

SLEEP: THE UNDERRATED SUPERPOWER

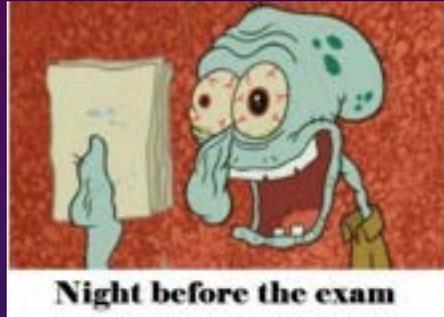

TAMMY GRIFFIN, M.A.

MANAGER/EMPLOYEE HEALTH & WELLNESS

CENTRAL HEALTH IMPROVEMENT PROGRAM - CMU

- 
- I do not need sleep
 - I am fine with 4-5 hours of sleep
 - Yes I sleep....I get 10 hours or more each night
 - I catch up on sleep on weekends
 - I am a great sleeper....I can sleep anytime, anywhere

Pulling an “all-nighter”

or

**4 days of less than 6
hours of sleep**

Intoxicated/Inebriated

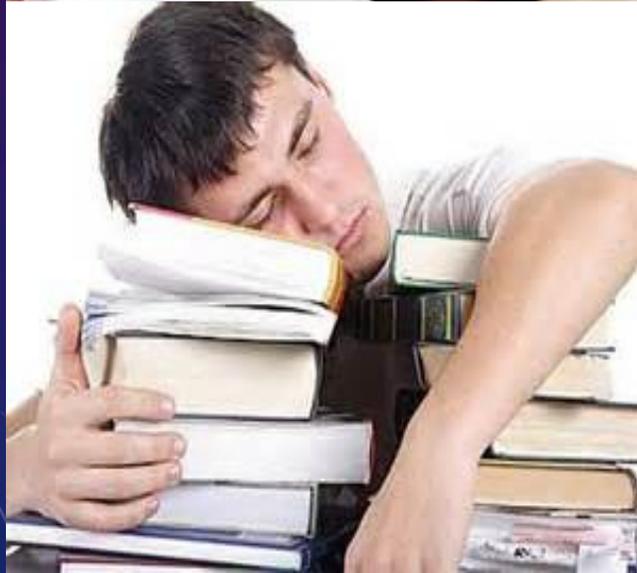

**16 hrs awake = 0.05
22 hrs awake = 0.08
26 hrs awake = 0.1**

Impaired Function

SLEEP DEPRIVATION IS THE NEW SMOKING

SLEEP

SLEEP WELLNESS

- Why we need sleep?
- What is sleep?
- How to get better sleep?

SLEEP WELLNESS

WHY SLEEP?

- Science suggests that we sleep to:
 - Adapt
 - Inactivity Theory
 - Conserve
 - Energy Conservation Theory
 - Restore
 - Restorative Theory
 - Develop
 - Brain Plasticity Theory

SLEEP WELLNESS

WHY IS SLEEP IMPORTANT?

Getting an adequate amount of quality sleep:

- Improves Brain Function
 - Improves your ability to learn.
 - Improves your memory.
 - Improves your decision making ability.
 - Improves problem solving skills.
 - Improves grades.
- Improves Emotional Wellbeing
- Improves Physical Health
- Improves Job Performance and Safety.

Go for at least 8!

Students who get 6 or fewer hours of sleep per night feel more tired, sad, and stressed

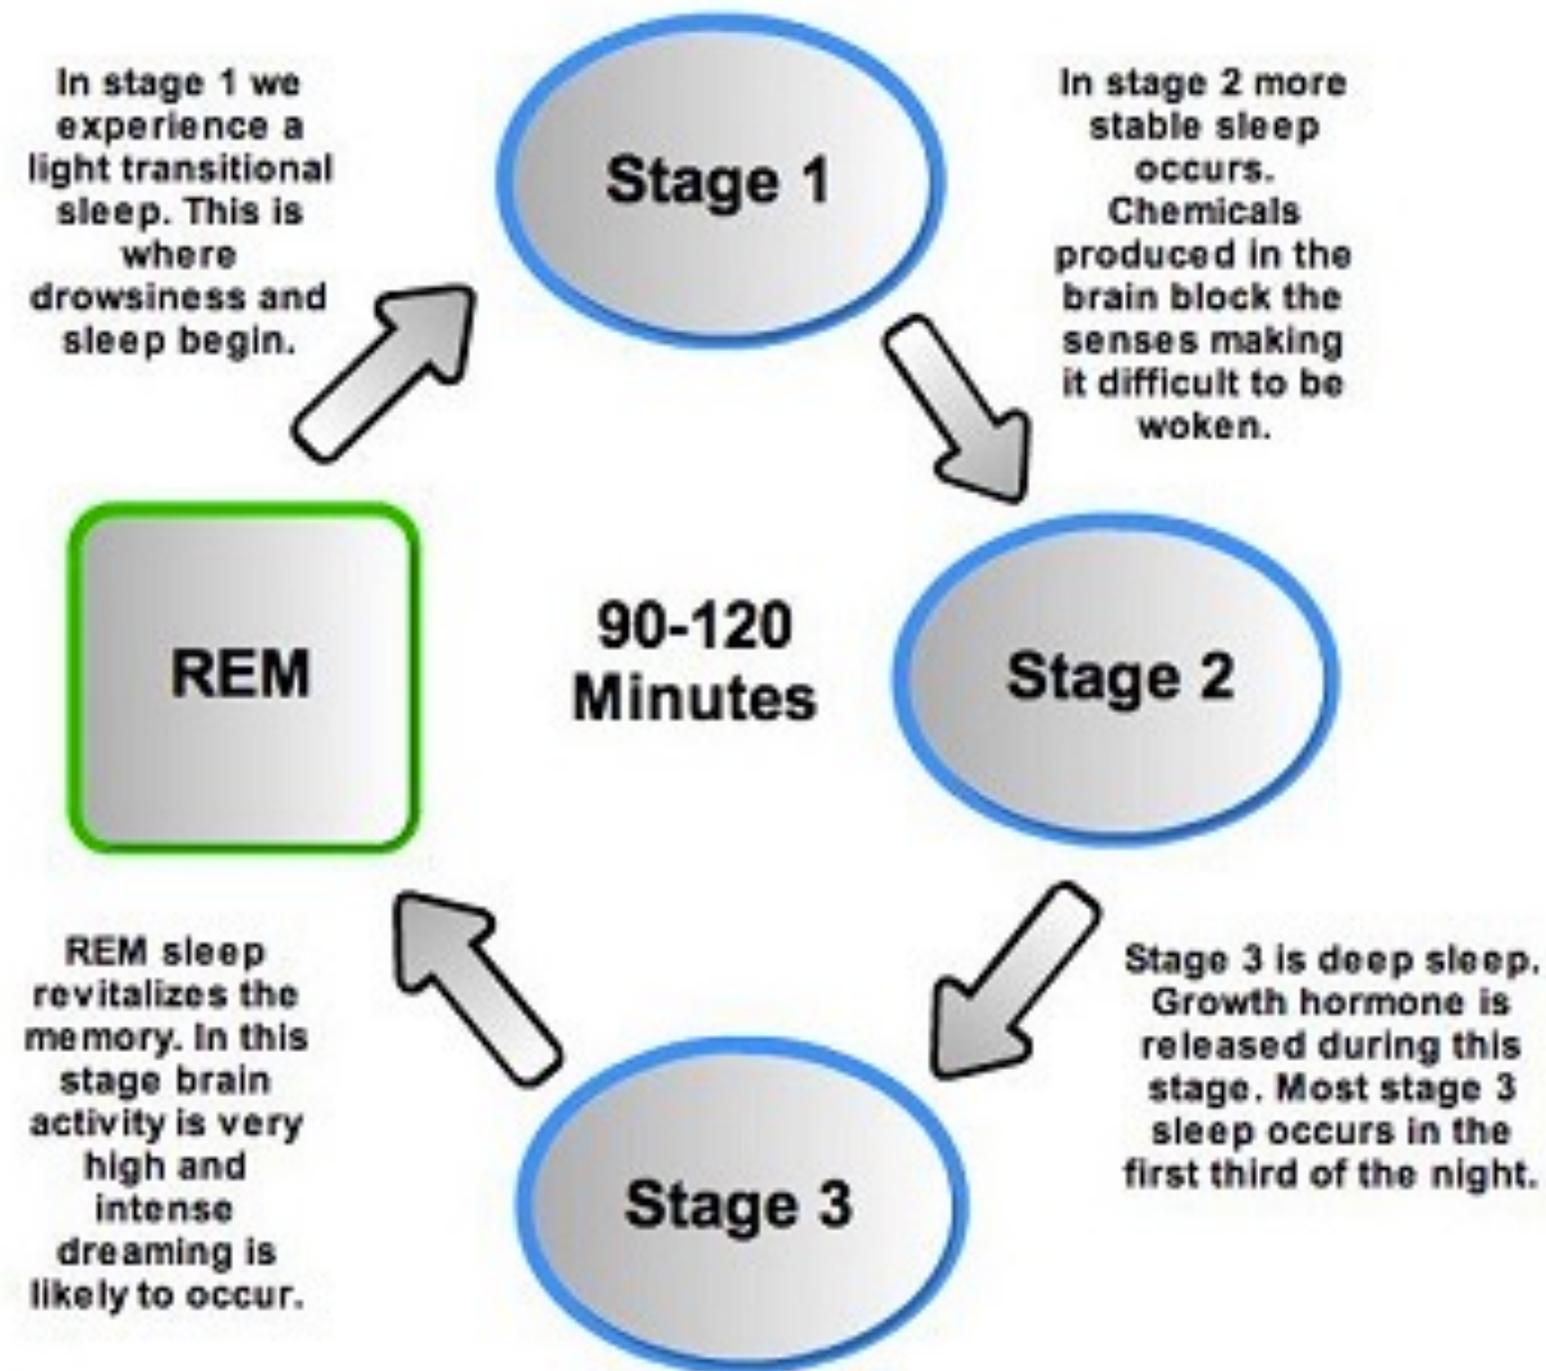

Want more A's? ...get more *Zzzz's!*

Students who sleep at least 7-8 hours have a higher GPA than those who get 6 or fewer

SLEEP WELLNESS

WHAT IS SLEEP?

Sleep is a series of stages that transition from non-rapid eye movement (non-REM) to rapid eye movement (REM) for 1 or more hours that alternate in cyclical fashion.

HOW MUCH SLEEP IS RECOMMENDED?

Age	Recommended Hours of Sleep
Newborns (0 - 3 months)	14 -17 hours a day
Infant (4 -11 months)	12 -15 hours a day
Toddler (1-2 years)	11 - 14 hours a day
Preschool-aged children (3 - 5 years)	10 - 13 hours a day
School-aged children (6 - 13 years)	9 - 11 hours a day
Teenagers (14 - 17 years)	8 - 10 hours a day
Young Adult (18 - 25 years)	7 - 9 hours a day
Adult (26 - 64 years)	7 – 9 hours a day
Older Adult (65+ years)	7 - 8 hours a day

The average college age adult should get about 8 hours of sleep per day.

WHAT ABOUT NAPPING?

- Napping is a good option for reaching 7-9 hours of sleep if you can't get it all at night
- 10-30 minute naps
- Avoid long naps
- Avoid napping too close to bedtime

SLEEP WELLNESS

TIPS FOR GETTING QUALITY SLEEP

- Develop a regular sleep schedule everyday of the week.
- Create a bedtime routine that works for you.
- Exercise regularly, but not too close to bedtime
- Avoid alcohol, caffeine, and nicotine before bed.
- Get plenty of natural light during the day and keep things dark at night – circadian rhythm
- Invest in blue light blocking glasses or turn screens off 1 hour before going to bed – blue light suppresses production of melatonin
- Keep bedroom quiet, dark, comfortable and cool – 60° to 67°
- Use sleep mask and/or earplugs to limit light and noise
- Listen to white noise – Calm app

*sweet
dreams*
