

## Required OLFS Training Information

Reminder: An OLFS Safety Training Form needs to be filled out and submitted to OLFS before training modules will be assigned to an individual. To access this form select the [link](#).

Typically required OLFS trainings are listed below (at minimum).

<b>Biosafety Awareness Training</b>	Required for individuals who work in a BSL2 environment, but who do not work with BSL2 agents.	Renew Every 5 years
<b>Bloodborne Pathogens Training</b>	Required for individuals with exposure to sharps, blood, and other potentially infectious material. Meets the training requirements of MIOSHA Part 554.	Renew Annually
<b>Lab Safety Training</b>	Required for individuals who work with hazardous chemicals in a laboratory setting. Meets the training requirements of MIOSHA Part 431.	Refresher Course Due Annually

Other training may be assigned by a PI (if needed).

Training must be refreshed in accordance with guidelines established by OLFS. You will receive a reminder email from the SAP SuccessFactors system close to the time that your training module(s) will expire.

If you need help determining the appropriate training for your protocol, contact the IACUC Coordinator at [IACUC\\_admin@cmich.edu](mailto:IACUC_admin@cmich.edu).
