Funded Grants

Lancaster, P. E., Dirkin, K, Davidson, J. F. (2024) Michigan Consortium for Addressing Rural Education Expansion and Retention (MiCAREER) Resource Hub.

The purpose of this project is to develop a consortium of public educator preparation institutions (EPI) that collaborate to offer centralized support and credentialing pathways to individuals in working and/or living in rural school districts at no cost to the educator. The Hub utilizes assessment of qualified prior experiences and experiential learning combined with academic courses delivered online and mentoring support.

Lancaster, P. E. & Davidson, J. F. (2023) Morris Hood Jr, Educator Development, KCP, Michigan Department of Labor (\$60,000).

The purpose of this project is to increase the number of academically or economically disadvantaged students who enroll in and complete K-12 teacher education programs at the baccalaureate level.

Lancaster, P. E. & Nagelkirk, J. W.K. (2018). Education and Community Engagement Partnership. (Funded by W.K. Kellogg Foundation, \$15,000,000).

The purpose of this project was to partner with Batter Creek Public Schools to launch the Education and STEM Revitalization Project in order to ensure that BCPS students are college or career-ready upon graduation, support the retention of teachers, and develop career pathways for students in STEM, Health Professions, and Education. Education-specific initiatives within the project included an intensive mentoring program for early career teachers, district-wide project-based learning professional development, increased placement of student teachers in the district, support for the opening of a STEM-focused middle schools, and camps for youth interested in pursuing education as a career path.

Lancaster, P. E. (2014). Comprehensive Early Literacy Instruction: CEEDAR at Grand Valley State University (\$20,000).

The purpose of this project was to partner with institutions of higher learning across the state and the Michigan Department of Education to align literacy instruction and interventions across special and general education. CEEDAR staff facilitated multiple convenings, which over the course of five years grew from a focus on literacy to support for high-leverage, or core, teaching practices.

Lancaster, P.E. (2005). Computerized Vocabulary Instruction for Students with Disabilities. (Funded by The Eunice Kennedy Shriver National Institute of Child Health and Human Development, \$850,000).

Award Number: R44HD54028. The purposes of this project were to test the feasibility and efficacy of using a computerized format for providing comprehensive vocabulary instruction to students with high incidence disabilities (HID). To evaluate the feasibility of this type of instruction, software programs were designed to teach common prefixes, suffixes, and words parts; teach two research-validated vocabulary learning strategies; and provide multiple opportunities for students to apply their knowledge of word parts and use of learned strategies to high frequency academic vocabulary. Validated instructional principles such as detailed description and multiple levels of practice with feedback are embedded into each segment of the programs. Segments include an overview of the strategy, rationale for learning and purpose of using the strategy, detailed descriptions of each step, video clips of students using the strategy in real testing situations, practice activities, and checks for understanding. To test the efficacy of the programs, revisions to each program were made based on findings from the feasibility studies. The feasibility and validation studies focused on (a) usability of the program, (b) student knowledge

of the content and skills, (c) student use of the content and skills, (d) social validity of the program, and (e) social validity of the model.

Lancaster, P. E. (2002). Multimedia Strategic Tutoring Training. (Funded by The Eunice Kennedy Shriver National Institute of Child Health and Human Development, \$850,000).

Award Number: R44HD045146. The project included the development, pilot-testing, refinement, and field-testing of computer programs to be used to provide professional development in Strategic Tutoring to tutoring center directors, teachers, paraprofessionals, and volunteer tutors were developed. The efficacy of using a computerized format for providing professional development in Beginner and Advanced-Level Strategic Tutoring was evaluated relative to: (a) participant use of the components of Strategic Tutoring, (b) participant knowledge of the components of Strategic Tutoring, (c) student knowledge of a tutored strategy, (c) student use of a tutored strategy, and (d) social validity of the medium. The efficacy of using a computerized format for providing professional development in The Strategic Tutoring Center was evaluated relative to: (a) participant knowledge of the process and principles associated with developing and running a tutoring center, (b) participant use of the knowledge and skills associated with developing and running a tutoring center, and (c) student use knowledge of a tutored strategy.

Lancaster, P.E. (1999). The Development and Validation of an Interactive Hypermedia CD-ROM for Teaching Learning Strategies to Individuals with Disabilities. (Funded by The Eunice Kennedy Shriver National Institute of Child Health and Human Development, \$850,000).

Award Number: R44HD38155. The aims of this project included the development, pilot-testing, refinement, and field-testing of interactive-hypermedia (IH) computer programs to be used to teach task-related learning strategies to adolescents with high-incidence disabilities. Specifically, *The Test-Taking Strategy CD Program*, *The FIRST-Letter Mnemonic Strategy CD Program*, and *The Listening & Note-Taking Strategy CD Program* were developed. The efficacy of using an IH format for teaching each of the three learning strategies was evaluated relative to: (a) student use of the IH program, (b) student knowledge of the strategy, (c) student use of the strategy, and (d) social validity of the medium.
