DEAN'S MESSAGE

+ Welcome to the CMU College of Medicine

It inspires me to welcome each new medical student to the CMU College of Medicine. When you chose CMU, you joined a group of unique and passionate individuals who care deeply about changing the face of health care and improving the lives of patients here in Michigan and beyond. In 1892, CMU was created to link the community's progress to education. That legacy continues with you. After 125 years, CMU continues to lead in finding solutions to community needs. Our faculty and staff work side by side to assure student success and prepare them for meaningful careers.

The CMU College of Medicine welcomes you to serve others and, with a shared dedication to our mission, touch the lives of patients in the most impactful way — by giving them the gift of your knowledge, your compassion and your ability to care for them from birth to old age.

In a series we published about our inaugural class of students in 2017, we asked each of them the question: Why did you choose the CMU College of Medicine? Almost every student answered that they chose us because 1) they believed in the mission, and 2) they wanted to be part of creating the foundation of this innovative and new medical school.

When that first class of entrepreneurial-minded students graduated and became physicians in the summer of 2017, we asked each one of them to jot down some "words of wisdom" to share with incoming students.

Their answers showed that first class knew firsthand the challenges you, too, will be facing, but that you will get to your destination, just as they did — through hard work, taking it one day at a time, befriending and relying on your classmates, and opening your minds to learning all you can. One word we hear over and over when we ask our current students to describe the support and friendships they develop at the CMU College of Medicine is "family." I know your CMU family will be an integral part of this new journey you are about to begin.

We hope you are inspired by their words and their advice. That first class represents our founding alumni, and they have helped pave the way for all future medical students here at the College of Medicine with their vision and courage. The fact that you have chosen the CMU College of Medicine means you have this same drive, and you have already shown a commitment to helping others and a passion for the mission of the CMU College of Medicine. We are glad you are here.

You follow in great footsteps, and I know you will make all of us proud as you forge your own path. Congratulations on your achievements, and welcome to the CMU College of Medicine!

George E. Kikano, M.D.
Dean, CMU College of Medicine

OUR MISSION

The Central Michigan University (CMU) College of Medicine educates diverse students and trains culturally competent physicians to provide comprehensive health care and services to underserved populations in Michigan and beyond. Our faculty, staff and graduates advance health and wellness through exceptional education, innovative research, quality patient care and strategic collaborations to improve the health and wellbeing of individuals and communities.

OUR VISION

We will realize our bold vision by producing future generations of well-trained physicians, developing new solutions from innovative research, improving access to high-quality health care and forging strategic partnerships to build thriving communities and better lives for all people in Michigan.

OUR VALUES

Integrity | Respect | Empathy | Excellence | Inclusiveness | Social Responsibility | Innovation

ADMISSIONS TEAM

Chris Austin
Director of Admissions

Ray Wilson
Assistant Director of Admissions & Financial Aid

Jody MacGregor
Executive Administrative Assistant

Admission Timeline

October
Submit Free Application for Federal Student AID (FAFSA) at FAFSA.gov

January
Criminal Background checks begin for U.S. Citizens for all admitted students.

April
Early April- Financial aid award notices will be sent to students.

Second Look Experience

April 30th - Students may hold only one medical school acceptance (AAMC guideline)

July
Deadline for Student Loan Activation.

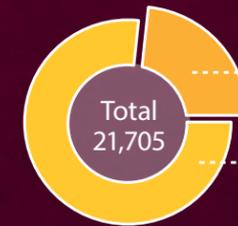

Transcripts due to Admissions Office.

August
Classes begin.

Fall 2018

ENROLLMENT

By location

*About 24% of main campus students also take online classes, resulting in some duplicate counts

HELLO, CENTRAL MICHIGAN

+ Welcome to Mount Pleasant

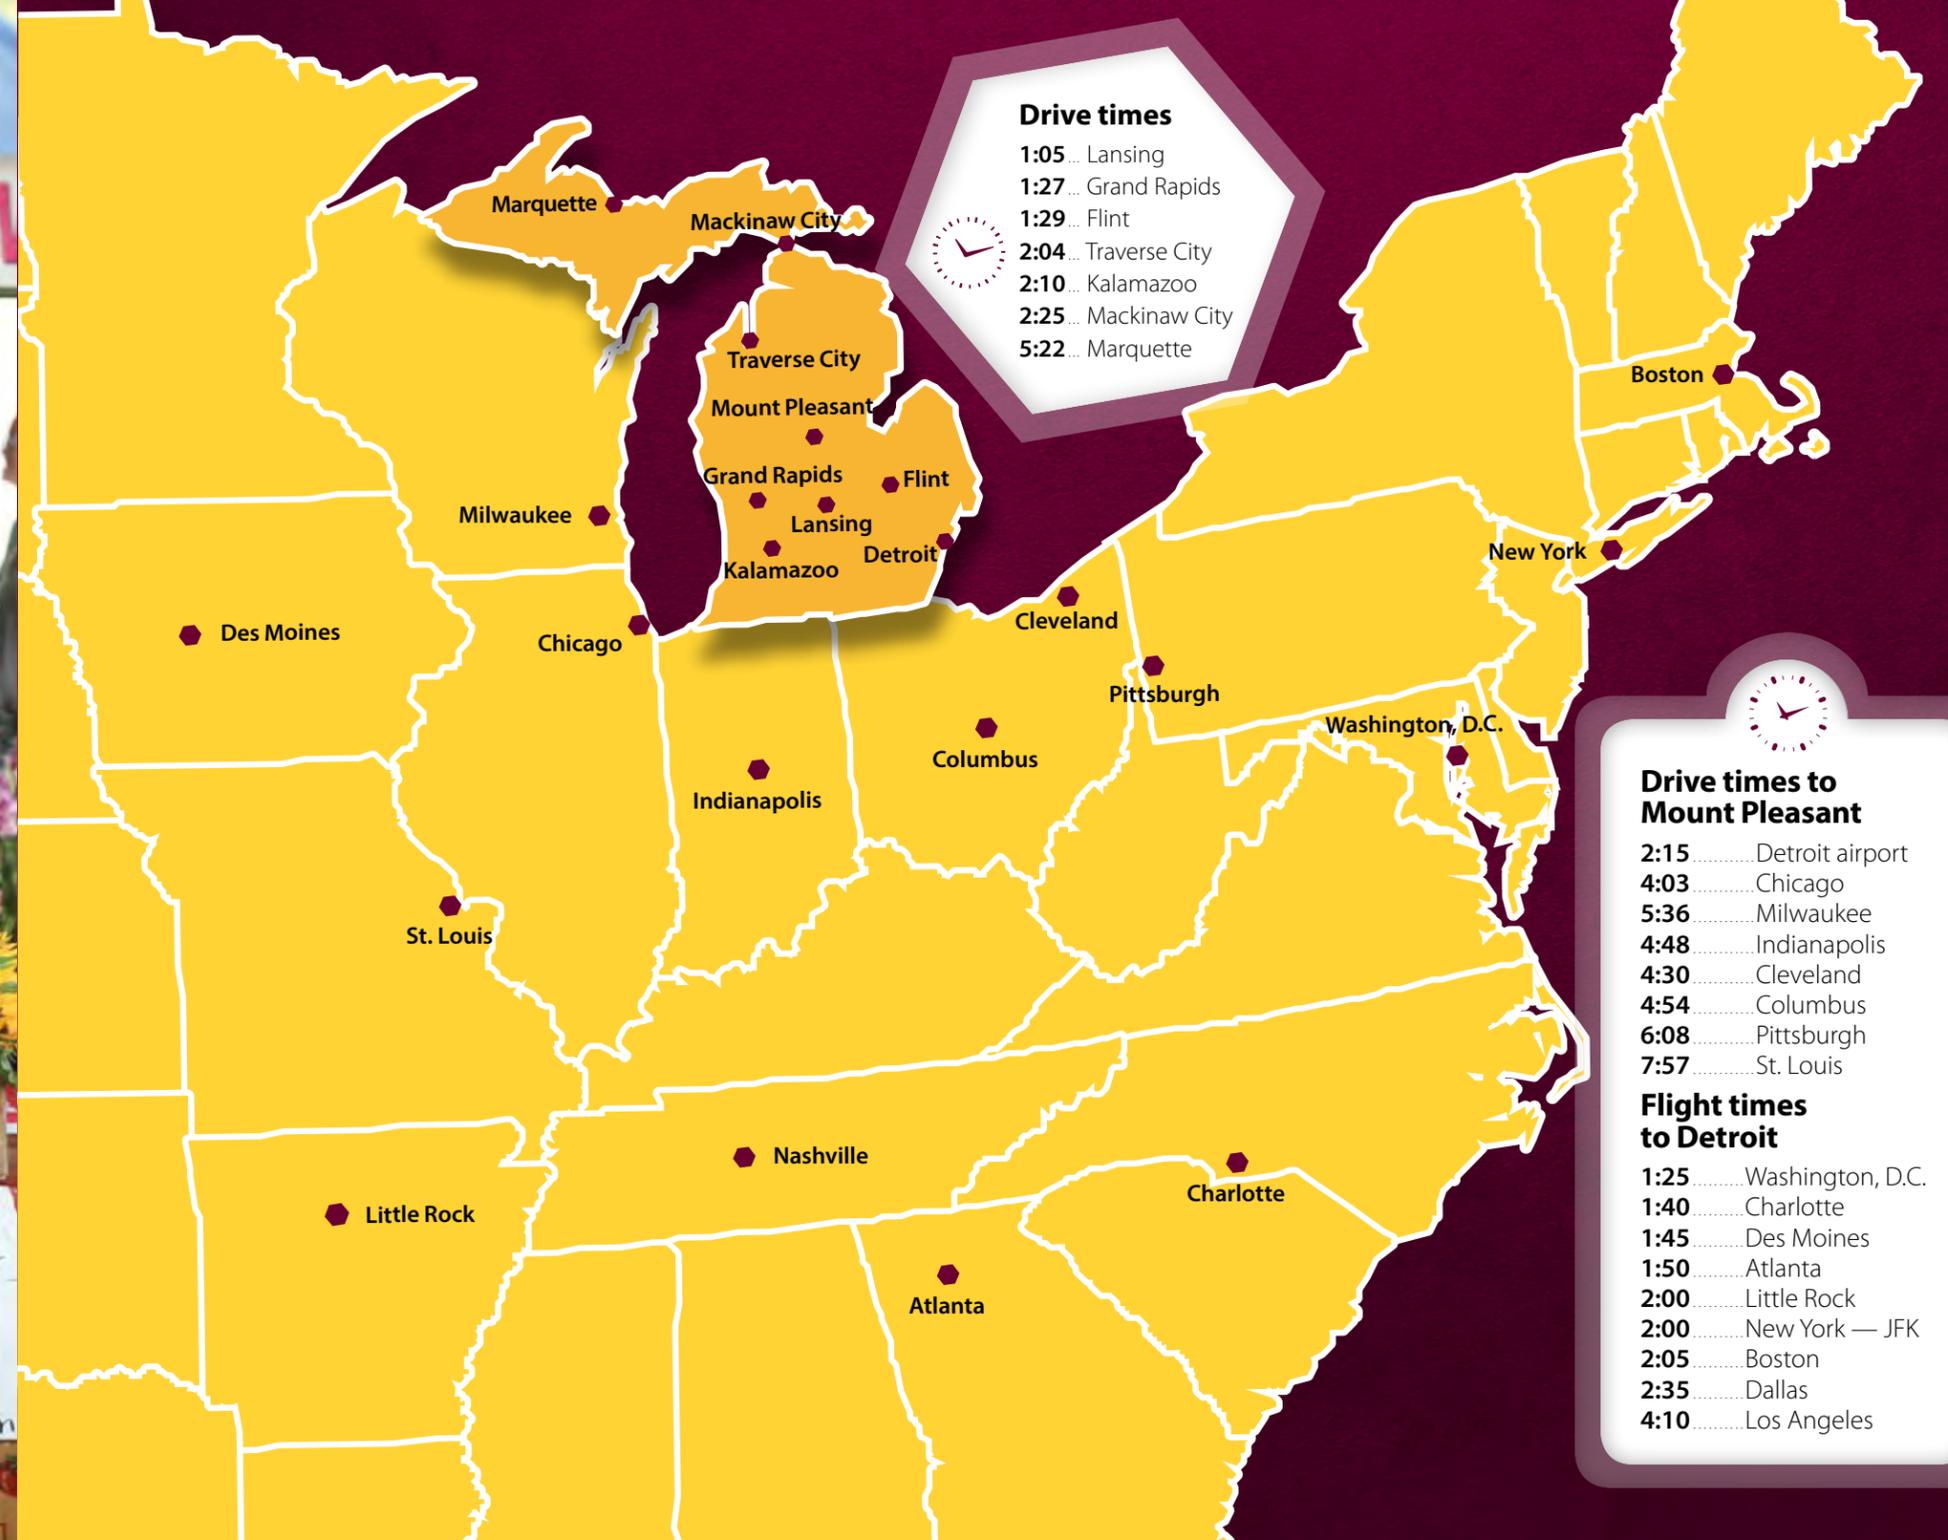

Enjoy a close-knit collegiate feel in a town that offers activities and attractions you'd find in a larger city.

- 130 businesses such as big-box stores, shops, galleries, restaurants and cafes
- 80 miles of the Chippewa River to fish, canoe, kayak and tube
- 1,000 acres of parks and trails for hiking and biking
- 500+ local events each year
- Soaring Eagle Resort with fine dining, top-rated concerts and a water park
- Five golf courses

- 4:10 Los Angeles

GRADUATION

DIVERSITY

✦ Our commitment to diversity begins with our mission: to prepare diverse, culturally competent physicians focused on improving access to high-quality health care in Michigan and beyond. In support of this mission, we strive to foster diversity and inclusion amongst our faculty, staff and students.

The College of Medicine uses a holistic approach to teach students how to assess patients' unique needs, as well as diverse techniques to provide the most effective treatment. Furthermore, students learn how to conduct diagnoses that extend beyond physical ailments. Using case-based learning, the College of Medicine curriculum emphasizes the importance of incorporating environmental and institutional barriers to healthcare into their diagnoses.

Students at the CMU College of Medicine can expect to participate in the variety of diversity and inclusion-related programming, with frequent C.A.R.E.S. week activities focusing on these areas. Our signature spring event is the week-long Diversity Health Spotlight Symposium in which students, faculty, and staff work hand in hand to develop timely and engaging diversity programming. Student Interest Groups (SIGs) such as Student National Medical Association, Latino Medical Student Association, LGBTQ Equality in Medicine, and Muslim Medical Students' Association play an important role in cultivating an inclusive community at the College of Medicine.

Students also have access to a variety of diversity resources on campus, including: the Office for Institutional Diversity and Inclusion, Office of Diversity Education, Multicultural Academic Student Services, Office of LGBTQ Services, Native American Programs Office, Office of Civil Rights and Institutional Equity, and Office of International Affairs.

STUDENT PROFILES

Manjit Bhandal is currently living our mission. Manjit shared her experience in the Comprehensive Community Clerkship (CCC) in a beautiful letter written to the leadership at the CMU College Of Medicine. Through the CCC, our students are exposed to community-based clinical practices, emergency medicine, in-patient care, women's health and more while caring for patients in under served rural and urban communities.

"This is one of the best experiences I've had throughout my time in medical school, and honestly, probably the most worthwhile experience of my academic career," Manjit wrote, adding, "I also want to say how incredibly valuable the CCC experience has been for me. I fell in love with the patients here and the small-town community atmosphere. I think having a half-year of CCC is one of the best academic implementations the College of Medicine has had in terms of achieving our school's mission."

Thank you to Manjit for sharing her experience working with Dr. Paul Simmons through CMU Health in Mount Pleasant, one of the many dedicated physicians throughout the state committed to training the physicians of the future."

Meet Ali Hachem of Dearborn, Michigan, pictured here (right) with his classmate Housam Tahboub (left). Ali said that from the day he first interviewed to attend the Central Michigan University College of Medicine, he could sense the passion and care that the faculty and staff had for its future students. "In addition to that," he said, "the College's mission to facilitate access to high-quality health care and to address the shortage of physicians in Michigan spoke to me." Ali added that he considers himself lucky to be part of such a wonderful class and could not have asked for better peers to help lay the foundation for the classes that will follow. After residency, Ali looks forward to completing a cardiology fellowship and remaining in Michigan as a physician, leader and educator.

Meet Stephanie Rhynard from Alma, Michigan. Stephanie said she chose to come to CMU's College of Medicine because the mission of the school truly spoke to her. "I was raised in a small Michigan town and want to return there upon completion of residency; I also appreciate that the College aims to grow its students as well-rounded people, not just physicians." The past four years for Stephanie have been an absolute whirlwind! "I have moved five times, gotten married and gotten a puppy, all while somehow managing to go to class, pass the boards and get offered residency interviews."

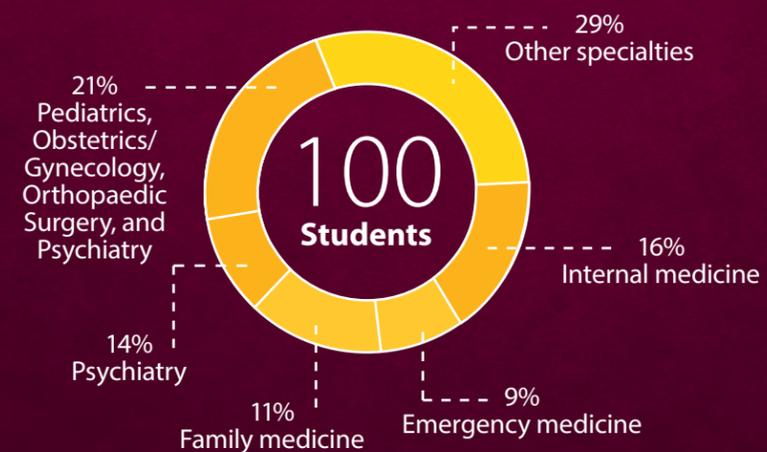

Meet Andrew Krause of Jackson Hole, Wyoming. Andrew was "very impressed with the curriculum and environment at CMU," and said that everyone he met during the interview process was very friendly. He said he likes living in mid-Michigan because it allows easier access to many of the outdoor activities Michigan has to offer. When asked why he wants to be a doctor, Andrew said, "To help athletes and all patients recover from injuries and return to their previous level of function. After residency, I am looking forward to helping to teach future generations of medical students and residents by being associated with a residency program."

Meet Matthew Wolf, whose hometown is Frankenmuth, Michigan. Matthew chose to attend Central Michigan University's College of Medicine because "first and foremost, the mission really fit with what I wanted out of my medical education ... as a native of Saginaw County, I wasn't going to pass on the privilege to be a part of that." He said the past four years have gone by incredibly fast, "with all of the ups and downs medical school has to offer, but it has been such an honor to be a part of the family here at the CMU College of Medicine." Matthew looks forward to practicing medicine in his own community, or another Michigan town, and is looking forward to being a leader, educator and mentor in whichever community he serves.

FINANCIAL AID

+ Complete the FASFA

Completing the free application for Federal Student Aid (FASFA) is the first step in applying for financial aid at Central Michigan University College of Medicine. You will need to complete the FASFA form. Remember to list CMU's Federal school code of 002243 to ensure your FASFA results are sent to us. The FAFSA opens on Oct. 1.

+ Investigate

Be proactive—explore additional resources for scholarships and or grants. If you need loans to cover additional expenses, consider pursuing federal student loans. They typically have some of the best terms and conditions. The only source of federal student loans is the Department of Education's Direct Loan program.

+ Apply Early

Paying attention to deadline is crucial. Obtain, read, complete and turn in the FAFSA application by March 1 so that you can receive your financial aid package in a timely manner. Occasionally unexpected situations might arise that could delay your application. If you wait until the last minute to apply, you may not qualify for financial aid offer simply because of a missed deadline.

+ Your Award Notice

Once your FASFA results are received and processed in early April, you will receive an award notice indicating the types of financial aid and amounts for which you are eligible. Follow the directions for accepting or declining the aid. If you are accepting the aid and it included student loans, pay particular attention to the information about how to activate your loan.

Estimated Tuition and Fees for Students in 2020-21 Academic Year

	In State	Out of State
Tuition and Fees	\$44,127	\$64,227
Room, Board, Transportation and Personal	\$18,299	\$18,299
Health Insurance (if needed)	\$2,630	\$2,630
Loan Fees	\$1,215*	\$1,215*
Total	\$66,271	\$86,371

*Fee charged by the direct loan program at disbursement.

ACADEMIC SUCCESS

Amanda Swafford, MBA
Academic Success

Academic Success is led by Amanda Swafford, MBA, in collaboration with faculty and staff from the Office of Student Affairs and the Office of Medical Education. The goal of Academic Success is to enhance medical students' and residents' academic and clinical learning experiences by offering a variety of learner-centered programs, services, and resources. Academic Success programs include workshops and webinars, panel discussions, guest speakers, peer tutoring, confidential consultations, and online instructional resources focused on timely and relevant topics. Example topics include, but are not limited to,

- Transitioning to Medical School
- Understanding learning style preferences and implications for learning
- USMLE Step 1, 2 and 3 strategies and resources

+ Peer Tutoring Program

The College of Medicine at Central Michigan University offers a Peer Tutoring Program for students enrolled in our medical school program. Through this program, you have the opportunity to work individually with trained students who have a sincere interest in helping their colleagues and who have excelled in their coursework.

This program serves to supplement existing academic success and support services provided by Faculty, Course Directors, and Academic Success. In addition, this program provides the opportunity for tutors (who are also medical students) to reinforce their medical and clinical knowledge, enhance critical thinking, and improve leadership skills while simultaneously helping their peers to achieve similar goals

OFFICE OF STUDENT AFFAIRS

Our goal is to help guide our students on their journey through Medical School. We provide them with support and the tools they need to become wonderful doctors. We work towards providing all of our students a safe and healthy learning environment, whether it's assisting them with compliance for vaccinations or just being the friendly face they need to brighten their day. We are here for our students.

CURRICULUM YEARS 1 & 2

+ Foundational Sciences

The following 18 academic weeks encompass the Foundational Sciences course, divided into two 8-week blocks with a C.A.R.E.S. week between them and at the end. In addition, two longitudinal courses: Medicine and Society and Essentials of Clinical Skills begin at this time and continue throughout the first two years.

In keeping with the integrated model of medical education, the Foundations of Medicine course includes content in Anatomy, Embryology, Physiology, Biochemistry, Cell Biology, Microbiology, Nutrition, Genetics, Immunology, Pathology, Pharmacology, and Neurology, presented in an integrated fashion around common problem presentations. As a foundational course focused on normal human functions, it is designed to provide a common baseline of information for students prior to beginning the organ systems courses.

Each of the three longitudinal courses have a focus for further horizontal and vertical integration in student learning of content, skills, and behaviors. They are:

Medicine and Society:

Explores topics and skills in research methods, public health, and health humanities to address the ethical, legal, and cultural aspects of medicine in society. CR/NC only. Prerequisite: Admission to the College of Medicine.

Essentials of Clinical Skills:

An integrated clinical, diagnostic, and therapeutic skill development course. Emphasis is placed on history-taking, physical examination, and diagnostic skills presented by body systems.

Within the Essentials of Clinical Skills course there is a longitudinal half-day clinical placement in a primary care physicians practice in the Mount Pleasant area. This placement is called the Initial Clinical Experience (ICE) and serves as the Clinical laboratory in which students apply the content behavior and skills learned in the other Foundational Course and Organ Systems Courses. Students in ICE learn to become keen observers of the clinical environment and the healthcare team from the patients' perspective as well as that of the health care team. As interviewing and physical examination skills increase, students will begin to interact with patients, always aware of the multi-faceted patient care environment.

Interspersed between courses are a series of week-long experiences known as C.A.R.E.S. as an acronym for:

Continuous Improvement/Curriculum;
Assessment; **R**einforcement/Remediation;
Evaluation and **S**kills

As envisioned, these weeks provide an opportunity for student input and evaluation of their curricular experiences, opportunity for unique assessment of student progress, reinforcement of learning concepts and skills, remediation if

necessary and serves as a means of continuous quality improvement.

Organ systems courses begin following the winter break and Transition week in Year 1. In order, the first-year organ systems courses are Reproductive/ Human Development – 6 weeks; Cardio/Pulmonary – 7 weeks; and Renal/Endocrine – 6 weeks. Each course focuses on wellness and disease and is followed by a C.A.R.E.S. week. While all of the medical sciences are integrated in each module, the focus is upon anatomy, physiology, and pathology. A six-week summer recess follows Year 1 and leads to Year 2.

The second year continues the integrated organ systems courses, including:

Neurosciences/Behavior – 8 weeks; Gastro-Intestinal – 6 weeks; and Musculoskeletal/Dermal – 4 weeks; Hematologic Systems (taught with Oncology) – 4 weeks.

The organ systems courses are followed by SYNAPSE, a four-week block of experiences focused on transition to clinical work, studying for the national board examinations, and review of the major content and concepts in the first two years.

CURRICULUM YEARS 3 & 4

+ Clinical Education

Years three and four represent the logical extension of clinical and basic science courses of the first two years into the clinical environment. The curriculum includes a 24-week longitudinal integrated clerkship, which the College of Medicine calls the Comprehensive Clinical Clerkship (CCC), a series of 7 required clerkships and 28 weeks of elective rotations.

+ The CMU College of Medicine Model

The Comprehensive Community Clerkship (CCC) is a unique longitudinal integrated clerkship that occurs in the third year of the medical school curriculum. The goal of the CCC is to immerse students in a primary care experience to learn the values of

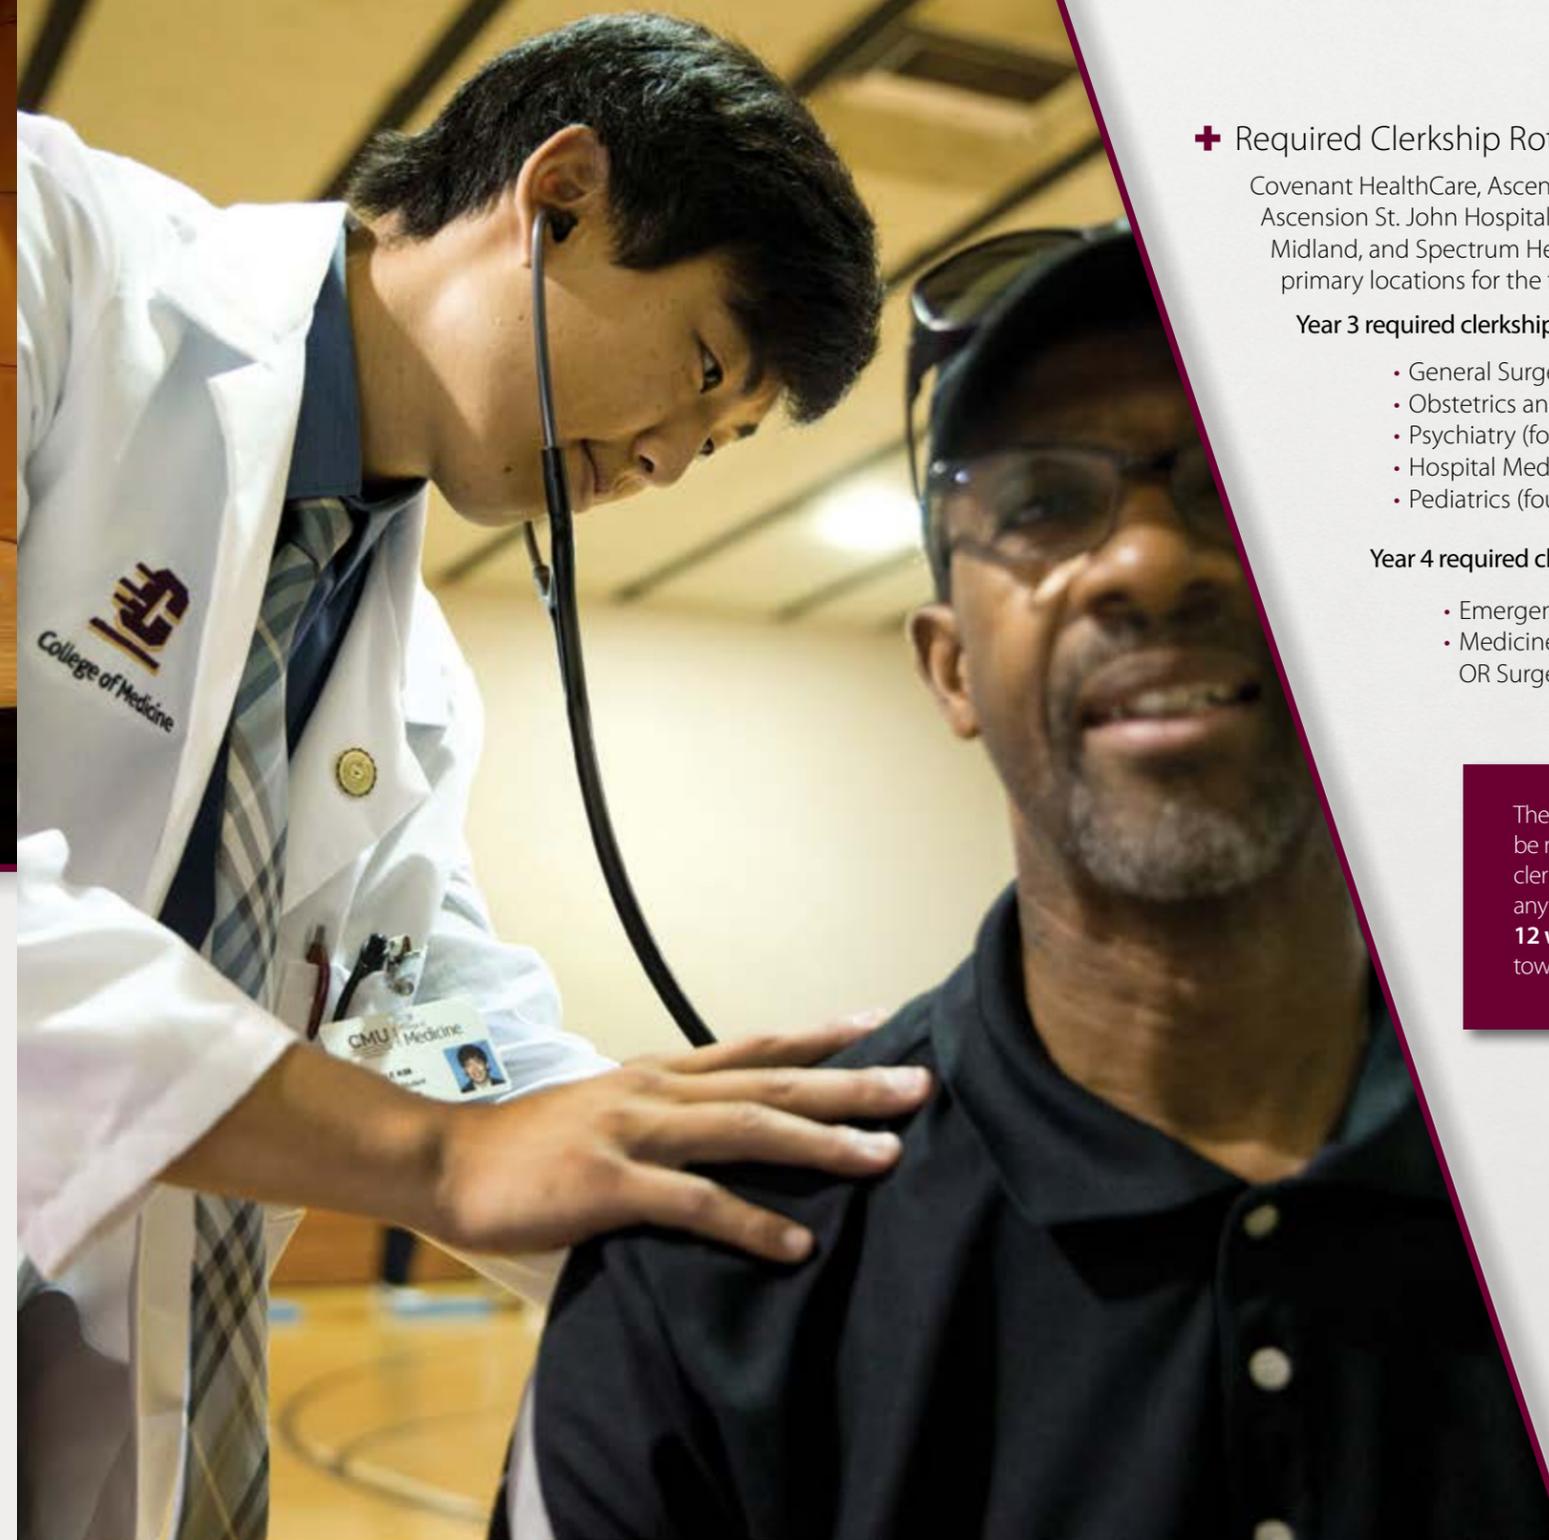

comprehensive patient-centered medical care in the context of a community.

The medical students are placed in primary care practices for a 6 month (22 week) clinical immersion experience in a rural or urban community, working 2 ½ days per week with primary care provider (a family or internal medicine physician) where they will share in the provision of care of both acute and chronic conditions over the course of the clerkship. Students also have longitudinal exposure to community health resources and other medical and surgical specialty experiences, including pediatrics, obstetrics, and emergency medicine.

Students follow patients that they have seen in the primary physician's practice as they are referred to other specialists for further care. Students learn

the course of a patient's illness and appreciate the context in which the patient lives with his or her illness. Students learn about population health, doing a quality improvement project in the primary physician's practice.

Videoconference technology connects the students weekly for small group sessions. Students live in and experience the communities to which they are assigned across Michigan and Northern Ohio. These partnerships with hospitals and clinics are vital to CMU College of Medicine's mission to educate physicians to provide medical care for rural and underserved populations.

+ Required Clerkship Rotations & Electives

Covenant HealthCare, Ascension St. Mary's Hospital in Saginaw, Ascension St. John Hospital in Detroit, MidMichigan Health in Midland, and Spectrum Health Lakeland in St. Joseph are the primary locations for the following hospital-based clerkships:

Year 3 required clerkships include:

- General Surgery (four weeks)
- Obstetrics and Gynecology (four weeks)
- Psychiatry (four weeks)
- Hospital Medicine (four weeks)
- Pediatrics (four weeks)

Year 4 required clerkships include:

- Emergency Medicine (four weeks)
- Medicine Sub-Internship (four weeks)
- OR Surgery Sub-Internship (four weeks)

The College of Medicine Students will also be required to at least 28 weeks of elective clerkships. These can be completed at any of our clinical sites. In addition, **up to 12 weeks of "away" electives** can count toward graduation requirements.

CLINICAL TRAINING AND HEALTHCARE PARTNERS

+ Covenant Health Care - Saginaw

Covenant HealthCare is the largest, most comprehensive health care provider in the Great Lakes Bay Region, serving 20 counties across northeast and central Michigan. With 4800 employees and a medical staff of more than 500 physicians, the Saginaw-based health system offers a broad spectrum of programs and services including high-risk obstetrics, neonatal and pediatric intensive care, acute care including a Level II Adult and Pediatric Trauma Center, cardiology, oncology, orthopedics, robotic surgery and more. Covenant also serves as a critical access hospital for more than five community hospitals across the region.

+ MidMichigan Health

MidMichigan Health is a nonprofit health system, headquartered in Midland, Michigan, affiliated with Michigan Medicine, the health care division of the University of Michigan. They cover a 22-county region with medical centers in Midland, Alpena, Alma, Clare, Gladwin and Mount Pleasant. In addition to its Medical Centers, MidMichigan Health also offers both home health care and physician services and has a strong commitment to medical education (medical students and two residency programs). MidMichigan Physicians Group provides patients with access to compassionate, quality medical care and manages urgent care facilities and medical offices in more than 30 specialties and subspecialties including cardiology, hematology/oncology, orthopedics, vascular surgery, family medicine and more. To learn more about MidMichigan Health visit www.midmichigan.org.

+ Ascension St. Mary's Hospital - Saginaw

Ascension St. Mary's Hospital is part of Ascension, who has been serving Michigan for over 140 years. Ascension is a faith-based healthcare organization dedicated to transformation through innovation across the continuum of care. As one of the leading non-profit and Catholic health systems in the U.S., Ascension is committed to delivering compassionate, personalized care to all, with special attention to persons living in poverty and those most vulnerable. In Michigan, Ascension operates 15 hospitals and hundreds of related healthcare facilities that together employ over 20,000 associates. Across the state, Ascension provided over \$272 million in community benefit and care of persons living in poverty in fiscal year 2018.

+ St. John Hospital & Medical Center

St. John Hospital and Medical Center is a teaching hospital in Detroit known for excellence in cardiology, oncology, neurosciences, minimally invasive and robotic surgery, women's services, pediatrics, and medical education. St. John Hospital has one of the busiest Emergency Centers in the nation. As a Level II Trauma Center, St. John Hospital has both Chest Pain Center and Heart Failure Center accreditations.

+ Spectrum Health Lakeland

Spectrum Health Lakeland is a health system nationally recognized for delivering exemplary patient experiences and clinical outcomes. Our team of over 4,000 diverse and highly trained professionals works together to provide excellent medical services at locations throughout southwest Michigan. More than 450 primary and specialty care physicians and other licensed providers from all over the world practice medicine at Lakeland Health—Berrien County's largest employer. With a rich history that dates back to the 1800s, Lakeland is a not-for-profit, community-owned health system that today includes three hospitals, an outpatient surgery center, a regional cancer center, rehabilitation centers, two long-term care residences, home care and hospice services, and 41 affiliate physician practice locations.
