with the recognition that resources for new initiatives most often come from reallocations within the department or college.

Summary Ratings and Rationale

The self-study prepared by the program faculty concludes with three summary ratings, using the scales specified below (see Table 2), each accompanied by a brief rationale. Faculty provide a rating of the program's overall quality based upon the evidence in the self-study. Next, a recommendation is made regarding program size. Should the program increase, decrease, or remain the same size? Should it be combined with other similar programs? Or is this a program that should be eliminated? Finally, the faculty provide a rating of the resource funding. Are the resources adequate? What could the program do differently with the current resources? Are additional resources needed? If additional resources are needed, include an explanation of the expected source of the funding.

Table 2 - Summary Ratings of Quality, Size and Funding	
First Dimension: Program Quality	
1 = Exceptional Quality	Program quality is truly exceptional, constituting one of the top programs among comparator programs nationally.
2 = High Quality	Program is of high quality and needs few, if any, improvements.
2.5 = Moderately High Quality	Program is of moderately high quality, but needs improvement in a few areas.
3 = Needs Improvement	Program is a solid program, but needs significant

	improvement in many areas.
4 = Low Quality Program	Program is of marginal or low quality.
Second Dimension: Program Size	
1 = Increase Size	Program is in high demand or demand is expected to increase.
2 = Maintain Size	Program size should remain the same.
3 = Decrease Size	Program demand is reduced. Decrease size of program.
4 = Combine with another program	Program will be strengthened if combined with another program.
5 = Eliminate Program	Program is no longer needed. Plan for program deletion.
Third Dimension: Resource Funding	
1 = Top Priority	Program needs additional resources and should be a priority for new resources or reallocation of existing resources.
2 = Secondary Priority	Program needs additional resources and should be a priority for new resources or reallocation after addressing top priority programs. <ul style="list-style-type: none"> a. University-level reallocation b. Provost-level reallocation c. College-level reallocation
3 = No Increase	Program does not need additional resources beyond those that are available at the department level or through department actions.
4 = Reduction	Program resources should be reduced and reallocated to higher priority programs.

Submitting the Materials to the Dean and Provost

A final document should be prepared for each dean with program oversight. Deliver a final copy to the dean and request completion of the dean's SWOT and ratings. If the program is interdisciplinary and involves more than one college, submit a copy of all materials to all deans. All graduate programs should submit one copy of all materials to the graduate dean. The dean(s) will add their SWOT analysis and ratings to the document. Forward one paper copy and one electronic copy of the complete document to the Provost's Office along with a request for a final interview. The hard copy and the electronic copy should be well organized with tabs or bookmarks identifying the program review sections as noted in this handbook.

No.	Section Title
1	Table of Contents and List of Participating Program Faculty
2	Self-study
4	Library and Information Technology Forms
5	External Reviewer Report and External Reviewer's CV
6	Departmental SWOT, Action Plan, and Ratings
7	Dean SWOT and Ratings

Action of the Dean (or Deans)

The responsible dean and graduate dean in the case of graduate programs will review the self-study, report from the external reviewer, SWOT analysis, and the program's overall quality, size, and funding ratings as submitted by the department or council. The dean (or deans working independently or together) will then provide a response in the form of a SWOT analysis and suggested next steps, along with his or her own ratings of quality, size, and funding. The dean will then submit the complete program review to the provost.

Culminating Conversation with Provost

After the documents have been forwarded to the provost, the provost's office (774-7162) will schedule a meeting of the provost, vice provost, dean and graduate dean for graduate programs, and department or interdisciplinary council chair. This meeting is scheduled as soon as possible after receiving the materials. The program narrative, SWOT analyses, external reviewer's comments, and ratings will be discussed along with the next steps in the development of the program. Discussion might focus on the following questions:

- How will the unit build on success?
- How will it improve upon shortcomings?
- What, if any, new directions are going to be pursued?
- What resources are needed to accomplish this?

Provost's Feedback

The provost's letter will include a summary rating of quality and needed resources as well as a set of recommended actions to be taken by various individuals in response to the program review. Most actions come with a deadline prior to which an update, final report, or action should be taken. Other more frequent updates are welcomed from the dean or the program leadership (through the dean) in a letter or email to the provost with a copy to the vice provost for academic effectiveness.

As program faculty and departmental and college leadership take actions in response to program review, or new opportunities or challenges emerge, faculty through their dean should feel free to propose alternative actions to those called for by the provost if in their judgment those would be in the best interests of the program's students and faculty and CMU.

Department Follow-up and Closing the Loop

One very important outcome of program review is what happens after the final discussion with the provost. Although this section has few words and comes last in this document, it is ***the most important piece in the program review process***. Program review should lead to program improvement based on the data analysis of the self-study, recommendations of the external reviewers, discussion with the dean and provost, and—most importantly—reflection among program faculty. The department faculty should reflect on what they learned through the process and develop a concrete plan to improve the program. The Action Plan developed as part of the self-study may need to be revisited for potential revision. The actions taken in response to the provost's recommendations should complement the program improvement process initiated by the department. Finally, reflection on program quality is a continuous process that should engage all faculty and be a topic of discussion in every department on an annual basis. Departments may find that a good time for these discussions comes during the development of the Assessment Report of Student Learning Outcomes. If at any time you would like to have a discussion concerning program improvement, the data that informs that process, or actions that may be taken, please never hesitate to contact the vice provost for academic effectiveness at 989-774-3632. Thank you for putting in the effort to make this process meaningful.

Appendix A: Program Review Criteria Table

Program Quality Indicators	Relevant Questions	Data Definition	Data Source
Environmental Variables			
1. Description of program including purpose and goals.			
A. Relevance of program purpose and goals	Broadly stated, what are the educational purpose and goals of this program? When were they last reviewed? What was the process? Who was involved? Did it lead to revision?	Statement of program mission, purpose and goals from assessment plan and Bulletin description.	Assessment Plan (WEAVEonline) Current Bulletin
B. Relationship of program to university and college mission	How are the program purpose and goals related to the university and college mission and goals?	Alignment of program with college and university mission and goals	President's and College websites: https://www.cmich.edu/about/Pages/university_goal.aspx Narrative
C. Clarity and communication of program goals	How are the program purpose and goals communicated to students?	Narrative	Narrative
2. Current and Future Demand			
A. Student demand	What is the trend in student demand over the past 5 years? How do you explain changes? Is there student demand that the program cannot meet? How is the program marketed to students?	Number of signed majors/minors, number of intended majors	Student Enrollment Profiles by Program Reports Intended Majors of First-time Freshmen Reports
B. Employment forecast	What are the employment opportunities for program graduates? What is the trend for employment 5 years from now? How has the program taken employment forecasts into account?	Labor statistics (US and MI) showing future demand	U.S. Bureau of Labor Statistics Michigan Labor Market Information U.S. Bureau of Labor Statistics http://www.bls.gov/data/#projections

Input Variables			
3. Quality of Enrolled Students			
A. Academic characteristics of enrolled students	Is there effort to analyze the characteristics of incoming students? Are the faculty aware of these characteristics? Is the program responsive to the characteristics of the students? Are there opportunities for informal student/faculty interaction?	Mean HS GPA, ACT Scores, transfer GP GRE, GMAT or equivalent for graduate programs	Student Enrollment Profiles by Program Reports
B. Student characteristics – do they reflect the diversity in the field?	How does the diversity of students enrolled in the program compare with the diversity in the field? What efforts are made to recruit a diverse student population? Do all groups of students demonstrate the same retention and graduation rates? If not, what are the plans to correct disparities?	Gender and ethnicity percentages	Student Enrollment Profiles by Program Reports Demographics of field Recruitment plan
4. Quality of Program Faculty			
A. Degrees, rank, TT/temp, date of hire	What is the distribution of faculty in the program? Is this the optimal use of faculty resources for program delivery? Do the faculty represent the diversity in the field? Is there a critical mass of faculty to teach in the program and to supervise students?	Highest degree, TT/temp, rank, date of hire Gender and ethnicity percentages Analysis of FTE and SCH production % of faculty who are graduate faculty	OFIS report (Select: 1. Faculty Information, 2. Year range, 3. Department name – save, build report) If you do not know the gender and ethnicity of your faculty, contact Faculty Personnel Services Demographics of field Narrative
B. Research/ Creative activity – including publications with students	What percentage of the program faculty are research active? What percentage engage in research with students? Are there differing modes of scholarship among the faculty? Do	Intellectual contributions, creative activity, presentations, funded grants, % of research- active faculty	OFIS reports (Select: Intellectual Contributions (or Creative Works) by Faculty, Intellectual Contributions (or Creative Works) with Students = lists all pubs/ presentations by faculty member); Select: Annual Report College OR Department (excel V2) for a

	the faculty bring results of their research to the classroom?		summary table.) ORSP data or OFIS reports (Select: Contracts, Grants and Sponsored Research by Faculty, 2. Year range, 3. Department name – save, build report) ORSP: Thompson-Reuters Impact Factor data
5. Review and Analyses of Curriculum			
A. Competitive, relevant	How do the goals of your program compare to the goals of similar programs at other institutions? What are the characteristics of other exemplary programs? What recent trends/changes have occurred in the field? Does this program prepare students for employment? Are the Master Course Syllabi current?	Compare to standards or programs at other universities Alumni/employer comments	Professional or accreditation standards Peer institution websites Professional white papers, trend analyses, etc. Employer and/or alumni surveys (contact Academic Affairs for more information)
B. Appropriate sequencing of content and prerequisites	What is the plan for the program and how was it determined? Is there a common core of courses taken by all students? Does this sequence of courses reflect the most efficient program? Do the courses build on one another? When was the curriculum last reviewed? What changes were made? Does the curriculum introduce students to the methodology of the discipline? Are there bottlenecks that prevent students from advancing in a timely manner? What steps have been taken to remove these barriers?		Narrative, transcript analysis Discussion among faculty, analysis of learning outcomes
C. Capstone experience – does it exist? Is it effective?	Describe the capstone experience. Does it allow for integration of knowledge and methodology	Alumni/employer/graduating student feedback Comments from internship or	Survey of students, employers, faculty (contact Academic Affairs for available institutional data)

	common to the field? Does it challenge students to problem solve and deal with the societal and ethical issues of the field? If there is no capstone experience, explain why.	student teaching supervisor if appropriate.	
D. Does the program prepare students to live and work in a global and diverse environment?	Are there internship or summer employment opportunities for students? Do these experiences connect to employment opportunities in the field?	Analysis of curriculum Evidence of content on global issues	Narrative with examples Study abroad participation International internships
6. Program delivery - Best practices pedagogy			
A. Effective teaching	How does the program encourage high quality teaching? What mechanisms exist to improve teaching? What mechanisms exist to connect faculty who teach the same or similar courses to facilitate planning? What mechanisms exist to mentor new faculty? If graduate students teach in the program are they well trained and supervised? Are teaching evaluations taken into account when making teaching assignments related to this program?	Mean SOS item #8, GA teaching survey results Teaching Awards Use of small groups, problem-based learning, development of critical thinking skills	<i>Faculty Evaluation Reports.</i> <i>Off-campus Programs, Academic Program Prioritization</i> OFIS reports (Awards and Honors; Supervised Student Learning) Observations Grad student training Mentoring of new faculty
B. Research in scholarship of teaching and learning	Are any faculty engaged in the scholarship of teaching? Do they serve as a resource for others? Are there opportunities for the faculty to regularly discuss teaching strategies?	Faculty publications, presentations on teaching Faculty discussion around pedagogy	OFIS report (see 4.B above) Seminar schedule, special event, regular study groups Dates of MCS updates
C. Recent course redesign	What courses have been redesigned? When? What was the nature of the redesign? What teaching techniques, such as small group learning, team teaching, etc., are present in the program?	Description of revisions and why	Narrative
D. Use of technology	What instructional technologies are used in the program? How do you know if they are effective? Are they	Description of innovative and appropriate use of technology	Narrative

	available to all students in the program?		
7. On-line availability			
A. Is the complete program available on line?		Yes or no	
B. Which courses are available on line or in hybrid format?		List of on line and hybrid courses Description of delivery	Narrative
C. Plans for on line or hybrid delivery		Courses or entire program delivery	List of courses, delivery mode, off-campus locations Narrative
8. Resources			
A. Facilities	Are the program facilities adequate? Are they safe? Is the equipment what is needed? Is it current?	Adequate, safe	Floor plans, safety inspections, comparison with other institutions
B. Library Holdings		Discussion with librarian on holdings	Program Review Library Survey
C. Technology		Discussion with technology team	Program Review Technology Survey
Outcome Variables			
9. Student Learning			
A. Assessment of Student Learning Outcomes	What are the intended educational outcomes of the program? Have the faculty discussed the assessment results? Did any changes result from the analysis of SLO? Is there opportunity for students to reflect on their learning and provide feedback?	Evidence of SLO	Annual Assessment Reports (WEAVEonline) Discussion with the assessment coordinator and the preparation of a five year summary of student learning
B. Quality of theses, dissertations, honors papers, capstone papers, presentations, etc.	Do students complete a capstone experience? How is this experience reviewed for quality? How is this information used for program improvement?	Analysis of quality	Results of jury Awards Rubrics
C. Scores/pass rates on standardized tests	Are standardized tests taken by the students in the program? Are they taken by all students or a select	Standardized tests given to all graduates Graduate/professional school	ETS field tests, ACS MCAT, GRE, etc.

	group? How are the results used for program improvement?	admission tests Certification tests	MTTC Results , accounting tests, etc.
D. Mean cumulative GPA at graduation, cumulative hours to graduation, years to graduation	What is the mean GPA of graduates? Is it appropriate? What percentage of students enrolled in the program graduate? Could this number be increased? How long does it take for students to graduate? How many credits does the average graduate have at graduation? How does the program justify that number of credits? Has there been discussion among the program faculty of student time to graduation and number of credits at graduation?	Mean GPA of majors/ minors at graduation Number of credits at graduation Time to graduation	Student Graduation Profiles by Program Reports
10. Student scholarship and creative activity			
A. Student publications, presentations, grants, and creative activity	Do students engage in research or creative activity that leads to publication or presentation? What is the quality of these activities? What percentage of the enrolled students engage in research or creative activity? How are faculty rewarded for mentoring student research or creative activity?	Evidence of student scholarship with or without faculty co-authorship Graduate programs should present evidence of the quality of the theses	OFIS reports with student co-authors (Select: Intellectual Contributions (or Creative Works) with Students = lists all pubs/ presentations by faculty member); Department records, SCREE Awards
11. Student Accomplishments after Graduation			
A. Graduate/Professional school acceptance	Are the intended outcomes for the program the most appropriate for preparation for professional/ graduate school? What is the number of graduates applying for admission to professional/ graduate schools and what is the acceptance rate? What are the recommendations for program improvement from those who have gone on to professional/ graduate school?	Evidence of successful completion of professional/ graduate programs	Number of students accepted Quality of schools Survey or focus groups of students in professional or graduate schools

<p>B. Employment</p>	<p>Are the intended outcomes for the program the most appropriate for employment? What does the program do to prepare students for employment? What is the number of graduates who gain employment? Has the program incorporated recommendations of graduates and employers for program improvement?</p>	<p>Evidence of successful employment Evidence of advancement</p>	<p>Number of students employed after 1, 3, 5, 10 years Employer survey data/focus groups</p>
----------------------	--	--	--

Appendix B: Adequacy of Library Resources for Academic Programs

This form is to be completed, discussed and included as documentation for criterion in the academic program review process. To complete this form, program faculty are asked to meet with their subject bibliographers and review and discuss the state of the collections and associated services and complete this form together. Subject bibliographers will provide data on number of items held by subject/discipline.

I. Background Information (Circle the appropriate response to each question)

1. Academic Program Being Reviewed _____

(More than one program may be listed if there is a great deal of overlap in associated library resources)

2. Department _____

3. College (circle) CBA CCFA CEHS CHP CHSBS CST Graduate Studies

4. Persons completing this form: _____

Academic Program: _____

Library Bibliographer: _____

II. General Library Usage (To be completed by program faculty)

1. Rate general level of satisfaction with library resources:

	Strongly Disagree	Disagree	Neither	Agree	Strongly Agree	Not Applicable
a. collections serve program needs						
b. reserves services are useful to program faculty and students						
c. interlibrary loan services are useful						

d. reference services are available and helpful						
e. library space (i.e. meeting rooms) is available and useful						
f. MELCAT services are useful						

2. What additional information or services are needed from library staff?

III. Program Bibliographer (to be completed by program in conjunction with bibliographer)

1. How has the bibliographer communicated with faculty members in the program? (e.g. e-mail, attendance at faculty meetings, visits to individual faculty, attendance at departmental events etc.)

2. Bibliographer provided for _____ classes in the past year.

3. Is the current quantity and quality of bibliographer contact meeting this program's needs?

_____ Yes

_____ No

If not, please elaborate on how the bibliographer or the program faculty could improve the support of the program's library-related needs?

IV. Library Collections

1. To what extent are the following statements true about the CMU Libraries' collections relative to the needs of the program being reviewed?

Collections serve current instructional needs	Strongly Disagree	Disagree	Neither	Agree	Strongly Agree	Not Applicable
a. Research Databases						
b. Books						
c. Journals						
d. Non-print Media						
Collections serve current creative and scholarly activity	Strongly Disagree	Disagree	Neither	Agree	Strongly Agree	Not Applicable
a. Research Databases						
b. Books						
c. Journals						
d. Non-print Media						
Collections serve likely <u>future</u> instructional needs	Strongly Disagree	Disagree	Neither	Agree	Strongly Agree	Not Applicable
a. Research Databases						
b. Books						
c. Journals						
d. Non-print Media						

Collections serve likely future creative and scholarly activity needs	Strongly Disagree	Disagree	Neither	Agree	Strongly Agree	Not Applicable
a. Research Databases						
b. Books						
c. Journals						
d. Non-print Media						

2. What would make Library collections and associated services more usable?

3. Summary Comments and Recommendations:

Upon completion:

1 copy to be included in Program Review

1 copy to be provided to Dean of Libraries

Appendix C: Adequacy of Information Technology Resources for Academic Programs

Please contact Kim Vogel (vogel1kc@cmich.edu) (989-774-1771) in the Office of Information Technology to make arrangements to complete this form. She will arrange for a meeting to discuss these questions in an effort to assess the adequacy of resources and services available to academic programs. The completed form is to be included in the academic program review document.

Questions for the group:

1. How are your staff and faculty currently using technology in their day to day work?
 - What is the level of technology expertise in the department?

 - Are there areas in which faculty and staff are more proficient than others?

 - Are there areas in which technology training or education would help the department function better?

 - Do you feel you have adequate technology support for staff and faculty in your area?

 - What suggestions do you have for improving support?

2. What has been your staff and faculty's overall experience working with the OIT Help Desk?

- Are there ways in which the Help Desk can be more helpful/useful?

- Are you satisfied with the hours of operation for the Helpdesk?

3. Are you experiencing any difficulties with the mediated classrooms in your area?

- What is the level of comfort among faculty in the department in using the podiums?

- What technologies in the podiums are and are not commonly used?

- What technology changes would your staff and faculty like to see in the classrooms?

4. Does your department have a formal or informal vision for how your area should be leveraging technology?

- Who plays a role in helping to define and execute technology vision across the College or department?

- Do you feel you are close to achieving this goal/vision for your area/department?

- How can IT better facilitate your department with achieving this goal/vision?

5. Is there technology that your staff or faculty require that is not currently available on campus? Is there a demand in your area for statistical or other specialized software packages?

6. Would your faculty and staff find advanced scheduling of courses (i.e. the development of a plan of classes several years in advance) useful? Would an online system help in this area?

7. Do you find the resources on your departmental website to be effective? In what ways do you think technology could be better leveraged to increase recruitment of new students?

8. How do your faculty and staff prefer to communicate or receive information about services and technology support?

- Do you use technology interdepartmentally for communication purposes?

9. Do you believe IT allocates sufficient resources to maintaining the integrity and security of information and data? Do you have any security concerns you would be willing to share?

Questions for the departmental technician(s):

10. What is the average/standard desktop configuration in use by staff and faculty in your department? Do you have a technology or hardware replacement plan in place in your department? If so, please explain.

11. What is the mix of Macintosh, Windows, and other OS computers in the department?

12. Do you enforce some sort of security policy on computers across the College or department?

13. Do you have a formal inventory control process in the department?

14. What information and technology access do you grant to temporary or adjunct faculty in your department? How does this differ from access granted to full time faculty in your department? To grad students?

15. Do you believe there are sufficient safeguards and procedures in your department to protect the integrity and security of information and data?

Appendix D: Program Review Criteria Crosswalk for Programs with Specialized Accreditation

Accrediting bodies vary on their criteria and emphases; therefore, deans and chairs should engage in a conversation with the vice provost for academic affairs in the year preceding program review to determine what will be required in addition to the accreditation documentation. A Crosswalk Table is provided below to serve as a key to the evidence for program review that may be contained in the accreditation documentation.

Program Quality Indicators	Relevant Questions	What data are provided?	Where is this information found?
Environmental Variables			
1. Description of program including purpose and goals.			
A. Relevance of program purpose and goals	Broadly stated, what are the educational purpose and goals of this program? When were they last reviewed? What was the process? Who was involved? Did it lead to revision?		
B. Relationship of program to university and college mission	How are the program purpose and goals related to the university and college mission and goals?		
C. Clarity and communication of program goals	How are the program purpose and goals communicated to students?		
2. Current and Future Demand			

A. Student demand	What is the trend in student demand over the past 5 years? How do you explain changes? Is there student demand that the program cannot meet? How is the program marketed to students?		
B. Employment forecast	What are the employment opportunities for program graduates? What is the trend for employment 5 years from now? How has the program taken employment forecasts into account		
Input Variables			
3. Quality of Enrolled Students			
A. Academic characteristics of enrolled students	Is there effort to analyze the characteristics of incoming students? Are the faculty aware of these characteristics? Is the program responsive to the characteristics of the students? Are there opportunities for informal student/faculty interaction?		
B. Student characteristics – do they reflect the diversity in the field?	How does the diversity of students enrolled in the program compare with the diversity in the field? What efforts are made to recruit a diverse student population? Do all groups of students demonstrate the same		

	retention and graduation rates? If not, what are the plans to correct disparities?		
4. Quality of Program Faculty			
A. Degrees, rank, TT/temp, date of hire	What is the distribution of faculty in the program? Is this the optimal use of faculty resources for program delivery? Do the faculty represent the diversity in the field? Is there a critical mass of faculty to teach in the program and to supervise students?		
B. Research/ Creative activity – including publications with students	What percentage of the program faculty are research active? What percentage engage in research with students? Are there differing modes of scholarship among the faculty? Do the faculty bring results of their research to the classroom?		
5. Review and Analyses of Curriculum			
A. Competitive, relevant	How do the goals of your program compare to the goals of similar programs at other institutions? What are the characteristics of other exemplary programs? What recent trends/changes have occurred in the field? Does this program prepare students		

	for employment?		
B. Appropriate sequencing of content and prerequisites	What is the plan for the program and how was it determined? Is there a common core of courses taken by all students? Does this sequence of courses reflect the most efficient program? Do the courses build on one another? When was the curriculum last reviewed? What changes were made? Does the curriculum introduce students to the methodology of the discipline? Are there bottlenecks that prevent students from advancing in a timely manner? What steps have been taken to remove these barriers?		
C. Capstone experience – does it exist? Is it effective?	Describe the capstone experience. Does it allow for integration of knowledge and methodology common to the field? Does it challenge students to problem solve and deal with the societal and ethical issues of the field? If there is no capstone experience, explain why.		
D. Does the program prepare students to live and work in a global and diverse environment?	Are there internship or summer employment opportunities for students? Do these experiences connect to employment opportunities in the field?		
6. Program delivery - Best practices pedagogy			

A. Effective teaching	How does the program encourage high quality teaching? What mechanisms exist to improve teaching? What mechanisms exist to connect faculty who teach the same or similar courses to facilitate planning? What mechanisms exist to mentor new faculty? If graduate students teach in the program are they well trained and supervised? Are teaching evaluations taken into account when making teaching assignments related to this program?		
B. Research in scholarship of teaching and learning	Are any faculty engaged in the scholarship of teaching? Do they serve as a resource for others? Are there opportunities for the faculty to regularly discuss teaching strategies?		
C. Recent course redesign	What courses have been redesigned? When? What was the nature of the redesign? What teaching techniques, such as small group learning, team teaching, etc., are present in the program?		
D. Use of technology	What instructional technologies are used in the program? How do you know if they are effective? Are they available to all students in the program?		

7. On-line availability			
A. Is the complete program available on line?			
B. Which courses are available on line or in hybrid format?			
C. Plans for on line or hybrid delivery			
8. Resources			
A. Facilities	Are the program facilities adequate? Are they safe? Is the equipment what is needed? Is it current?		
B. Library Holdings			
C. Technology			
Outcome Variables			
9. Student Learning			
A. Assessment of Student Learning Outcomes	What are the intended educational outcomes of the program? Have the faculty discussed the assessment results? Did any changes result from the analysis of SLO? Is there opportunity for students to reflect on their learning and provide feedback?		
B. Quality of theses, dissertations, honors papers, capstone papers, presentations, etc.	Do students complete a capstone experience? How is this experience reviewed for quality? How is this information used for program improvement?		

C. Scores/pass rates on standardized tests	Are standardized tests taken by the students in the program? Are they taken by all students or a select group? How are the results used for program improvement?		
D. Mean cumulative GPA at graduation, cumulative hours to graduation, years to graduation	What is the mean GPA of graduates? Is it appropriate? What percentage of students enrolled in the program graduate? Could this number be increased? How long does it take for students to graduate? How many credits does the average graduate have at graduation? How does the program justify that number of credits? Has there been discussion among the program faculty of student time to graduation and number of credits at graduation?		
10. Student scholarship and creative activity			
A. Student publications, presentations, grants, and creative activity	Do students engage in research or creative activity that leads to publication or presentation? What is the quality of these activities? What percentage of the enrolled students engage in research or creative activity? How are faculty rewarded for mentoring student research or creative activity?		
11. Student Accomplishments after Graduation			

<p>A. Graduate/Professional school acceptance</p>	<p>Are the intended outcomes for the program the most appropriate for preparation for professional/ graduate school? What is the number of graduates applying for admission to professional/ graduate schools and what is the acceptance rate? What are the recommendations for program improvement from those who have gone on to professional/ graduate school?</p>		
<p>B. Employment</p>	<p>Are the intended outcomes for the program the most appropriate for employment? What does the program do to prepare students for employment? What is the number of graduates who gain employment? Has the program incorporated recommendations of graduates and employers for program improvement?</p>		

Criterion 4 Evidence
Program Review Schedule 2012-2017

Program Review Schedule (2012-2013 to 2016-2017)

(last updated 3/3/2016)

Programs needing review:

- Graduate Programs (each degree and each concentration)
- All Majors (each concentration within a major)
- Stand-alone minors
- Honors Protocol
- General Education Program

Programs that do NOT undergo program review:

- Minors that are part of a major
- Certificates
- 2+2 programs
- Accelerated Programs
- Programs on hiatus

Criterion 4 Evidence
Provosts Assessment Incentive Award 2015-2016

Provost's Assessment Incentive Award 2015-2016

Call for Proposals: The purpose of the Provost's Assessment Incentive Award is to encourage departments and councils to use assessment data for program improvement. Departments or interdisciplinary councils that clearly demonstrate how they used assessment data to improve an academic program or student success may apply for a \$5,000 incentive provided by the Provost, which will be matched by the appropriate dean's office. This commitment from the Provost is for \$5,000 awarded to a maximum of five departments or interdisciplinary councils each year for five years, ending 2018-2019. At the end of five years, the incentive program will be reviewed to determine its effectiveness.

Deadline: All applications must be received by 5:00 pm December 18, 2015. Submit applications electronically to Leslie Watters, Academic Effectiveness (devin1lk@cmich.edu).

Decisions: On or before January 29, 2016.

Award management: All awards will be transferred to the recipient's department or, in the case of interdisciplinary programs, to the recipient's college. The funds may be used at the program's or council's discretion, as long as university policies are followed. All awards are to be spent within two years. All unused funds will be returned to the dean/provost. A brief report explaining how the funds were used is due within 30 days after all funds are expended, and no later than January 31, 2018. Please submit reports and a summary of expenditures to Leslie Watters, Academic Effectiveness (devin1lk@cmich.edu).

Limitation: Applications will be judged first on merit. In the case of equally qualified applications, preference will be given to the program belonging to a department or council that has not received an award in the last three years.

Criteria:

1. All successful applicants must demonstrate that they have used student learning outcome assessment data to significantly improve either the program or student success.
2. The applicant must provide data collected using appropriate methodology. Preference will be given to programs presenting data spanning multiple years, collected using multiple measures, and/or allowing for comparison to other institutions. Please use tables or graphs as appropriate to present data.
3. The applicant must clearly provide a narrative summarizing the assessment findings/data.
4. The applicant must provide a very clear statement describing how the assessment data were used to guide program improvement and/or student success, for example course redesign, revision of curriculum, incorporation of technology, etc.

Review Process: The Review Committee will consist of the Vice Provost for Academic Effectiveness (non-voting chair), Director of Curriculum & Assessment, Assessment Council Chair, and one or two assessment coordinators who are faculty, one or two additional faculty nominated by the committee and appointed by the Provost. The Review Committee will make recommendations to the Provost who will make funding decisions.

Provost's Assessment Award Application 2015-2016

Due: Friday, December 18, 2015 4:30 p.m.

Application Cover Page

Program Name (including concentration): _____

Degree: _____

Department or Interdisciplinary Council: _____

Lead Author: _____ Email: _____

Names and department of those directly involved in the development of this application:

Approval of Department or Interdisciplinary Council Chair: _____
Signature

Printed Name: _____ Date: _____

Approval of Dean/Associate Dean: _____
Signature

Printed Name: _____ Date: _____

Application Narrative

Application: Use an easily readable font no smaller than 11 point, 1" margins, and single space.

Proposal Preparation: Narrative not to exceed five pages (brevity and bullet points are appreciated). Provide clear evidence that data were used for program improvement or gains in student success. Programs, student learning outcomes, and program outcomes vary greatly. Therefore, the applicant must organize the data in a logical and coherent manner to demonstrate program improvement. Refer to the criteria above for essential elements to include that demonstrate that assessment data were used for effective program improvement and/or increased student learning. It is helpful if the application is organized so as to provide an introduction to the assessment problem, methodology for collecting data including instruments, a summary of the findings, and then a clear statement of how those findings improved the program and/or student success.

Criterion 4 Evidence
Request for Transfer Credit

CENTRAL MICHIGAN UNIVERSITY

UNDERGRADUATE ACADEMIC SERVICES
OFFICE OF THE REGISTRAR
WARRINER HALL ROOM 123
PHONE: 989-774-3504
FAX: 989-774-7252

DIRECTIONS: This form is official verification of transferability of courses that are NOT listed on the TRANSFER EQUIVALENCY WEBSITE and should be used by undergraduate CMU students only. All information (including CMU equivalencies) must be provided before this request will be processed. Grades and honor points are not accepted in transfer. The transfer credit policy states transferable courses must be completed at a regionally-accredited institution with a grade of C- or better. Grades of D+, D, or D- do not transfer. For a transferred course to fulfill a competency requirement, it must be transferable, and completed with a grade of C or better. Whenever it can be determined that a course has an equivalent, a CMU course number will be given. Where this cannot be determined, the acceptable credit will be designated as "CR".

Criterion 4 Evidence Risk Factors Summary

Summary of Risk Factors Analysis

Please direct questions to: Robert M. Roe, PhD
Executive Director of Institutional Research and Planning – x 7205, roe1rm@cmich.edu

Purpose

- A simple method for determining students at risk for attrition before they arrive on campus
- A way to measure the impact of individual risk factors
- A way to measure the impact of multiple risk factors

Method

- Choose a set of risk factors from literature (academic, financial, minority, first generation)
- **Academic Risk Factor** - Institutional Rating < 63. Institutional Rating = $(50/36)*ACT + (50/4)*HSGPA$
- **Low Income Risk Factor** - Pell Eligible
- **Minority Risk Factor** - Minority Status
- **First Generation Risk Factor** - Neither Parent any College - From FAFSA
- Identify students with risk factor(s)
- Track historic prevalence and impact on retention
- Calculate Relative Risk
- Predict future retention based on incoming class

Use

- Much literature indicates earlier intervention is more effective
- By the time a student struggles in their first year, intervention is likely too late
- Risk Factors Analysis identifies incoming students likely to be at risk for attrition
- Gives ability to reach out to at risk students with intervention specific to their risk factor(s) BEFORE issues arise

Results

Retention Rates, Relative Risk, and Prevalence by Type of Risk Factor

Risk Factor	Retention Rate ¹	Relative Risk ²	Prevalence ³
Academic	64.0%	1.69	13.8%
Low Income	68.2%	1.46	15.5%
Minority	70.4%	1.32	11.8%
First Generation	72.1%	1.28	24.3%

¹Retention rate of students with risk factor - The average retention rate from fall 2008 through fall 2012 was 76.7%

²For example, a student with the academic risk factor is 1.69 times more likely to leave than one who does not have the risk factor

³From fall 2008 through fall 2013, the proportion of the entering FTIAC class with the risk factor

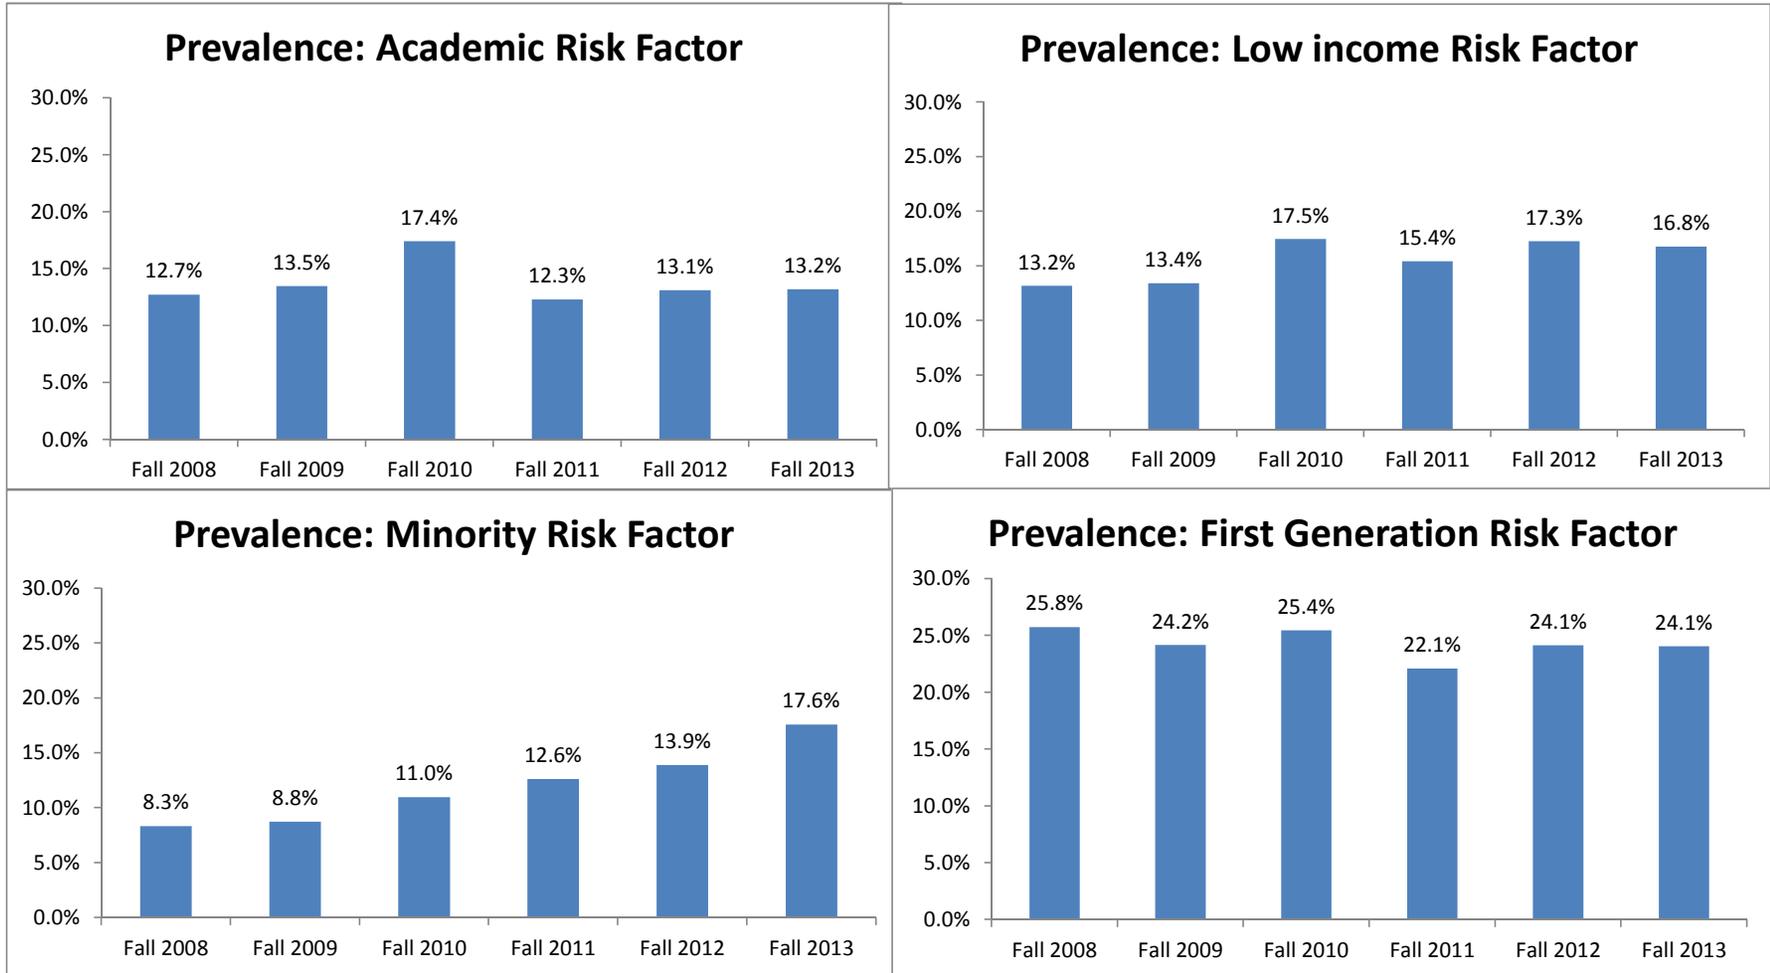

Retention Rates, Relative Risk, and Prevalence by Number of Risk Factors

# of Risk Factors	Retention Rate	Relative Risk ¹	Prevalence
0	81.1%		54.6%
1	74.6%	1.34	30.4%
2	67.2%	1.73	11.5%
3	58.7%	2.18	2.9%
4	56.2%	2.31	0.6%

¹For example, those with the 2 risk factors are 1.73 times more likely to leave than those with no risk factors

Note that 15% of the population have 2 or more risk factors (11.5% + 2.9% + .6%). With an entering class of 3300 students, 495 students would be expected to have 2 or more risk factors (3300 * .15 = 495).

Historic Prevalence of Risk Factors

¹Academic Risk Factor - Institutional Rating < 63. Institutional Rating = $(50/36) \cdot \text{ACT} + (50/4) \cdot \text{HSGPA}$

²Low Income Risk Factor - Pell Eligible

³Minority Risk Factor - Minority Status

⁴First Generation Risk Factor - Neither Parent any College - From FAFSA

Impact of Risk Factors - Retention Rates for Those With and Without Risk Factor¹

Retention: Academic Risk Factor

	Attrit	Retain	Total	Retention	Relative Risk ²
No	3459	12825	16284	78.8%	
Yes	945	1681	2626	64.0%	
Total	4404	14506	18910	76.7%	1.69

Institutional Rating < 63. Institutional Rating = (50/36)*ACT + (50/4)* HSGPA

Retention: Low income Risk Factor

	Attrit	Retain	Total	Retention	Relative Risk
No	3481	12527	16008	78.3%	
Yes	923	1979	2902	68.2%	
Total	4404	14506	18910	76.7%	1.46

Pell Eligible

Retention: Minority Risk Factor

	Attrit	Retain	Total	Retention	Relative Risk
No	3796	13062	16858	77.5%	
Yes	608	1444	2052	70.4%	
Total	4404	14506	18910	76.7%	1.32

Minority status

Retention: First Generation Risk Factor

	Attrit	Retain	Total	Retention	Relative Risk
No	3121	11185	14306	78.2%	
Yes	1283	3321	4604	72.1%	
Total	4404	14506	18910	76.7%	1.28

Neither Parent any College - From FAFSA

¹Data from FA2008-FA2012 First Time at Any College (FTIAC)

²For example, those with an academic risk factor are 1.69 times more likely to attrit than those without the risk factor

Central Michigan University (CMU) Vision and Mission

Vision Statement: Central Michigan University, an inclusive community of scholars, is a national leader in higher education inspiring excellence and innovation.

Mission Statement: At Central Michigan University, we are a community committed to the pursuit of knowledge, wisdom, discovery, and creativity. We provide student-centered education and foster personal and intellectual growth to prepare students for productive careers, meaningful lives, and responsible citizenship in a global society.

Priorities: The Strategic Enrollment Management Plan development aligns with university strategic priorities, initially focused on:

Priority 1-Student Success

- Address the following five year (FY18) goals:
 - Improve Four-Year Graduation Rate to 25%
 - Improve Six-Year Graduation Rate to 63%
 - Improve the Freshmen to Sophomore Retention Rate to 80%

Priority 2-Research and Creative Activity (especially regarding graduate programs)

- Continue transitioning and progressing as a Doctoral Research University.

Priority 5-Infrastructure Stewardship, Initiative 5.2-Enrollment & Retention Strategies

- Develop a long-term Enrollment & Retention Strategy

Strategic Enrollment Management (SEM) Introduction

SEM is a comprehensive process designed to aid the University in realizing optimal enrollment through strategic recruiting and retention practices focused on student success. SEM planning involves thorough analysis of data relevant to current student population and projections for the future. A strong SEM plan is a direct reflection and extension of the University's strategic plan and vision.

The development of SEM must be an institution-wide initiative, relying on input and buy-in from stakeholders across the university including faculty, staff and students. Other units within CMU, such as Global Campus and the College of Graduate Studies, have independent plans relating to enrollment management, marketing and recruiting. However, this SEM Plan is designed to incorporate all areas of CMU within a centralized planning initiative. CMU needs to better represent itself as "one university." As academic units increasingly combine online, hybrid, and off-campus studies with traditional campus course offerings, we need a larger, university-wide discussion on how best to position all areas of CMU to accommodate change and move the university forward.

In order to create buy-in and to better employ the wide variety of knowledge and experience our university community offers, the establishment of an Enrollment Management Committee is vital. The committee will be comprised of representatives from a wide cross-section supplying varied perspectives from the University community. By utilizing pertinent data sources and guided by the University's strategic plan, vision, and purpose, the Enrollment Management Committee will make recommendations on recruitment practices, admission standards, student success programs, and beneficial enrollment for the institution.

The use of SEM and creation of an Enrollment Management Committee are critical to the sustainability of the University as it faces increased challenges to enroll and retain students in the face of decreasing high school graduate populations in the University's primary market, increased

costs intensified by reductions in state funding, and a constant evolution of student needs. The plan will frame the activities we will take for the Academic Years 2013-14 (Fall 2013 / Spring 2014 / Summer 2014) and 2014-2015 (Fall 2014 / Spring 2015 / Summer 2015).

Executive Summary

In the last decade, leading into the Fall Semester of 2012, CMU enjoyed a period of sustained and/or increased enrollment. First time freshmen and transfer student enrollment remained consistently at target numbers, even experiencing record highs in Fall 2010 and Fall 2011. During that extended period of growth, student retention also remained relatively constant, lending to larger overall enrollment numbers for the University. Graduate enrollments increased from 1,696 (2006) to 1,922 (2010), and dropped back to 1,863 (2011). Because enrollment targets were met, undergraduate recruitment and retention processes were not scrutinized to identify the highly successful programs to continue, the less successful programs to alter or discontinue, and the new challenges of a quickly evolving marketplace.

CMU, like most institutions around the country, is not immune to the challenges facing higher education, with increased competition, governmental mandates for improved graduation rates, a more price sensitive consumer, and shrinking high school graduate populations. These significant threats must be addressed in a strategic manner to insure that enrollment goals are met, while maintaining the academic integrity of our institution, meeting the needs of our student population, and continuing to represent the mission of CMU. The process of evaluation and development of a Strategic Enrollment Management plan is a vital component of insuring that all of these expectations are met and exceeded.

The Path to Success

- The purpose of the plan is to provide a blueprint to guide our recruitment and retention efforts over the next two years to increase our opportunities for success.
- The plan intends to respond to three overarching questions:
 - What is the desired size of the university?
 - What is the desired enrollment profile?
 - What is the university's value proposition over competitor and aspirant institutions?
- The plan seeks to develop consensus regarding goals and priorities for managing enrollment at the undergraduate and graduate levels, as well as the Global Campus. The plan will enable units across campus to reexamine their positions and roles within the greater CMU enrollment management condition and to redesign their own pathways to success in accordance with the greater interests of the university as a whole.
- Successful enrollment planning facilitates attracting and enrolling the optimal student profile, and enables the university to:
 - Set goals that align with the institutional mission
 - Develop enrollment goals strategically, including the use of institutional resources
 - Balance short-term vs. long-term expectations
- The plan is a place to articulate university strengths, opportunities, threats, and challenges, particularly in response to external influences and growing competition.
- Included within the plan are data points and information to increase awareness and inform decision making regarding the desired enrollment profile. It is critically important that enrollment efforts are focused on the individuals we recruit and their opportunities to be successful at CMU. The plan will also keep us focused on the larger higher education landscape to avoid any surprises that may impact fiscal stability and institutional success.

- The plan is a fluid document and, therefore, will be updated periodically throughout each enrollment cycle to reflect and account for current trends, occupational outlook, and federal, state, and institutional decisions that may impact recruitment and retention outcomes.

We are embarking on a formal partnership to develop a strategic enrollment management plan to define our enrollment profile and instructional aspirations. As we develop this strategy, there are specific roles the Academic Colleges, Enrollment and Student Services, Global Campus, the College of Graduate Studies, and other units must play to facilitate success.

Enrollment and Student Services will:

1. Create an Office of Student Success — This new initiative will promote student retention, progression toward degrees, and graduation within four years.
2. Reengineer CMU's financial aid package — CMU is revising its financial aid package to award more and larger merit scholarships for prospective students with GPAs of at least 3.0. CMU also will expand its need-based awards for students who otherwise couldn't continue their education.
3. Expand the academic advising team — CMU is adding five advisors within the academic advising team and the colleges to support students in selecting and managing courses. CMU now has 16 dedicated advisors.
4. Implement the Talisma CRM (constituent relationship management) system — This system will allow the admissions office to automate and track communications with prospective and current students. Communications will occur sooner and at set touch-points during the recruitment cycle.
5. Recruit students earlier — CMU has secured names and contact information for 9th and 10th grade students in Michigan, Ohio, and Pennsylvania who meet certain academic criteria on the PSAT.
6. Recruit students beyond Michigan — CMU has secured names and contact information for students in Michigan, Illinois, Indiana, Ohio, Wisconsin, and for the first time Arizona, Texas, Florida, and Georgia based on their ACT/SAT scores. CMU is starting the recruitment process with more than 120,000 leads for the Fall 2014 class vs. 40,000 for this Fall's class.
7. Recruit students internationally — CMU now has two individuals dedicated to the recruitment of international students, one at the graduate level and one at the undergraduate level.
8. Conduct market research — Gain insight into awareness and perception of CMU in the marketplace. Better understand psychographics, determine key opportunities and challenges to increase our student prospect pool, market engagement of potential students, and viability of our current strategies.
9. Model financial performance as a function of UG enrollment for colleges.
10. Project enrollment by major over the next 5 to 10 years based on external factors — (e.g. high school graduation rates, changes in demographics).

The College of Graduate Studies will:

1. Enhance the graduate outcomes assessment process to review and assess program quality, enhance graduation rates, and track successful performance indicators.
2. Develop a financial assistance plan to maximize fellowship, scholarship, assistantship, loans, and other forms of financial assistance for graduate students.
3. Engage graduate coordinators and department chairs in recruiting and retention objectives.
4. Fully implement the CMU/CGS proprietary Graduate CRM.
5. Strategically recruit in-state to meet program-based objectives.
6. Strategically recruit nationally to meet program-based objectives.

7. Strategically recruit internationally to meet program-based objectives.
8. Conduct market research – to gain insight into program-based trends, opportunities, and challenges.
9. Model financial performance as a function of graduate enrollment.
10. Project enrollment by program, department, and college over the next 5 to 10 years based upon both external and internal factors.

Academic Colleges will:

1. Oversee greater involvement and leadership in establishing admissions criteria by program, college, etc.
 - Provide input to developing a holistic admissions review process.
 - Define conditional admissions criteria for those who just miss the defined admissions criteria.
 - Review and efficaciously enhance graduate admissions standards and processes.
2. Seek out and secure additional development opportunities to increase funds earmarked specifically for scholarships and need-based funding to support new and continuing students.
3. Assign proven, senior-level faculty in introductory major courses.
4. Consistently review gateway courses with high poor/failing grade rates (D, E, W, and I) and support both curricular and pedagogy revisions that will strike the appropriate balance between rigor and support (supplemental instruction, success coaching, tutoring, etc.), promoting improved academic habits and student investment in the learning process.
5. Monitor registration to assure student access to courses.
6. Create multi-year academic course offerings to support student planning and advising.
7. Provide quality advisement
 - Advocate faculty interventions with students who are underperforming to assist and/or make referrals to support services, and connect the referral with support personnel, as early as possible.
 - Advise within the colleges to support students in selecting and managing courses to promote student retention, progression toward degrees, and graduation in four years.
8. Effectively manage curriculum development (new degrees, majors, and minors) —The right product to interest the type(s) of students we want at CMU will be offered. Work with Academic Planning Council to get involved in new and obsoleting program discussions earlier as an opportunity to share occupational outlook and high interest/demand areas.
9. Prepare to actively and continuously participate in student outreach and core recruitment activities — Engage students via CRM/communication plans, admissions fairs, open houses, etc.
10. Identify a recruitment and retention liaison for each college —Ensure direct and ongoing collaboration.
11. Help define a value proposition —Identify programs where CMU is the **first, best, only** university to offer them! Identify and define programs of excellence (e.g. first quartile outcomes in graduation rates, placement, and graduate study).
12. Identify what opportunities exist in each major field of study — (e.g. occupational outlook)
13. Institutionalize an internal informational/recruiting system whereby students become aware of advanced academic opportunities beyond the bachelor's degree – (i.e. accelerated degree programs, graduate certificates, master's, and doctoral, etc.).

Enrollment Projections

On-campus enrollment projections are developed annually to provide information for budget and personnel needs for the next fiscal year. The projection methodology starts with identifying an on-campus headcount enrollment, composed of first-time freshmen, incoming transfer students, returning undergraduate and graduate students, and new graduate students. Considerations in projecting freshmen enrollment include the size of the Michigan high school graduating class, and CMU’s market share of that class. New freshmen and transfer student projections are influenced by changes at CMU and among key competitors in recruitment initiatives (especially tuition pricing), institutionally-funded scholarships, and new academic programs. Graduate enrollment numbers, including both domestic and international graduate enrollments, are determined relative to historical enrollment, new programs, program deletions, recruiting efforts, and the availability of graduate assistant funding. Returning undergraduate enrollments follow historical persistence rates and consider marked changes in students’ time-to-degree. CMU’s Enrollment Profiles and Projections document provides additional information.

Once enrollment headcount is determined, semester credit hours (SCH) are projected. SCH are projected by designator, department, college, level, tuition cohort, and semester using expected credit hour loads per student type and a modified Markov process to spread SCH consistent with recent history and adjusted for recent trends.

The enrollment projections serve as the base on which enrollment goals are developed in addition to items such as revenues, expenses, marketing investments, break-even analysis, overhead, revenue/expenses by course, new programs, discontinued programs, facility availability, online delivery subscription, and faculty availability.

Enrollment Goals 2013 – 2015

Here are performance indicators as well as goals established as of September 2013.

	Fall 2012 Actual	Fall 2013 Goals	Fall 2014 Goals	Fall 2017 Goals
Undergraduate new FTIACs on-campus	3,345	2,850*	3,184	3,600**
Undergraduate new transfers on-campus	1,215	1,050*	1,100	1,200**
One-year retention rate change	75.4% (-0.4%)	77% (+1.6%)	78% (+1.0%)	80% (+2.0%)
Total undergraduates on-campus	18,686	18,000***	18,200***	18,000***
Minority students on-campus	2,095 (10.22%)	1,990*** (11%)	2,100*** (11.5%)	3,780*** (21%)
Graduate new students on-campus	482	501	516	534
Graduate students on-campus	1,818	1824	1840	1910
International new undergraduate students on-campus	91	109 (+20%)	136 (+25%)	170 (+25%)
International new graduate students on-campus	116	150 (+30%)	195 (+30%)	253 (+30%)
Total On-Campus enrollments	20,504			

OIR – Official Fall Headcount Data

*revised 6/2013

**historical high as base

***As of 8/30/13, to be updated in September

These goals are in recognition of the current market performance as well as the opportunity to expand our reach beyond the State of Michigan. The goals will be monitored and adjusted as milestones are reached.

Organizational Structure for the Enrollment Management Committee

CMU supports enrollment management as a strategic, university-wide program designed to provide student service, satisfaction, and success. While responsibility for enrollment management is shared by all, the Enrollment Management Committee has been charged with providing sound advice and recommendations to the university's executive leadership on optimal enrollment profile and matters influencing the establishment and attainment of enrollment goals. This will be accomplished through a comprehensive evaluation of internal and external data, including demographic, geographic, and financial influences on recruitment and retention, and through an advanced, qualitative assessment based upon discussions with academic unit directors, chairs, and college deans. The primary objective of the committee will be to ensure that recruitment, enrollment, and retention practices align with the institution-wide strategic plan, mission, and purpose of attracting, educating, and graduating highly qualified students.

Enrollment Management Subcommittee Descriptions

Academic Subcommittee

The subcommittee on academic enrollment management will analyze data specific to academic program offerings at the undergraduate and graduate levels with a goal of improving degree completion and job placement outcomes. The committee will:

- Review and verify academic program offerings as compared to occupational outlook and other demand indicators.
- Conduct major demand analysis.
- Analyze curricular complexity and choice and make recommendations for improvement.
- Identify collaborative opportunities that integrate career and academic advising.

Recruitment Subcommittee

The subcommittee on recruitment will review current recruitment practices for the on-campus, undergraduate admissions enterprise. The committee will review current market penetration, strategies for identifying target markets, potential out-of-state markets, evaluate the communication plans for a variety of audiences, and make recommendations for continuation and implementation of new strategies. The committee will also review the methods and philosophy for evaluation of applicants and make recommendations according to effectiveness in meeting class size and profile enrollment goals. The committee will additionally involve the College of Graduate Studies to review graduate level, program-based recruiting goals and objectives, identify areas of shared interests and potential cooperation, and make recommendations for enhanced marketing and recruiting initiatives.

Retention Subcommittee

The subcommittee on retention will examine student persistence and graduation rates across all departments, programs and colleges. The committee will analyze data (retention, withdrawal, transfer, student satisfaction, etc.) and recommend strategies to enhance CMU's retention and graduation rates.

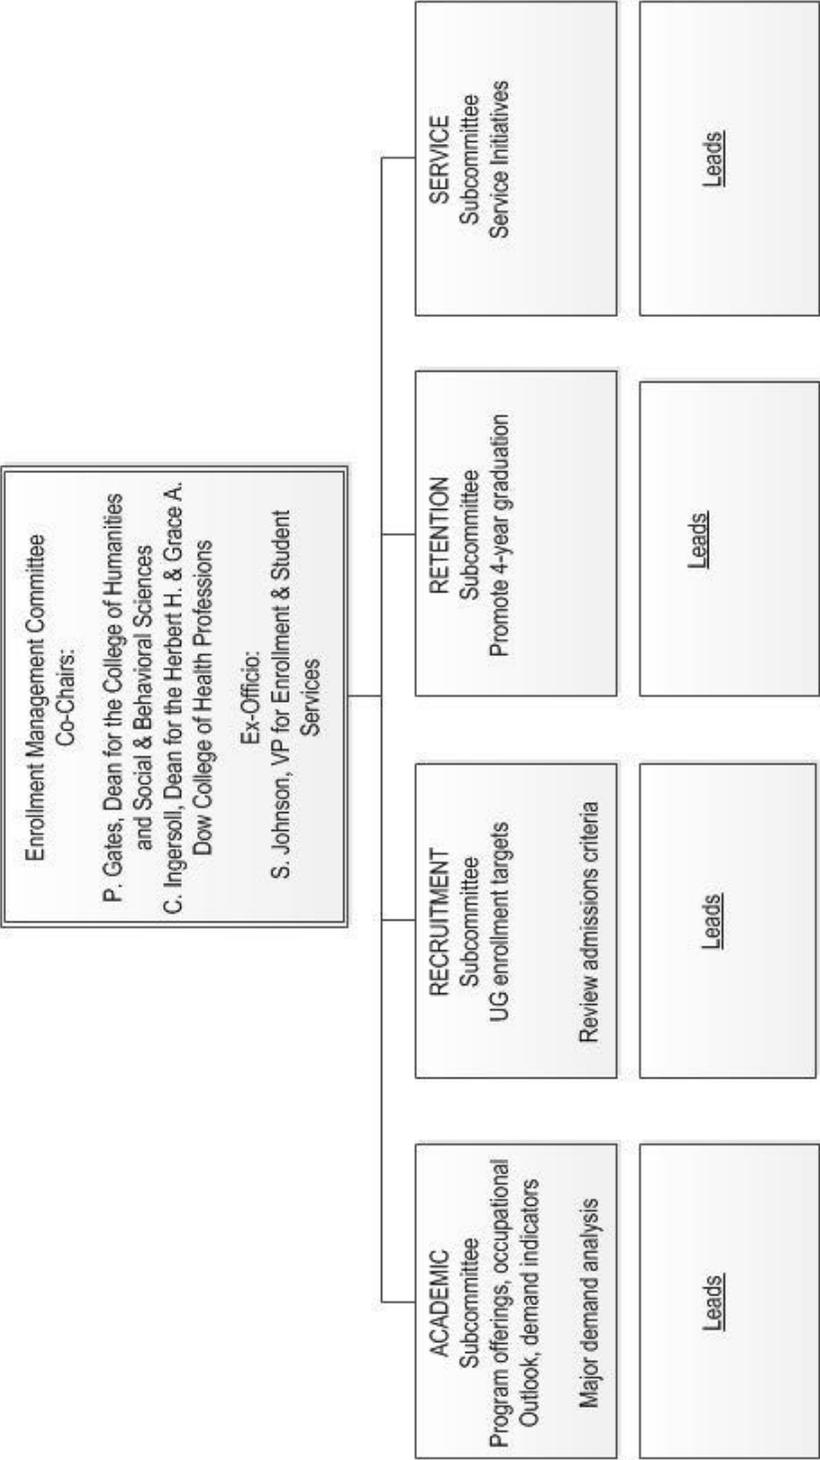

The committee will recommend long-term strategies to address the ongoing needs of all students, and partner with other campus constituencies to advance priority action items. These priority action items will likely include the following:

- Analyze and communicate retention data and best practices across campus.
- Share ideas and initiate conversations on issues contributing to retention, such as campus culture, shifting student demographics, etc.
- Recommend the implementation of programs for identifiable at-risk groups.
- Seek ways to enhance academic and social interaction among all student populations, including international students, diverse and underrepresented populations, graduate and undergraduate students, full-time and part-time students, rural and urban populations, etc.
- Participate in national research and conferences as appropriate.
- Evaluate institutional policies, practices, and procedures as they pertain to student retention.

Service Subcommittee

The subcommittee on services will examine the impact of student services and activities on recruitment, student connectedness and retention. The subcommittee will also examine data (student engagement, satisfaction, retention, etc.) to recommend strategies to enhance future efforts to increase enrollment.

The committee will also recommend strategies to address opportunities for the delivery of essential student services (Career Services, Disability Services, Advising, Parent Programs, etc.) as well as new opportunities to further engage both undergraduate and graduate students in extra-curricular activities (student organizations, leadership programs, volunteer service, Greek Life, etc.) to increase student connections and affinity with the institution.

Situational Analysis

Situational Analysis is a comprehensive assessment of internal and external factors that may influence or directly impact desired outcomes.

1. Enrollment Trends:

- CMU's 1-year total enrollment change is down 2.2%, while the 5-year change is up 3.4%
- CMU's 1-year on-campus total enrollment change is down 3.4%, and up 3.2% over 5 years
- CMU's 1-year undergraduate enrollment change is down 3.5%, while the 5-year change is up 2.9%
- First time in any college (FTIAC) on-campus enrollment is down 12.8% over 1 year, and down 11.3% over 5 years
- Transfer on-campus enrollment is down 8.5% over 1 year, but up 10.9% over 5 years
- CMU's FTIAC student entering credentials have remained constant at a 3.33 GPA and 22 ACT
- With the expected decrease in undergraduate enrollments at CMU and nationwide, we expect those decreases to start affecting the graduate school in approximately three years

2. Population Characteristics:

- 95% of undergraduates and 93% of all CMU students are from Michigan
- CMU has students enrolled from all 83 counties in Michigan
- Minority enrollment is 10.21%
- Slight growth in non-resident (domestic and international) graduate enrollment is expected

3. Retention and Graduation Trends:

- CMU's three-year average persistence rate from first-to-second year for FTIAC students is 77.1%
- FTIAC students persisting to a third and fourth year average 68.4% and 64.3%, respectively
- CMU's four-year graduation rate is 19.9%
- CMU's five-year graduation rate is 29.8%
- CMU's six-year graduation rate is 55.2%

4. Yield/Conversion Analysis:

- FTIAC Conversion (5-year average)
 - Prospect/Lead* to Applied – 64.40% **Lead Management is being developed so initial numbers are suspect.*
 - Applied-to-Admitted – 61.90%
 - Admitted-to-Paid – 35.99%
 - Paid-to-Enrolled – 96.04%
- New Transfer Conversion (5-year average)
 - Prospect/Lead* to Applied – 74.05% **Lead Management is being developed so initial numbers are suspect.*
 - Applied-to-Admitted – 60.43%
 - Admitted-to-Paid – 73.66%
 - Paid-to-Enrolled – 96.83%

5. Major & Job Trends:

- Fall 2012 top major - Psychology; 2nd - Health Fitness (disaggregated, see Appendices for top 25)
- Fall 2011 top major - Health Fitness; 2nd – Psychology (disaggregated)
- Michigan's top outlook through 2018 with corresponding CMU majors:
 - Accountants, auditors, elementary school teachers, industrial engineers, computer systems analysts, human resources, training and labor relations specialists, network

systems and data communications analysts, insurance sales agents, management analysts, public relations specialists, sales managers, marketing research analysts

- In nearly all teacher-related fields, the recent decline in students seeking graduate degrees is expected to continue for several years. A few niches, such as Early Childhood and online Educational Technology programs, are expected to grow.

6. Financial Aid & Pricing Comparisons:

- Cumulatively lowest tuition increase of all Michigan public institutions for the last 3 years
- Even with modest increases in tuition, CMU's tuition is the 4th highest in the State of Michigan among public universities, indicative of high-cost, specialized programs, use of cutting-edge technology, and delivery of advanced degrees.
- Tuition set in April, earlier than most Michigan institutions, to allow for family planning and early financial aid packaging
- 87.7% of all students receive some form of financial aid
- Added more than \$800,000 in work-study funding in 2011-2012, bringing the total to \$1.1 million
- During the last 3 years, CMU's total institutional scholarships and financial aid budget increased \$14 million
- Non-resident graduate tuition rates have not increased for five years

7. Competitive Analysis:

- CMU has the only online MBA offered that has a management information systems concentration with an emphasis in SAP and was recently ranked 6th in the country by U.S. News and World Report
- CMU's leadership minor is the first and only one of its kind at a four-year Michigan public university
- CMU's neuroscience undergraduate degree is the first and only program of its kind in Michigan
- CMU is the only university in Michigan to have a public relations program that incorporates journalism, communication and dramatic arts, and broadcasting
- CMU offers the only undergraduate degree in Meteorology in the State of Michigan
- MHTV won the first "Signature" award from the Broadcast Education Association as the top student television operation in the nation
- CMU seniors exceed the national average by 20 percent, with their participation in co-curricular activities
- CMU's physician assistant class has achieved the highest score in the nation on the standardized Physician Assistant Clinical Knowledge Rating Assessment Tool Exam for three of the past five years
- CMU's MSA program is one of the largest graduate programs in the United States, with over 4,000 enrollments each year ... mostly online and at Global Campus locations, but also with on-campus enrollment options

8. Capacity Analysis:

- Office of the Registrar is currently working with Ad Astra, analyzing capacity metric; however, they are not yet ready for release
- Additionally, Graduate Studies is wrapping up an extensive study on enrollment capacity involving faculty, facilities, graduate funding, and long-range program development plans. This information is available in the new College of Graduate Studies Marketing and Enrollment Plan which will be completed in October, 2013.

Planning Assumptions

External

1. Michigan population and high school demographics
 - Despite economic toil in the state, the overall population in Michigan has remained relatively constant over the last 3 years, seeing only slight declines since 2005
 - Of the population in Michigan, 59.1% has at least some college education, with 26.7% of the total population holding a bachelor's degree or higher. *Source: U.S. Census Bureau*
 - While the state population has remained relatively constant, of particular concern is the decrease in Michigan high school graduates and projections that those numbers will continue to decline as much as 15% by 2020. *Source: Western Interstate Commission on Higher Education*
 - Shifting in-state demographics will adversely affect graduate enrollments, beginning 2016
2. Labor force growth
 - Michigan's unemployment rate is 8.9% (December 2012). The National unemployment rate is 7.9% (January 2013). *Source: Bureau of Labor Statistics*
 - Traditionally, a poor economy enhances graduate enrollments. However, lack of access to credit and the removal of federal student loan incentives are having the reverse affect. As unemployment rates shift, graduate enrollments will follow along the same trajectories
3. High school drop-out and graduation rates
 - Michigan's drop-out rate among high school students is higher than the national average. According to the Center for Educational Performance and Information, 10.71% of Michigan students drop-out leaving high school without completing a diploma or GED, compared to 7.4% nationally
 - In most recent comparison data on graduation rates (2008-2009) provided by the *National Center for Educational Statistics*, Michigan's graduation rate of 75.3% remains only slightly behind the national average of 75.5%. The other 25% of students could be continuing on for another year in order to receive their diploma, could be receiving their GED, or could be classified as a dropout.
4. Increased competition from four-year public, private, and proprietary schools, as well as community colleges in Michigan
 - 15 public four-year institutions
 - 50 private (not-for-profit) colleges and universities
 - 12 private (for-profit) colleges and universities
 - 28 community colleges
 - 3 designated Tribal colleges
 - State of Michigan approval for community colleges to begin offering four-year degrees in specific programs, with further expansion being considered
 - Expansion of online and hybrid options from competitors will continue indefinitely and compete more aggressively with on-campus graduate degree options
5. While the number of high school graduates in Michigan decreases, the number of academically prepared students continues to be a concern as all institutions compete for the most qualified applicants, according to the ACT College Readiness benchmarks, students from the class of 2012:
 - 59% met or exceeded the benchmark in English
 - 45% met or exceeded the benchmark in Reading
 - 36% met or exceeded the benchmark in Math

- 26% met or exceeded the benchmark in Science
6. Identification and lease of space in Detroit
 - Space will provide CMU a visible presence in the city, as well as the ability for providing class instruction through Global Campus, and working space for on-campus Admissions staff

Internal

1. 95% of CMU undergraduates and 93% of all students are from Michigan, representing all 83 counties
2. 79% of our graduates stay in Michigan, working as engineers, entrepreneurs, scientists, teachers, health professionals, communicators and a multitude of other professions, applying their knowledge and contributing to the economy of our state
3. CMU has 220,000 alumni, nearly 124,000 of them living in Michigan
4. CMU is not immune to the shrinking number of high school graduates — our commitment to serving Michigan students with the primary student population base being from the state means the University is certainly affected. As a result, our recruitment and marketing efforts in Michigan and beyond will see greater commitment of resources
5. CMU's current student minority enrollment is 10.21%. The president's goal is for the student population to reflect the minority population for the State of Michigan, which is 21%. Faculty/staff minority representation is 11%.
6. Design and construction phases to be complete on new Biosciences Building
 - Will meet a tremendous need made possible by a \$30 million capital outlay from the state
 - The \$89.5 million Biosciences Building will provide classroom and research laboratory space for CMU scientists and students and will augment existing facilities in Brooks Hall, which was built in 1964. The new facility will allow us to keep pace with advances in scientific research and the rapid growth of our biology department.
 - Biology is our largest / fastest growing major on campus. Since 2009, CMU has seen an increase from 450 to nearly 1,000 biology majors with biology being one of every 15 majors signed. Future graduate programs in related fields are being considered
7. ESS is a new division focusing on enrollment and student services — efforts include not only student recruitment, but improving retention and graduation rates
8. Implementation of Talisma CRM (Customer Relationship Management) software to allow for better prospect and inquiry tracking and communication management. The new Graduate Studies CRM will bring similar improvements, and the possibility of moving Graduate Studies into the Talisma environment will be evaluated following successful transition of undergraduate admissions.
9. Creation and implementation of our online “Request for Information” form placed on the CMU web site to allow students to submit inquiries quickly and easily
10. Continued enhancement of CMU's web sites is expected and Graduate Studies will be enhancing its entire web presence, beginning in 2014
11. Academic departments and Career Services continue to cultivate relationships with business and industry partners
12. Create greater partnerships with CMU-sponsored charter schools as a pipeline for future enrollment
13. Added and hired a position within the Admissions Office focused on not only recruiting new transfer students, but to building strong, positive relationships with community colleges

14. Currently signed four reverse transfer agreements with community colleges with a fifth to be signed in April 2013
15. Creation of transfer student specific advising resources within the department of Academic Advising and Assistance
16. Partnership with the Student Success Collaborative through the Education Advisory Board to yield valuable data on how to best retain enrolled students
17. Partnerships with international colleges and universities involving student recruitment, faculty exchange and collaborative research, and both undergraduate and graduate student exchange will be expanded and strengthened

SWOT Analysis

Strengths

- Campus environment: beautiful, friendly, inviting, and safe
- Student Services
- Research, Internship, and Mentoring Opportunities
- Global Campus

Weaknesses

- Competition
- Minimum exposure outside MI
- Operational silos and loosely coupled systems
- Location
- Brand Awareness
- Web site Presence
- Inconsistent messaging and communication with students
- Low four-year graduation rate
- Institutional Financial Aid Discount Rate
- Recent Public Relations

Opportunities

- College of Medicine
- Redesign in Financial Aid
- Transfer Student Enrollment
- Global Campus course offering expansion
- Alumni Outreach
- Early Outreach (K-12)
- Market Research
- Lead Management and CRM
- University-wide planning efforts
- Change to out-of-state tuition charges and model
- Lead generation and capture from non-recruitment CMU-sponsored events
- Enhanced academic advising process
- Implementation of a Student Success Center

Threats

- Declining Student Pools
- Competition
- Regulation

- Academic Program Offerings
- College Affordability, with rising costs of living and limited student funding
- Student Success (i.e., Retention, Progression, Graduation Rates)
- Limited university awareness and visibility
- Increased costs for advertising, recruiting events, and travel
- Declining State Appropriation and limited funding/budget
- Leverage Technology to support enrollment process

Market Position

Market research conducted in Fall 2013, as well as information supplied by Enrollment and Student Services, the deans and career services will produce the data that allows CMU to identify its market niche, market rank and strengths vs. its competitors, CMU's institutional and program strengths vs. the strengths and weaknesses of competitors, and insight into student demand/employment market needs.

A Request for Proposal (RFP) was drafted to review perceptions on institutional brand along with the choices students are making. With data, a brand strategy can be formalized to increase student enrollment, although the branding and marketing efforts fueled by the results of this research will also improve alumni, donor, and legislative relations. Focusing on Hillsdale, Jackson, Kent, Lenawee, Livingston, Macomb, Monroe, Oakland, Washtenaw and Wayne Counties, as well as on Chicago, the research will help CMU leaders pinpoint action steps.

Market Strategy

1. The Spring 2013 marketing campaign — the first since 2008 — continued the Discover Central, Discover You theme that was used in admissions materials starting Summer 2012. This theme will be used throughout the recruitment season for the class of 2014, including the Fall 2013 campaign.
 - The campaign positions CMU as a first-choice university for real-life CMU students. The spring campaign focused on business, health careers, and science majors - three of the hottest areas of the university and within higher education as a whole. The fall campaign will add education, communications, and the social/behavioral sciences.
 - It targets students, parents, and student influencers in the metro Detroit, Flint/Saginaw/Bay City/Midland, Grand Rapids/Battle Creek/Kalamazoo, and Lansing/ Jackson markets.
 - It includes broadcast/cable television spots, outdoor advertising, digital/online advertising, and Pandora radio. Online efforts and Pandora are highly measurable /trackable.
 - Additional leverage is gained through social media, a concerted online presence, emails to new admits, etc.
 - A complementary Discover Central / Discover You social media initiative features real students and alumni from all of the colleges.
2. University Communications and Enrollment and Student Services are developing and implementing a strategic, methodical plan for communications targeting individual students (and in some cases, their parents and influencers). This plan will create an orchestrated campaign, rather than relying on reactive, one-off communications.

Input into the university's marketing and communications efforts is gained from a cross-campus marketing team with representatives from each of the colleges and major service units. University Communications and ESS also meet frequently with stakeholders across campus, including deans, faculty, staff, and students.

Both Global Campus and the College of Graduate Studies have marketing and recruiting plans that focus on program-based and/or delivery-based initiatives. These plans involve strategies that will be reviewed and incorporated into this SEM Plan.

As Enrollment and Student Services becomes increasingly data driven, so will marketing and communications efforts.

The Spring 2013 the campaign ran approximately 10 weeks followed by a complementary campaign starting in late summer.

Recruitment Strategies

On-Campus Undergraduate Recruitment Strategies

CMU can no longer recruit to a number. We need to tailor our approaches to drive applications from students who are the right “fit” for CMU where they will persist and succeed. Some of the areas where we have begun to adjust our recruiting processes are:

1. Inquiry Processing – Lead/Prospect Management
 - Inquiry Processing is the practice of entering prospective student data into a database for future cultivation. Looking at the origin of our leads allows us to leverage data to inform recruitment efforts. With the establishment of the Lead/Prospect Management framework, the Undergraduate Admission processes are being adjusted to ensure capture of all defined lead sources at the appropriate level for ROI evaluation. Assessment of all the data and formulating plans to respond and communicate by lead source will provide the foundation for improving the student pool feeding our enrollment funnel.
2. Communication Flow
 - For each lead source, the communication plan needs to be refined and established. Use of the current EMAS system is being expanded to enable basic communication plans. The implementation of Talisma CRM, now underway in Undergraduate Admissions to replace EMAS, enables full-scale communications that will be implemented, monitored and managed.
3. Campus-wide Communications Coordination
 - This activity combines the centralized communication flow with decentralized communication initiatives to ensure consistency of message and look and prevent illogical overlapping or duplication of information. To the student, CMU is one institution. Hence, communication from various campus units will be collectively intuitive and synergistically connected. The ESS departments are all documenting their current and future communication plans that can be rolled up into a single plan that, for the first time, can be assessed and adjusted. This assessment will allow future implementation of the Talisma CRM tool to be prioritized for managing all communications. Not only is the coordination of main campus department communication a vital strategy, but also the promotion of all modalities of providing a CMU education whether on-campus undergraduate, Global Campus centers and online, and transitioning from undergraduate programs to CMU graduate programs.
4. Recruiting Events will include: high school visits, campus visits, open houses, information sessions, area receptions, fairs, private visits, and high school counselor campus visits.
5. Exploration of out-of-state potential
 - As State of Michigan high school graduate demographics continue to decline, CMU can no longer rely on the State of Michigan as its primary source of new students should the current

market share remain the same. Through strategic use of data, potential out-of-state markets will be identified and cultivated for building a greater market share of out-of-state students.

6. Benchmarking Admissions Resources

- Brief polls of Michigan institutions on the size of their admissions staff indicates that CMU operates with far less staff resources in comparison to competitor institutions and institutions of similar size. Continued research and evaluation will take place to determine optimal staff numbers and models to ensure efficient use of university resources while optimizing the opportunities for greater presence in current and emerging markets.

7. Director of Undergraduate Admissions

- A new director started in March 2013. He brings experience implementing enrollment management changes at other universities and given time, will have additional areas of focus for our recruiting strategy.

On-Campus Graduate Studies Recruitment Strategies

Graduate recruiting strategies are uniquely tailored to the needs of the university, to the colleges, departments, and specific degree programs, and to the quality and quantity objectives of the College of Graduate Studies. At the graduate level, program-specific recruiting initiatives have been prioritized according to university priorities and available resources and are under review by the College of Graduate Studies.

Enrollment projections:

- Master's degree enrollments (approximately 1,400 in Fall 2013)
 - to 1,430 in Fall 2014
 - to 1,480 in Fall 2018
- Doctoral degree enrollments (approximately 400 in Fall 2013, excluding CMED)
 - to 410 in Fall 2014
 - to 430 in Fall 2018

General graduate-level promotional objectives:

- Transition to more traditional, full-time target audiences
- Promotion of CMU as a destination university
- Program-specific marketing and enrollment plans
- New and improved informational materials and channels of communication
- Partnership development with international institutions
- Enhanced CRM and integrated marketing and communications planning
- Greater presence in print and online directories and educational search engine resources
- New program launch procedures with cross-campus support
- Specialized local, regional, national, and international awareness initiatives
- Increased cooperation with counselors, agents, consultants, and government agencies

Enrollment profiles and recruiting objectives:

The College of Graduate Studies works with each academic program, department, and college and then sets the recruiting goals and objectives to align with those of the university's mission, the mission of the College of Graduate Studies, and the colleges and academic units.

The College of Graduate Studies is conducting a full review of graduate enrollment issues, including quality and curricula requirements, prioritization review, academic program enhancement, new program development, long-range capacity parameters, student body profiles,

and optimal enrollments. This SEM Plan will help Graduate Studies maintain focus on these important concerns while also establishing new graduate enrollment projections, student profile enhancement objectives, and optimal admission and enrollment goals for CMU as a whole and for each graduate program, while also coordinating strategic enrollment and recruiting initiatives with all other areas of the university

Graduate enrollment profiles are complex because each program has diverse challenges, goals, and objectives. General recruiting objectives for each college are summarized below:

- CHP: enrollments are at or near capacity and the quality and quantity objectives for nearly all HP programs are met. To increase enrollments, capacity must expand. Current objectives include:
 - increasing diversity
 - increasing international enrollments (in some programs)
 - increasing national (non-Michigan) enrollments in some programs
 - exploring expansion options (more programs, more professors/courses)
- CST: most programs have room for moderate enrollment growth and for increases in qualifications of new students. Current objectives include:
 - attracting more full-time and higher-quality students in research-based programs
 - increasing national and/or international recruiting (depending upon the program)
 - increasing diversity
 - exploring expansion options (new research-based programs, partnerships, etc.)
- CGS (MSA): in terms of quality, the MSA will be increasing the qualifications of new students. As a scalable program, it will also significantly expand in terms of quantity. Current objectives include:
 - increasing diversity
 - slightly increasing part-time, non-traditional enrollments from mid-Michigan area
 - moderately increasing full-time enrollments from national regions, especially from the Great Lakes and neighboring regions
 - greatly increasing full-time international enrollments, especially from China and India but also including South Korea, Saudi Arabia, Turkey, Ghana, and others
 - exploring expansion options to grow existing concentrations and add new concentrations
- CEHS: hit hard by the general decline in education sector demand, CEHS is transitioning into a stronger and more market-oriented college. Current objectives include:
 - transitioning the declining on-campus graduate programs (mostly teacher-related) to meet rising demand for online/hybrid graduate programs
 - increasing diversity, especially with diverse populations within Michigan
 - increasing part-time, working professional enrollments in mid-Michigan for master's, specialist, and doctoral levels
 - increasing full-time, traditional enrollments for some programs
 - increasing international enrollments for some programs
- CHSBS: some programs are at capacity, in terms of faculty and funding options, while others are poised for moderate growth. Current objectives include:
 - increasing diversity, especially with HBCUs and diverse populations in Michigan
 - increasing both part-time and full-time Michigan enrollments
 - transitioning to an increased proportion of full-time students
 - increasing national and international enrollments of high-level scholars
 - increasing enrollment from externally funded positions (Fulbright, foreign governments, etc.)

- CCFA: some programs are at capacity but others have moderate room for growth. Current objectives include:
 - increasing diversity from state and national markets
 - enhancing domestic recruiting efforts throughout Michigan, neighboring regions, and national markets
 - increasing skilled, international enrollments, especially with partner institutions
- CBA: the recent decline in business administration students is a primary concern, while the other programs continue to perform quite well in terms of quantity. Current objectives include:
 - increasing diversity
 - maintaining recently attained capacity in MSIS while increasing quality of newly admitted students
 - enhancing top-level, out-of-state enrollments in Economics
 - slightly increasing part-time, non-traditional MBA enrollments
 - recruiting more full-time, U.S. enrollments from outside the state
 - significantly increasing international enrollments from China, Saudi Arabia, India, and other areas, especially by working with partner institutions
 - exploring expansion options (new programs, new partnerships, etc.)

New Program Development:

Many new programs are being considered across campus.

- Doctoral programs include administrative leadership, educational technology, rehabilitative science, and bio-sciences, plus PhDs in educational leadership and in earth and ecosystem science
- Master's level programs include engineering, cultural resource management, and new MSA concentrations

The CEHS is continuing to shift campus student over to Global, and, in spite of their new programs, we expect a net decline here on campus. All other programs will contribute to growth in campus numbers. We anticipate starting with about 20 and expanding up to as many as 50 new students in the upcoming Administrative Leadership program. We anticipate limited growth potential in the other doctoral programs.

We anticipate starting with about 20 MSE (Master of Science in Engineering) enrollments and expanding up to around 40 within the first three years. We expect the other new programs to have fairly small but important growth potential.

Programs of declining interest:

All graduate programs heavily reliant upon teachers are expecting declines in teacher enrollments, and this includes nearly half of all graduate programs. However, we are preparing for this decline by (a) accelerating our shift away from being a teacher-based graduate school toward a research-based graduate school, and (b) recruiting more full-time, traditional students.

This transition also supports CMU's priority of enhancing research and creative endeavors, as our previous teacher-based graduate programs are becoming more research-based and focused upon developing excellence in publishable fields.

Some programs, such as the M.A. in Educational Technology, are moving completely off-campus by offering only online classes. This will adversely affect campus enrollment numbers but will concurrently strengthen overall CMU enrollment numbers. Other departments are exploring more

online and hybrid programs and course options. We expect this shift will involve more programs over the next few years.

All graduate programs have recently been reviewed and prioritized, and many enhancements are already underway. Several graduate programs have already been cut, but we do not expect much overall change in numbers as a result. Instead, we expect a stabilization of enrollment numbers in most graduate programs which will poise us for slow yet consistent long-term growth.

Important trends to note:

- continued decline in teachers entering graduate school
- continued economic pressures preventing working professionals from attending school
- continued increase in globalization and interest in international studies
- increased competition from non-profit universities
- increased technological savvy among traditional graduate student markets

Required resources:

The College of Graduate Studies needs increased financial investments in graduate-level marketing and recruiting, in addition to increased administrative support.

Graduate program highlights:

- Out of 750 colleges with Communication programs, CMU's Communication Department was ranked in the Top Ten in four categories by a peer review journal.
- CMU's MBA retained AACSB-International accreditation, keeping it in the top 23% of American business schools ... and the Online MBA was ranked #6 in the U.S. by U.S. News and World Report.
- Many programs maintained high-level accreditations, including Teacher Education, Music, Psychology, Public Administration, and many STEM and health related programs
- CMU's Physician Assistant program was ranked 4th best in the United States by the Journal of Physician Assistant Education.
- Our Health Promotions programs continue to draw high-quality students. Average GPA's of incoming graduate students are 3.57 (PA), 3.58 (AuD), 3.72 (PT), and 3.81 (SLP).

Occupational outlook:

The various colleges are better able to address this issue. However, several programs can boast 100% placement in career-oriented jobs or advanced doctoral degree programs, including Geographic Information Science, Economics, Apparel Product Development and Merchandising Technology, Mathematics, Neuroscience, Physical Assistant, Physical Therapy, Psychology, etc.

We currently highlight the above mentioned 100% job placement in printed materials and promotional campaigns but we can do a better job of gathering data and leveraging the information that we have.

Marketing collateral:

A variety of marketing collateral is created and utilized to increase awareness of programs. Graduate Studies currently utilizes a wide variety of promotional channels, including public and private broadcasting, newspapers, professional journals, online directories, search engines, and social media. Additionally, CGS actively develops a wide range of marketing collateral for graduate-level recruiting, including:

- Collaborative branding projects with UCOM, Global, OIA, etc.

- General CMU graduate program awareness
- Department and program-specific informational flyers, posters, brochures, etc.

First/Best/Only strategy:

For those graduate programs with special achievements (rankings, accreditations, job placement, etc.), Graduate Studies leverages that information within program-based print materials and various promotional campaigns. However, we must go far beyond the “First/Best/Only” mentality to truly succeed.

“First/Best/Only” almost always relates to programs that are already at capacity and are already meeting or surpassing our recently increased quality standards for admission, and the return on investment from promoting these programs is quite minimal in relation to the possible ROI from investing in specific areas of intended growth.

Each graduate program has its own unique features, strengths, and benefits which we must leverage in our marketing and other promotional endeavors. CMU’s marketing needs at the graduate level, in contrast to the broad, general branding approach focused on undergraduate recruiting, requires uniquely targeted, program-specific information dissemination. In addition to general attraction to the university – i.e. location, convenience, safety, sport teams, etc. – graduate students are attracted to very specific curricula, faculty, research opportunities, research and laboratory facilities, and learning outcomes.

For graduate level marketing and recruiting, we must “cast a wide net” by being visible in national and international educational directories, and we must still work collaboratively with Undergraduate Admissions, University Communications, Global Campus, the Office of International Affairs, and others, but we must also invest additional promotional dollars wisely and utilize highly targeted, program-specific materials and promotional campaigns.

Programs poised for growth:

Based upon marketability, capacity, faculty, and other resources, the graduate programs poised for potential growth include:

- Master of Business Administration
- Master of Science in Administration
- MS in Chemistry
- MA in Communication
- MS in Computer Science
- MA in English Language and Literature
- MS in Geographic Information Science
- MA in Political Science
- MPA in Public Administration
- MA in Sport Administration
- All new graduate programs, especially in Engineering and Administrative Leadership.

Office of International Affairs Recruitment Strategies

International students have become a critical population on U.S. college campuses. They enrich the student experience and help us to prepare our students for global citizenship. In addition to offsetting any losses of domestic student enrollment and/or increasing an institution’s overall enrollment, international students promote outreach of institutional brand and global citizenry. Campus internationalization is critical to the continued success of CMU.

International student enrollment for Fall 2013 is expected to increase by 20% over Fall 2012. This trend mirrors other institutions that have made the investment in internationalizing and globalizing their campuses. In 2011, the position of Director of International Recruitment was established with a focus on undergraduate student recruitment. One undergraduate advisor was added to the OIA staff to better process undergraduate admissions. In early 2013, the position of Director of Graduate International Student Services was established in the Office of International Affairs which includes recruiting graduate international students.

Strategies for recruiting international students include:

- Develop a comprehensive recruiting plan for undergraduate and graduate students based on an analysis of market data, partner institutions, and U.S. Office of International Education outlook data.
- Design and develop recruiting brochures that are program specific and are translated into Arabic and Chinese (traditional and simplified).
- Expand affiliation agreements with English Language Services, community colleges, and four-year universities in the United States. Explore agreements with high schools in the Grand Rapids area.
- Attend education fairs for face-to-face contact in target countries of Vietnam, Taiwan, Korea, Canada, and Saudi Arabia. In 2013-2014, visits are also planned to India, Turkey, and Jordan.
- Visit partner institutions in China to develop program-specific agreements (3+1+1, 2+2, and 3+1 programs) for cohorts of students in journalism, broadcast and cinematic arts, interior design, engineering, and others.
- Visit and establish agreements with Chinese high schools.
- Encourage participation of key campus leaders in recruiting trips.
- Host delegations from foreign institutions and agencies to build stronger relationships and confidence.
- Organize alumni receptions in major foreign cities.
- Continue to improve the application, acceptance materials, and processes with follow-up emails and calls.

Our strongest opportunities lie in the development of affiliation agreements that will bring cohorts of students directly to CMU, whether from English Language Programs, high schools, community colleges, or foreign universities. According to national data, we are recruiting successfully in China and Saudi Arabia. However, to balance our risks, we also need to cultivate recruitment efforts in India, Canada, South Korea, Vietnam, Taiwan, and Turkey, as our enrollment is lower than the national averages. International Affairs must carefully analyze and choose markets and foreign partners which make the best use of recruiting resources.

Students need to be actively recruited, as well as retained through outstanding relationships with the English Language Institute, campus facilities, and student services. Scholarships and tuition reduction program levels need to be maintained. Promotion of CMU's top programs needs to be continued, since rank is important in the international marketplace. The greatest recruiting opportunity lies in the very positive experience students receive here at CMU. Support of international student services, both on campus and in Mt. Pleasant, needs to continue.

For international recruiting, time and finances remain a challenge. Many other universities have 3 or 4 times our recruiting staff. In addition, because other institutions pay agents and CMU does not, CMU needs to reevaluate the way it works with agents and external advisors, and respond accordingly. Translation of materials and the web site to attract students broadly and to inform

their parents must continue. Alumni in foreign countries are a great resource for the university and cultivating stronger relationships with these alumni is essential. Capitalization is needed on the international travel of CMU's faculty and administrators for active recruiting and development of joint programs.

Global Campus and Online Marketing & Recruitment Strategies

Global Campus (GC) currently accounts for 25% of our students, 18% of our credit hours production, and 22% of our gross tuition revenues. With the growing interest in online courses, GC's recruitment and retention efforts should be incorporated within the university-wide SEM plan. Note that GC enrollment deserves close attention and support, as it faces the same, if not more aggressive, competition in the marketplace.

Specific Global Campus marketing and recruitment strategies for 2014 are detailed as follows:

1. Civilian and Military:

- Continue to create awareness of CMU programs both undergraduate and graduate open enrollment and cohort offered face-to-face across our centers and online.
- Continue to drive a preference for CMU programs by implementing marketing communication strategies that are relevant to adult students and customer focused. This includes but is not limited to the following strategies:
 - Using messages adult students have told us they want and need to hear from a university when considering returning to college or seeking an advanced degree.
 - Reinforcing GC's experience and success in working with and supporting adults from inquiry through graduation.
 - Strategically, yet efficiently, purchase media and mediums directed at reaching our adult student market. (GC's share of voice is the lowest or near the lowest in all markets where we market. The private, for profit universities have long had more dollars to invest in their marketing efforts. Now the public, non-profits in major metro markets such as Detroit, Atlanta, and Alexandria have increased marketing dollars that often exceed what GC can invest in that same metro market.)
 - Exemplify success of our alumni in reaching adult students, across Michigan, Ohio, Georgia, Virginia, and other states where licensure or an MOU has been granted.
- Expand and continue to refine our front-line teams (New Student Services Call Center and Program Administrators) use of CRM in monitoring and identifying student inquiry needs while using data in CRM to measure campaign response to continue to sustain conversion rates. Over the past two years, GC has improved our conversion rates. Past academic year conversion rates were at a high of:
 - 43% for Inquiry to Application
 - 80% for Application to Admit
 - 50% of Application to First Time Enrolled
- Increase GC outreach efforts to corporations, government agencies, municipalities and associations to increase awareness of CMU flexibility in bringing degree programs and customized non-degree programs to their employees.
- Position and support MSA as GC's lead program offering the career options with the most appeal for adult students looking to advance their career. Global Campus has sustained MSA enrollments of over 4000 students/year. MSA represents the largest portion of graduate enrollments for GC.
- Request new programs. Yearly, GC pulls employment data, labor statistics and "degrees in demand" data, and uses secondary market research to evaluate the recruitment potential of

new degrees in geographies where we have centers. Inquiries for programs currently offered through GC are regularly monitored and reported. There is opportunity for Global Campus to increase enrollments and revenue by also offering select existing on-campus programs at Global Campus centers and online.

2. Online:

Most of the above objectives are applicable to the marketing of CMU online programs. However, GC does engage in additional electronic and Social Media avenues to reach community college students and traditional college students that seek either online programs and/or online courses. We coordinate closely with University Communications on “One CMU” message to give students their CMU option of main campus, online or regional centers and coordinate with campus admissions operation on community college visits and recruitment fairs.

With online mediums we can target by age, geography, interest, title, industry, gender, degree, etc. to better market our online undergraduate degrees to traditional students and our graduate degrees to adult students.

Growth in online enrollments is growing across the country. The key for sustaining our level of enrollments and grow is to have more customer desired programs offered online. Ten years ago, CMU was one of two public, four-year institutions in Michigan offering online degrees. Six years ago, CMU was one of five public, four-year institutions. Today, all Michigan public, four-years institutions offer online degrees.

According to public enrollment data, Michigan State University had 11K students enrolled in online programs in 2011, Wayne State University had 5K students and Grand Valley State University had 3K students. Thus 19K students were served online programs by our competitors. This also reinforces the increased competition for online students.

2014 Global Campus Marketing Recruitment Goals: (Graduate and Undergraduate)

- Inquiries – 23,730
- Applications – 7,656
- Admitted Students – 5,923
- First Time Enrolled students – 3,676

Global Campus Population Characteristics:

- 60% of all GC students are from Michigan. 87% of all undergraduate and 50% of all graduate students live Michigan
- 7% of GC students are from Georgia; 6% are from the Virginia/Maryland/DC area; 4% are from Ohio; and over 2% are from Kansas. There is a higher concentration of students enrolled in online programs in areas where CMU has a physical presence
- 12% of GC course registrations are from students participating in cohort programs
- 23% of students qualify for the CMU military rate (either veteran, active duty military, or are military spouses or dependent students)
- Minority enrollment in Global Campus is 38%

Retention Strategies

Retention is “an outcome of a high quality educational experience that puts the students and their learning at the center. Providing intellectually stimulating and satisfying learning environments are central elements in fostering student success and educational attainment. It is developing engagement approaches that will improve the student experience.” (*Noel-Levitz: Student Retention in the New Environment*). We need to build a framework to identify “at-risk” students and have steps defined for each identified group to help them get back on track.

- Educational Advisory Board (EAB) Student Success Collaborative
- Creation and management of information technologies in support of university retention goals
- Support and assistance in the development of university retention goals and key performance metrics
- College-level support for the creation of retention strategies in identified areas of need
- Early Alert and Intervention / MAP-Works or CRM
- Enrollment and Persistence Reporting
 - College-level information support
 - University-wide information support
- Academic Progress / Continuous Enrollment Monitoring
 - Identification and maintenance of progress markers by academic program
 - Monitoring or re-enrollment status
- Establishment of program-specific retention goals and objectives for graduate students
- Withdrawal Services
 - Review and follow-up with students making transcript requests
 - Monitoring and intervention including exit interviews among students not re-enrolling in academic classes
- Academic Success Education
 - Curricular
 - First Year Experience (FYE), Academic Advancement (AAD)
 - Academic course / curricular assistance in high attrition courses and high DEWFI courses identified as significant predictors of degree attainment
 - Co-Curricular Programming
 - Success Coaching
- Implementation of Academic Empowerment Program to provide greater structure and oversight of class selection and guided advisement for students presenting “at-risk” academic indicators at time of admission.
- Creation of greater awareness and stronger connections for student to current services already in place with proven positive impact on retention, such as:
 - Supplemental Instruction
 - Residential Colleges and Living and Learning Communities
 - Faculty advising and partnerships
 - Student mentors

Office of Student Success

Student recruitment efforts require substantial institutional expenditures from the hiring of staff to funding marketing and travel. In contrast, student success and retention initiatives are four to five times more cost-effective than recruitment efforts. It requires four to five times more investment to

recruit a new student than it does to retain an already enrolled student, and a retained student for four years will generate the same net revenue as five or six new students who leave after one year.

Established in August 2013, the Office of Student Success (OSS) provides focus on student success and facilitates collaborations that help to improve overall persistence and graduation rates. OSS fosters the success of every CMU student supporting the progression from matriculation to graduation. Aligned with CMU's strategic priorities, the OSS helps support student success and infrastructure stewardship. Specifically, the OSS assists students and leverages data to encourage increased year-to-year progression, and both four- and six-year graduation rates.

Historically, career services for graduate students have not been robust. CMU will explore options for incorporating graduate students within a wider range of student support and student success services.

Mission: The Office of Student Success (OSS) supports the university's mission by (a) empowering students to achieve academic and personal goals, and (b) identifying and helping to mitigate conditions which slow progression to graduation. The OSS maintains collaborative relationships across campus, supports each college's objectives, encourages student use of educational resources, provides success coaching services, promotes best practices concerning student success and persistence, investigates potential barriers to student success, and recommends strategies to help optimize the CMU experience.

Vision: The Office of Student Success (OSS) serves as an information and support resource for students, faculty, and staff in an effort to promote best practices in student success and persistence.

Objectives: The OSS will:

- Provide clear, concise, and timely information concerning student success and persistence to the university community.
- Help new students acclimate to CMU.
- Assist students in connecting with the appropriate campus resources in a timely and personal manner.
- Collaborate with colleges, advisors, and student service units to develop and maintain common tools to assist students with academic planning and progression to degree attainment.
- Partner with colleges, faculty, and student service units to identify and intervene with students who are not making good progress toward timely degree attainment.
- Provide educational opportunities and resources for students to sharpen academic skills.
- Help develop data-driven initiatives and programs meant to help retain students.
- Stay current with current research and practices within the field of student success and retention.

Measures: The OSS is a learning organization that utilizes data to understand student matriculation, attrition and pacing to graduation. The following markers provide

- # / % increase in the number of admitted, on-campus FTIAC and transfer students who matriculate
- # and % in the number of matriculated, on-campus students progressing each semester until graduation
- % reduction in the # and % of total cohort of students who do not re-enroll during open enrollment
- # / % decrease in the number of on-campus students with holds preventing registration during the open enrollment period

- 90% of students report good or excellent service following success coaching or involvement in a program or service provided by the OSS

Global Campus Retention Strategies

Improving retention rates for undergraduate students is a top goal of Global Campus. Non-traditional students face many competing priorities with work and families and many attend part-time. Over 50% of GC undergraduate students are bringing with them more than 48 hours of transfer credit from other institutions.

Retention and Graduation Trends:

- The three year average persistence rate from first-to-second year for GC undergraduate students transferring in 48 hours is 71.2%
- The three year average persistence rate from first-to-second year graduate students is over 78%
- The five year graduation rate is nearly 50% for undergraduate transfer students who start at CMU with 48+ hours of transfer credit
- The five year graduation rate for graduate students is nearly 62%

Global Campus online and face-to-face retention strategies are broken down into program specific and course specific retention activities:

- Achieve 100% voluntary orientation completion either face-to-face or online
- Encourage both face-to-face and online students to attend a “welcome on board” session at one of our face-to-face locations before the beginning of each semester. This connects all students to the student service staff and advisors
- Schedule advising appointment and develop student specific academic program plan within the first 12 hours enrolled at CMU
- Communicate to every student who didn’t re-enroll from one term to another to encourage re-enrollment or try to resolve barriers that stopped re-enrollment
- Recognize students that have met 50% of the degree requirements
- Review and communicate to all students at the end of each term and semester that are placed on academic probation. Advisors reach out to students on improvement plans
- Cohort students sign an automated registration agreement and are automatically registered for courses

To improve success outcomes for students enrolled in online formats the following services are provided:

- Make all online instructors aware of students that are new to the online format at CMU
- Reach out to all students who have not yet engaged in their online course in both the first and second week. Explain the implications of non-participation
- Inform students of tutoring services and the online student ally service

In 2014, Global Campus will conduct research that will identify issues that potentially lead a student to be at risk. Proactive student services will then be implemented that will allow for students to be retained at a higher rate.

Service Strategies

Service strategies should be designed, implemented, and enhanced to support the effective and efficient delivery of services to students and their family members. Effective service delivery refers to services that meet the needs of students and family members, support student success, and

increase service satisfaction. Efficient service delivery refers to processes, methods, and formats that are accurate, timely, cost-efficient, and, when feasible, comprehensive.

- Support admissions application in various online and mobile formats
- Online Degree Audit
- Academic Workbench
- Student Success Portal
- Dedicated web site to provide resources for family members
- Staff support for personal, phone, and email connections with family members
- Earlier notification of financial aid packaging
- Provide financial aid package information in both online and hard copy formats
- Provide information for the financial aid shopping sheet
- Utilize social media interactions to connect students to career planning and resources
- Increase reverse articulation agreements with community colleges
- Decrease transfer credit evaluation time (if resources are available)
- Increase staff outreach to transfer students
- Promote use of existing web-enabled tools within Student Organization Management program, i.e. Co-curricular transcript

Financial Aid Strategies

Financial Aid is leveraged strategically to shape enrollment. The university appreciates the importance of financial aid to acknowledge academic achievement, special talents, and other distinctive characteristics that are deemed as deserving of monetary recognition. In addition, funds are identified and allocated to support students who demonstrate exceptional financial need.

The following points are causing us to review our philosophy:

- Over the last three decades, college costs have increased nearly four times faster than the median family income.
- Federal and state financial assistance has not filled this growing gap, leaving families with unmet financial need.
- As a result, student debt has continued to grow, now averaging more than \$26,000 for recent four-year college graduates (Reed and Cochrane, 2012).
- Students and families are becoming more cost conscious, shopping around for the college presenting the best value, and often the institution providing them with the greatest financial aid package.
- In order to survive in this new economic climate, CMU must adapt its own merit and need-based financial aid practices to assist students in meeting their financial need while having a positive impact on enrollment, retention, and graduation.

A proposal has been submitted to begin FY15. Proposed changes include:

- Increasing the number of awards made available to Honors-eligible students
- Creating a new award for students with a GPA between 3.00 and 3.50 (a large segment of the FTIAC population)
- Increasing the number of awards and scholarship amounts for Leadership Institute participants
- Increasing awards and scholarship amounts for qualified transfer students
- Expanding need-based award availability to rising junior and seniors
- Creating an award program to incentivize degree completion

Academic Strategies

Program Development Strategies

The Academic Planning Council will provide direction in the development of new programs. The council will be informed early each semester by the Vice President for Enrollment and Student Services, providing enrollment data, the reasons why students who were accepted to CMU did not enroll, identification of programs that are in greatest demand, and other pertinent data. In addition, the Academic Planning Council will receive workforce and occupational data from Career Services. These data will be discussed and communicated to the academic deans for planning purposes. Special consideration must be given to the development of programs that are not provided by our competitors.

New academic programs most often originate in the departments where faculty are in tune with the latest trends and student interests. Faculty will continue to evaluate program content through the processes described below, making revisions to strengthen the program and to better prepare our graduates.

In all cases, the Provost and academic deans will evaluate the need, competition, existing resources, and cost analysis. They will need to balance student interest with the occupational outlook and institutional capacity. There must be employment opportunities for our graduates.

Program Quality Verification

The quality and effectiveness of the academic programs is evaluated regularly through several different processes. The student learning outcomes of every program are evaluated annually by the program faculty. With the assistance of the assessment coordinators and the oversight by the Assessment Council, each program has an approved assessment plan that outlines how the student learning outcomes are measured. These data are collected throughout the year. They are discussed by the department and action steps are developed for program improvement as reported in the program assessment report. Throughout the year, the assessment coordinators assist the departments with the development of assessment tools, locating institutional data, analyzing the data, and closing the loop by using these data for program improvement. The evaluation of student learning outcomes by the department faculty is the best mechanism for immediate program improvement. CMU is a leader in the assessment of student learning outcomes at the program level.

Program review occurs every five years with the express purpose to assess the overall educational quality of academic programs along a number of dimensions including program demand, student and faculty quality, the appropriateness of program content as workforce or graduate program preparation, program delivery and pedagogy, and student learning and accomplishments after graduation. The review includes an intensive self-study and evaluation through external review. The external review may be part of specialized accreditation or it may be conducted by well-informed experts. The program faculty consider the data provided through their self-study and the external review process and suggest action steps for program improvement. The program faculty, dean, and provost all make independent ratings of the program with regard to program quality, size, and the need for additional resources. After discussion with the Provost, recommendations for program improvement are developed and communicated to the department. This process allows departments to readjust the focus of programs in response to changes in the field and by employers.

CMU holds specialized and professional accreditation from over 20 agencies. Specialized accreditation ensures that students in accredited programs receive an education consistent with the standards for entry to practice or advanced practice in their respective fields or disciplines. Accrediting agencies set forth rigorous standards that must be met by each program as evidenced by

solid documentation. Specialized accreditation requires an extensive self-study which is then reviewed by a team from the accrediting agency followed by a site visit and consultation. Only programs of distinction receive specialized accreditation. A full list of the specialized accreditations held by CMU may be found on the Academic Affairs web site.

The assessment of student learning outcomes, program review and specialized accreditation are all processes that lead to program improvement through reflection and discussion among colleagues.

Program Prioritization

Academic program prioritization was conducted in 2011. This evidence-based process resulted in placing academic programs at CMU into one of five categories: program is a candidate for enrichment, program should be retained at a somewhat higher level of support, program should be retained at a neutral level of support, program should be retained but with a lower level of support, and program is a candidate for reduction, phasing out, or consolidation with another program. Colleges were required to distribute their programs among all rating categories forcing a comparison of one program to another based upon a common set of criteria. The criteria are the same as those used for program review focusing on need, student and faculty quality, and program outcomes.

The University invested in the top programs, building upon our strengths. Colleges were able to invest in top-rated programs through new positions, improved facilities, and other support as needed. Weak programs and programs with low enrollment were redesigned or deleted. This process may be repeated in 2016. Top rated programs, for example include: International Business Major, Logistics Management Major; MA in Communications; Apparel Merchandising and Design; Doctor of Physical Therapy; Neuropsychology; and Electrical and Mechanical Engineering.

College Synopses

Although Enrollment and Student Service units and co-curricular programs play an important role in a students' decision to enroll and persist at CMU, it is the academic programs and quality of relationships with faculty which are the most critical factors. The degrees and programs offered by the academic departments are core to students' decisions.

If the university does **not** offer academic programs which:

- Meet the interest of students
- Meet the needs of society
- Are delivered in a manner to facilitate students' degree completion in a reasonable time
- Impart value to the student, however the students define it
- Are characterized by professional and meaningful interactions with faculty

then **students either will not enroll at CMU or will not remain enrolled at CMU.**

Academic colleges and departments must design and deliver programs which are:

- Current
- Relevant
- Responsive to the interest of students
- Meet societal needs
- High quality
- Advancing the university's mission

Indeed, if the core "product" of the university is not of high quality all support services and opportunities will be for naught.

Responses from each of the colleges summarizing their strategies, opportunities and challenges are incorporated below:

BUSINESS ADMINISTRATION (CBA)

- Consistent with university projections, the college expects on-campus undergraduate student credit hours to continue to decline over the next several years. However, the college may be attracting a larger percentage of university students due to the demand for business degrees and the positive job market. For these reasons, undergraduate business enrollment may outperform the overall university. Graduate enrollment contributes a small portion of total college enrollment, but is expected to increase due to MSIS program growth. The #6 ranking by US News & World Report could also benefit online MBA enrollments.
- CBA's current enrollment profile is desired – about 87% undergraduate and 13% graduate. Currently, about 82% of total college student credit hours are produced by on-campus programs. Undergraduate programs contribute 95% of these on-campus student credit hours. Of the off-campus (remaining 18%) production, about 60% is from graduate programs.
- CBA would like more options for undergraduate and graduate students to earn professional certification and has interest in establishing a Masters of Accounting.
- CBA is currently not experiencing a decline in program interest and is modernizing the SAP, Entrepreneurship, and Professional Sales programs to enhance potential student interest.
- Growth is expected in the MSIS program and SAP related programs.
- Additional MSIS faculty is needed to better meet unmet demand.
- Resources are not being underutilized at the moment because of declining enrollment.
- Retention activities currently underway and their impact on student persistence, progression, and graduation are highlighted as follows:
 - Freshmen – BUS 100 (required course) is a large section highlighting key faculty and business programs; Business Residential College;
 - Sophomore – Advising Initiative (advisors visit all required ACC 250 classes);
 - Freshmen/Sophomore- CBA Major/Minor night; Transfers- CBA Transfer Student Outreach Program.
 - No firm data on results.
- CBA's SAP program is one of 4 programs of its kind.
- Students with particular skills are in high demand including accountants, logistics managers, and SAP related positions.
- Most Michigan community colleges have 2 year business programs. CBA has articulation agreements with most of these colleges and all of the large colleges and the primary feeder community colleges to CMU.
- CBA is willing to participate in a program to leverage staff and faculty to strengthen partnerships with high school guidance counselors but must work closely with FA because of faculty job enlargement issue.
- CBA is willing to participate in developing institutional/college-based merit aid program for high-achieving and “promise/opportunity” prospects with specific interest in CBA programs, but a funding source is unknown.

COMMUNICATION AND FINE ARTS (CCFA)

- Most departments in the College can handle growth in enrollment and all departments are engaging heavily in recruitment.

- If the requested faculty cohort in emerging media is funded, a substantial increase in enrollment is expected.
- Enrollment in the Department of Art & Design can grow substantially if we offer a program in animation and gaming which is currently not offered.
- The Department of Journalism is working on accepting a cohort of about 30 international students in two or three years' time.
- Even though CCFA is limited by laboratory and studio space, classes can be offered on weekends. This is an area that the College has not ventured into before.
- There is a more significant drop in student credit hours than in the number of majors. The decline in enrollment for the university overall affects the UP courses in particular.
- Currently three of the five departments have graduate programs that are prospering. The Department of Communication and Dramatic Arts' graduate program is considered one of the top 10 in the country. The School of Broadcast and Dramatic Arts relies heavily on their graduate assistants for their co-curricular activities. The College focuses predominantly on undergraduate student preparation. A few years ago the Department of Art & Design eliminated their graduate program due to a lack of enrollment. There is room for a graduate program in journalism focusing on integrated communication and work is underway.
- Several new programs and courses are underway. An emerging media faculty cohort request was submitted which, if funded, could provide multiple opportunities for new programs in all areas in the college by focusing on emerging technologies in all the fields. This cohort will enhance our programs and attract more students. It will allow for programs in animation, gaming, video graphics and digital communication. In addition, a master's in journalism focusing on integrated communication is underway. The Communication Department is working on an online oral competency course and on a minor in health communication. The School of Broadcast and Cinematic Arts is working on delivering its basic UP class online. The Department of Art & Design is working with Museum Studies on a certificate in Art Gallery Management.
- CCFA is working on eliminating certain concentrations that were slated for consolidation or elimination under the prioritization process due to declining interest. Modernizing is continuously underway. An example is the new certificate in social media that is offered online. Equipment and software upgrades are continuously taking place to provide up to date programs. As mentioned, a faculty cohort in emerging media has been requested. This cohort will provide added value to the modernization of the programs and providing more offerings for the students.
- CCFA needs to focus more on emerging technologies in the arts and in communication, thus the requested cohort that was submitted.
- CCFA needs more resources in technology focusing on equipment and laboratories to offer more classes.
- All CCFA programs are still viable. The enrollment decline is predominantly seen in the UP classes which provided the revenue needed for most programs.
- CCFA would like to obtain retention figures for each department. The Dean would then be able to review with each department, the DEW rates in their classes.
- "First/Best/Only"
 - The graduate program in communication is recognized as one of the top ten in the country.
 - BCA and Journalism faculty and students garner many awards in many categories.

- The Integrative Public Relations program is unique in the sense that it combines classes from three different departments: COMM, BCA & JRN. The job outlook in this area is above average.
- Communication skills are listed in the top ten skills required by employers.
- The Debate program is nationally recognized.
- The graphics design program in the Art department utilizes the latest software and hardware.
- The School of Music facilities are unmatched.
- Journalism, Art and Music are accredited.
- Our journalism program is only one of two accredited programs in Michigan.
- BCA, JRN, Art all house excellent technology.
- Occupational data suggests that communication related careers, particularly public relations is in high demand. The Arts are actually stable and are not affected by the economy.
- Very few like programs exist with community colleges because of the nature of the programs we offer. Would be more than willing to work with community colleges. Some of that work is already underway. The Journalism Department hosts a community college media faculty workshop every year and the Department of Art & Design is working on articulation agreements with community colleges.
- CCFA would be more than willing to work with high school guidance counselors. The School of Music and BCA do a lot of school visits. We would welcome the opportunities to do more. I know that Art in particular would be very interested in collaboration with high schools. Journalism just held a summer workshop for journalism high school students. The Art department is working with the School of Music on summer camps. The Art department will also be conducting portfolio reviews for high school students this fall. CDA is working on hosting a high school debate and forensics tournament on campus. The Art department works with high school students and offered last fall, Saturday classes for elementary students.
- We currently have multiple scholarship opportunities in each department and would be more than willing to expand those opportunities.
- We have updated most of our promotional materials and have been working with UCOMM on all initiatives including “Discover Central, Discover You.”

EDUCATION AND HUMAN SERVICES (EHS)

- EHS anticipates significant enrollment change:
 - CSE: Over the past three years, the majority of CSE programs have remained relatively stable, with specific program increases. For example, enrollment in Special Education undergraduate programs has increased by 11%. Graduate Special Education program enrollment has increased by 12%. The on campus enrollment in the graduate Professional Counseling/School Counseling programs have decreased slightly over the past three years, however the enrollment in Global Campus has increased (e.g. two new Global Campus cohorts were added this school year).
 - EDL: Enrollment has declined in the past five years, but in the last year it has leveled and increased this fall. EDL program offerings have been revised and retooled to meet the needs of the professionals we prepare. We anticipate enrollment increases as we move more programs to online/hybrid offerings. The new Ph.D. will increase overall campus enrollment and recruit from a national pool.
 - HEV: There are a few HEV program areas that are poised for growth due to changes at the professional level and the focused efforts of the faculty in the program: 1) The field of

dietetics is moving to a master's degree as the entry level credential for the Registered Dietitian. While details of how this will be implemented and how current credentialed RDs will be impacted are still unclear, CMU is positioned well to respond to this change with the existing online MSND program; 1a) It should be noted that the certificate in nutrition and dietetics was approved over a year ago but has not been heavily marketed due to the need for CMED accredited CEUs. Efforts to move in this direction have been delayed due other more pressing priorities for the College of Medicine. This is a potential program area that would benefit from cross-campus collaboration; 2) Early childhood (birth to age eight) is receiving increased attention as a critical period in the lifespan for maximizing children's learning potential. On both the state and national levels there is a clear call for well-qualified early childhood professionals. The Early Childhood Development and Learning major and minor (formerly Child Development) experienced a decline in enrollment in the past two years due, in part, to revisions in the programs to meet new state and national standards and where students were finishing one program before the revised program was implemented. In Michigan, teachers are required to hold an early childhood endorsement (ZS) to work in early childhood programs offered through the public school system. The demand for the ZS is projected to grow as new students enter the field and professionals holding the ZA endorsement (previously acceptable credential) return to pick up additional course work to transition to the ZS endorsement; 3) Apparel Merchandising and Design (merchandising concentration) is anticipating growth as a result of the national recognition that the program has garnered. The closing of several similar programs at other Michigan schools has also positioned CMU's program well to be an attractive in-state option for Michigan High School students; and 4) Gerontology – as the undergraduate program and the graduate certificate are revised and become a part of focused and deliberate student recruitment effort it is anticipated that this program area will see interest that better reflects the changing societal demographics.

- RPL: Enrollment has increased approximately 7% over the past five years. There is some growth potential in our Leadership, Outdoor Recreation, and Recreation & Event Management programs. We also envision growth in our on-line MSA Concentration and the potential for inclusion in the University General Education Program. The International Disney Program will decline and plateau at about 150 students annually. The Therapeutic Recreation program is really beyond its functional capacity.
- TEPD: There has been a gradual decrease in the undergraduate teacher education program due to a decrease in the birth rate and a poor economy in Michigan over the past years. However, there has been an increase in enrollment in the online MA in Educational Technology program. In addition TEPD is developing an online Doctorate in Educational Technology proposed to start in the 2014-15 academic year. There is an anticipation of increased enrollment once this program begins.
- Overall EHS: Human Service majors will remain stable or grow (HEV) and show steady growth (RPL). Teacher education programs in elementary will decline, early childhood, stem education, special education and administration and ed technology will grow.
- EHS desired enrollment profile based on college capacity:
 - CSE: During the 2013-14 school year, CSE is activating several graduate programs that have been on hiatus, implementing transition to more online/hybrid offerings at both the undergraduate and graduate levels, and anticipate increased enrollment as a result of these activities. With the addition of four new tenure-track faculty this year, we are able to more comprehensively address the needs of our students. We will offer more

specialized tracks in the area of Counseling including substance abuse/addictions and veteran's affairs.

- HEV: We continue to be a primarily undergraduate department with a few strong and select graduate programs. We would anticipate this mix to continue, even with the growth in the programs noted above. We expect that the forms of program delivery will become increasingly mixed with a greater mix of online, face-to-face and hybrid offerings.
- RPL: We continue to be primarily an undergraduate discovery major. RPL will work to expand our profile to include an earlier student connection within the University Program and increase graduate students within the MSA.
- TEPD: Primarily an undergraduate teacher education program, we plan to work with community colleges in an attempt to build enrollment in the teacher education program. TEPD is working with Global Campus to revamp the MA programs in elementary, secondary and early childhood programs.
- Overall EHS: We continue to promote a strong Teacher Education presence and Human Service offerings, we have two active taskforces that are examining career trends and will be recommending programmatic changes based on research/trends.
- EHS New Programs:
 - CSE: With the Counseling program undergoing CACREP accreditation, the result will be an improved focus on psychopathology and general mental health counseling. By taking the Learning Disabilities and Autism Spectrum Disorder graduate programs off hiatus, we will be able to offer more options to our students, as well as the specialized tracks of substance abuse/addictions and veteran's affairs. In addition, the revamped Human Development Clinic provides extensive collaboration opportunities among departments in EHS, which will result in new programming options for students. CSE and EDL are collaborating to provide a Director of Special Education graduate program. We are also reviewing opportunities to provide Counseling options at the undergraduate level.
 - EDL: New Ph.D. to begin Fall 2014. Additionally, proposing a new Doctor of Leadership (fully online). This proposal will move through curricular processes during the 2013-2014 academic year. EDL has investigated and will propose a new undergraduate Leadership major that will fast track into a MA in Student Affairs Leadership, BA/MA program. Proposal begins curricular processes in the 2013-2014 academic year.
 - HEV: The Apparel Product Development and Merchandising Technology (APDMT) master's program is a relatively new master's level program that has already seen graduates move on to Ph.D. programs. Research opportunities and faculty expertise make this a program area where a CMU Ph.D. program could be viable and successful. Faculty are continuing to plan for this potential program expansion, recognizing that resources such as faculty, research labs, and assistantships, and industry partnerships to name a few, will be critical to the success of such a program. The certificate in nutrition and dietetics is a newly approved program that has much potential to attract interested students from program areas such as pharmacy, nursing, medicine, etc. who are seeking professional CEUs.
 - RPL: This is the first full year of our Recreation and Event Management Program. The MSA/RPL Concentration will be a new program, application to provide a course in the University Program will be a new addition. All of these expansions offer student options and the potential for additional student credit hours.
 - TEPD: The proposed Doctoral in Educational Technology will begin in Spring 2015. In addition, the MA in Education will be fully reorganized to merge the MA in Secondary Education; the MA in Elementary Education with the MA in Education offered through

Global Campus. This merger will create the MA in Education with concentrations in instruction, elementary education, and secondary education. This reorganized program will be offered off-campus face-to-face and an online delivery.

- Overall EHS: We are planning graduate/undergraduate options in addictions prevention, fast tracks to some Master Degree programs; develop our robust online/hybrid offerings. Two new doctorates are in the planning stages (DET/DOL). Registered Dietetics program is expanding as industry requirements are increasing, new PhD in Ed Leadership will be starting. Examining opportunities for confluence with STEM Education, International Education and Human Services. Human development and Family Studies has a prevention Science focus this will invigorate curriculum; we will leverage CDLL, our premier teaching and research space.
- EHS Programs of declining interest:
 - CSE: The slight decline in interest of the School Counseling program has shifted the focus to growth in general mental health counseling. An overview of the undergraduate Special Education program yields an increase in overall enrollment. In more detail, the Emotional Impairment program has decreased, while the Cognitive Impairment program has grown.
 - EDL: MA in School Principalship in Charter School leadership has seen declining enrollment. EDL moved emphasis to align with site-based school leadership. We are also discussing the degree focus and how to capture the intended audience. The charter school movement is huge and the market is not saturated, we need to retool our degree to meet the needs of these reform minded school leaders.
 - HEV: The MS in Human Development and Family Studies has been placed on hiatus as the program area reviews its vision for the undergraduate and graduate program. As offered, the program was not attracting the quality of student anticipated.
 - RPL: Our Outdoor Recreation Program shows some modest decline. This program has been reformatted to expand the attainment of related professional certifications. This upgrade is expected to make the program more professionally desirable.
 - TEPD: The MA in Elementary Education; the MA in Secondary Education; and MA in Early Childhood program have all demonstrated declining interest. The major reason for this decline in interest is due to the legislative changes in requirements for teachers earning a professional certificate in teaching. The new legislation allows teachers to count professional development activities toward earning their professional teaching certificate. Length of degree program is being examined.
 - Overall EHS: We have decline in educational related areas primarily, but that is uneven, Ed Tech is not declining. Faculty and departments have redirected resources.
- EHS Trends:
 - CSE: Trends in the area of Special Education focus on an increased demand for accommodations and modifications to provide optimal learning opportunities for students with disabilities in the general education setting. The use of technology in education is also vital in our field, as well as the use of evidence-based practices. Within the area of Counseling, substance abuse/addictions, multidisciplinary teams, and general mental health are of utmost importance.
 - EDL: Seeing more students interested in general MA degree, less interest in K-12 school admin or higher ed., but looking for MA degree with leadership focus (no MDE certification interest). EDL exploring ways to capture and retain these students.
 - HEV: Anticipated changes to the educational requirements to sit for the RD exam will likely result in revisions to the dietetics major, post-baccalaureate dietetics internship

program, and possibly to the online MSND program. HDFS is focusing on family prevention science which is cutting edge in the field and early childhood has received state and national support. We are prepared to ramp this up.

- RPL: There is significant growth in demand for our Therapeutic Recreation Program. This parallels growth and interest in health professions. It also illustrates the perceived value in a professional degree option at the bachelor's degree level. The interest in Recreation and Event Management has grown along with the interest in the Leadership Minor.
- TEPD: There is an increase in interest in educational technology not only in teacher education, but also in business, industry and human service areas. We are responding to trends by expanding the MA in Educational Technology and creating the Doctorate in Educational Technology to begin in the 2014-15 academic year.
- Overall EHS: The college continues to examine all trends and are in the midst of making many changes and will continue to do so.
- EHS Additional Resource Needs:
 - CSE: We need to fill two tenure-track positions in the area of Counseling, as well as Human Development Clinic director, and Counseling Global Campus cohort director.
 - EDL: Fewer faculty with expertise in K-12 administration/leadership. Three faculty retired/promoted and EDL only filled one position with K-12 expertise.
 - HEV: Additional FTE will be needed if HEV is to continue to support university initiatives for undergraduate students such as writing intensive courses, quantitative reasoning courses, honors course offerings, which require lower course enrollments to meet requirements. In addition, HEV, especially the HDFS area has traditionally had higher course caps than most other HEV or EHS courses. As scholarship expectations increase, it is becoming increasingly apparent that reducing course caps will help reduce demands on faculty time and free them for additional scholarship activities. Additional FTE will be needed, if HEV is expected to meet the SCH projections identified.
 - RPL: Will need additional FTE to meet current demand in our Therapeutic Recreation Program. The MSA/RPL concentration will require FTE to cover program delivery. FTE required if we are successful in placing a course in the UP.
 - TEPD: The department will need additional tenure-track faculty in Educational Technology due to the expanding MA in Educational Technology and start-up of the Doctorate in Educational Technology. There is also a need for a replacement tenure-track faculty for the Middle Level endorsement program for the undergraduate program due to a planned retirement.
 - Overall EHS: We are anticipating some retirements and will need to replace tenure lines. We will need some upgraded lab space for our design programs.
- EHS underutilized resources due to low enrollment:
 - HEV: Interior Design, is challenged by some low course enrollments primarily due to a lack of focused recruitment efforts. To that end, we hired a full-time fixed-term faculty to focus on recruitment. Better course planning is beginning to result in the need to cancel fewer classes. All other program areas have healthy enrollments, even with the overall decline experienced by the university.
 - RPL: No low enrollment programs, FTE to SCH ratios illustrate that our programs are cost efficient.
 - TEPD: Faculty in the MA in Early Childhood is underutilized due to low enrollment. Also, there six faculty with Reading and Literacy expertise and there are semesters that it

is difficult to fill the course schedules for each of these six faculty members. Faculty are often reassigned to teach other courses.

- Overall EHS: We have been focusing on aligning resources with program needs for the past year and therefore have very little underutilized resources.
- EHS Retention activities:
 - CSE: We have responded to student feedback and have increased hands-on, experiential learning opportunities for our students. Personal, positive relationships are built between faculty and students. Through collaboration, students are involved in research, service learning, and community involvement. We are involved in new transfer student retention initiatives, as well as collaboration with the Honors college to offer specific EHS focused cohorts for EHS Honors students.
 - EDL: Student retention is not our major issue; graduation is especially at the doctoral level. Fall 2013 EDL will focus on increasing our graduation rates of doctoral students. Non-completers who are approaching their final timeline to finish the degree will be supported with increased faculty contacts. Faculty support to help move students toward completion will be reviewed, and assistance implemented.
 - HEV: Retention data varies across programs. Dietetics and Interior Design have an admission process into programs. Once admitted to the program, the commitment from students is quite high. Interior Design is a program area where greater visibility within the university, with the high school, and with community colleges is needed. A faculty member has had part of her load designated for recruitment and retention purposes and she will work with the EHS recruiter and the Admissions staff to draw attention to the interior design programs. Child Development and Family Studies are program areas that students discover after being at CMU for a few semesters and taking one of our university program courses. A part-time general advisor has been hired this year to focus on meeting with prospective students, enhancing our recruitment efforts. Community College articulation agreements have been in place for a while, however revisions to the Child Development/Early Childhood programs has resulted in a need to revise those agreements to fit the new program requirements.
 - RPL: Our students don't become majors until later in their undergraduate years so we don't have a "freshmen" issue. The reasons for our retention success include:
 - Our faculty members do all student advising themselves.
 - Our students see their professors/advisors in more than one course (relationship enhancement)
 - Our student groups assist in creating an attachment to the programs
 - As a discovery major, students have already waded through typical exploratory decisions common to younger students.
 - TEPD: Retention is not a major issue in teacher education (TE). TE candidates enter the program during their junior year. Students have several requirements to meet to be admitted, once students are admitted into the program, over ninety percent of the students will complete the undergraduate teacher education program.
 - Overall EHS: we have very few retention issues at the undergraduate level. Our faculty who teach graduate offerings at the doctoral level are ramping up graduation support. We already implemented a writing/dissertation support program.
- EHS First/Best/Only:
 - CSE: Our newly remodeled, cutting edge Human Development Clinic is near completion. This clinic will offer unique and dynamic collaborative opportunities for students to

observe best practices as well as complete hands-on experiences in the areas of both education and human services.

- EDL: Programs are fully aligned with MDE Administrative Certification requirements; additionally our Higher Education program is fully aligned with the Council for the Advancement of Standards voluntary guidelines. New PhD in research and policy.
- HEV: Apparel Merchandising and Design programs both received national rankings by Fashion- Schools.org, an online resource for students seeking info about fashion school programs and careers in fashion. The Apparel Merchandising program was ranked 20th in the nation, placing the program in the top 10% of programs ranked and the Apparel Design program ranked 31st, placing the program in the top 15% of programs ranked. A closer examination of these rankings revealed that the CMU Apparel Merchandising and design programs were ranked 10th in the mid-west and are the only program in Michigan to receive a regional ranking.
- RPL: Program first to be nationally accredited in Michigan. Currently, only one other state program is accredited. National certification examination pass rate for Therapeutic Recreation students is significantly higher than the national and regional average. Over 60% of the recreation professionals in MI are CMU alums. CMU ranks 5th nationally in Certified Therapeutic Recreation Specialists.
- TEPD: The both the undergraduate and graduate programs are nationally accredited through the Teacher Education Accreditation Council. Central Michigan University is the only educator preparation program in Michigan to offer the Middle level endorsement. TEPD also has one of the largest graduate programs in Educational Technology in the State of Michigan and across the region.
- Overall EHS: We offer many niche and premier programs that have earned national acclaim. Additionally, our 121 year history in education is a powerful endorsement.
- EHS Occupational Outlook:
 - CSE: According to the Bureau of Labor Statistics 2010-2020:
 - Careers in special education are expected to grow 17% by 2020. Over the next ten years, 77,400 more special education teachers will need to be hired.
 - Careers in mental health counselors and marriage/family therapists expected growth 37% by 2020. In next ten years, 58,500 more professionals needed.
 - Careers in school and career counseling are expected to grow 19% by 2020. Over the next ten years, 53,400 school and career counselors will be hired.
 - EDL: Bureau of Labor Statistics 2010-2020 jobs in education, training and library occupational groups expected to grow 15% by 2020. Need for 17% increase in Ph.D. graduates required to fill national need, esp. in higher ed. by 2020. Of the 3.5 million job openings in 2011, 600,000 were in educational sector, this number is projected to increase by 5% in 2012. Employment of postsecondary education administrators is expected to grow by 19% from 2010 - 2020 w/expected increases in college enrollments. Employment of elementary, middle, HS administrators is projected to grow by 10%. Almanac of Higher Education (2012) indicates degree completion in USA has increased by 1.4% annually over past decade. Internationally, average degree completion growth exceeding 6.5%, warranting new programs developing educational leaders in higher ed. Projections show growth in the discipline, EDL needs to situate programs to meet increase in student demand for new jobs and replacements of retiring baby-boomers.
 - HEV: Bureau of Labor Statistics national data project average to above average growth in most employment areas in which HEV graduates seek employment. Specific examples include Dietitians (20%), Interior Designers (19%), Kindergarten/Pre-K teaching (17 –

25%), Human Service settings (28%), and Fashion Merchandising (17%). Data for Michigan employment trends follow a similar pattern, though the growth expected is smaller.

- RPL: Bureau of Labor Statistics project growth in the recreation professions from 12% to 18% through the year 2020. Median salary is reported to be \$39,410 per year. The MI job outlook is less optimistic, particularly in the areas of public sector employment (community and outdoor recreation). National opportunities abound.
- TEPD: Bureau of Labor Statistics reports 2010-2020 suggest a growth rate of 17% from 2010-2020 for elementary teachers. The average growth rate for secondary teachers was reports at 7%. The average growth rate for all occupations is 14%. Secondary teachers reported a lower than average growth rate due to student-to-teacher ratios and increases in enrollment. Overall, projected enrollment figures by geographic regions are excellent indicators of where new teacher opportunities exist. Through 2016, enrollments in K-12 schools are expected to slow down as children of baby boomers leave the system. Fast-growing states, such as Nevada, Arizona, Texas and Georgia, will experience the largest enrollment increases. Enrollments in the Midwest are expected to be steady, while those in the Northeast are expected to decline. Teachers who are mobile and earn licensure in multiple subjects have the most job opportunities available to them.
- Overall EHS: Trends indicate growth in all HS, Mental Health, Leadership/ Administration and Education and Technology Programs. We are well positioned.
- EHS Community College articulation options:
 - CSE: For students in the Cognitive and Emotional Impairment programs, they benefit from community college agreements arranged through TEPD.
 - HEV: Community College articulation agreements are critical but, keeping them current is challenging. Programs such as early childhood have agreements with several community colleges. Mid-Michigan CC has been eager to revise their programs to meet the needs of CMU students due to close geographic proximity between the two schools. Community Colleges that serve a larger number of four-year institutions find it harder to mesh their 2 year programs with HEV programs. Programs such as interior design are recognizing that this is an area that needs to be explored to potentially increase student enrollment in the CMU program.
 - RPL: We have had some success with Northwest Michigan Community College in affiliating with our Outdoor Recreation Program. Affiliations are certainly very possible, yet our initial explorations have not shown an interest of mutual benefit.
 - TEPD: The department has articulation agreements with all community colleges in Michigan for transferring EDU 107 – Introduction to Teacher Education into CMU and the teacher education program. In addition, CMU and TEPD have partnership programs in Traverse City with Northwest Community College and in Lansing with Lansing Community College, respectively, to offer the BS in Elementary Education program for students in these regional areas.
 - Overall EHS: We are continuing to harvest and cultivate CC agreements as well as implementing innovative early college programs and outreach for EDU 107 for TE.
- EHS Strengthening partnership with high schools:
 - CSE: In the Counseling program, interns are placed in high schools and connect with students to begin conversations about their future career interests. Special Education student teachers provide role models for high school students interested in the area of teaching individuals with disabilities. Our outreach plan this school year includes a concentrated effort to work with CMU Admissions to target potential future students. In

addition, the creation of Chippewa Camp for middle school students focuses on outreach with the intent to connect with future Chippewa.

- HEV: AMD program is actively involved in connecting to HS students through marketing materials, Threads, and Fashion Camp. Further, many high schools bring their vocational child care students to the CDLL for tours but the opportunity to market our undergraduate programs may be missed.
- RPL: Clearly lack of program's identity within the University's admissions and marketing materials is a hindering factor. If we can begin to market to Human Services programs, I believe the student and faculty interest will grow.
- TEPD: Currently, TEPD has a Teacher Academy Committee to review high school teacher internship programs. If approved by the TEPD Teacher Academy Committee, CMU and TEPD will accept credit for high school internship programs.
- Overall EHS: See above CC info. We have many innovative HS Partnerships. We also just hired a college recruiter with a primary undergraduate focus.
- EHS Merit based programs for students:
 - CSE: We are working to increase our scholarship opportunities for students in CSE programs. In addition, the creation of awards such as the EHS Teaching, Learning, and Leading award helps to recognize outstanding students in their field with monetary and professional development support.
 - HEV: We have started discussions with the Honors program about how to interest transfer students in honors work so a merit based program for such students may be a nice addition to that focus.
 - RPL: We work collaboratively with the Honor's Program with coursework. We provide student scholarships/seed monies for student professional development.
 - TEPD: Currently, there are two honors courses, EDU 107 and EDU 290, which honor students can use in their program. TEPD has been in discussion with the honors program administration to determine how to expand teacher education offerings for students in the honor program.
 - Overall EHS: This is a major focus this year with EHS taking an honors and a leadership approach for undergraduate programs across EHS.
- EHS Marketing for increased awareness:
 - CSE: This year we have already increased our collaboration with other CMU units to spread the word about our hidden gems. The grand opening of the Human Development clinic, revamped and interactive web site, EHS recruiter, community involvement, and increased communication will result in increased awareness not only at CMU, but throughout the state and nation.
 - EDL: Fully engaged in development of new marketing materials/and comprehensive campaign to increase enrollment in our programs with Global and EHS.
 - HEV: We have not focused on recruitment in the past. Today, we are seeing some slight drops in enrollment that suggest a more proactive stance is needed to increase interest in prospective students. We have hired someone in interior design to begin some recruitment work and hired a general advisor for HDFS to do some preliminary discussions with students. Faculty are key to recruiting students and finding ways to engage faculty in this type of activity is a new challenge.
 - RPL: Within a human services context, all of our programs represent marketable skills (leadership, programming, communication, planning, organization, budgeting, administration, etc.). Unique RPL features; Adventure Center, over 10,000 annual hours of service learning, 600 internship affiliation sites, Disney College Program.

- TEPD: We hired a graphics design intern/student to support our efforts to improve quality brochures, newsletters and materials for the recruiting activities organized by CMU, the college and the department. In addition, TEPD is working with the CMU public radio station for advertising the department's graduate programs.
- Overall EHS: We have hired a recruiter, staff writer, web designer/content expert, a community partner consultant and upgraded our media presence. We have also developed an enrollment management team that meets regularly and developing and finalizing a strategic plan. EHS goal is to increase enrollment by 5% this year.

GRADUATE STUDIES (MSA PROGRAM)

- Currently one of the largest graduate programs in the U.S., CMU needs to leverage local, regional, and national awareness
- Regionally-based market-penetration growth strategies will be developed
- The huge number of MSA alumni can be tapped to assist with recruiting and targeted for possible enrollment into additional programs
- Campus-based faculty lines strengthen the program on campus and through Global Campus
- The MSA focus on core administration skills is especially relevant in the current business environment and should be leveraged to bring added value to both students and employers
- The MSA is scalable and can quickly expand into a much larger academic program
- The combination of on-campus, off-campus, online, and hybrid options makes the MSA extremely convenient and desirable to mobile audiences (military personnel, working professionals, etc.)
- The interdisciplinary nature of the MSA fills seats in several other departments and brings added revenue to participating colleges, and this relationship should be enhanced and strengthened to bring better cooperation in terms of new program development and expansion of course offerings
- The demand for the MSA will increase as the economy improves, especially among mid-level managerial positions
- Because of its customer-needs focus and its internal flexibility, new programs will emerge from the MSA that will attract new, uniquely identifiable target audiences

HUMANITIES AND SOCIAL AND BEHAVIORAL SCIENCES (CHSBS)

- CHSBS enrollment has declined significantly in the past 3 years. CHSBS is the canary in the coal mine, since our enrollments are GenEd dependent to a significant degree. We hope that it will stabilize to some degree and are taking some steps to address that (below).
- CHSBS has several new programs on the horizon:
 - Cultural and Global Studies Major and Minor
 - Interdisciplinary area studies certificates (Africa and African Diaspora Studies, American Indian Studies, Cultural Competency, East Asian Studies, European Studies, Latin American and Latino Studies, Middle East and Islamic Studies)
 - Civic Engagement undergraduate and graduate certificates
 - Cultural Resource Management Graduate Program
 - TESOL certificate
 - MSW

These are areas of demonstrated student and employer interest. The MSW, the TESOL, and the CRM are all reported on the Bureau of Labor Statistics to generate above average growth in jobs over the next decade.

- CHSBS is participating in the college-wide effort to identify programs of declining interest, identify the reasons, and reconfigure those programs to better meet student interest and interests of the marketplace.
- International experience is a significant trend that our School of Public Service and Global Citizenship programs are addressing. Cross-cultural competency and experience is a growing trend. Our growing Neuroscience programs at the undergraduate and graduate levels are addressing significant trends toward intensified research in this field.
- Hiring of an academic advisor for the College to assist with early advising as well as improved advising in the Major/Minor including working with college curriculum committee and improving faculty advising is expected to have an impact on student persistence, progression and graduation.
- CHSBS considered how to leverage staff and faculty to strengthen partnerships with high school guidance counselors but we need to reach beyond the guidance counselors to the students and teachers. Here we have an advantage in having so many CMU alumni in the schools. We are discussing having CMU host a Model UN for high schools that would bring students to campus for a series of events. Another possibility would be to host the annual regional competition for National History Day as well as to host the statewide competition on a rotating basis.
- CHSBS is working on a presentation for Orientation, CMU and You Day, and other recruiting events that will highlight unique features of the building, facilities, and hands-on learning environment. The Virtual Tour will assist with this as well.

COLLEGE OF MEDICINE (CMED)

- Combined MD-graduate programs are highly desirable, particularly pairing the MD degree with a Masters' in Public Health, Masters' in Administration (health focus), and possibly with other graduate degrees. Strategic planning for this effort is anticipated to begin in approximately 2015.
- Start-up funding for the research and clinical missions of CMED was not planned or allocated.
- CMED enrollment will increase annually until the fifth class is accepted in 2017, reaching the full enrollment complement of 416 students.
- CMED's desired enrollment profile is 100% graduate students in the MD program.
- CMED has established endowed scholarships, granted based upon a combination of merit and demonstrated need.
- Physician shortage in MI is currently estimated at 2,000, rising to between 4,000 and 6,000 by 2020. This shortage is more significant in primary care and other generalist practices (emergency medicine, family medicine, general surgery, internal medicine, obstetrics-gynecology, pediatrics, psychiatry), and due to maldistribution of physicians, more severe in the central and northern regions of the state. The CMED mission focuses on addressing shortages in the region and in these specialty areas. Significant physician shortage exists in MI and nationally...employability and salaries are currently non-issues.
- MD degree program and residency programs are the first and only currently available in the Central or Northern part of Michigan.
- Through the AHEC, such activities (leverage staff and faculty to strengthen partnerships with high school guidance counselors) are beginning, and apply to all health related and health professions programs.

- CMED has hired a PR/Communications Director who, with the Dean's Executive Committee, and in collaboration with University Communications manages the marketing and awareness program.

SCIENCE AND TECHNOLOGY (CST)

- Most departments in the college can handle growth in enrollment.
- All departments, along with the college, are engaging heavily in recruitment and retention efforts.
- Most majors' enrollment will increase or stay even. Our enrollment drop will be in UP courses.
- CST's desired enrollment profile is to increase academic preparedness of undergraduate students.
- CST's new programs on the horizon: EES PhD program, and potential masters in engineering have demand from outside the university but are unlikely to significantly affect undergraduate enrollment.
- No programs currently in significant decline. Those that were, have been eliminated through the prioritization process.
- Biology is substantially revising curriculum.
- CST is always investing in new technologies.
- BLS projects an increase in most STEM fields over the next few decades.
- Significant opportunities for growth in engineering require additional investment from the university including new faculty lines and renovation of the ET building.
- The decline is in the UP classes and CST has responded by reducing fixed-term faculty.
- CST has 5-year strategic plan to address retention and recruitment.
- CST is providing a Student Success Center that will provide advising and tutoring for all students in our college.
- CST has hired a Director of Student Services and a CST Academic Advisor.
- All of the following CST metrics will be improved:
 - Freshman to Sophomore retention = 52%;
 - Sophomore to Junior retention = 65%;
 - 4-yr graduation rate = 11%;
 - 6-yr graduation rate = 26%.
- "First/Best/Only"
 - Undergraduate meteorology program is the only program in Michigan.
 - Marketing for the other programs is based upon the quality of faculty and experiences that students will gain.
- BLS projects an increase in STEM related careers for the next decade.
- CST has looked at like programs offered by Michigan community colleges but the primary issue is the quality of the programs and courses which must be considered.
- Leveraging staff and faculty to strengthen partnerships with high school guidance counselors will be part of the CST strategic plan initiatives as well as providing Admissions with specific information on our programs to take into schools that they visit.
- CST would like to see institutional/college-based merit aid program for high-achieving and "promise/ opportunity" prospects but will require funding from administration.
- CST marketing collateral is continuously updated, however, is it currently not focusing on the "first/best" aspect for most programs. It is focused on the "best" for a subset of high school students.

- CST has been working with UCOMM and Admissions to insure all information given out to the public is current and correct.

THE HERBERT H. AND GRACE A. DOW COLLEGE OF HEALTH PROFESSIONS (CHP)

- Enrollment changes for CHP will depend on the strategy adopted. The college is currently investigating increasing enrollment in existing programs. Some increased enrollment is possible in the graduate clinical programs, but the SCHs generated would be almost exclusively within CHP (no benefit to other colleges). Increased resources would be needed for any increases in existing programs. Increased enrollment in undergraduate programs is possible, but information to inform projections is soft. Development of new programs offers the possibility of new SCHs and substantial financial benefit to the other colleges. Startup costs (financial, space, etc) will be required to launch these programs. Nursing holds the greatest promise in terms of attracting new freshmen and SCH distribution to other colleges.
- We have a couple of programs with declining interest. To date, these declines have been offset by growth in other areas. Through academic prioritization, some of these programs have been eliminated or placed on hiatus.
- There are provider shortages in many of the professions in the college and in health-related jobs in general. Student interest in health professions is high and is anticipated to remain so for the foreseeable future.
- Increasing enrollment in current programs or starting new programs will require additional space, equipment, and faculty. The specific needs will depend on the strategy adopted.
- There is a certain expected level of attrition in CHP programs as enrollment in many of them is determined on a competitive basis. Opportunities exist to identify what happens to student who are not accepted into one of our programs (i.e., leave the university; select another CMU major; or quit college altogether, etc.). If certain programs attract these students, efforts to make the pathway to these programs should be explored. Our college does not deal with freshmen and we offer very few courses aimed at freshmen.
- CHP is interested in engaging in First/Best/Only activities. Data from first professional graduate programs would be relatively easy to collect at the college level. Undergraduate data would be more difficult to obtain. We would gladly work with Enrollment Management and OIR to collect, analyze and interpret these data.
- Department of Labor statistics cover employment opportunities well for the health professions.
- So called “ladder” programs are identified with community college programs, but are not valid concepts. For example, the Physical Therapist Assistant program at MMCC is not really a gateway to the DPT program at CMU. There is great distance between the associate degree in PTA and the doctoral level DPT. Very few PTAs have credentials that make them competitive for admission into the DPT program. Combining some of the programs offered at the community colleges with undergraduate majors (e.g., Health Fitness) may provide them with more employable skills. Thus far, the community colleges have shown little interest in partnering in this way.
- Connecting faculty/staff with high school counselors or other high school personnel is certainly possible. CHP sponsors the Michigan chapter of Health Occupation Students of America (HOSA) conference every year. This conference attracts some of the best high school students in the state who are interested in health careers as well as their faculty mentors. They interact with our faculty, staff and students while on campus.

Committee Key Performance Indicators (KPIs)

The Enrollment Management Committee is charged with:

- Recommend enrollment goals based on careful study and thorough discussion of external and internal data, in alignment with the strategic plan
- Evaluate current enrollment policies and practices in regards to their effectiveness in reaching established goals
- Recommend strategic initiatives for meeting enrollment goals based on the University's strategic plan, vision, and priorities
- Identify strategies for under-subscribed majors and programs

The priority initiatives of the Committee for the 2013-2014 year are:

- Refine undergraduate enrollment targets
- Review and update undergraduate admission criteria, as needed
- Promote four-year graduation
- Conduct major demand analysis
- Review and verify academic program offerings as compared to occupational opportunities and outlook along with other demand indicators

ACTION PLANS**Committee Action Plan**

ESS Goal 1: Develop and implement a strategic enrollment management plan.

Objective 1: Develop a plan that aligns with and supports the university's strategic plan, mission, and vision to provide sound recommendations on an optimal enrollment profile and matters influencing achievement of enrollment goals.

Action Item	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes/KPIs	Actual Outcomes
Form Enrollment Management Committee	ESS	Faculty Staff Student	Dec 2012	Committee defined and meeting scheduled.	Committee formed and four meetings held Jan-Apr 2013, meetings to resume in the Fall.
Improve use of data to drive enrollment decisions.	ESS	EMC	Jan 2013	Provide data regarding discussion topics so that recommendations and decisions are informed and data driven.	<Completed/Ongoing> Binder provided for initial meeting and materials posted on the committee SharePoint site.
	ESS	EMC	Jan 2013	What Information is needed to inform decisions? Collection of any information that is identified and has not yet been shared.	<Completed/Ongoing> This question was asked in the first EM Committee meeting when the binder was shared. Additional information is pulled, as it is identified.
Create Strategic Enrollment Management(SEM) Plan	ESS		Feb 2013 Draft Sept2013 Final Published	Plan document created and shared with the committee	A draft was shared at various levels; input collected and incorporated; to be finalized for Sept 2013 distribution to the board.
	EMC	GC, Intl Grad, Academic Colleges	Aug 2013	Input from International & Academic Prioritization Committee; Input from Graduate Studies; Input from GC; Input from each of Colleges. Attain Subcommittee recommendations/metrics.	Content/feedback incorporated as shared. Subcommittee recommendations will be collected for a future version after the committee reconvenes in Fall 2013.
Form Subcommittees with focus on 4 strategic areas: Academic, Recruiting, Retention, and Service	EMC		Mar 2013	Form Subcommittees	<Completed> posted.
	EMC- Subs		Fall 2013	Subcommittees meet, confirm summaries and assign a lead as well as provide recommendations.	<To Be Rescheduled> May2013 meeting was cancelled so agenda was moved to first Fall meeting to be scheduled.

Action Item - <i>ESS Goal 1 cont.</i>	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes/KPIs	Actual Outcomes
Establish concrete objectives and metrics to qualify and quantify goal attainment :	ESS-Johnson/Tickle	UGAdm, AAdv, OSS, OFA	Aug 2013	Action plans with metrics	<Completed> ESS Division Goals and SEM Plan Recommendations from the Committee are being included as action plan items for improved progress tracking in its own section which can be extracted and maintained.
	EMC –Subs			Review/Expand Action plans for sections that align with each subcommittee.	
	ESS	EMC		What resources are needed for recruiting and enrollment of students	Copied to ESS-Recruiting goal Action Plan
	ESS	EMC		Should we lower our admission standards? If so, a. What would be the impact on the number of new students b. What impact would this have on retention; for these students and overall	Copied to ESS-Recruiting goal Action Plan
	ESS	EMC		Should we change (lower) our tuition for non-resident students a. What should we charge b. What is the impact on the number of out of state students we enroll c. What is the financial impact	
	ESS	EMC		What should be our financial aid philosophy backed up by data? a. Mix of merit vs. need based aid b. Amount of university financial aid c. What should our ‘discount’ rate at various levels d. What is the right amount of university dollars needed e. Who should we give money to	<WIP> a new Financial Aid philosophy was shared in Aug 2013 so this question was copied to the ESS-Financial Aid goal action plan.

Marketing Action Plan

ESS Goal 2: Develop and implement a comprehensive student marketing and recruiting campaign.

Objective 1: Strengthen the University's brand identity in its current market as well as expand reach and exposure beyond the current market.

Action Item	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes	Actual Outcomes
Improve brand recognition and awareness of CMU within Michigan and beyond current markets	UComm	ESS	Spring 2013 10 weeks Late Summer 2013	Update and invest in new marketing and advertising opportunities, including collateral, giveaways, brochures, television spots, and public broadcasting to increase awareness and brand recognition.	Launched a Spring 2013 Media Campaign Discover Central – Discover You <ul style="list-style-type: none"> TV, Billboards and radio ads scheduled for 10 weeks, aligned with Fall 2013 recruiting cycle complementary campaign to follow
	UComm		12/31/2013	Establish a social media presence for Undergraduate Admissions.	Complete: Official CMU Social Media site established and maintained.
	UComm	ESS		Clarify value proposition, competitive advantage, and brand identity.	<IP>
Develop and implement a market research plan; Identify and cement markets	UComm-Knight, ESS-Johnson	UG Adm-Speakman	7/1/2013	Market analysis completed defining current market and segmentation; generating opportunities we choose to pursue and planned with specific metrics	<IP>
	UComm / ESS		June 2013	RFP distributed to review perceptions on institutional brand along with the choices students are making.	RFP was sent to multiple vendors in June
	UComm / ESS	Affected Depts	TBD	Address the psychographic issues – why are students not coming, etc.?	With data from the RFP engagement, a brand strategy can be formalized and specific plans to address any issues beyond marketing need to be added to the appropriate action plans.
Align and orchestrate marketing and communications efforts targeted at prospective students, their parents and those who influence them; communicate in a campaign format	UComm / ESS	UG Adm	June 2013	A strategic, methodical plan for communications targeting individual students (and in some cases, their parents and influencers)	An integrated communication plan for Fall 2013 was created and UG Admission communications adjusted and improved accordingly. Specific pieces created as needed.
Council of Deans: At 2 Alumni events feedback was provided on what they(Alumni with college age kids) see about CMU:				1) Identify opportunities to leverage CM Life to support recruitment and retention efforts. 2) Need to change the promotional message of what comes out of CMU.	

Recruitment Action Plan

ESS Goal 3: Develop a comprehensive recruitment strategy for increasing and diversifying the University's student applicant pool.

Objective 1: Expand the student prospect and applicant pool in respond to cohort declines in current applicant pool.

Action Item	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes	Actual Outcomes
Review current application process and admissions standards Review and update undergraduate admission criteria, as needed			Spring 2013	Explore a Common Application and what benefits it may provide for increasing number and caliber of applications.	Holistic components to participate were researched and it was not appropriate for Fall 2013 recruiting. Holistic aspects to continue to be pursued by the new Director.
	Dir/UG Adm	UG Adm Support	August 2013	Communicate with students who completed but did not submit their applications. "Ghost" (un-submitted) applications can be processed as "incomplete" applications. Applicants of "partial" apps can be contacted to encourage completion.	For the first time, "Ghosts" received scheduled communications to facilitate completion. (>3,000 un-submitted and >3,000 partial). This shifted application numbers from--4% to +4% in comparison to last year. A unique source was not loaded for tracking progress as a inquiry/lead source of partial & un-submitted apps.
	Dir/UG Adm	UG Adm Support Staff; Mgr/Comm-Adm;	June 2013	Increase frequency of scheduled communications to "incomplete" applicants to reduce missing materials and increase the timeliness of decisions. Examine the most common item(s) missing that keep a decision from being made to plan needed improvements / communications.	Implemented new monthly (email/1call) communications, after the current single letter being sent regarding missing materials needed for an admit decision. Transcript is the most common item missing for a decision. As of 6-20-13: 4,000 incomplete apps (3,000 newly added Ghosts). Slow decline began in response to new monthly reminder communications.
	Dir/UG Adm	UGAdm Counselors		Evaluate "incomplete" applications where only the application fee payment is left.	Waived the \$35 app fee for admissible students so a decision can be made. About 450 app fees were waived as of 6/20/13 and moved to the queue for decision. Need to track #Admitted and #Enrolled for these.
	Dir/UG Adm	UGAdm Counselors	July 2013	Reduce the number of applications "on hold" by making decision based on information available.	Eliminated the large number of files on Hold (> 800) for Fall 2013. 6/20/13. <400 left to review and 400 being decided (most were offers, a few denied).
	Dir/UG Adm	ResLife	June/July 2013	Increase Paid Admits (Deposits) by 100 students: Utilize newly created Maroon & Gold Scholarship* to enhance yield of admitted students who have not yet paid.	Initial award letter sent then reminders (email/1Call). As of 6/20/13, 136 of 1500 offered a scholarship confirmed attendance. *HSGPA 3.1 - 3.49/ ACT 20 or >

Action Item - <i>ESS Goal 3-Obj 1 cont.</i>	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes/KPIs	Actual Outcomes
Create provisional admissions standards	ESS-AA ESS-UG Adm	ESS		Academic Empowerment Program was piloted and refined.	Program refined after 2012-13 pilot of 202 students (70% eligible to return).
	ESS-UG Adm	Adm Counselors		Spring 2014 Conditional Admit program defined with targeted follow-up assigned to counselors.	Spring 2014 Conditional Admit is drafted with anticipated numbers: 1,000-1,200 invitations; 25% response and 8-10% become actual transfer students.
Hire an Admissions/Communication Mgr	Rinke; Tickle	team	6/1/2013	Position hired.	Completed successfully-started 6/24/13
Determine desired <u>enrollment profile</u>			May/June 2013	Refine undergraduate enrollment targets and revisit the profile for adjustments.	Fall 2013 targets: 2,850* FTIAC /1,050* Transfers *Revised 6/2013
Develop an annual recruitment plan to guide annual admissions efforts.	UG Adm			Maintain High Achieving student apps FY14 1,500; FY18 3,000	FY12 1,269; FY13 1,233
Increase recruitment of out-of-state students, south / west states will see significant increases in high school graduates through 2020	ESS-UG Adm			Increase leads from out-of-state to expand geographic representation FY14 1,600; FY18 3,000	FY12 1,266; FY13 1,426
Increase participation in national and professional associations to build networks; learn/share best practices.	ESS-UG Adm			Identify/plan attendance at NACAC confr to extend visibility and recognition of CMU that align with outreach areas.	13 NACAC conferences added to the out of state recruiting travel in Fall13
Increase effort to recruit Southeast MI	ESS-UG Adm			Increase leads from Southeast Michigan FY14 10,750; FY18 9,000	FY12 10,865; FY13 10,533
Explore a Program to engage HS counselors from schools / districts not historically in CMU's market, encourage student interest from home areas & develop referral relationships.	ESS-UG Adm Williams			Define a plan for implementing the Counselor Fly-in Program for Fall 2014 recruiting.	
Develop partnerships with campus constituencies (Alumni, MASS, colleges) to diversify the applicant pool	Dir/UG Adm			Increase Minority applications FY14 5,500; FY18 7,000	FY12 4,898; FY13 5,501
Build relationships with students attending CMU charter public schools	Dir/UG Adm ESS Mgr/CRM	Tim Odyrkirk		Increase FTIAC applications FY14 21,000; FY18 25,000	FY12 18,366; FY13 18,185
Enhance community college partnerships	UG Adm; Registrar	CCs		Increase Transfer student apps FY14 4,000; FY18 5,000	FY12 4,079; FY13 3,898 Finalized +4 reverse transfer agreements.
Connect with prospective students/families who visit CMU/MtPI.	Derek; Seelye;	NWilliams UComm		Athletic Events (20-25,000) Camps and big events(~200,000)	Plans to share data for communication campaigns (camps available Sept2013)
Engage alumni in recruiting	Dir/UG Adm	Alumni		Outline outreach/training & schedule	
Support individual colleges in their marketing efforts, including helping them to prioritize big impact, first-step initiatives	Dir/UG Adm			Enable improved communication from the Colleges to prospective and new students to increase confirmation rates and reduce the number who choose to go elsewhere.	Provide monthly student list by College-they can communication with prospective ("Offered"-Admit/Not Pd) new ("Offer Confirmed- Admit/Pd) students

Objective 2: Establish a Prospect / Lead Management framework for monitoring the enrollment funnel.

Action Item	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes	Actual Outcomes
Utilize EMAS (Enrollment Management Action Systems) to report current prospect / inquiry management until Talisma/CRM is implemented. EMAS is Admissions current CRM tool. (CMU hasn't captured leads historically beyond ACT & transcripts. Beginning with 2012, all lead data should be captured/loaded, where available, as a baseline for comparison with 2013 data).	ESS-Mgr/CRM	UG Adm; OFA	Feb 2013	<p>Develop a Prospect/Lead Management process and baseline prospects/leads by source and conversion to applicant rates.</p> <p>a) Identify key inquiry sources not currently receiving communications or response from CMU. Students initiated inquiries have higher conversion rates than university initiated recruiting and should be a priority response. Implement a process for:</p> <ul style="list-style-type: none"> ▪ Transcripts & Scores coming in on paper (mail/fax) for non-applicants ▪ un-submitted and partial "Ghost" applications ▪ loading FAFSA data for non-applicants <p>b) Identify reporting potential from the current system and any process/system issues which need to be corrected to solidify the short-term framework & process in preparation for Talisma CRM.</p> <p>c) Identify Lead Trends</p>	<p>Investigated, documented, and prioritized all available and desired lead sources; establish benchmark metrics, where available. Define any data/process issues for correction so 2013-14 data will be more complete and usable for decision making.</p> <p>a) EMAS load so included in communications sent.</p> <ul style="list-style-type: none"> ▪ >1,900 Non-applicant Transcripts ▪ 300 Non-applicant "paper" Scores ▪ >4,000 Un-submitted Ghost Apps ▪ >3,000 Partial/started Ghost Apps ▪ 6,500-8,500 Non-Applicant FAFSA's were not loaded but data extract for CRM & Data Warehouse was identified <p>b) Data elements not consistently captured /loaded for reporting (source; stage, enrollment term state/geography; and Fr/Tr student type). Fields corrected in EMAS data based on a best guess; mandatory fields identified /loads fixed. Email was not being captured for communication forcing mail. New lead sources are not being loaded so 2013-14 data will not be complete in EMAS to compare to CRM.</p> <p>c) Trends</p> <ul style="list-style-type: none"> ▪ # leads increasing (capturing more consistently and more lead sources) ▪ ACT Scores sent by students is largest source of new leads for an academic year– tailored communications could improve conversion. ▪ CAPPEX as a University Web Search tool send significant numbers of unique new leads. Tom is looking at other top searches like FastWeb.

Action Item - <i>ESS Goal 3-Obj 2 cont.</i>	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes/KPIs	Actual Outcomes
	ESS-Mgr/CRM; OIT	Dir/UG Adm; UG Adm Support Staff; UComm	April 2013	Design and implement a Web Inquiry Form missing from the CMU site, similar to that used by Global Campus which provides approximately 60% of their leads.	<i>The first inquiry forms were submitted within 15 min. of launch without announcement of the form being available (Easily found accomplished!). An average 450 inquiries/mo were submitted for the first three months. 1,500 total inquiries through 6/13/13, resulting in 785 unique new student leads across 4 academic years.</i>
	ESS-Mgr/CRM; OIT		March 2013	Document undergraduate admissions processes and identify both short-term and long-term improvements.	<p>Review processes and document current enhancements.</p> <p><i>A few improvements made in ImageNow system processing of transcripts to automatically post transcript receipt on the Track My App for students. Much of the manual effort of the current processes <u>cannot</u> be eliminated due to limitations of the current EMAS system.</i></p> <ul style="list-style-type: none"> ▪ <i>Manual data loads and export data/manipulation for communication in EMAS can all be built / scheduled and then run without manual intervention in the Talisma system.</i> ▪ <i>Communication Campaigns automatically run in CRM based on defined data elements/criteria being met allowing very tailored/automated communications that will expand the communication plans we can offer today in EMAS that require export/manipulation of files and manual fulfillment.</i> <p><i>Event Management and automated communications and tracking related to the events will capture leads in CRM that we don't consistently capture, communicate with or track today in EMAS.</i></p>

Objective 3: Implement Talisma CRM on campus in undergraduate admissions.

Action Item	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes	Actual Outcomes
Improve communication throughout the student life cycle through implementation of Customer Relationship Management (CRM) strategies.	GC-Mgr/CRM	ESS/Mgr/ CRM & OIT	Mar/April 2013	Participate in the Global Campus <u>Upgrade of Talisma CRM to the Higher-Education Pack Requirement Meetings and Training.</u>	Understand the data structure of the upgrade and the plans for Global Campus to migrate existing Campaigns and Events for planning On-Campus parallel requirements. <i>Implementation was delayed till 6/3/13. Participated in requirements and training. *Ability to use the test environment was restricted until May and then again for a refresh till August.</i>
	ESS-Mgr/CRM		Jan 2013	Establish a Lead Management framework to understand the <u>data</u> that will need to be loaded to CRM.	<i>See the ESS Goal 3 Objective 2 for details.</i>
	ESS-Mgr/CRM	UG Adm ESS Dirs	Jun 2013	Establish a template to build out a <u>communication plan</u> for UG Admissions and have the ESS directors plan student / parent communications they do and/or want to add that can fill out the plan.	<i>The template was developed and shared with the ESS Directors and drafts of plans from primary areas were shared. UG admissions created a matrix only till the new Director started and defined a basic plan with UComm for Fall 2013 forward. Alignment with GC processes will allow cloning of their established campaigns.</i>
	Rinke; Tickle	Dir UGAdm; UComm ESS	May 2013	Hire a Manager of Communication for the Admissions area who can coordinate the building of an integrated communication plan in the Talisma product.	<i>Started 6/24 and can participate in the delayed kickoff of CRM having had a chance to get up to speed.</i>
	ESS-Mgr/CRM	UG Adm	Oct-Apr 2013	Understand <u>processes</u> in UG Admissions; where there are breaks and opportunities for improvement; implement some key fixes and prioritize work request till start CRM conversion.	<i>Liaison with OIT for Admissions fixes. Fixed Transcript system issues and resolved 3 month backlog. Implemented a Web Info Request Form. Implemented Remote Access (VMWare). Designed a Visit/Event simplified solution.</i>
	CIO ESS-Mgr/CRM	Each Admission office OIT	April 2013	Establish process documentation for the Admissions office process(es) so differences can be identified and impact of requests better understood.	<i>Initial high-level process was drawn. The UG Admissions' CRM implementation aligning with the GC processes that have already been optimized gets CMU to a single process for the majority of admissions. The rest can be tackled adding the smaller admissions area into CRM.</i>

Action Item - <i>ESS Goal 3-Obj 3 cont.</i>	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes/KPIs	Actual Outcomes
Continued from prior page	VP ESS; ESS-Mgr/CRM	Dir UGAdm; OIT; VP GC	April 2013	Establish a Statement of work with Talisma/CRM vendor (Campus Management) to design/assist in the initial on-campus implementation for undergraduate admissions. Defining a 2nd campus & what data should be shared vs. separate between campuses is critical to avoid impacting Global Campus' processes.	With a solid understanding of the data sources that we need to implement, an SOW was requested. Budget approval delayed commitment. Signed SOW for Phase 1 On-Campus project with UG Adm and Introduction phone call held in April 2013. Kickoff scheduled for 6/11-13 was postponed.
	ESS-Mgr/CRM	Dir UGAdm;	June 2013	Global Campus Process to be "cloned" as the design for UG Admissions implementation with an initial scope focused on inquiry. Data sources to be included in the scope are key Student Initiated: Web Inquiry; Ghost Apps; Visits Scores; College Web Search; & FAFSA. Requirements communicated with the vendor need to emphasize reuse of existing/approved processes that will be "shared" vs time spent on broken or inefficient "as-is" processes.	Admissions Process Diagrams reviewed. Updated the requirements document with these process diagrams as the requirement for implementing a shared CRM environment. Significant documentation is needed to capture process differences and bring the process flows current(5yrs old). High-level process flows need created to tie detail flows together scheduled with Pat Fox (GC) and UG Adm process owners to have current going into the kickoff.
	ESS-Mgr/CRM	UG Adm: Dir Mgr/Com m OIT-Rohn & Reid	Sept2013* Postponed now Feb2014	Talisma/CRM Implementation for UG Admissions targeted to begin Spring 2013 after the GC upgrade, migrating data for Fall 2013 and beyond. It will provide improved, automated, fully integrated communication plans, full tracking of all sources & improved dashboard/reports.	Talisma/CRM contract was signed 5/3/13. Kickoff scheduled for 6/11-13 (postponed*) Kickoff rescheduled for 9/23-25. The project will run approximately 4 months putting implementation likely in Jan/Feb.
Complete import of all Admission Prioritized Lead Sources	Mgr/CRM ESS or GC?	OIT; ESS Dir	Spring 2014	Continue to load additional lead/inquiry sources into CRM as secondary phases until all key sources are available; automatically managed in campaigns and being tracked / reported.	Non student initiated lead sources will not be included in the initial scope and will be completed as a second phase outside the vendor SOW project. Scoping/timing depends on Phase I timing.
Rollout CRM to the next critical area	Mgr/CRM ESS or GC?	ESS Dir		Create a CRM Roadmap.	Rollout to be determined by the full ESS communication plan being developed but likely involves: Orientation; Housing; Financial Aid; OSS/Retention & Registrar with student communications to integrate.

Service Action Plan

Goal 4: Enhance Student Engagement.

Objective 1: Increase out-of-classroom experiences for student connection to campus, social and civic responsibility, and personal growth.

Action Item	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes	Actual Outcomes
<u>Increase participation</u> in co-curricular activities (student organizations, service opportunities, leadership events, campus activities) and <u>enhance student engagement</u>	ESS-ResLife			Increase in first year students attending Leadership Safari program to maximum capacity of 1900.	Fall 2013 – 1,900; Fall 2012 – 1,736
Add a Greek Life and Student Involvement Coordinator to adequately support students involved in Greek organizations and encourage increased involvement and outreach opportunities.	<Damon>			Establish baseline participation numbers for all areas of the Office of Student Activities & Involvement (Student Activities, Fraternity & Sorority Life & Student Organizations).	Total students involved in student organizations: FY13 – 5,656 FY12 – 4,040
	<Damon>			10% increase in the student use of Orgsync (Student Organization Management tool)	Students logged in/registered FY13 – 10,227
Explore creation of a Substance Abuse Education Coordinator to educate the community on the impact of substance abuse based on trend data, research & # of cases.	Rapaport	ESS Student Affairs	Fall 2012	Collaboratively complete the planning and research necessary to write a Substance Abuse Education Coordinator position request for submission.	Final Coordinator Alcohol, Other Drug Abuse and Violence Prevention and Intervention Position request was submitted for FY14 but funding did not allow it to be pursued. It will be resubmitted for FY15.
Review the Volunteer Center staffing structure to determine appropriate levels required to meet volunteer and service needs of students.	<Shawna>			Staffing Proposal.	A proposal was received and approved with base funding which will allow expanding the program and hiring another FTE.
Increase the Leadership Institute workforce to provide appropriate staffing to allow for improved service and expanded outreach.	ESS-LI			Staffing Proposal.	In August 2012 two additional positions were created in the Leadership Institute. One Assistant Director (P&A-3, 1.0FTE) and one Administrative Secretary (OP-5, 1.0FTE) were hired and have performed exceptionally well during their first year.
Create a leadership program assessment plan intended to assess performance in civic responsibility and student engagement.	ESS-LI			Develop and implement methods to collect baseline data demonstrating Leadership Institute students' engagement. (e-Portfolio and new online protocol documentation for the Leader Advancement Scholarship)	Developed an e-Portfolio system that allows self-reporting of student progress toward stated learning outcomes & competencies for LAS. This was complimented by the online protocol documentation launched by LI. These efforts were highly successful resulting in a national presentation at the annual convention of the American College Personnel Association (ACPA) in March 2013. Currently using these tools to develop an assessment plan for all LI programming in FY13-14 that measures student progress towards learning outcomes and tracks unique students

Retention Action Plan

ESS Goal 5: Develop and implement strategies to identify and mitigate student attrition

Objective 1: Mitigate student attrition by:

- Identifying factors that cause students to drop-out or stop-out
- Decrease over-reliance on the enrollment of new students (FTIAC)
- Improve year-over-year persistence rates

Action Item	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes	Actual Outcomes
Establish a staffing model focused on student retention.	ESS-OSS			Establish a proposal for establishing an Office of Student Success (OSS).	Proposal was presented and approved in 2013 with hiring in-progress for Fall. ESS launched OSS in August 2013.
Identify a vendor to conduct research on why students leave.	ESS-OSS				CMU will participate in the EAB Student Success Collaborative.
Define desired metrics for evaluation and student success	ESS-OSS				See table 1 below; to be updated in Jan 2014.
Identifying factors that cause students to drop-out or stop-out	ESS-OSS	Success Coaches		Decrease 4 year drop out /stop out rate by FTIAC cohort.	55.6% (FY12) down from 59.2% (FY11)
Improve persistence rates	ESS-OSS	Success Coaches		Increase year-over-year persistence rates	2009 cohort saw improved persistence but cohort 2010 and 2011 have decreased or are not yet available
Promote four-year graduation	ESS-OSS	Success Coaches		Increase 4- and 6-year graduation rates	20.6% (FY10) up from 20.54% (FY9) for the 4 year graduation rate

Table 1

Mitigate Student Attrition					
	FY 9	FY 10	FY 11	FY 12	FY 13
4 Yr Drop out / Stop out rate by FTIAC cohort	2006 cohort= 56.5%	2007 cohort= 55.3%	2008 cohort= 59.2%	2009 cohort= 55.6%	TBD
Persist Year 1 to Year 2 (Fr –So)	2008 cohort= 76.1%	2009 cohort= 79.6%	2010 cohort= 75.8%	2011 cohort= 75.4%	TBD
Persist Year 2 to Year 3 (So –Jr)	2008 cohort= 67.6%	2009 cohort= 69.2%	2010 cohort= 67.3%	TBD	TBD
Persist Year 3 to Year 4 (Jr –Sr)	2008 cohort= 63.3%	2009 cohort= 65.0%	TBD	TBD	TBD
4 Year Graduation Rate	2008 cohort= 20.54%	2009 cohort= est. 20.6%	TBD	TBD	TBD
6 Year Graduation Rate	TBD	TBD	TBD	TBD	TBD

ESS Goal 6: Review and analyze the academic advising process and develop strategies to support student success.

Objective 1: Recommend an academic advising model that promotes student success by reducing the number of undeclared students in the first year.

Action Item	Responsibility Center	Others Involved	Target Implementation Date	Expected Outcomes	Actual Outcomes
Review academic advising philosophy and structure	ESS-AA			Academic Advising proposal.	The current structure was reviewed and a proposal delivered
Review applicable academic advising models to provide better alternatives for CMU.	ESS-AA			Achieve a 300:1* ratio of student to faculty/staff over a 5-year period.	General academic advising average over the last 5 years: 5,700:5 (1,140:1 ratio). Hiring 5 additional Advisors in Fall 2013 shifts that ratio to 570:1
Engage academic colleges to encourage major selection at the time of application for early major selection and academic program planning.	ESS-AA	Academic Colleges		Decrease the number of students with an undeclared major and no official academic program plan to graduate.	52% Undeclared freshmen being advised. Holds decreasing as advising appointments increase. (Table 2 below)
Review existing advising resources to determine if appropriate staffing is available to successfully deliver advising services university-wide.	ESS-AA	Res Life		Maintain >85% Residence Hall students contact.	87% of residence hall students were advised in 2011-2012. (Table 3 below)
	ESS-AA			Increase % of students who successfully complete the Academic Empowerment program, eligible to return.	70% of 202 Pilot students in 2012-13 were eligible to return.
Develop a transfer advising program and increase the level of service offered to transfer students to improve their experience.	ESS-AA Transfer Coordinator			Baseline new transfer students who have met with an academic advisor.	63% (421) of new transfer students were academically advised in Transfer Advising Services in Fall 2012 (excluding students who declared College of Business or Teacher Education).
Develop a parent/family program.	ESS-AA Parent/Family Coordinator	ESS-UG Adm		Foster relationships with parents and families of current and prospective students through open communication specific to their needs and concerns.	Launched Family Central, a web site with resources for the family.

Table 2

Year	Holds (Placed at 56 CRS)	Advising Appointments	%Undeclared Freshmen Advised
2007-2008	603	3,448	n/a
2008-2009	536	3,996	n/a
2009-2010	374	4,029	54%
2010-2011	190	4,166	45%
2011-2012	156	3,944	52%
2012-2013	TBD	TBD	TBD

*First year using new student system SLCM.

**Does not include summer entrants. Approximately 70 more than normal began in the summer due to ending of CMU Promise.

Bolded figures are highs during the covered 10-year period.

Due to continuous enrollment, Global Campus enrollment figures pertain to the Fall term (end-of-semester) of the prior year per official count date policy.

Enrollment counts are unduplicated headcounts and students enrolled at both on-campus and Global Campus are included in the on-campus total.

* Lower tuition & fees due to students still being under the CMU Promise.

** Institutional Aid includes all awards listed below:
 1. Departmental Scholarships
 2. Endowed Scholarships
 3. Institutional Grants

Awards that were excluded from the Institutional Aid Category include:
 1. Athletic Aid
 2. Michigan Indian Tuition Waiver
 3. CMU Tuition Waiver

Office of Institutional Research, CMU

December 2012

This data highlights the difference for Junior/Seniors and includes duplicates (1 person receiving 2 or more awards). Per OIR, 2012-13 data will not be available until September 2013.

Data Sources:
 Tuition & Fees: HEIDI
 Freshman Cohort, Institutional Aid: IPEDS Student Financial Aid Survey
 Office of Institutional Research

August 2013

The types of aid/awards included are different in IPEDs (more comprehensive) and does not include duplicates (1 person receiving multiple awards). Kirk intends to inquire on how the other universities classify the data they include to improve his interpretation of this data.

Per OIR, 2012-13 data will not be available until September 2013.

Peer Institutions

For comparison purposes, the following institutions are identified in the *Integrated Postsecondary Education Data System (IPEDS)* as CMU's Peer Institutions:

- Ball State University
- Bowling Green State University
- Eastern Michigan University
- Illinois State University
- James Madison University
- Kent State University
- Miami University (Ohio)
- Middle Tennessee State University
- University of Louisiana at Lafayette
- Western Michigan University

Competitor Institutions

Competitor institutions are defined as those institutions that historically have significant cross-over in applications with CMU, have proven to be institutions that a significant number of students admitted to CMU have chosen to attend instead, or have taken a significant market share of students thought to be in areas CMU has traditionally drawn from:

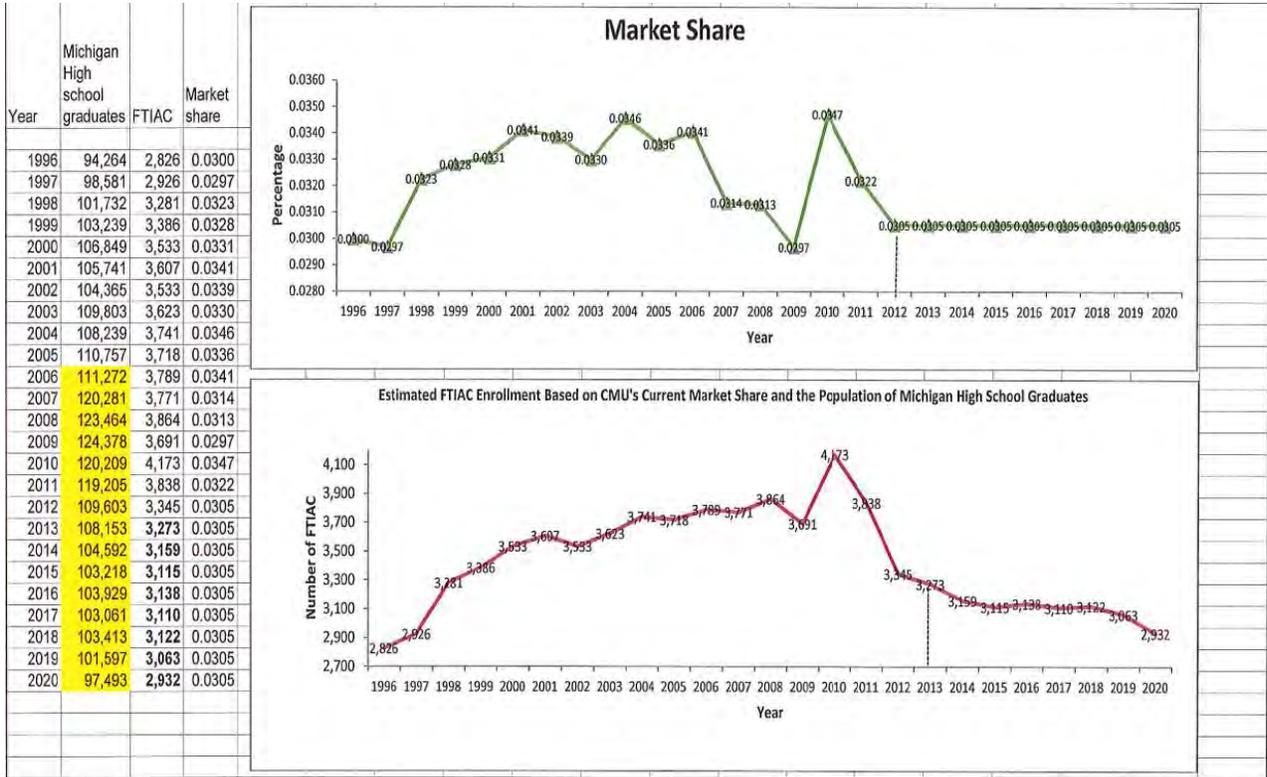

- Bowling Green State University
- Grand Valley State University
- Michigan State University
- Oakland University
- Saginaw Valley State University
- University of Toledo
- Western Michigan University

Mid-American Conference Institutions

Mid-American Conference institutions are those institutions belonging to CMU's athletic conference, and in many cases, are comparative in size, academic offerings, and other key comparison areas:

- University of Akron
- Ball State University
- Bowling Green State University
- University at Buffalo
- Eastern Michigan University
- Kent State University
- University of Massachusetts
- Miami University (OH)
- Northern Illinois University
- Ohio University
- University of Toledo
- Western Michigan University

Market Share

Primary, Secondary, and Tertiary Drawing Area

In a geographic and geodemographic analysis complete by College Marketing Technologies, Inc. in the fall of 2011, enrollment data was utilized to identify specific characteristics of students most likely to enroll at CMU. This information, as well as their area of residency, was used to build models showing where CMU has historically done well, relatively well, or poorly, in attracting students from specific areas. These models were broken down to represent CMU’s primary, secondary, and tertiary drawing areas. Recommendations were also made as to where CMU should focus its recruitment efforts to maintain or improve the number of students drawn from a specific area.

While this analysis was done specifically for the State of Michigan and the Chicagoland area, the Enrollment and Student Services division is contracting with College Marketing Technologies for a similar analysis of potential out-of-state markets which may assist in decision-making for targeted recruitment efforts.

Maps and further information regarding the analysis is available upon request.

Note that for reporting purposes, numbers for “Declared Major” are specific to a singular SAP-coded major and are not represented departmentally in size, meaning that signees within a department might be spread over several of the concentration specific majors within an area.

Occupational Outlook – Unemployment Rates – Salary - Popularity

Here is a chart that measures unemployment rates, salary and popularity of CMU majors with a report published by the Wall Street Journal. Obviously the lower the unemployment rate the higher in demand and visa versa.

Major Field	Unemployment Rate	25th % Earnings	Median % Earnings	75th % Earnings	Popularity
Actuarial Science	0.00%	\$52,000	\$81,000	\$116,000	150
School Psychology	0.00%	\$18,000	\$20,000	\$42,000	172
Astronomy/Astrophysics	0.00%	\$56,000	\$62,000	\$101,000	170
Teacher Education	1.10%	\$30,000	\$38,000	\$48,000	86
Meteorology	1.60%	\$40,000	\$68,000	\$101,000	146
Physical Science	2.50%	\$36,000	\$51,000	\$68,000	157
Social Science or History Teacher Education	3.00%	\$35,000	\$45,000	\$58,000	83
Industrial Technology (<i>Production</i>)	3.10%	\$46,000	\$67,000	\$91,000	82
Geosciences (<i>Geography and Geology</i>)	3.20%	\$36,000	\$52,000	\$71,000	153

(Red/italic text) is the CMU major/minor that best equates to the data.

Popularity indicates the number of students who choose to major in that discipline.

Occupational Outlook – Major Occupational Groups Employment Demand, Projected 2020

14.3% is the average growth projected for all occupations

**Source: U.S. Bureau of Labor Statistics*

Major occupations with projected growth above the average are

Business and financial operations	17.3%
Computer and Mathematical	22.0%
Life, physical, and social science	15.5%
Community and social service	24.2%
Education, Training and library	15.3%
Healthcare practitioners and technical operations	25.9%
Healthcare support occupations	34.5%
Personal care and service	26.8%
Construction and extraction	22.2%
Transportation and material moving	14.8%

Major occupations with projected growth below the average are

Management	7%
Architecture and engineering	10.4%
Legal	10.8%
Arts, design, entertainment, sports, and media	12.6%
Protective service	11.0%
Food prep and serving related	9.8%
Building and grounds	12.1%
Sales and related	12.5%
Office and administrative support	10.3%

Occupations with the fastest decline projected 2010 – 2020

The only occupations included in *BLS.gov* fastest declining that required a bachelor degree was journalist/correspondent.

More from *BLS.gov*: “Declining occupational employment stems from falling industry employment, technological advances, changes in business practices, and other factors. Almost all of the occupations that are projected to decline the fastest fall into two occupational groups. Eleven of the twenty fastest declining occupations are in the production occupational group; examples are shoe machine operators and tenders and fabric and apparel patternmakers, declining by 53 percent and 36 percent, respectively. Together, the 11 production occupations are projected to shed 77,300 jobs by 2020.

Seven of the twenty occupations that are projected to decline the fastest are in the office and administrative support staff occupational group. The seven occupations are expected to contribute to a loss of 143,300 jobs over the coming decade. Included among these fastest declining office and administrative support jobs are several postal service occupations. Postal service mail sorters, processors, and processing machine operators, the fastest declining office and administrative support occupation, are expected to decline by 49 percent. Both production occupations and office and administrative support occupations are adversely affected by increasing factory automation or the implementation of office technology, reducing the need for

workers in those occupations. The difference between the office and administrative support occupations that are expected to experience the largest declines and those which are expected to see the largest increases is the extent to which job functions can be easily automated or performed by other workers. For instance, the duties of receptionists and customer service representatives involve a great deal of personal interaction, so automating their jobs is difficult or not desirable, whereas the duties of some file clerks, operators, and data entry workers can be automated or performed by other workers, such as administrative assistants.

Although farmers, ranchers, and other agricultural managers are not among the fastest declining occupations, their employment is projected to drop by 96,100, the most of any occupation.”

Some facts and quotes

1. There is a demand for greater numbers of college-educated workers
2. In a globalized knowledge economy, the capacity to drive innovation is the key strategic economic advantage
3. Rapid scientific and technological innovations are changing the workplace and demanding more of ALL employees
4. Global interdependence and complex cross-cultural interactions increasingly define modern society and the workplace and call for NEW levels of knowledge and capability

The Economic Value of Liberal Education; Prepared for the Presidents' Trust; Humphreys, D. AACU & Carnevale, A. Georgetown University Center for Education & the Workforce

“Irrespective of college major or institutional selectivity what matters to career success is students’ development of a Broad set of cross-cutting capacities...”*Carnevale, A.*

“(Employers) generally are...frustrated with their inability to find ‘360 degree people’ who have both the specific job/technical skills and the broader skills (communication and problem-solving skills, work ethic, and ability to work with others) necessary to promise greater success for both the individual and the employer.” *Peter D. Hart Research Associates, Report of Findings Based on Focus Groups Among Business Executives (AAC&U, 2006)*

Employers’ Top Priorities for Student Learning outcomes in College

1. Effective oral/written communication
2. Critical thinking/analytical reasoning
3. Knowledge/skills applied to real world settings
4. Analyze/solve complex problems
5. Connect choices and actions to ethical decisions
6. Teamwork skills/ability to collaborate
7. Ability to innovate and be creative
8. Concepts/developments in science/technology

“Raising the Bar: Employers’ Views on College Learning in the Wake of the Economic Downturn” (AAC& U and Hart Research Assoc. 2010)

Criterion 4 Evidence
Student Learning Outcomes Assessment

APPENDIX E

POLICY ON STUDENT LEARNING OUTCOMES ASSESSMENT

I. GENERAL POLICIES AND PRINCIPLES

Student learning outcomes assessment is defined as the ongoing monitoring of the extent to which students are developing the knowledge, skills, beliefs, and attitudes that are appropriate for graduates of their respective academic programs. The assessment of student learning assists programs in defining course goals and outcomes. Assessment data provide information for faculty development of strong programs, effective curricula, and innovative teaching. In addition, student learning outcomes assessment assists programs, departments, councils, colleges, and the university in accreditation by providing evidence of quality teaching and learning. Outcomes assessment is also a key component in CMU's internal program review process.

The Academic Senate supports student learning outcomes assessment as a means of understanding and improving student learning. This policy reaffirms that the senate is committed to the central role of faculty in the assessment process and the flexibility of academic programs in choosing assessment methods that will be most useful and appropriate.

A. Assessment Information and Use

Assessment information shall be used by the department/council conducting the assessment to understand and improve student learning. Assessment may be at the departmental, program, or institutional level. Assessment should be based on multiple direct and indirect measures, and activities shall be designed to identify both strengths and challenges.

The assessing department/council decides what specific student learning outcomes are measured, the instruments and achievement targets for assessing student learning, and the process for sharing the data with stakeholders. This framework of mission, goals, student learning outcomes, measures, and targets that define the assessment plan is entered into the university's assessment management system. Within this framework, both process (how we assess) and outcomes (what we learned) are important. The assessment of student learning is expected to stimulate discussions among faculty (both regular and temporary) of program learning goals, program curriculum, and pedagogy as means to improve learning.

A summary of the raw data that result from assessment activities is entered as findings into the assessment management system by the assessing department/council, and inclusion of such data in reports required by any university office or body will be at the department's/council's discretion. The findings that result from assessment activities and the action plans and analyses that support those findings are to be made available through the assessment management system to the Assessment Council, reviewing bodies, and appropriate constituencies, including students.

Student learning outcomes assessment information may not be used for personnel decisions (except for information voluntarily provided by the individual), nor shall it be the primary criterion for resource allocation decisions. Assessment information provided by individuals or programs may be used only for self-comparative purposes and may not disclose information about other individuals or other programs/councils at CMU. Other uses not contemplated in this statement may be proposed to the Assessment Council (see Assessment Council Charge below), which will determine whether a proposed use is to be permitted or prohibited.

B. Assessment in Programs

A positive culture of assessment requires the input of multiple stakeholders, especially faculty and students. Assessment is a collaborative effort that fosters effective student learning, curriculum enhancement, and program development. A positive culture of assessment should *not* be a punitive-oriented process for students, faculty, or programs. Reporting of assessment activities and how information gleaned from such activities has been used to improve programs will be reviewed by the Assessment Council through the assessment management system and as part of other activities (e.g., accreditation) that review the quality of academic programs. Student learning outcomes that have been approved by the Assessment Council shall be made available to students and faculty.

C. Link Between Assessment and Program Review

Department/council Program Review documents will include the following information on student learning outcomes assessment:

1. The approved assessment plan, including the learning outcomes.
2. The yearly reporting of findings.
3. Achievement summary and analysis reports.
4. Communications from the Assessment Council based on the department/council reports of assessment activities.
5. The department's/council's overall synthesis of assessment results since its last Program Review and the implications of those results for the department's/council's future plans.

Departments/councils may choose to include additional assessment information in their Program Review materials as supporting documentation. Program Review has other reporting requirements that can be found on the Academic Effectiveness web site (https://www.cmich.edu/office_provost/AcademicAffairs/Program_Review/Pages/default.aspx).

II. DEPARTMENTS/INTERDISCIPLINARY COUNCILS

A number of different university bodies have responsibilities for learning outcomes assessment activities. These include the faculty and staff involved in offering the assessed

programs, the departments/councils responsible for the programs, the Assessment Council of the Academic Senate, the Office of Curriculum and Assessment, the deans, the provost, and the president. All programs, both on-campus and through Global Campus, shall be assessed by the departments/councils responsible for the program curriculum. Departments and councils are, consequently, the principal assessing bodies at Central Michigan University. Therefore, it is expected that these principal assessing bodies abide by the logic of CMU's Research Integrity and Misconduct policy. The Assessment Council will adjudicate in cases where there is a dispute about whether a program should be assessed or a dispute about the correct assessing unit.

Programs that are assessed and the assessing units are as follows:

Program	Assessing Unit
Departmental Majors, Designated Minors	Program faculty in the relevant department/council and, where appropriate, the Global Campus Academic Council
Graduate Programs	Program faculty in the relevant department/council
MSA Program and certificates	MSA Council
MA in Education Program and certificates	MA in Education Council
Interdisciplinary Programs	Appropriate Interdisciplinary Council
Certificates not otherwise assessed, as determined by the Assessment Council	Program faculty
General Education Program (including University Program and Competency courses)	General Education Committee
Honors Program	Honors Council

Assessment responsibilities of departments/interdisciplinary councils:

1. Develop program assessment plans (including a program mission statement, student learning goals and outcomes, methods of measurement, achievement targets, and curriculum maps) and update the plans periodically, especially the year after Program Review.
2. Develop a structure within the unit (e.g., committees, coordinators) to help ensure that assessment activities will be completed in a timely manner.
3. Implement assessment activities and submit reports according to established timelines (see below), which include updating an assessment plan for each program in the year following Program Review.
4. Provide findings yearly and complete the achievement summary and analysis reports, according to the timeline found below, through the assessment management system on assessment activities, which need not cover all outcomes of the program annually (see below).

5. Provide regular feedback to department/council faculty/staff on assessment activities; share assessment information with constituencies, including students; and promote conversation among faculty and staff of the implications of assessment for program improvement. It is expected that departments will post, at a minimum, their current detailed assessment reports from the assessment management system on their department/program websites.
6. Based upon the conversation among faculty and staff, ensure that assessment information leads to program improvement;
7. Consider providing recognition and reward for assessment activities in department/by-laws, which may include credit in any of the three contractually recognized areas for personnel decisions (teaching, research service).
8. Provide regular feedback to students on assessment activities within departments and share with them, as appropriate, conclusions reached as a result of assessment activities.
9. Involve students in meaningful ways in assessment activities.
10. Communicate to the Office of Curriculum and Assessment ways in which specialized accreditation requirements address assessment.

III. ASSESSMENT COUNCIL

The Assessment Council is a committee of the Academic Senate. The membership and charge are as follows:

A. Membership

1. The Assessment Council shall be composed of 12 members:
 - Six faculty representatives, one each from the Colleges of Business Administration, Communication and Fine Arts, Education and Human Services, Health Professions, Humanities and Social and Behavioral Sciences, and Science and Technology, elected by the senate. Preference will be given to those with some expertise, experience, or interest in assessment.
 - One representative of the College of Medicine, appointed by the Dean of the College of Medicine.
 - One representative of Global Campus, appointed by the Vice President of Global Campus.
 - One at-large representative from any unit engaged in learning assessment, elected by the senate.
 - One department chair, elected by the Council of Chairs.
 - The Academic Senate Chair (or a designee appointed by the Chair from the faculty members on the Senate Executive Board).
 - The Director for Curriculum and Assessment, *ex officio*.

- College Assessment Coordinators are invited to attend meetings, but are non-voting guests.
2. Academic Senate policies on committee membership:
 - Under Academic Senate policy, a member may not serve more than two successive terms on the same committee.
 - If a member misses three consecutive meetings (excused or unexcused) of any senate committee to which that person has been appointed or elected, the member shall be dismissed from that committee and replaced.
 3. Chairperson:

A chairperson of the council will be elected from among the voting members of the council. The chair will serve a one-year term but may be reelected.

B. Charge

1. Develop learning assessment policies for Central Michigan University and recommend those policies to the Academic Senate for approval.
2. Develop a format for program assessment plans and a format for reviewing and approving those plans.
3. Review and approve program assessment plans and communicate to the units on the status of those plans.
4. Review and approve substantial changes in program assessment plans and communicate on the status of those changes; acknowledge minor changes facilitated by the Director of Curriculum and Assessment with Council oversight.
5. Develop a format for the periodic summary reports from departments and councils on assessment activities and review communications to the units from the Office of Curriculum and Assessment based on these summary reports.
6. Review and approve requests for funding by units or individuals for assessment projects and professional development activities relating to assessment.
7. Assist in developing and maintaining the presence of assessment as a defining element of Central Michigan University, including recognizing faculty and councils making significant contributions to learning outcomes assessment and communicating to students the importance of these activities.
8. Help ensure that conversations about student learning and program improvement remain central to departments and councils.
9. Provide advice to the Office of Curriculum and Assessment, including advice on official CMU publications and reports related to assessment (e.g., reports for external accreditation agencies).
10. Recommend to the Academic Senate a process for the comprehensive evaluation of the university's assessment activities.

11. Advocate for university resources to support faculty/staff involvement in assessment activities.

IV. OFFICE OF CURRICULUM AND ASSESSMENT

The Office of Curriculum and Assessment is a unit of the Office of the Provost staffed by the Director for Curriculum and Assessment as well as support personnel. The responsibilities of the Office of Curriculum and Assessment include the following:

1. Disseminate assessment-related information to the campus community, provide expertise, and support faculty development activities related to assessment.
2. Work with campus units to coordinate, as appropriate, opportunities for gathering information about student learning (including information on student retention, persistence, and graduation).
3. Develop and communicate a timetable of due dates for departments' periodic assessment plans and reports, working to ensure that department/council timelines for assessment activities coordinate with timelines for their Program Review and specialized accreditation.
4. Work with the Assessment Council in assisting those responsible for the development of assessment plans, such as department/program assessment coordinators, to develop assessment plans and other student learning outcomes activities (e.g., identifying student learning goals and outcomes).
5. Maintain records on the status of the development, modification, and implementation of assessment plans by departments/councils and disseminate information based on these records in official CMU publications, webpages, and reports (e.g., reports for external accreditation agencies). The Office of Curriculum and Assessment will make departmental/council assessment plans (including student learning goals and outcomes) available to the public upon request when they have been approved by the Assessment Council.
6. Receive and evaluate periodic summary reports of assessment activities from departments/councils according to guidelines established by the Assessment Council. Copies of the reports and the communication will be sent to the relevant dean's office as a means for keeping the college informed of department/council assessment efforts.
7. Report to the Academic Senate yearly through the Assessment Council on the status on learning outcomes assessment at CMU.
8. Evaluate periodically the overall effectiveness of assessment policies and practices and report the findings to the Assessment Council.
9. Serve as a resource for campus assessment activities.

V. DEANS

The deans and their offices have the following responsibilities in learning assessment:

1. Foster a positive culture of assessment to facilitate learning in each college through activities such as hosting college-based discussions and faculty development programs about assessment and program improvement.
2. Construct a support structure for assessment within each college, which includes providing resources to assist departments and units with assessment activities; rewards and recognition to units, faculty, and staff for assessment efforts; and support for by-law changes that credit assessment activities.
3. Help coordinate competing deadlines so that the due dates for assessment plans and activities receive appropriate priority.

VI. PROVOST AND PRESIDENT

The Offices of the Provost and President have the following responsibilities in learning assessment:

1. Communicate to the campus the importance of learning outcomes assessment and that making CMU a student-focused learning community is an essential institutional priority.
2. Ensure that adequate resources, including both funds and time, are available for assessment activities.
3. Encourage appropriate recognition and rewards for those individuals and units engaged in significant assessment activities.

VII. TIMELINES

Departments collect assessment data on a continuous basis and report findings on a yearly basis. The focus shifts every other year from the analysis and discussion of the data to the implementation of improvements that arise from the data analysis. This might be improved curriculum, revised assessment measures, new/improved pedagogy, and/or consultation with constituents. The documents associated with Program Review include a thoughtful discussion of these data as guidance for curriculum improvement.

Efforts will be made to coordinate cycle timelines with Program Review and accreditation schedules to reduce duplication of effort whenever possible. The assessment activities detailed below will be completed for review by the Assessment Council and Office of Curriculum and Assessment by October 1 of each year.

Assessment Cycle

Year	Program Review	Assessment Report	Assessment Plan
Year 1	Program Review	No assessment report is due. Submission of a cumulative summary of assessment activities of the past 5 years will be included in both Program Review and in the assessment management system for Assessment Council review.	
Year 2		Data collected and entered into the assessment management system. Focus on implementation of action plans based on assessment data and Program Review to improve learning.	Revisit Assessment Plan in light of Program Review feedback and in consultation with College Assessment Coordinator. Revisions (if needed) are due December 1. Assessment Council reply/approval by January 15.
Year 3		Data collected and entered into the assessment management system. Assessment report due Oct. 1	
Year 4		Data collected and entered into the assessment management system. Focus on implementation of action plans.	
Year 5		Data collected and entered into the assessment management system. Assessment report due Oct. 1	Substantive review of program assessment plan and data with Council or College Assessment Coordinator in preparation for Program Review.

Goal Setting Exercise

To find your purpose, passions, and drivers, do the exercises listed below. They will help you get to know your true self a little better, which will pave the way to setting goals.

Exercise One: The Million-Dollar Giveaway

If you were given a million dollars today, but had to spend it immediately, what 10 things would you buy? Remember, you must spend it and buy things with it. You cannot invest it in stocks or put it in the bank. List ten things that you truly want.

*This exercise gives you an idea of what your long-term goals are. With a million dollars, the "no money" excuse dissipates.

Exercise Two: Long Lost Friend

You come across a good old friend today. You lost contact with this friend and have not seen him in three years. Both of you are delighted to see each other again. He says, "I haven't seen you in so long! How have you been doing?" You answer his questions:

- I live in (town/city) _____.
- The car I drive is _____.
- I am making a living by (job) _____.
- I am earning (annual salary) _____.
- My hobbies and interests are _____.
- I have given up/I have taken up _____.
- Since I've last seen you a new skill that I have acquired is _____.
- My partner is _____.

*This exercise gives you the answers to what you want to achieve in the next three years. It will serve as a starting point for your short-term goals.

Exercise Three: Charity Giveaway

If you had \$100,000 to give to a single charity, which one would you give it to? If you do not know of a specific charity, what would be its main population and focus?

*This exercise shows how you would like to contribute to society, and to help others.

Exercise Four: The Last Time I Felt....

The last time I felt successful was _____.

The last time I did something that I really, really did not want to do, but did anyway, was _____.

The last time I felt truly happy was _____.

The last time I felt truly at peace was _____.

The last time I felt really proud of myself was _____.

The last new skill that I developed was _____.

The last time that I felt totally focused was _____.

*This exercise helps you to appreciate life and enables you to know when you are experiencing certain 'feelings'. It gives you a point of reference for the future to feel that experience again.

Exercise Five: Financially Free

You have won the lottery and acquired millions and millions of dollars. You do not have to worry about bills, loan repayments, or any other payments. Picture this incredible wealth. Now, what are you going to do? How are you going to fill each day?

*This indicates how you would like to spend your time and what you really want to do. Could you do more of this in your life? Could you even do this for a living?

SMART Goals

Specific	Measurable	Attainable	Relevant	Time Based
Think of what specifically you want to accomplish.	How and when will you measure your progress and achievements?	Can you achieve this goal in the amount of time allocated? Is it realistic?	Is this goal relevant to your life right now? Is it something that you chose to pursue for yourself?	What is the deadline on this goal? When will you have achieved it?

Introduction

The majority of Central Michigan University's undergraduate majors are intended to prepare students for employment. Feedback from employers will help the University examine if our recent graduates are meeting their needs and identify the skills/abilities that are most important to employers. The Office of Institutional Research developed the survey instrument to be included in the three year survey research cycle. This is the first time the survey was sent to employers that had previously hired CMU graduates.

Objective

The survey was developed to examine employers' hiring status, the importance of skills/abilities and CMU graduates' performance on these skills/abilities, CMU's main competitors among Michigan's public institutions, and overall satisfaction with recent CMU graduates.

Method

The online survey instrument was developed by the Coordinator of Survey Research in collaboration with the Survey Research Advisory Board. Career Services provided the Office of Institutional Research with a list of employers that previously recruited CMU students or had worked with Career Services. The survey invitations were sent to employers in July and August. There were approximately 250 undeliverable emails. The list of invalid emails or those identifying which person to contact was sent to Career Services. Of the 1,148 employers receiving the survey, 410 responding resulting in a 36% adjusted response rate.

CMU EMPLOYER SURVEY SUMMARY OF FINDINGS

Hiring Status:

- Approximately 37% of the employers completing the survey reported they planned to increase the number of new hires, 47% planned to keep it the same, and 16% planned to decrease the number of new hires during the next three years.
- Of the new college graduates hired within the past twelve months, approximately 70% of the employers hired at least one CMU graduate.

Importance of Work Attributes/Skills:

- The top five attributes rated most important by supervisors were (1) work ethic, (2) interpersonal skills, (3) time management, (4) adaptability, and (5) problem-solving (96%, 89%, 78%, 78%, and 74% selected “*very important*”, respectively).
- Several attributes were considered to be more important based upon the employers’ industry type. The four major industry types of the respondents were business, education, healthcare, and science and technology.
 - Individuals in the business industry rated the following three attributes more important than all other industries: (1) leadership skills (67% vs. 45% selected “*very important*”); (2) quantitative skills (44% vs. 27% selected “*very important*”); and (3) project management (45% vs. 33% selected “*very important*”).
 - Five attributes were more important to employers in the education field than all other industries: (1) continuing professional development (70% vs. 38% selected “*very important*”); (2) writing skills (69% vs. 40% selected “*very important*”); (3) speaking/presentation skills (71% vs. 44% selected “*very important*”); creativity (53% vs. 31% selected “*very important*”); and (5) a broad general education (42% vs. 25% selected “*very important*”).
 - Respondents in the healthcare industry rated three attributes more important than all other industries: (1) continuing professional development (69% vs. 44% selected “*very important*”); (2) technical job skills (65% vs. 42% selected “*very important*”); and (3) customer service skills (86% vs. 68% selected “*very important*”).
 - The only attribute rated more importance from employees in the science and technology industry was technical job skills (74% vs. 42% selected “*very important*”).

Performance of CMU Graduates:

- Coinciding with the two most important attributes, CMU graduates received the most favorable work performance ratings for their (1) interpersonal skills and (2) work ethic (43% and 41% selected “*excellent*”, respectively).
 - CMU graduates in the education field received higher performance ratings than the other industry types on their work ethic (62% vs. 38% selected “*excellent*”) and speaking/presentation skills (45% vs. 21% selected “*excellent*”).
 - CMU graduates in the healthcare industry obtained higher performance ratings than the other industry types on three attributes: (1) technical skills (55% vs. 25% selected “*excellent*”); (2) research skills (42% vs. 14% selected “*excellent*”) and (3) quantitative skills (43% vs. 30% selected “*excellent*”).
 - CMU alumni in the business and science and technology industries did not display significantly higher scores than the other industry types.

Importance-Performance Gaps:

- This is simply the importance mean score minus the performance mean score. The larger the gap, the greater the discrepancy between what employers felt was important and CMU students performance. Negative gap scores indicated CMU students’ exceeded the importance placed on the work attribute in order to succeed as an employee of the organization.
 - The largest gap scores occurred for work ethic which emphasizes the importance placed on this work attribute. Work ethic received a favorable performance rating but the gap score indicates there is still room for improvement (i.e., 43% were rated as “*excellent*”, whereas 96% felt it was very important).
 - The gap scores also suggest it may not be very troublesome that CMU graduates received lower scores for their international awareness/global consciousness since this attribute was not viewed as being particularly important to work performance (i.e., Only 8% received an “*excellent*” rating, however, only 10% felt it was “*very important*”).

CMU’s Competitor’s Among Michigan’s Public Institutions:

- MSU received 3 times more first-choice selections than the remainder of Michigan’s public institutions.

Overall Satisfaction with CMU Graduates:

- Over 90% of supervisors felt CMU graduates were “*equally*” or “*better*” prepared compared to graduates of other institutions.
- Furthermore, nearly all of the supervisors (95%) would “*probably*” or “*definitely*” still choose to hire CMU employees after becoming aware of their work performance.

SURVEY RESULTS

Employer Background Information

Nearly 1 in 4 of the employers responding to the survey was an alumnus of Central Michigan University. Sixty-five percent of the respondents were located in Michigan. The specific location of the respondents is listed in Appendix A. The most common industry types were business, education, healthcare, and science and technology. Appendix B lists the responses included in each industry.

Background Information (continued): Job Function

Respondents were asked to select if they were responsible for recruiting, hiring, and/or supervising employees. Individuals that did not provide any of these functions were skipped out of the remainder of the survey. Chart 1 below indicates that 80% were responsible for recruiting, 62% were responsible for hiring, and 44% were responsible for supervising employees.

Chart 1: Employers Job Function(s)

Hiring Status

The hiring status of employers that have a relationship with Central Michigan University's Career Services was rather positive given the current state of the economy. Approximately 37% of the respondents indicated they plan to increase the number of individuals hired at their organization within the next three years. Nearly half (47%) reported their outlook for hiring new employees will remain the same and 16% expect to decrease the number of new employees over the next three years.

Only 6% of the employers did not hire new graduates during the past 12 months. Of the new graduates hired during the past 12 months approximately 70% had hired at least one CMU graduate. About 20% of the respondents had never recruited, hired, or supervised a CMU graduate. These respondents were skipped out of the remainder of the survey.

Table 2: Hiring Status

Question	Response Options	Count	Percent
How long has it been since you recruited, hired, or supervised an employee that received his or her degree from Central Michigan University?	Less than 1 year	204	51%
	1 to 2 years ago	88	22%
	3 to 4 years ago	15	4%
	5 or more years ago	8	2%
	I have never recruited, hired, or supervised a CMU graduate	89	22%

	Total	278	100%
Of the number of new graduates hired during the past 12 months, please estimate how many were Central Michigan University graduates.	0	84	31%
	1 to 5	167	62%
	6 to 10	14	5%
	11 to 25	2	1%
	50 +	1	0%
	Total	268	100%

Application Information

Respondents were asked to rate the importance (i.e., very important, somewhat important, not important) of 14 items when they review application materials. The three most important achievements or skills were (1) relevant work or internship experience, (2) the graduates major/minor, and (3) leadership skills (Table 3).

The importance of achievements or skills on application materials differed by the type of industry (Table 4). The most notable results for the business industry compared to all other industries were the higher importance ratings of leadership skills (84% vs. 59% selected “*very important*”) and student organization involvement (41% vs. 13% selected “*very important*”). Employers in the education field compared to all other industries placed more importance on letters of recommendation (66% vs. 27% selected “*very important*”). The healthcare industry placed a greater emphasis than all other industries on letters of recommendation (59% vs. 36% selected “*very important*”) and conference attendance and/or presentations (31% vs. 6% selected “*very important*”).

Employers that graduated from CMU tended to rate leadership skills as being more important than employers that did not attend CMU (80% vs. 64% selected “*very important*”). In addition, CMU alumni rated academic achievement (i.e., GPA) as being less important than non-CMU alumni (33% vs. 48% selected “*very important*”).

Table 3: Importance of Achievement/Skills on Application Materials

Achievements/Skills	% Very Important
(1) Relevant work or internship experience	77%
(2) Major/minor	71%
(3) Leadership skills	69%
(4) Academic achievement (i.e., GPA)	44%
(5) Letters of recommendation	39%
(6) Degree-granting institution	37%
(7) Student organization involvement	24%
(8) Volunteer or community service experience	23%
(9) Multi-lingual abilities	12%
(10) Conference attendance and/or presentations	9%
(11) Thesis or completion of senior-year project	6%
(12) Study abroad/cultural educational experience	6%
(13) Published research	3%
(14) Student-athlete experience	3%

Table 4: Importance of Application Materials by Industry Type

Application Materials	Business % Very Important	Education % Very Important	Healthcare* % Very Important	Science & Tech.* % Very Important
(1) Relevant work or internship experience	70% ↓	83%	88%	78%
(2) Major/minor	55% ↓	89% ↑	81%	87%
(3) Leadership skills	84% ↑	53% ↓	63%	64%
(4) Academic achievement (i.e. GPA)	43%	48%	50%	57%
(5) Letters of recommendation	15% ↓	66% ↑	59% ↑	9% ↓
(6) Degree-granting institution	42%	36%	48%	26%
(7) Student organization involvement	41% ↑	11% ↓	13%	9%
(8) Volunteer or community service experience	19%	20%	34%	5% ↓
(9) Multi-lingual abilities	11%	22% ↑	0%	5%
(10) Conference attendance and/or presentations	7%	5%	31% ↑	10%
(11) Thesis or completion of senior-year project	6%	8%	10%	9%
(12) Study abroad/cultural educational experience	9%	5%	0%	5%
(13) Published research	3%	1%	7%	5%
(14) Student-athlete experience	6% ↑	1%	0%	0%

* Use caution interpreting results. There were approximately 32 respondents for healthcare and 23 for science & tech.

↑ = Results were significantly higher than all other industry types at $p < .05$.

↓ = Results were significantly lower than all other industry types at $p < .05$.

Results are presented in descending order based upon the overall results.

Importance of Attributes to Performing Work

The importance ratings of 19 skills/abilities from respondents in charge of supervising employees are displayed below in Table 5. The top five skills or abilities rated most important by supervisors were (1) work ethic, (2) interpersonal skills, (3) time management, (4) adaptability, and (5) problem-solving.

The importance ratings of attributes differed by industry. In order to gain an adequate number of responses those responsible for recruiting, hiring, and/or supervising were included in the responses displayed in Table 6 which contains several interesting findings. For example, the results indicated that continuing professional development is much more important to those obtaining jobs in education compared to all other industries (70% vs. 38% selected “*very important*”) and healthcare compared to all other industries (69% vs. 44% selected “*very important*”). Creativity was rated higher by those in education than the other industries (53% vs. 31% selected “*very important*”) as well as communication skills which included writing (69% vs. 40% selected “*very important*”) and presenting (71% vs. 44% selected “*very important*”) information.

Table 5: Supervisors’ Importance Ratings of Work Attributes

Attributes	% Very Important
(1) Work ethic (e.g., attitude toward work; dependable and responsible; takes responsibility for his/her own work; demonstrates initiative and self-motivation, etc.)	96%
(2) Interpersonal skills (e.g., work effectively with others; value different perspectives; respect all employees, etc.)	89%
(3) Time management	78%

* Use caution interpreting results due to the low *n*-size. There were approximately 31 respondents for healthcare and 23 for science & tech.

↑ = Significantly higher than all other industry types at $p < .05$

↓ = Significantly lower than all other industry types at $p < .05$

Results are presented in descending order based upon the overall results.

Performance of CMU Graduates

In order to eliminate response bias and obtain the most relevant feedback for this set of questions the results presented in Table 7 below are from non-CMU alumni supervisors (approximately 70 respondents). Coinciding with the top two most important work attributes, the two attributes rated the most favorable by non-CMU alumni supervisors were (1) interpersonal skills and (2) work ethic. The most common response selected for each of the 19 attributes was “good” from the 4-point scale (excellent, good, fair, poor).

The performance ratings of CMU graduates varied by industry. The results presented in Table 8 and Appendix C are based upon responses from non-CMU alumni responsible for recruiting, hiring, and/or supervising. CMU graduates in the healthcare received rather favorable ratings whereas those in the science and technology industry tended to obtain lower ratings compared to all other industry types (Appendix C and Table 8). In fact, CMU graduates in the science and technology industry received lower mean results on 12 of the 19 attributes (Appendix C).

Table 7: Performance of CMU Graduates from Non-CMU Alumni Supervisors

Attributes	% Excellent
(1) Interpersonal skills (e.g., work effectively with others; value different perspectives; respect all employees, etc.)	43%
(2) Work ethic (e.g., attitude toward work; dependable and responsible; takes responsibility for his/her own work; demonstrates initiative and self-motivation, etc.)	41%
(3) Adaptability	34%
(4) Customer service skills	32%
(5) A broad general education	31%
(6) Technical job skills	23%
(7) Define and solve problems	22%
(8) Creativity	22%
(9) Continuing professional development	21%
(10) Time management	21%
(11) Think critically	19%
(12) Leadership skills	18%
(13) Writing skills	18%
(14) Speaking/presentation skills	18%
(15) Research skills	12%
(16) Quantitative skills	11%
(17) Project management	10%
(18) International awareness/global consciousness	8%
(19) Multi-lingual abilities	5%

NA's were excluded from the calculations.

Table 8: Performance of CMU Graduates by Industry

Attribute	Business	Education	Healthcare*	Science & Tech.*
	% Excellent	% Excellent	% Excellent	% Excellent
(1) Interpersonal skills (e.g., work effectively with others; value different perspectives; respect all employees, etc.)	46%	54%	32%	27%

* Use caution interpreting results due to the low *n*-size. There were approximately 21 respondents for healthcare and 11 for science and tech.

↑ = Significantly higher than all other industry types at $p < .05$

↓ = Significantly lower than all other industry types at $p < .05$

Sorted in descending order based upon the overall mean scores from non-CMU supervisors.

Importance-Performance Gap Scores

The previous section does suggest there are opportunities for improvement. In order to assist in deciding where the greatest opportunities for improvement exist, Table 9 below displays the mean gap between importance and performance ratings. This is simply the importance mean score minus the performance mean score. The larger the gap, the greater the discrepancy between what employers felt was important and CMU students' performance. Negative gap scores indicated CMU students' performance exceeded the importance placed on the work attribute. As noted in the prior sections the importance ratings are based upon the responses from all supervisors and the performance ratings are based upon responses from non-CMU alumni supervisors.

The attribute that received the largest gap was work ethic. Time management, problem-solving, and critical thinking skills were the next set of attributes with the largest importance minus performance mean scores. Tables 10 through 13 display the importance-performance gaps by industry.

Table 9: Importance-Performance Gaps

Attribute	Importance Mean	Performance Mean	Gap
(1) Work ethic (e.g., attitude toward work; dependable and responsible; takes responsibility for his/her own work; demonstrates initiative and self-motivation, etc.)	3.95	3.23	0.72
(2) Time management	3.76	3.08	0.68
(3) Define and solve problems	3.72	3.08	0.64
(4) Think critically	3.63	3.05	0.58
(5) Interpersonal skills (e.g., work effectively with others; value different perspectives; respect all employees, etc.)	3.88	3.33	0.55
(6) Adaptability	3.75	3.22	0.53
(7) Leadership skills	3.44	2.97	0.47
(8) Customer service skills	3.62	3.20	0.42
(9) Writing skills	3.31	2.97	0.34

Central Michigan University's Competition

Employers were asked to select which of the 15 Michigan public institutions they typically recruit their employees. Central Michigan University was excluded from the results. Over half of the respondents (54%) indicated they typically recruit from Michigan State University followed by 39% for Western Michigan University and 34% for University of Michigan-Ann Arbor (Table 14).

Employers differ in the institutions they choose to recruit from by the type of industry. For example, Table 15 indicates respondents working in Education were significantly more likely than the other industries to recruit employees from Eastern Michigan University (59% vs. 21%), Western Michigan University (57% vs. 33%), and University of Michigan-Ann Arbor (44% vs. 30%).

Table 14: Recruitment from Michigan Public Institutions

Institution	Percent
(1) Michigan State University	54%
(2) Western Michigan University	39%
(3) University of Michigan-Ann Arbor	34%
(4) Eastern Michigan University	32%
(5) Grand Valley State University	29%
(6) Wayne State University	19%
(7) Saginaw Valley State University	18%

*Use caution interpreting results due to the low *n*-size. There were 34 science and tech. respondents.

↑ = Significantly higher than all other industry types at $p < .05$

↓ = Significantly lower than all other industry types at $p < .05$

Sorted in descending order based upon the overall recruitment results.

Central Michigan University's Competition – First Choice Institution

After stating all the institutions from which respondents typically recruit employers were then asked to indicate which one of the institutions tends to provide them with employees that “best fit” the needs of their organization. Central Michigan University was excluded from the results. The data presented in Tables 15 and 16 suggest that Michigan State University is CMU’s main competitor. MSU received 3 times more first-choice selections than the remainder of Michigan’s public institutions.

The results for “first choice” institution by industry type are presented in Table 17. Michigan Technological University and Wayne State University were more likely to be selected as first-choice institutions by employers in the science and technology industry than the other industry types. Saginaw Valley State University was more likely to be selected as a first-choice school by employers in the healthcare industry than the other industries. Lastly, Eastern Michigan University was more likely to be selected as an employers’ first institutional choice if he or she was in the educational field compared to the other industry types.

Table 16: First Institutional Choice

Institution	Percent
(1) Michigan State University	35%
(2) Western Michigan University	11%
(3) University of Michigan - Ann Arbor	10%
(4) Grand Valley State University	9%
(5) Michigan Technological University	8%

Total	100%	100%	100%	100%

*Use caution interpreting results due to the n-size (there were 20 healthcare and 15 science and tech. respondents).

↑ = Significantly higher than all other industry types at $p < .05$

↓ = Significantly lower than all other industry types at $p < .05$

Sorted in descending order based upon the overall first institutional choice results.

Overall Satisfaction

Employers were asked two questions involving their overall satisfaction with Central Michigan University graduates. The first question asked respondents to rate the level of preparation of CMU graduates with graduates of other institutions. The second question asked respondents to report if they would still choose to hire CMU graduates now that they are aware of their performance. In order to eliminate response bias and obtain the most pertinent feedback only responses from non-CMU alumni supervisors are presented in Chart 1 and Chart 2 below. Ninety-three percent of non-CMU alumni supervisors indicated CMU graduates were “better” or “equally prepared” compared to graduates of other institutions. Ninety-five percent of reported they would “definitely” or “probably” still choose to rehire CMU graduates after becoming aware of their performance.

Employers in the science and technology industry were more likely than all other industries to report CMU graduates were “not as well prepared” as graduates of other institutions. In order to increase the number of respondents individuals responsible for recruiting, hiring, and supervising were included in the results displayed in Table 18. Five of the twelve respondents or 42% indicated CMU graduates were “not as well prepared” as graduates of other institutions. It is important to note that the results should be interpreted with caution due to the low number of respondents.

Chart 2: Preparation Ratings From Non-CMU Alumni Supervisors

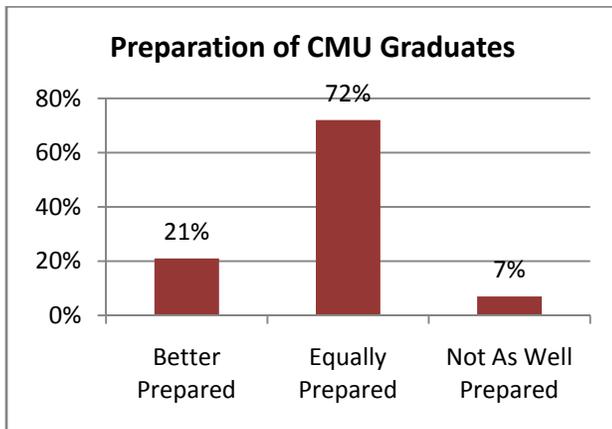

Chart 3: Rehire Ratings From Non-CMU Alumni Supervisors

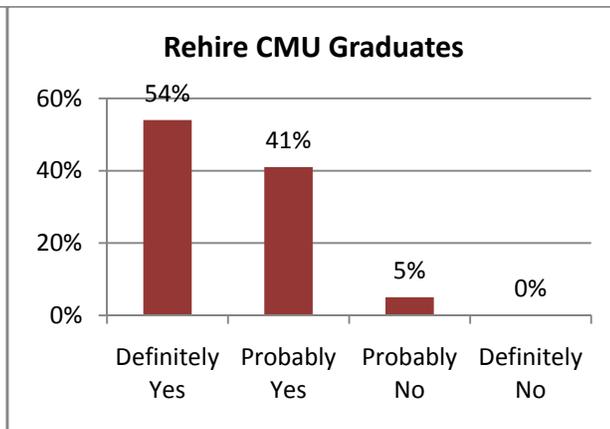

Table 18: Level of Preparation by Industry

Question	Response Options	Business		Education		Healthcare*		Science & Tech.*	
		Count	Col %	Count	Col %	Count	Col %	Count	Col %
How would you rate the level of preparation of Central Michigan University graduates with graduates of other institutions?	Not as well prepared	5	8%	2	4%	0	0%	5	42% ↑
	Equally prepared	44	71%	40	73%	17	81%	6	50%
	Better prepared	13	21%	13	24%	4	19%	1	8%
	Total	61	100%	55	100%	21	100%	12	100%

* Use caution interpreting results due to the low *n*-size.
Results were based upon non-CMU alumni supervisors.

Open-ended Comments – Strength of CMU Graduates

Respondents were asked an open-ended question asking them to state any strengths they have observed in CMU graduates as it relates to job performance. There was no overwhelming number of comments that fell into any specific category. The most common comment referenced work ethic (Table 19) which was followed by the general preparedness of CMU graduates (Table 20). The remaining comments were grouped together but do include a separate heading identifying common themes (Table 21).

Table 19: Work Ethic

Work Ethic
Work ethic; thoughtful planning; connections with students, families, and colleagues.
Work ethic. Willing to be mentored and coached.
Work ethic, ability to learn
work ethic - most students are balancing work (at least part-time) and school
Work ethic--although this is more an innate characteristic; PT service skills--exceptional
Well rounded background, ability to pick up on new things, work ethic.
We hire college students for their stick-to-itiveness and their willingness to work. We look for intelligent young people who NEED a job and will apply themselves to whatever task is assigned.
Very responsible and willing to learn.
To be fair - we've just hired our FIRST Central Michigan student, and he started one week ago - so I don't have much point of comparison for "typical CMU" students. Our hire has demonstrated responsibility (orchestrating his relocation), good communication skills (one week in he presented in front of 60 people), and a thirst for knowledge.
They work independently requiring little supervision, are well-organized completing assigned work in a timely fashion, and communicate effectively with co-workers and the public.
Strong work ethic Personable Well-rounded
Reliable, dependable, hard working and are able to utilize the skills and knowledge they gained at College in the workplace.
Professional Dress, Good Listener, Observant, Good Attendance, Motivated, Understanding product knowledge.
leadership, work ethic, interpersonal skills, problem-solving abilities
In general they seem eager to learn, strive to perform well, and have a sound knowledge base.
I found the graduates to be positive, motivated, and professional. They expressed an interest in team work and continuing education and knew what they wanted.
I find more individual differences than by school, but as a general rule, the students are better prepared in museum studies than other schools. Nearly all have been conscientious and hard working.
hard, willing, ethical workers with abilities for leadership
Hard working, realistic, competitive, self-motivated
Hard work ethic
Good work ethics.
Good work ethic. The students expect to have to work and earn their way, not be handed a position.
Good work ethic. Background and experience relates to our business.

Work Ethic (continued)
Fully prepared to contribute to group and take on anything thrown at them. Good computer skills which is of utmost importance.
For the ones that we hire, we have found them to be very open to relocation and a great work ethic.
Excellent work ethics. Not necessarily demanding the top job immediately upon graduation, i.e., understanding they need experience in most cases which comes with time.
enthusiasm, follow through, on time, inquisitive, willing to gain extra experience.
Eagerness to work without a sense of entitlement.
CMU students have a strong work ethic, and a ability to adapt to change quickly.
Central MI graduates are eager to learn and grow as professional educators. They are willing to relocate and happy to begin their careers.
Attitude, work ethic, and networking abilities.
Adaptability, openness to new experiences, eagerness to learn
The CMU students that we have hired exhibit no sense of "entitlement", know how to "dig in" and get the job done. I have been impressed with their ability to focus, learn and then apply what they've learned in the appropriate situation. There is no hesitation to ask questions to further their understanding of a service or procedure, which results in a favorable knowledge base for both them and their clients. CMU is, hands down, my favorite place to recruit both for the students and the administration that leads them.

Table 20: Preparedness

General Preparedness
overall, well prepared to make the transition from academics to the work environment
Very well prepared. The full year student teaching is a strong piece of their readiness.
Well prepared to present lessons in the classrooms
The teachers coming out of your Education college are well prepared for the classroom.
They are prepared and are realistic in today's job market
Great sense of community, Leadership and Real world preparation.
We have only hired interns from CMU, but they have worked out great and are very prepared.
I find more individual differences than by school, but as a general rule, the students are better prepared in museum studies than other schools. Nearly all have been conscientious and hard working.
We have found that the degree of depth in their core area study is a strength.
Social conditions understanding that relate to our field.
knowledgeable of profession well rounded education promote involvement in profession
Knowledgeable in the areas of work needed, often find a desire to succeed, students are computer trained, aware of team management, and time management.
Know their subject area
Its concentration of personal finance classes that ties in with our industry well.
Elementary instructional strategies, reading strategies, and classroom management.
Creativity and understanding of general business practices

Table 21 – Additional Positive Comments

Technical Skills
Excellent technical skills.
Strong Tech skills. Good Problem solving skills.
Confident, strong technical skills
Knowledgeable in the areas of work needed, often find a desire to succeed, students are computer trained, aware of team management, and time management.
Fully prepared to contribute to group and take on anything thrown at them. Good computer skills which is of utmost importance.
SAP knowledge
SAP experience, internship experience
SAP course
Knowledge of SAP
Ability to research on the internet and use of various computer programs.
Ability to communicate both orally and in written form Knowledge of technology
Experience
Most have had experiences outside of the classroom, either internships or work studies, that have provided an excellent opportunity to apply what they learn in the classroom to the real life.
SAP experience, internship experience
Good work ethic. Background and experience relates to our business.
well-rounded individuals with good grades plus experience in outside activities/clubs
The graduates I typically encounter have excellent exposure to community projects and personal involvement in positive organizations outside their required courses of study.
Solid internship experience
Retail experience, working students
many have additional educational experience in the field of exceptional children (in addition to the area of their certification)
Interpersonal Skills
Work ethic; thoughtful planning; connections with students, families, and colleagues.
Strong work ethic Personable Well-rounded
leadership, work ethic, interpersonal skills, problem-solving abilities
Organization participation, personable qualities.
Great interpersonal skills, willingness to commit to long-term projects, not afraid to ask questions
Good interpersonal skills
Building relationships with others
Communication Skills
Good research skills and good communication skills.
Ability to communicate both orally and in written form Knowledge of technology
Oral Communication
To be fair - we've just hired our FIRST Central Michigan student, and he started one week ago - so I don't have much point of comparison for "typical CMU" students. Our hire has demonstrated responsibility (orchestrating his relocation), good communication skills (one week in he presented in front of 60 people), and a thirst for knowledge.
Professional Dress, Good Listener, Observant, Good Attendance, Motivated, Understanding product knowledge.
good listeners, good leaders. great resumes with campus involvement and solid gpa.

Leadership Skills

leadership, work ethic, interpersonal skills, problem-solving abilities
good listeners, good leaders. great resumes with campus involvement and solid gpa.
Great sense of community, Leadership and Real world preparation.
hard, willing, ethical workers with abilities for leadership
CMU students tend to be very adaptable to new environments and strong leaders.

Location

For the ones that we hire, we have found them to be very open to relocation and a great work ethic.
Central MI graduates are eager to learn and grow as professional educators. They are willing to relocate and happy to begin their careers.
Your location mirrors our section of the State so your students are more likely to stay once we have recruited them. Our first graduate who came in 2004 continues in the district.
want to work in Northern Michigan area. Not surprised by our winters and cold weather.
Familiar with Mt. Pleasant and Mid Michigan

Professionalism

Relating skills to professional and production employees.
Professionalism
Professional Dress, Good Listener, Observant, Good Attendance, Motivated, Understanding product knowledge.
I found the graduates to be positive, motivated, and professional. They expressed an interest in team work and continuing education and knew what they wanted.

Adaptability

CMU students tend to be very adaptable to new environments and strong leaders.
CMU students have a strong work ethic, and a ability to adapt to change quickly.
Adaptability, openness to new experiences, eagerness to learn

Other

With the new sales program we are finding targeted students for our Sales positions.
Dually certified applicants
Multiple Certifications
Versatility of knowledge in degrees
Well-rounded, informed on many topics
There are students who are good students and ready for the job market, but my observation is these are ones who are self directed and motivated, and are the exception.
Strong Tech skills. Good Problem solving skills.
leadership, work ethic, interpersonal skills, problem-solving abilities
Work ethic; thoughtful planning; connections with students, families, and colleagues.
They work independently requiring little supervision, are well-organized completing assigned work in a timely fashion, and communicate effectively with co-workers and the public.
Knowledgeable in the areas of work needed, often find a desire to succeed, students are computer trained, aware of team management, and time management.
there has been an improvement in the quality of interns assigned to our organization and of graduates hired over the last five years.
The students I have supervised for internships have had very supportive faculty and CMU staff.
support of programs and each other
It depends on each student. Overall, students coming out of BAP or SAS make better associates.
creativity, good interviewing skills, lesson planning

Open-ended Comments – Areas for Improvement

The final question asked employers to address any weaknesses they have observed in CMU graduates as it relates to their job performance. Similar to the positive comments there was no overwhelming number of comments falling into a particular category. As noted in Table 22, some comments referenced less favorable real world experience, communication skills, professionalism, job expectations, time management skills and other opportunities for improvement.

Table 22: Opportunities for Improvement

Real Life Experience
Only the normal lack of experience most new graduates face.
Lack of focus on internships as requirement for graduation. Also, focus on real life work skills not just course work.
need more focus on working in the real world experience
Preparing for programs - real life situations
Some knowledge and "learned expectations" for how things will be on the job are too rote and create issues when reality is different from what they were expecting.
Some may not have "worldly" experiences, but that doesn't necessarily hold them back.
Just inexperience.
Most interns are not prepared for "real world" work experience. They are not very professional and have difficulty adapting to a professional environment. A suggestion would be for Career Services to offer some sort of "business etiquette" training to prepare them for their work environments.
Focus on team work and customer service - that is what is happening out here. Not 5 people assigned to write 1 paper, but more like 1 does research, 1 does note taking, 1 does speech writing, 1 does presentation, etc....like jobs...you don't all do everything together
Some of the graduates that I have hired over the past 3 years in Early Childhood Education seem to be only prepared for a particular type of program (1/2 day or 3/4 day program versus a full day, full year program). Also, some of the graduates do not have any classroom experience with infants and toddlers and they are used to more adults in a classroom than what is typical.
practical experience
Communication Skills
Writing skills
From what I have observed, CMU students tend to be rather immature and not prepared for the job market. Writing and communication skills are very, very poor, and there is an attitude of entitlement that is not justified by their skills. They seem to think they have more skills/value than they really do. Study habits and work ethic are abysmal. One thing I'm observing is that students are not really forced to work at CMU -- they can take many credits and float through, not really learning the required skills. One thing at work here is the leverage of student scores on faculty job evaluations -- any teacher who forces students to work and learn is punished with bad scores, causing the whole system to degenerate.
Writing skills and grammar skills. In particular how grammar is important to good writing skills.
lack of business acumen, lacking ability to effectively communicate with impact
Sometimes not as well spoken as other college grads.
excellent communication skills
very helpful and encouraged if graduates are fluent in another language (especially Spanish)
Foreign Language, English
Public speaking

Professionalism

Professionalism.

Lately I have seen a decline in maturity and professionalism. This needs to be taught to students and it's not only seen at CMU, but lately I have had a handful of CMU students flake out on me, accept an offer and not start. Or they say they're relocatable and they don't want to leave Michigan.

Could use some additional professional development and leadership skills.

We have had a couple who were only good workers when it suited them. Lazy, waiting to be shown what to do next, late, stupid errors. I try to fire these people as soon as it's clear to me that they are a drain on things.

Unprofessional appearance at Job Fairs, lack of enthusiasm at Job Fair interviews, poor interviewing skills.

Communication, leadership, problem-solving, time-management, and teamwork skills could be strengthened.

Some of them might not be as focused on their jobs as they perhaps should be!

Lack of attention to detail, issues with their ability to have professional relationships with fellow employees and as a representative of our company.

From what I have observed, CMU students tend to be rather immature and not prepared for the job market. Writing and communication skills are very, very poor, and there is an attitude of entitlement that is not justified by their skills. They seem to think they have more skills/value than they really do. Study habits and work ethic are abysmal. One thing I'm observing is that students are not really forced to work at CMU -- they can take many credits and float through, not really learning the required skills. One thing at work here is the leverage of student scores on faculty job evaluations -- any teacher who forces students to work and learn is punished with bad scores, causing the whole system to degenerate.

Unrealistic Expectations

Unrealistic expectations of an entry level position. This is far and away the biggest problem with CMU grads (the same is true with Western Michigan..and virtually all MAC schools for that matter, with the exception of Toledo)

Setting unrealistic expectation of what position are like and expected wages

Poor information on salary expectations

same as any college grad...not cmu specific...they want to be the ceo right away.

Sometimes students graduate with a false understanding of how the job market actually is. I believe the professor's need to get more involved with the Private Sector to understand the job market and what it take's to succeed, and then be able to communicate that effectively to their students.

Time Management

Weak time management skills.

time management, big picture thinking at times--too much in the details at times--typical of new hires from any school.

typical of most new educators- classroom management and time management

Initiative and time management

Project management and time management

I only have one employee to evaluate from CMU. She has tremendous difficulty staying on task and completing work assignments on time. She follows directions well but does not think about how law or factual differences impact the results.

Additional/Other Opportunities for Improvement

Willingness to relocate to the Southwest part of the U.S.

Reluctant to relocate

Not willing to relocate out of state.

Not willing to move out of state.

Diversity

There are still some cultural insensitivity and stereotyping.

Some experience culture shock and have initial difficulty relating with a widely diverse community population.

This difficulty is generally short-lived.

Not as smart

They need to be familiarized with other state testing requirements for teaching as well as be told that the Highly Qualified rules are different in each state. Many of the candidates pass over potential possibilities for themselves because they don't understand that they are qualified for positions in other states that are considered qualified in Michigan.

The leadership and organizational involvement is higher and more common from smaller programs than C.M.U.

The last CMU teacher fair I attended was in the spring of 2008. I was NOT impressed with the candidates I interviewed that day. We had only one opening this past year, but I would not have returned to the teacher fair this year, even if we had additional available positions. I also attended teacher fairs for WMU, Grand Valley State, Hope College, Calvin College, Aquinas College and Cornerstone that same spring. WMU candidates were the weakest. Teaching candidates from Grand Valley State and Hope College were the strongest.

Seem to be looking for short-term experience before graduate school, then moving on.

Not really a weakness, but CMU focuses a lot on the SAP software application in accounting. There are a limited amount of job opportunities that will be applicable. There may be other accounting software programs that should/could be included.

Needs more emphasis on technical preparations in the IT, and engineering and project management fields.

Need to continue to build a strong background in best practice literacy instruction with the use of data

Lack of general office skill set. i.e., inability to operate general phone system or take messages in an appropriate manner or relay caller information to recipient.

Knowledge of special education and how to help them in their general ed. classrooms.

International awareness and project management

Initial lack of confidence in the corporate environment

I am a wildlife biologist who hires seasonal biological technicians every summer to conduct wildlife surveys.

The seasonals I hire often lack a background in study design and statistics, both of which are critical for studying wildlife populations. Seasonals also lack a background in Excel, Access, and ArcGIS, all of which are used to archive and analyze wildlife data.

Having a specific "School of Criminal Justice" with more C.J. career oriented classes offered would strengthen graduates' resumes. You are turning out great graduates and we will continue to recruit Chippewas.

Experience and understanding of urban school districts and at-risk students.

Creativity. In-depth critical thinking.

Confidence is good, but arrogance isn't - especially for new grads. New grads should be taught in school that the "best work environment" isn't always the one that pays the most.

Classroom Management

Bachelors on Psychology doesn't help us in filling our positions.

Again, it depends on the student. We had one intern from CMU that was a super star and got a full time offer.

The other student from CMU did not, because had difficulty catching on to concepts.

Analytical ability

commitment to pick up extra work

APPENDIX

* Use caution interpreting results due to the low *n*-size.

NA's were excluded from the calculations.

↑ = Significantly higher than individuals not responsible for the appropriate job responsibility at $p < .05$

↓ = Significantly lower than individuals not responsible for the appropriate job responsibility at $p < .05$

Sorted in descending order based upon the overall mean scores from non-CMU supervisors.

Criterion 4 Evidence
Transfer Credit Guide – Example Alpena CC

Transfer Credit Guide

This guide is subject to change and should be used in consultation with an academic advisor.

<p>MACRAO TRANSFER AGREEMENT will be replaced by the Michigan Transfer Agreement (MTA) <u>effective prior to Fall 2014.</u></p>	<p>MICHIGAN TRANSFER AGREEMENT (MTA) The MTA replaces the MACRAO Agreement <u>effective Fall 2014 and beyond.</u></p>
<p>This distribution of courses fulfills the MACRAO Transfer Agreement and will satisfy the University Program portion of the CMU bachelors' degree for students who started following the MACRAO Transfer Agreement at their Michigan community college <u>prior to Fall 2014.</u> Please see your community college Registrar and request to have your transcript reviewed and designated as "MACRAO Satisfied". <i>Students may elect to follow the MTA.</i></p> <p>English Composition: 6 Semester Credits Two Written Communication courses</p> <p>Science/Math: 8 Semester Credits One Science course with a lab Intermediate and/or College Algebra, and/or Geometry</p> <p>Humanities: 8 Semester Credits A minimum of 8 hours from at least two different disciplines</p> <p>Social Sciences: 8 Semester Credits A minimum of 8 hours from at least two different disciplines</p> <p>Minimum hours required to complete MACRAO Agreement: 30</p>	<p>This distribution of courses fulfills the MTA and will satisfy the University Program portion of the CMU bachelors' degree at CMU for students who begin attending a Michigan community college <u>beginning Fall 2014.</u> Please see your community college Registrar and request to have your transcript reviewed and designated as "MTA Satisfied". Only courses with a grade of "C" or better may be applied to the MTA requirements.</p> <p>Communication: 2 Courses One Written Communication course One Written <u>or</u> Oral Communication course</p> <p>Natural Sciences: 2 Courses Two natural science courses from two different disciplines. One course must be a lab science course.</p> <p>Humanities and Fine Arts: 2 Courses Two humanities courses from two different disciplines (excluding studio and performance classes)</p> <p>Social Sciences: 2 Courses Two social science courses from two different disciplines</p> <p>Mathematics: 1 Course One entry-level college course as defined by the three pathways.</p> <p>Minimum hours required to meet MTA: 30</p>

An official transcript that is designated as being "MACRAO Satisfied" or "MTA Satisfied" will have satisfied the University Program portion of the General Education Requirements. A portion or all of the Competency Requirements may also be satisfied by an official transcript designating "MACRAO Satisfied" or "MTA Satisfied".

Central Michigan Writing Intensive & Quantitative Reasoning Requirements

Effective Fall 2014, CMU has implemented a Writing Intensive (12 semester hours) and Quantitative Reasoning requirement (3 semester hours). Please note that these requirements are for both transfer and incoming Freshman students.

Any Michigan community college student transferring to CMU with their transcript designated as "MACRAO Satisfied" or "MTA Satisfied" will be given six (6) semester hours of Writing Intensive course work. The remaining six (6) semester hours **must** be completed at CMU. The Quantitative Reasoning requirement may be satisfied through transfer credit.

General Notes

- A grade of C- or better is required for a course to transfer.
- A bachelor's degree requires a minimum of 124 semester hours of credit. CMU will accept community college transfer credits beyond the recommend 64 semester hours, however students will need to complete a minimum of 60 semester hours from an accredited 4-year-degree granting institution. A minimum of 40 hours must be completed at the 300 level or above. A minimum of 30 semester hours of credit must be earned from CMU
- The University Program Requirements and competencies may be fulfilled by students who satisfy the MACRAO Agreement or the MTA
- **Students are required to meet CMU Competency Requirements prior to reaching 56 credit hours. Competency requirements consist of: two Written English (composition) courses, one Oral English (communication) course, and one Mathematics course be completed with a grade of "C" or above.**

Any remaining required and elective courses for a bachelor's degree will be selected in consultation with an academic advisor to ensure that CMU degree requirements are being met.

Admissions: Warriner Hall 102 | Mount Pleasant, MI 48859 | 1-888.292.5366 Toll Free

cmuadmit@cmich.edu | <http://admissions.cmich.edu>

CMU is an AA/EQ institution, providing equal opportunity to all persons, including minorities, females, veterans and individuals with disabilities. (see cmich.edu/aaeo) UComm 9063

Transfer Credit Guide

This guide is subject to change and should be used in consultation with an academic advisor.

IMPORTANT NOTES: This is a limited enrollment program. The Athletic Training program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE):

- The average pre-professional course GPA for students is 3.5.
- The GPA from your transferring institution will be counted for program admission eligibility.
- **From the date you arrive at CMU:**
 - It will likely take a student a minimum of two semesters to complete the Pre-professional Phase and all selection criteria to be an eligible candidate for selection. Most of those courses will need to be taken at CMU.
 - It will likely take a student a minimum of 3.5 years to complete
- It is recommended that you transfer to CMU after no more than two semesters. Students are strongly encouraged to speak with a CMU Athletic Training Education Program Advisor regarding program specifics at (989) 774-1054 before the end of their first semester to discuss the sequencing of the remaining athletic training pre-professional courses.
- The program is divided into three phases which include: (A) Pre-professional Phase, (B) Professional Phase, and (C) Internship Phase including a 15 week internship.
- Selection criteria, program technical standards and other pertinent information may be viewed by accessing the program website at <http://www.chp.cmich.edu> (Athletic Training link on the right under Departments)

Criterion 4 Evidence

Transfer Credit Policy

TRANSFER CREDIT POLICY

I. Transfers from Accredited Schools and Foreign Institutions

Undergraduate courses from another college or university which is accredited by one of the regional institutional accrediting associations or from a foreign university or college approved by the government or the official regulating agency of the country in which the university or college is located will be considered for transfer credit at Central Michigan University, subject to the following conditions:

- a. Courses must be germane to a program at Central Michigan University.
- b. Transfer courses completed with a grade of C- or better or the equivalent will be accepted.
- c. Credits from foreign institutions will be accepted using the guidelines developed by the World Education Series of the American Association of Collegiate Registrars and Admissions Officers, and in consultation with the affected departments.
- d. Grades and honor or quality points are not transferable to or recorded on the CMU permanent record.
- e. Acceptability of transfer course work to fulfill CMU major or minor requirements is at the discretion of the individual department.

II. Transfers from Non-Accredited Schools

A student who has earned credit or a baccalaureate degree from an institution which is not accredited by one of the regional accrediting associations may appeal through the Board of Appeals who may consult with the individual departments for an exception to the above policy for up to a maximum of 62 credits. Before accepting such credit for transfer credit consideration, the Board of appeals will consult with individual departments. If a positive decision results, transfer credit may then be granted subject to the same conditions that apply to transfers from accredited schools.

III. Exceptions

Academic units may request an exception to the Regional Accreditation portion of this policy from the Degrees, Admissions, Standards and Honors Committee.

IV. Military Training and Experience.

1. **Military Service School Experiences.** Granting of academic credit for military service school experiences will be guided by the evaluations prepared by the American Council of Education and published in the

“Guide to the Evaluation of Educational Experiences in the Armed Services.” All Military Service School experiences that are recommended for undergraduate level credit will transfer to Central Michigan University. Acceptability of credit for military service school experiences to fulfill CMU major or minor requirements is at the discretion of the individual department.

2. **Military Occupational Specialties.** Granting of academic credit for military occupational specialties will be guided by the evaluations prepared by the American Council of Education and published in the “Guide to the Evaluation of Educational Experiences in the Armed Services.” All Military Occupational Specialties that are recommended for undergraduate level credit will transfer to Central Michigan University. Acceptability of credit for military occupational specialties to fulfill CMU major or minor requirements is at the discretion of the individual department.
3. **Service Member Opportunity College (SOC) courses.** Undergraduate courses from another college or university that is recognized as a Service Member opportunity College institution for either the army (SOCAD), navy (SOCNAV), or marine corps (SOCMAR) will transfer to Central Michigan University subject to the following conditions: a) the student seeking the transfer of credit is an active or reserve military service member or the immediate family member of a service member; b) transferable courses completed with a grade of C- or better or the equivalent will be accepted; c) grades and honor points or quality points are not transferable to or recorded on the CMU permanent record; d) course work is taken after the issuance of a Student Agreement by Central Michigan University. The Student Agreement is a record of all of the student’s prior learning (including military experience) and where that learning fits into his or her degree plan.

V. Non-Military Training Experiences

Granting of academic credit for selected training experiences offered outside the sponsorship of colleges and universities will be guided by the evaluations prepared by the American Council on Education’s PONSI program (ACE/PONSI). ACE/PONSI credit recommendations appear in the publication entitled *The National Guide to Educational Credit for Training Programs*.

VI. The MACRAO Articulation Agreement.

A person who transfers from a community college in Michigan with a transcript documented as having satisfied the MACRAO Agreement, will also have satisfied the University Program portion of the General Education Requirements at CMU. All other students may refer to the General Education Requirements section of the *Bulletin* for guidelines on the applicability of their transfer credit toward University Program requirements.

VII. International Baccalaureate Credit.

Courses within the International Baccalaureate Diploma and the International Baccalaureate Certificate for individual courses may be accepted as transfer credit on a course-by-course basis if the higher-level examinations have been passed with a score of four or better.

Approved by the Academic Senate 10/7/80

Amended by the Academic Senate 11/30/82; 10/18/88; 10/5/93; 11/29/94; 1/28/97;
1/22/02.

Criterion 4 Evidence
Transfer Policy Global Campus

As an additional service for faculty, the library also offers a copyright clearance service for items that instructors wish to place on electronic reserve within the Blackboard course shell. If instructors want to use journal articles or excerpts from books as part of course materials, they may contact the Course Reserve and Copyright Services office, which will obtain a full-text copy of the item, obtain one semester's worth of copyright clearance to use the item, pay any applicable usage fees, and then upload it directly into an instructor's Blackboard course shell.

Through the Global Campus Library Services department, students and faculty have access to a very responsive and focused suite of library services, as well as to millions of print, electronic, and media items. All students and faculty participating in Global Campus courses are encouraged to take advantage of this nationally-recognized, full-service library program. For more information, see the OCLS web site at <http://ocls.cmich.edu> or call 800-544-1452.

Career Services and Resource Center

Career Services is located in Ronan Hall 250, 989-774-3068, and offers students assistance with job search activities. The office helps students with developing sound job-seeking skills, writing resumes, and interviewing techniques. Students can register for an online resume referral service through http://www.cmich.edu/about/careers/student/career_services/Pages/default.aspx (Career Service's Web site). An extensive career resource center is provided for use by all students and alumni who live near or visit the Mount Pleasant area. The resource center contains general career information, tips for seeking jobs, vacancy listings from a variety of sources, and information about potential employers in business, government, and education. For those students and alumni who do not live in the Mount Pleasant area, you can access most of this information through the Career Services Web site.

The center also coordinates recruiting on the main campus by businesses, government agencies, and educational institutions and serves as a clearinghouse for employment opportunities through publication of a weekly vacancy *Bulletin*.

Note: The center does not guarantee employment for graduates.

Transfer Credit

All transcripts and other documents received by the university become the property of the university and will not be released. Copies will not be made for other than university use.

Options for Earning Credit

Undergraduate Transfer Credit

Courses from other colleges will be considered for transfer credit if they meet the policy outlined below. At least 60 semester hours of the student's bachelor's degree academic requirements must be earned at a fully accredited, four-year, degree-granting institution like Central Michigan University, or from a foreign university or college approved by the government or the official agency of the country in which the university or college is located. Credit earned at other institutions is automatically evaluated when a student is granted regular admission status. In some cases, the evaluation of transfer credit may require that you obtain course descriptions for courses taken more than 10 years ago from out-of-state institutions before your transfer credit can be evaluated. Evaluation begins after all official transcripts have been received. Results of transfer credit evaluation will be sent to the student. It is the student's responsibility to consult with the academic advisor who determines which credits may appropriately be applied to that student's degree program. Coursework not eligible for transfer credit may be considered for prior learning assessment credit.

A student may not apply more than 94 semester hours of credit from any combination of the following sources:

- a. Transfer credit
 - b. Prior learning assessment credit
 - c. College Level Examination Program (CLEP) or the university's Credit by Examination Program
 - d. United States Armed Forces credit
 - e. As assessed on an individual case basis, any other credit earned through standard testing or evaluation procedures.
- I. Transfers from accredited schools and foreign institutions**
Undergraduate courses from another college or university which is accredited by one of the regional institutional accrediting bodies, or from a foreign university or college approved by the government or the official agency of the country in which the university or college is located, will be considered for transfer credit at Central Michigan University, subject to the following conditions:
- a. Courses must be germane to a program at Central Michigan University.
 - b. Transferable courses completed with a grade of C- (1.7 per Central Michigan University's grading scale) or better or the equivalent will be accepted.
 - c. Credits from foreign institutions will be accepted using the guidelines developed by the World Education Series of the American Association of College Registrars and Admissions Officers and in consultation with affected departments.
 - d. Grades and honor or quality points are not transferable to or recorded on the CMU permanent record.
 - e. Applicability of transfer coursework to a student's program plan is at the discretion of the academic advisor with approval by the appropriate academic unit.
- II. Transfers from nonaccredited schools.** A student who has earned credit or a baccalaureate degree from an institution which is not accredited by one of the regional accrediting associations may appeal to the Board of Appeals who may consult with the individual departments for an exception to the above policy for up to a maximum of 62 credits. If a positive decision results, transfer credit may then be granted subject to the same conditions that apply to transfers from accredited schools. For undergraduate transfer credit from another university to be considered for acceptance while an undergraduate student is currently enrolled in Global Campus, the student must:
- a. Consult with the academic advisor to determine whether the course would likely be appropriate to the program plan. Consultation does not guarantee acceptance of the credit as the guidelines, described above, must also be satisfied.
 - b. Upon completion of the work, request that the institution awarding the credit send one official transcript to Global Campus.
- III. Exceptions.** Academic units may request an exception to the Regional Accreditation Policy from the Degrees, Admissions, Standards, and Honors Committee.
- IV. Military training and experience.**
- a. **Military service school experiences.** Granting of academic credit for military service school experiences will be guided by the evaluations prepared by the American Council on Education and published in the "Guide to the Evaluation of Educational Experiences in the Armed Services." All Military Service School experiences that are recommended for undergraduate level credit will transfer to Central Michigan University. Acceptability of credit for military service school experiences to fulfill CMU major or minor requirements is at the discretion of the individual department.

b. Military occupational specialties. Granting of academic credit for military occupational specialties will be guided by the evaluations prepared by the American Council on Education and published in the "Guide to the Evaluation of Educational Experiences in the Armed Services." All Military Occupational Specialties that are recommended for undergraduate level credit will transfer to Central Michigan University. Acceptability of credit for military occupational specialties to fulfill CMU major or minor requirements is at the discretion of the individual department.

c. Service Member Opportunity College (SOC) courses. Undergraduate courses from another college or university that is recognized as a Service Member Opportunity College institution for either the army (SOCAD), navy (SOCNAV), or marine corps (SOCMAR) may transfer to Central Michigan University subject to the following conditions: a) transferable courses completed with a grade of C- (1.7 per Central Michigan University's grading scale) or better or the equivalent must be accepted; b) grades and honor points or quality points are not transferable to or recorded on the CMU permanent record. The Program Plan is a record of all of the student's credit (including military experience) and where that learning fits into her or his degree plan.

V. Nonmilitary training experiences. Granting of academic credit for selected training experiences offered outside the sponsorship of colleges and universities will be guided by the evaluations prepared by the American Council on Education College Credit Recommendation Service (CCRS) program. CCRS credit recommendations appear in the publication entitled: *The National Guide to Educational Credit for Training Programs*. Students must provide an official transcript from the Registry of Credit Recommendations American Council on Education, 202-939-9434.

The MACRAO and MTA Transfer Agreements: A person who transfers from a community college in Michigan with a transcript documented as having satisfied the MACRAO or MTA Agreement, will also have satisfied the University Program portion of the General Education Requirements section at CMU. All other students may refer to the General Education Requirements in this Bulletin for guidelines on the applicability of their transfer credit toward University Program requirements.

International Baccalaureate Credit: Courses within the International Baccalaureate Diploma and the International Baccalaureate Certificate for individual courses may be accepted as transfer credit on a course-by-course basis if the higher level examinations have been passed with a score of four or better.

Graduate Transfer Credit Policy

This policy relates to non-CMU coursework being considered for transfer into a CMU graduate degree program plan.

Transferable credit:

- Graduate Certificate: maximum of 6 semester hours from a previous or concurrent graduate degree or certificate can be transferred toward a graduate certificate.
- Master's Degree: maximum of 50% of the semester hours (Exception: maximum of 30 semester hours on the 54-credit hour joint master's degree in history are transferable.)
- Specialist's Degree: maximum of 12 semester hours beyond the master's degree if the master's degree was earned at CMU. (Exception: maximum of 9 semester hours beyond the master's degree if the degree was not earned at CMU.)
- Doctoral Degree: maximum of 50% of the post-baccalaureate semester hours. Minimum percentage that must be earned at CMU can vary among academic programs.
- Maximum of 6 semester hours may be transferred from one earned degree to another master's or higher degree program.
- Military coursework: coursework with a grade of outstanding or excellent is transferable.

A separate policy exists for the following: Students entering the Au.D. with a master's degree in Audiology and significant, relevant professional experience. See the Au.D. program description for details. Students in California are limited to six semester hours or prior learning credit according to California regulations. The ACE Guide is consulted, and its recommendations are generally, but not always followed. Coursework which is not transferable may be considered for prior learning credit.

Graduate transfer credits must be appropriate to the student's program, recommended by the student's academic advisor for use on the program plan, and approved by the Vice President/Dean of the Office of Research and Graduate Studies. Transfer credits are not considered in the computation of the student's graduate grade point average. Graduate transfer credit must meet the following criteria:

1. Credits must have been earned at a regionally accredited higher education institution or one of recognized standing (at the time the credits were earned) as defined by the College of Graduate Studies.
2. The credits are not in violation of any pertinent university or College of Graduate Studies regulation, procedure, or policy;
3. The credits do not correspond to a course previously taken at CMU;
4. The credits were earned within the time limit for program completion. Credits from a prior graduate degree or certificate that are to be applied to a doctoral degree may be exempt for the time limit for doctoral degree completion (see individual program description);
5. The credits are appropriate to the student's program and are not in conflict with credit limitation specified elsewhere in the Graduate Bulletin;
6. As certified on the official graduate transcript, courses must be at the graduate level.
7. The grade for the credits must be B or higher. Ungraded course work will not be accepted in transfer unless accompanied by evidence that the work was of B or higher quality. Military coursework with a grade of outstanding or excellent is transferable. At the discretion of the department, coursework that is not transferable may be considered for prior learning credit.
8. The student is in good standing (cumulative graduate GPA of 3.0 or higher) at the institution at which the credit was earned.
9. Doctoral degree students must have regular admission to their degree program;
10. The student is responsible for having official graduate transcripts sent by the institution at which the credit was earned directly to CMU Global Campus, 802 Industrial Drive, Mt. Pleasant, MI and for completing the most recent version of the Graduate Transfer Credit Request form (www.grad.cmich.edu/forms.htm).
11. The credits must be approved by the student's academic advisor (for graduate certificates and Master's degrees) or Program Director (doctoral degrees) and the Vice President/Dean of the Office of Research and Graduate Studies.
12. Courses earned by correspondence will be eligible for graduate transfer credit unless otherwise stipulated in department admission requirements.
13. Transfer credits must be earned within the time limit for program completion. Transfer credits are not eligible for extension of time consideration.

Transfer credits are not included in the computation of the student's CMU graduate grade point average.

Students who seek to transfer credit should begin the process by giving their academic advisor copies of course catalog descriptions or syllabi. After reviewing the materials, the academic advisor will indicate which work might be appropriate for use on the program plan. The student is responsible for requesting an official transcript(s) of the credits be sent directly to CMU, 802 Industrial Drive, Mt. Pleasant, MI, 48858, by the registrar of each institution from which the credit was earned. The academic advisor then initiates the Graduate Transfer Credit Request (GTCR) form which recommends to the Vice President/

Dean of the Office of Research and Graduate Studies that the transfer of coursework be approved. All transfer credits must be approved by the academic advisor and the Vice President/Dean of the Office of Research and Graduate Studies.

Students may request pre-approval of a course's content for possible transfer credit. Students should note that pre-approval by Graduate Studies does not guarantee the courses will be approved once a Graduate Transfer Credit Request form is submitted. Pre-approvals only indicate the likelihood that the coursework will transfer.

The Prior Learning Assessment Credit Process

The Prior Learning Student Handbook, required forms, and sample undergraduate and graduate portfolios are available on the Prior Learning Website <http://global.cmich.edu/prior-learning>. Students should review this material carefully before beginning work. The Prior Learning Student Handbook is an essential guide, and the forms are a required part of the student's portfolio. Portfolios must be typed or machine printed. Handwritten portfolios are not acceptable.

Portfolios should be submitted as early as possible in the degree program since an early evaluation of prior learning assessment credits enables the student to plan her or his degree program more efficiently. Graduate prior learning assessment credit applications should be submitted within four months (120 days) of a student's admission. Completed portfolios and the appropriate fee should be sent to: Prior Learning Assessment, Central Michigan University, Global Campus, 802 Industrial Drive, Mount Pleasant, MI, 48858.

The evaluation of portfolios is usually completed within 9-12 weeks. Students should submit two complete copies of their portfolios in separate notebooks; if they do not, evaluation time will be lengthened.

After being notified of their prior learning assessment credit award, students are responsible for consulting with their academic advisor. The academic advisor determines which prior learning assessment credits may be applied to the student's program plan.

Portfolios are evaluated using performance criteria established and administered by a trained team of university graduate faculty members. Typical criteria include such things as the amount and level of decision-making responsibility; the number of and reporting relationships with subordinates and colleagues; the span of financial control; the activity time span, training experience duration, preparation and results; and the overall level of responsibility or expertise required to perform the functions described. All experiences must be thoroughly self-assessed and documented.

The following course numbers are used to record prior learning assessment credits:

Undergraduate:

- UNV 297 (lower division), or
- UNV 497 (upper division)

Graduate:

- UNV 697

An appropriate title and credit hour designation are assigned by the Prior Learning Assessment Team to each award.

Classes and Seminars

The instructional format for each course offered through Global Campus is dependent upon content, student needs, and course design options. Classes are usually scheduled during compressed time blocks to maximize degree progression and to minimize scheduling conflicts. Scheduling options offered include alternate weekends, week-long, and evenings, as well as CMU Online. Course modality options include face-to-face classes, online, video conference courses, or hybrid courses.

Face-to-Face courses: Instructor and students meet and interact at pre-determined times, dates and location for purposes of delivering instructional content by a variety teaching methods and evaluative measures.

Online courses: Instructor and students interact in a virtual classroom where the learning experience is facilitated using the latest technology. Course materials are distributed electronically and student learning assessment and evaluations are conducted exclusively online. Online courses can include synchronous communication experiences where students engage in real-time interactions, at a specific point in time, with fellow students and faculty through the utilization of software imbedded in the learning management system (LMS); or, through asynchronous communication experiences where students engage with fellow students and faculty through independent learning spaces that allow anytime interactions and responses.

Video Conference courses: Instructor and students meet in various classroom environments, that are geographically dispersed, and interact via live interactive video. These courses provide opportunity for a collaborative learning environment by allowing delivery of one course to multiple locations.

Hybrid/Blended courses: Instructor and students meet and interact using both face-to-face and online environments in one course, leveraging a variety of strategies and interactions to enhance the learning experience.

Regardless of modality, all courses have specific start and end dates. In addition, textbooks, course outlines, reference materials and assignments are available prior to the first session of a class to allow preparatory reading and study.

Note: To ensure the best student learning experience and the availability of courses that fulfill student degree plans at given locations, courses initially scheduled as face-to-face courses may be converted to a hybrid/blended course format prior to the first class meeting.

Main Campus Courses

Any student admitted to Global Campus may enroll for classes on the Central Michigan University campus in Mount Pleasant. Students must follow regular main campus enrollment procedures. Information regarding dates and procedures for main campus registration is in the Class Schedule on the Registrar's website at http://www.cmich.edu/registrar_office/RegistrarClassScheduleCourseOfferings.

Limitations on College of Business Credits

MSA degree student program plans may include no more than 15 semester hours of coursework from the College of Business Administration; graduate certificate student program plans may include no more than 12 semester hours; undergraduates, no more than 27 semester hours. These credit limitations include both business transfer credits and credits earned at CMU. Students should consult with their academic advisor before enrolling in any College of Business course.

Independent Study

Independent study courses, such as MSA 691 (1-2 credits), are available for students who wish to pursue special areas of interest. Independent learning experiences should help students develop skills in planning, organizing, researching, reporting, and developing specific skills outside the classroom. The experiences may take the form of readings, research, or special projects. Students wishing to pursue independent study should contact their program center for an Independent Study Guide and an application for Independent Study Request. Independent study projects should not duplicate the content of an established course.

Tutorial Option

Students may, under certain circumstances, take courses as tutorials (on an individual basis) working closely with an approved instructor. Details are available from the program administrator.

Criterion 4 Evidence
UREC Report 2015

Central Michigan University Recreational Analysis of First Time in Any College Students.

The following analysis uses Fall 2013 and 2014 First Time in Any College (FTIAC) students and represent a total of 6,738 students.

Purpose

The main purpose of the study is to examine the influence of participation in Intermural Sport (IM) activities and using the Student Activity Center (SAC) on student's retention into the 2nd year at CMU and academic performance (1st Term GPA). Other factors considered are group differences (participation vs not) in High school GPA (HSGPA), ACT Composite, 1st Generation status and Low income status (Pell eligibility).

Executive Summary

SAC users

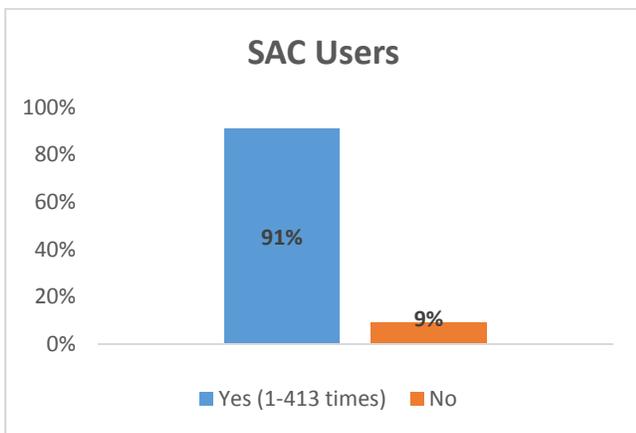

- 91% of the FTIAC students used the SAC at least once and at most 403 times within their 1st academic year in CMU - A student is considered a SAC user if he/she used the SAC facility at least 10 times within the 1st academic year. 52.7% of the 2 years of FTIACs are SAC users.
- **82.7% of SAC users retained in the 2nd year at CMU compared to 71.5% of non-SAC users.**
- The average ACT score for SAC users is 22.37 and it is significantly lower than the ACT scores of 22.86 for non-SAC users.
- The average HSGPA for SAC users is 3.31 and it is significantly lower than the HSGPA of 3.36 for non-SAC users. Practically, the difference in the HSGPA is very small (.05)
- The average 1st term GPA for SAC users is 2.83 and it is significantly higher compared to 2.77 for non-SAC users.
- There is no difference between the rates of use of the SAC among first generation and non-first generation students.
- 48.8% of low income students are SAC users compared to 53.4% of non-low income students. This differences is statistically significant.
- **Non-Pell students retain at a significantly higher rate than Pell students (78.9% vs 69.7%) and SAC users retain at a significantly higher rate than non-SAC users (82.7% vs 71.5%). However, there is a significant interaction in that for Pell students, the positive impact of using SAC is significantly greater than for non-Pell students (78% to 61% vs 83% to 74%).**

IM Activities

- 29% of FTIAC students participated in IM sport at least once within their 1st academic year in CMU.
- **85.9% of the students who participated in IM sports at least once, retained in the 2nd year at CMU compared to 73.9% of the students who did not participated in IM sports.**
- The average ACT score for students that participate in IM sports is 22.54 and it is not significantly different from the ACT scores of 22.58 for students that do not participate in IM. Thus the ACT score is not different between students that participate in IM sports and those that do not.

- The average HSGPA for students that participate in IM sports is 3.35 and it is significantly higher than the HSGPA of 3.32 for students that do not participate in IM sports. Practically, the difference in the HSGPA is very small (.03).
- The average 1st term GPA for participants in IM sports is 2.87 and it is significantly higher compared to 2.78 for non-participants in IM sports Thus IM sport students have relatively a higher 1st Term GPA than non-participants in IM sports.
- Nearly 27% of 1st Generation students participate in IM sports compared to 30% of non- 1st Generation students. The difference is statistically significant ($\chi^2 = 5.536$, p-value=0.019).
- 24.5% of low income students participate in IM sports compared to 30.2% of non-low income students. This difference is statistically significant.

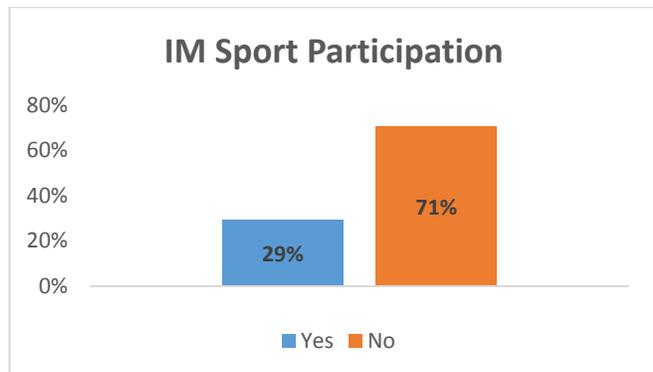

Preliminary Descriptive

SAC Users		
	Frequency	Percent
No	612	9.1
Yes (1-413 times)	6124	90.9
Total	6736	100.0

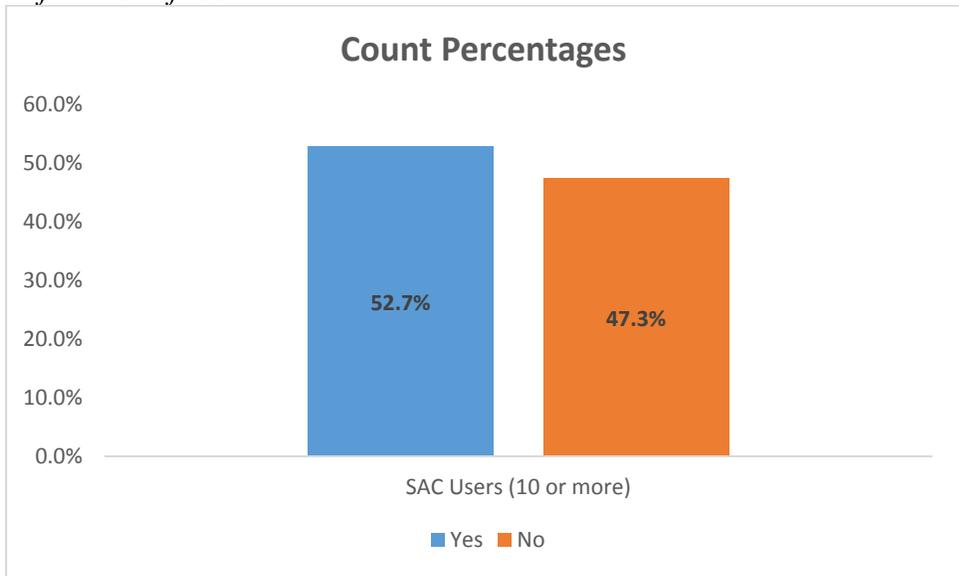

91% of the FTIAC students used the SAC at least once and at most 403 times within their 1st academic year in CMU.

IM		
	Frequency	Percent
No	4760	70.7
Yes	1976	29.3
Total	6736	100.0

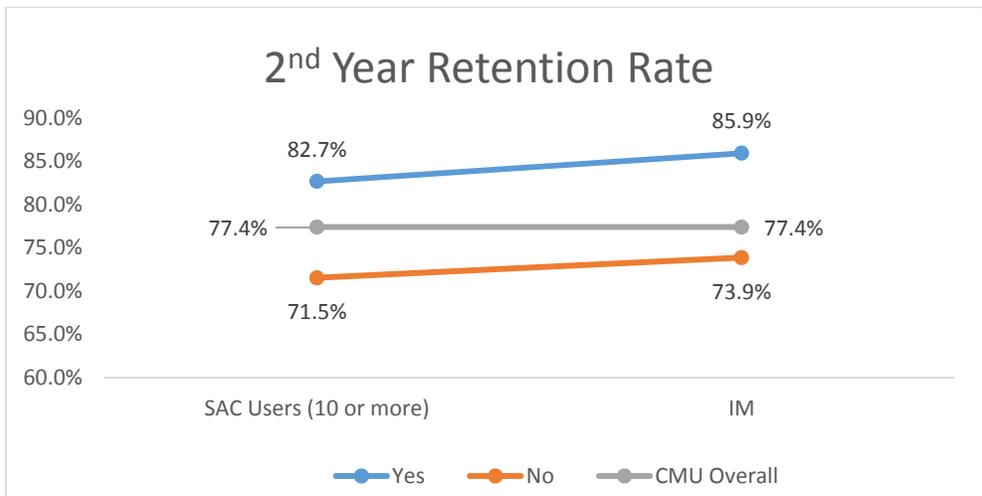

29% of FTIAC students participated in IM sport at least once within their 1st academic year in CMU.

Rate of the use of SAC

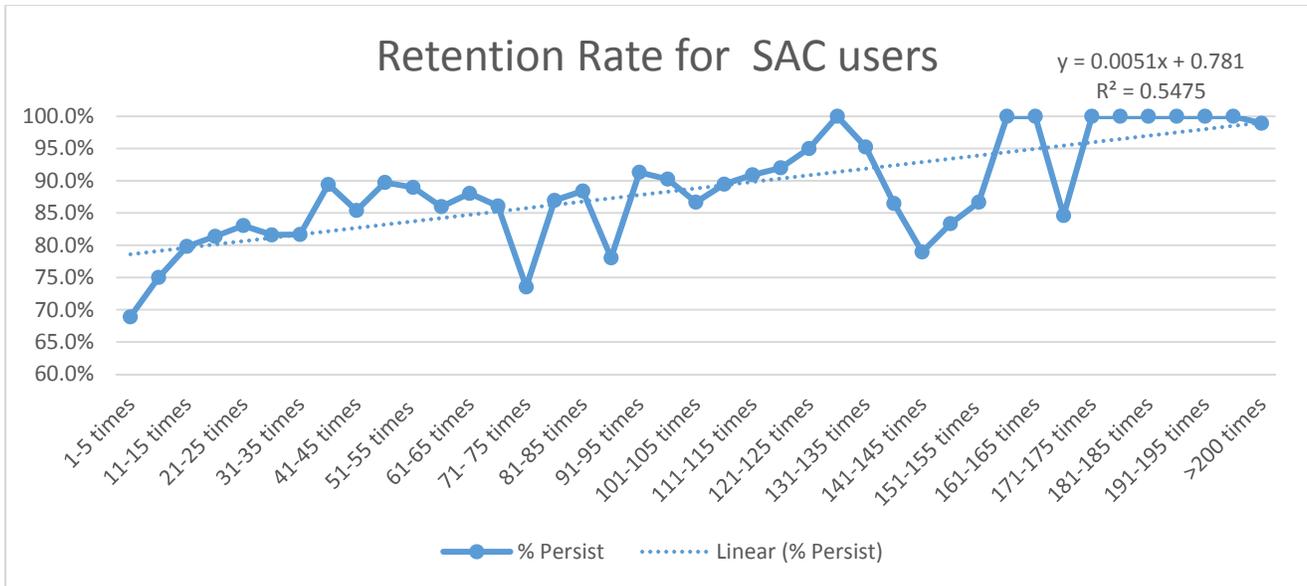

For the purpose of comparing this analysis to other institutions, we consider a student as a SAC user if he/she used the SAC facility 10 or more time within the 1st academic year. 52.7% of all the students used the SAC at least 10 times within their 1st academic year.

Retention rate for SAC use and IM sports

82.7% of SAC users retained in the 2nd year at CMU compared to 71.5% of non-SAC users. 85.9% of the students who participated in IM sports at least once, retained in the 2nd year at CMU compared to 73.9% of the students who did not participated in IM sports.

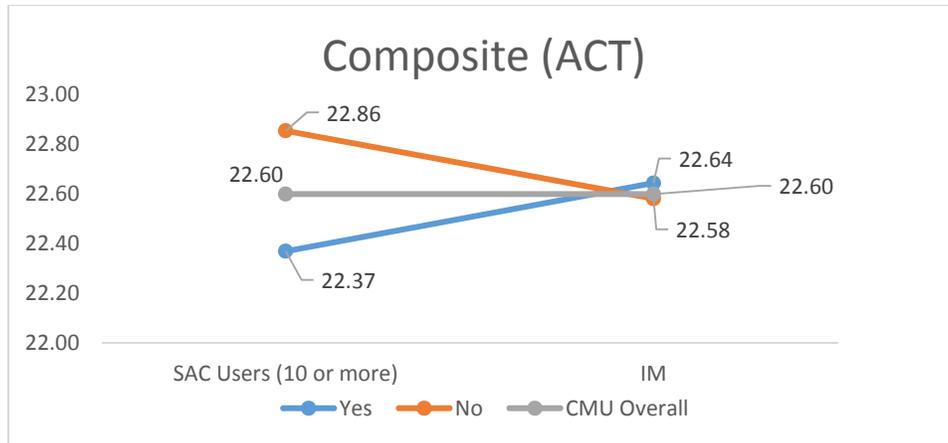

Retention rate on frequency of the use of SAC

A further analysis indicates the influence of the number of times using the SAC has on retention rate. There appears to be a linear relationship with a positive impact of the number of times of using the SAC on retention rate. Thus, for every additional 5 times increase in visiting the SAC, the retention rate increases by 0.51%. The R-square value of 54.8%, implies that there are other factors in addition to the number of times visiting SAC explains the variability in retention rate. Thus, there are other influential factors impacting a student returning to CMU in the 2nd year other than using the SAC.

Taking into consideration the entering credentials (ACT, HSGPA, 1st Generation Status, Low income Status) of FTIAC students that impact 2nd year retention rate we ran independent sample t-test and chi-square test to examine the nature of relationship or impact of these factors on retention within the two activities under study (Use of SAC and participation in IM sports).

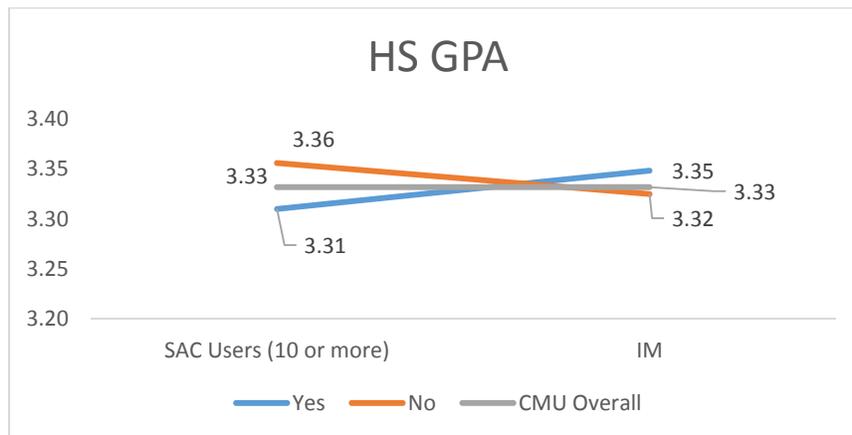

Composite by SAC use and IM sports

The average ACT score for SAC users is 22.37 and it is significantly lower than the ACT scores of 22.86 for non-SAC users. Thus students that use the SAC at least 10 time come to CMU with a lower average ACT compared to students that do not use the SAC at least 10 times. Note SAC users still retain at a higher rate than the non-SAC users.

The average ACT score for students that participate in IM sports is 22.54 and it is not significant different from the ACT scores of 22.58 for students that do not participate in IM. Thus the ACT score is not different between students that participate in IM sports and those that do not.

High School GPA by SAC use and IM sports

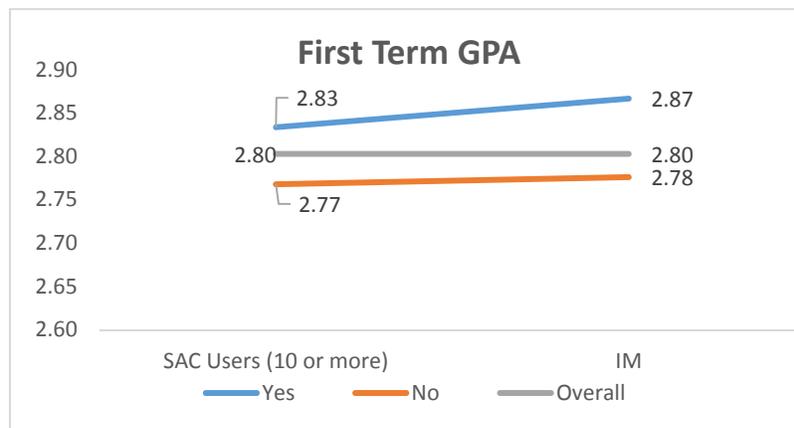

The average HSGPA for SAC users is 3.31 and it is significantly lower than the HSGPA of 3.36 for non-SAC users. The test confirms that this difference is not by chance, however, practically, the difference in the HSGPA is very small (.05)

The average HSGPA for students that participate in IM sports is 3.35 and it is significantly higher than the HSGPA of 3.32 for students that do not participate in IM sports. The test confirms that this difference is not by chance, however, practically, the difference in the HSGPA is very small (.03)

This results are confirmed by a logistic regression model that shows that the HSGPA is the 1st significant factor to impact retention followed by using the SAC or participating in Intermural sports.

First term GPA (in CMU) by SAC use and IM sports

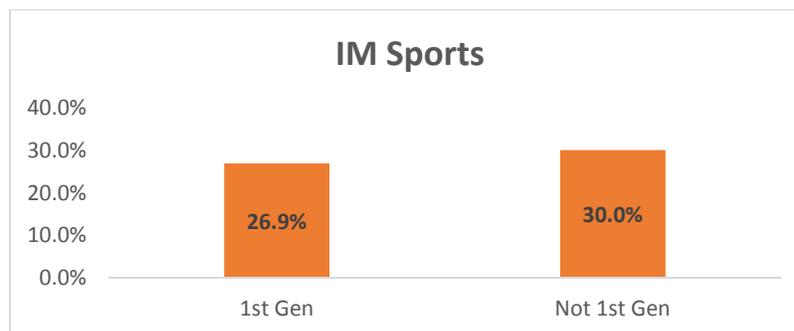

The average 1st term GPA for SAC users is 2.83 compared to 2.77 for non-SAC users and this difference is statistically significant. Thus SAC users have a higher 1st Term GPA to non-SAC users

The average 1st term GPA for participants in IM sports is 2.87 compared to 2.78 for non-participants in IM sports and this difference is statistically significant. Thus IM sport students have relatively a higher 1st Term GPA than non-participants in IM sports.

This data can be used to answer other questions about use of the SAC and participation in IM. In particular, are first generation and low income students less likely to participate in IM and use the SAC?

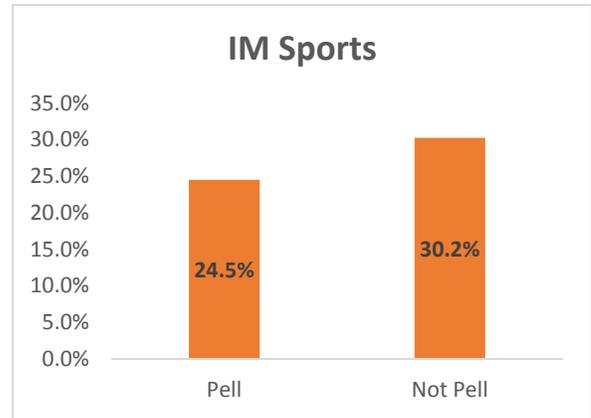

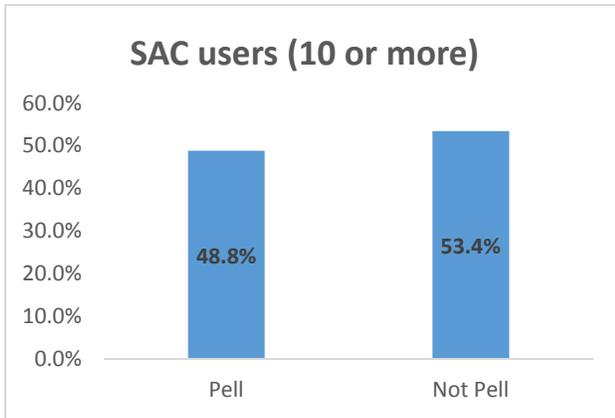

First Generation status

There is no difference between the rates of use of the SAC among first generation and non-first generation students. However, there is a difference in participation rates of IM sports.

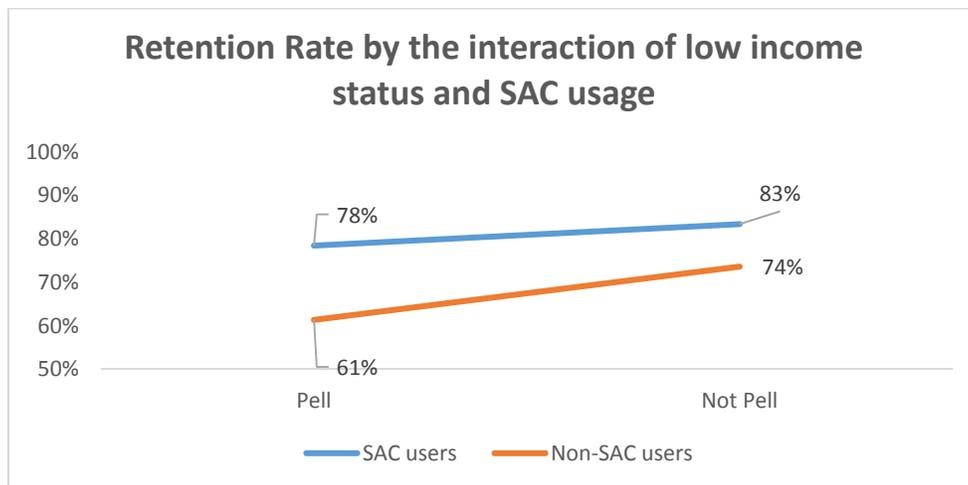

Nearly 27% of 1st Generation students participate in IM sports compared to 30% of non- 1st Generation students. The difference is statistically significant ($\chi^2 = 5.536$, p-value=0.019).

Low income status (Pell)

48.8% of low income students are SAC users compared to 53.4% of non-low income students. 24.5% of low income students participate in IM sports compared to 30.2% of non-low income students. Both of these differences are statistically significant.

Impact of SAC usage and low income status on retention rate

As is already known, non-Pell students retain at a significantly higher rate than Pell students (78.9% vs 69.7%) and SAC users retain at a significantly higher rate than non-SAC users (82.7% vs 71.5%). However, there is a significant interaction in that for Pell students, the positive the impact of using SAC is significantly greater than for non-Pell students (78% to 61% vs 83% to 74%).
