

Story Time with DB Central!

Together with CMU's CHARGE Syndrome Research lab, DB Central is proud to bring you fully accessible virtual storybook readings!

All stories are:

- Read aloud and include closed captioning
- ASL interpreted
- Labeled with the appropriate reading level
- Broken down into a vocabulary-based lesson

You also receive free access to the experience boxes, which include the book in Braille and objects that help your child understand the story!

Learn more by visiting dbcentral.org (under the Literacy tab)
