

Facility Orientation and Hands-On Training

Facility Orientation Training must be completed prior to being granted unsupervised access to an animal facility.

Pre-requisites for Facility Orientation and all other hands on training courses include:

- Completion of Animal Handler Occupational Health Program requirements.
- Completion of required CITI training.
- Completion of Lab Safety (OLFS) training courses indicated on the Safety Training form completed by your supervisor.
- Training video pre-requisites can be accessed via [SAP SuccessFactors](#) or by contacting the Office of Research Compliance

To sign up for any training, please contact Tracee Wilson in the Office of Research Compliance at wilso3t@cmich.edu or 989-774-7313.

All prerequisites for each session (see individual course descriptions for details) MUST BE COMPLETED prior to attending any session. You will not be able to attend a session if these prerequisites are not complete (Ex: watching required video) and will have to reschedule.

Hands-on training in animal handling techniques is provided by the PI, Animal Facility Managers, Veterinary Staff and/or Professional Animal Care Staff.

These training sessions provide an introduction to facilities, as well as an overview of the laboratory rodent and other laboratory animals, in both a lecture and hands on format.

Basic handling, restraint, and other techniques will be demonstrated. Class participants have the opportunity to practice their newly-acquired skills under the supervision of experienced trainers.
