

Professional Education Podcast Series

Responding to ACEs: Resources for Resilience

From CMU - Podcast Professional Education

- Information, strategies and resources for health professionals
- Updates and urgently needed tools for addressing health priorities

Introducing - a six part series with free CME credit opportunity

- Learn about the science underlying adverse childhood experiences, trauma, and resilience
- Gain insights from experts who are putting science into practice
- Access useful resources

What Are ACEs?

Adverse Childhood Experiences (ACEs) are “all types of abuse, neglect, and other potentially traumatic experiences that occur to people under the age of 18.” (Center for Disease Control).

ACE's are strongly associated with health risk behaviors and poor health outcomes.

Responding to ACEs: Resources for Resilience

CMU's podcast series responds to a critical need for mitigating the prevalence and impacts of ACEs and provides information, strategies, and resources for medical professionals.

Episodes discuss the expanding evidence across fields of neuroscience, genetics and epidemiology and spotlight the dramatic links between adverse childhood experiences, stunted physiological development, risky behavior, psychological issues, serious illnesses and the leading causes of death. Information on how trauma impacts the developing brain, how children can be impacted and protected, factors influencing the variable response to adversity and the challenges of preventing and recognizing the effect of trauma on children are explored.

Topic 1 Defining Adverse Childhood Experiences (ACEs) and their detrimental effect on the health of children and adults

Topic 2 The physiological effects of trauma and toxic stress on the brain

Topic 3 Assessing for ACEs

Topic 4 Parent-child interaction therapy: an evidence - based intervention to reduce the impact of adverse experiences in early childhood

Topic 5 Trauma-focused cognitive behavioral therapy: an evidence-based intervention

Topic 6 Adults dealing with ACEs

Target Audience

Physicians, nurses, physician assistants, social workers, all members of the interprofessional healthcare team and K-12 educators.

Disclosure

None of the planner(s) and speaker(s) have relevant financial relationships to disclose with ineligible companies whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products use by or on patients.

Did you know? ACEs are: Prevalent across society

- 2/3 of Michigan adults reported having one or more ACEs in 2016

Predictors for Risks of Poor Health Across Population such as:

- Chronic Obstructive Pulmonary Disease
- Asthma
- Poor mental health
- Poor physical health
- Heart disease and other illnesses

Preventable!

- Clinical approaches and social supports can help buffer negative effects of ACEs
- Learn more on **ACEs in Michigan**

Collaborating Partners

Responding to ACEs: Resources for Resilience is a collaborative production of Central Michigan University's College of the Arts and Media, the College of Medicine, and the Interdisciplinary Center for Community Health & Wellness.

Accreditation

Central Michigan University College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The CMU College of Medicine designates this enduring material for a maximum of 0.25 *AMA PRA Category 1 Credit™* for each podcast. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

A total of 1.5 *AMA PRA Category 1 Credits™* can be earned by listening to all six sessions.

The Central Michigan University Social Work Program, an accredited social work education program, is authorized by the Michigan Licensure Law Administrative Rule 338.2965 to award Michigan social work continuing education contact hours. For this program, 0.25 CE's will be awarded for each podcast and 1.50 for the series.
