

What are Moving Tote Kits?

CMU's Moving Tote Kits are Tyga Box Systems Inc. patented system of integrated plastic boxes and dollies for moving file folders, documents and other contents.

This system makes relocation and moving safer, you never lift a box unless it's empty and faster because boxes are packed and moved in the right order for unpacking. Each Kit contains 5 totes, 10 file rails and 1 four wheel dolly.

CMU Moving has been using this system with success for large and small relocations across campus. Examples include relocation of the College of Education and the CMU Pharmacy.

Contact our office at 989.774.3917 to schedule a demonstration of the system.
