

Continuing Education

Central Michigan University will periodically provide educational opportunities for animal users to learn basic animal handling techniques and advanced techniques (e.g., aseptic surgical technique, catheterization) and continuing education opportunities such as periodic seminars.

When these classes and seminars are provided, it is the responsibility of the animal user to record their attendance as part of their overall training record(s).

For more information about this process, contact the IACUC Coordinator, [Tracee Wilson](#) or the [IACUC Office](#).
