The Pilot—A Perfect Home—Price $1298—We Pay the Freight

The Aladdin Company offers you an opportunity to buy a complete house direct from the manufacturer saving four profits on the lumber, mill-work, hardware and labor.

Tens of Thousands of American families are living in Aladdin houses. The Aladdin System of Construction, the original Readi-Cut System, was created eighteen years ago. For eighteen years this organization has devoted its energies, its brains and its experience to making home building simpler, easier and less expensive. The Savings Aladdin offers you, the Service Aladdin offers you and the safety Aladdin offers you are completely explained on pages 10 and 11 of this book.
The modest cottage is the foundation of the American Republic. The American citizen is master of himself and his destinies when he steps across the threshold of his own home. He pity the flat dweller and the renter with their multiple restrictions, confinement and tribute-paying exactions. "He owns his own home," is a recommendation for thrift, character and integrity that all the world recognizes.

Wise, therefore, is the man who arrives at this momentous decision. However modest his own home must be, "it will be mine for the happiness of my family and myself."

The Columbia breaks through the clouds of obstructions, high prices, middlemen's profits, architects and contractors' fees and opens up the big opportunity to "Start right now!" to start with less than you thought possible, to start with a modest saving.

The Columbia is the foundation of the Aladdin business. That is because of the thousands of men and women who recognize it as the foundation of their home-owning ambitions. It is a place to start. Later successes may come enabling a larger and more ambitious house. But the Columbia is the starting point; it conserves expenses, inspires thrift—AND SAVES MONEY. Nine floor plans are presented. They are all priced alike—$548—and we pay the freight. The quality of material in the Columbia is all of the same high quality as that furnished for our larger houses. Choose that which meets your needs best—and LET'S GO!

Columbia No. 8
Included in the Columbia No. 8 are a porch, large living room, combined dining room and kitchen, two bedrooms, and bath. A small room is of the family of four. The picture shown above applies to Columbia No. 8.

Columbia No. 4
No. 4 is a very popular arrangement of big living room, kitchen, bath and two bedrooms. All rooms are the maximum size obtainable in these dimensions.

Columbia No. 5
The rooms in No. 5 are proportioned differently, although of the same accommodation to shown in plan No. 4. It has found a warm place in the hearts of those who have built it.

Columbia No. 6
Columbia No. 6 gives big living room, and dining room, with two bedrooms and kitchen. This type is desirable for those who are unable to obtain water or sewerage for modern convenience.
The savings after building a small home will add more to your happiness than the luxuries of a big home. The COLUMBIAS are priced at $548—and we pay the freight.

Porch for COLUMBIAS

The porch shown in the accompanying picture will be furnished for $60.00. It is size 14 x 8 ft. and price includes all materials complete.

Specifications

As in the larger plans, you may have sheathing and lath in place of siding without extra cost if you would like to stucco the outside. Shingles for the side walls like picture of Cedars, page 4, instead of siding can be had, (see page 16). The Columbia is priced at $548, in single construction and $558, in double construction—and we pay the freight. For double construction specifications see page 16.

Columbia—Size 18 x 26. (Single construction). 4 x 6 sills, 2 x 6 joists on 24 inch centers. No. 1 tongued and grooved flooring. 2 x 4 inch wall and partition studs on 16 inch centers. Lath for lining all walls and ceilings. No. 1 drop siding for outside walls. No. 1 outside finish. 2 x 4 inch ceiling joists on 16 inch centers. 2 x 4 inch rafters on 24 inch centers. Roof sheathing laid tight. Best quality green slate surfaced roofing. Check rail windows, size of glass in each sash 26 x 24 in., rush glazed ready to hang. Bathroom supplied with swinging casing, size of glass 18 x 24 inches. Clear interior trim. Clear 6 inch two member baseboard. Doors size 2 feet 8 inches by 6 feet 8 inches. Highest quality fir. Front and rear doors upper half glazed. 6 feet by 7 feet case arches furnished where shown in plans. Two coats of paint for exterior. Stain and varnish for interior trim and doors. All nails, mortised locksets, hinges, double nailing door hinges, casement locks and hinges, and spring window bolts to complete house. Height of ceilings 8 feet. Roof 1/2 pitch. Exposed eaves 1 foot projection.

Columbia No. 2

No. 2 is another variation of this remarkable design wherein two bedrooms are included with the big living room, kitchen and bath. It is a big seller and never fails to delight its owners.

Columbia No. 9

This plan of Columbia includes an inside cellar entrance—a complete little home having living room, dining room, bed room, kitchen and bath room.

Columbia No. 7

No. 7 illustrates another variation of the inset porch on the Columbia. It also includes living room, dining room, kitchen and two bedrooms. It is a cozy little nest for a family of four.

Columbia No. 10

Columbia No. 10 is designed with inside cellar entrance and includes a two bed room plan. It can be faced either way on your lot by transposing door and window in living room.

Be it ever so humble—"it's our own."
The Cedars—A Real Beauty—5 Plans—Price $695. And We Pay
The Freight

THE Cedars is a beautiful bungalow, marvelously
priced and remarkably designed. Five fine plans are
shown below, while the photograph above illustrates
the charm and home-appeal of the exterior. It is priced
with siding in single construction at $695 but sheathing and
shingles will be furnished at the regular price of double
construction (see page 16). The price in double construction
is $829. Porch shown is picture may be had by adding
$120 to the price. From the five floor plan arrangements
you are sure to find one that exactly meets your ideas of a
comfortable, convenient, sturdy home. Specification for
the Cedars in single construction are shown on page 5—at
bottom

The Cedars—Plan 5
This floor plan arrangement is a highly popular one. Think
of such a complete home—containing living room, dining room,
kitchen, two bed rooms, bath and
inside cellar entrance for the astonishingly small price of $695.
Plan No. 5 shown at the right. Remember that the price of the
Cedars is freight paid to your
station.

The Cedars—Plan 1
Plan 1 of the Cedars design offers a
type with dining room, arched opening
to living room, two bedroom, kitchen,
and pantry. It is a much sought-after
and never fails to make a
happy little home. Note the double
windows in living rooms and dining
rooms.

The Cedars—Plan 2
The Cedars, Plan 2, presents a type
with front porch together with a
easy arrangement of rooms. Note es-
specially the closets of each bedroom
with an extra closet from living room.
Two fine bedrooms with bath between
and big living room and kitchen offer
every comfort.

The Cedars—Plan 3
Here is a plan for a family of six.
Three bedrooms, living room, kitchen,
dining above and bath. A easy,
convenient little home as you will
agree. Porch size 16x9 feet will be
furnished like shown in picture, for
$120.00 additional.

The Cedars—Plan 4
The Cedars, Plan 4, is produced as
the result of a demand for three bed-
rooms, with big living room, and big
kitchen. It also has double windows
in the two larger rooms. As mention-
above the porch shown in picture
on front cover may be had by
adding $120.00 to the above price.
SERVICEABILITY, comfort, beauty—these three—if properly co-ordinated give happiness and gratification to the home owner. The Potomac is a master example of them all. Colonial atmosphere is ever appealing to the home owner for it bespeaks hospitality, generosity, old-fashioned simplicity and true goodness.

From its clean straight timber to its beautifully machined siding, and handsomely grained woodwork it represents the very best in everything desirable in a real home. Details of the sound construction are given below. Should you prefer a shingled exterior, see page 16. Three attractive floor plan arrangements for the Potomac are shown here.

You may have shingling and lath for a stucco exterior without adding anything to the above price. Pergola type porch comes extra at $76—size 8x14 feet. The price of the Potomac in single construction is $997. The price in double construction is $1166, as described on page 16.

Specifications for Potomac—
Size 30'x28' (Single construction). 6x6 inch sills. 2x8 inch joists on 24 inch centers. No. 1 tongued and grooved flooring. 2x6 inch wall and partition studs on 16 inch centers. Lath for lining all walls and ceilings. No. 1 drop siding for outside walls. No. 1 outside finish. 2x6 inch ceiling joists on 16 inch centers. 2x6 inch rafters on 24 inch centers. Roof sheathing laid tight. Best quality green slate surfaced roofing. Check rail windows, size of glass each 26x24 inches, each glazed ready to hang. Kitchen and bath rooms supplied with check rail windows, size of glass each 26x10 inches. Clear interior trim. Clear 6 inch two member baseboard of attractive design. Front and rear doors glazed upper half. Cellar stairs furnished where shown in plans. Two coats of paint for exterior. Stain and varnish for interior trim and doors. All rails, mortised lockets, hinges, double acting floor hinges and spring window bolts to complete house. Height of ceiling 8 feet. Roof 1/4 pitch. Exposed eaves 1 foot projection.

The Potomac—Plan Q
The Potomac Style Q offers a room arrangement that gives most unusual satisfaction to all owners. Splendid light, good air are secured from the carefully studied placing of windows. This will make a perfectly appointed home.

The Potomac—Plan L
This plan gives full accommodations for a family of six, having three bedrooms. A fine living room, extra large dining room, bath, kitchen and inside cellar entrance complete this desirable arrangement.

The Potomac—Plan M
In Plan M we find an arrangement that has had a long period of popularity with our customers. A big living room, size 22x14 feet with fine light and convenient access to other rooms, is a delight to the family. The dining room is 14x14 feet. Other rooms are well proportioned.
IGNIFIED simplicity was the aim of the thoughtful designers in creating the Victory. There is spread before you on these two pages a truly remarkable selection of interesting homes. Seven arrangements of the same size structure offer you an opportunity to pick exactly what floor plan your needs demand. These plans are worthy of a very careful and painstaking study. They are the result of our experience and knowledge of 18 years in planning homes. It would be almost impossible to secure a better planned home of this size than represented among these seven plans.

Splendidly manufactured siding and flooring; clear interior wood work—that's the kind of materials Aladdin furnishes. No finer quality grows. It is beautiful in grain, strong and lasting. Highest grade paints and varnishes are also supplied. You will be assured of a high type of material and construction. The Victory can be placed on a lot as narrow as 30 feet. The complete plans and illustrations and instructions furnished with each Aladdin house guard the home builder from costly mistakes and make the work pleasant and easy.

The Victory Plan W

Plan W offers you a porch, big living room and dining room, three splendid bed rooms, kitchen, bath and three bedroom closets. Note spaciousness of the carefully planned bed rooms. Doors and windows are thoughtfully considered in connection with the placement of bed and other furniture. Plumbing expense is held down by placement of bath room next to the kitchen. Ample wall space in kitchen gives opportunity for excellent arrangement of fixtures. Scientific design has made this a really big home at small cost.

The Victory Plan Z

This plan includes our inside cellar entrance, a feature that is of course much desired where a basement is a part of the home. Splendid living room, dining room, two bed rooms, kitchen, bath and closets complete the home.

A Cozy Interior

This is how one experienced home-maker has arranged the interior. There is ample opportunity to express one's taste in this roomy home.

ALADDIN—Homebuilder to the Nation
Here are Five Other Fine Plans of the Victory to Choose from. They are all Priced the Same—$975. We Pay the Freight.

The five plans on this page, any one of which may be had at the above quoted price, are all tested plans, having been built many times. There are valuable features included in each, yet each offers a particular arrangement for a particular need. If you desire to stucco the outside of your home, we will furnish sheathing and lath for the outside walls at the price quoted above. Price in single construction $975. Double construction price $1149. See page 16 for double construction specifications.

**SPECIFICATIONS FOR ALL VICTORY TYPES**

Victory—Size 26x36. (Single construction). 6x6 inch sills. 2x8 inch joists on 24 inch centers. No. 1 tongued and grooved flooring. 2x4 inch wall partition studding on 16 inch centers. Lath for lining all walls and ceilings. No. 1 drop siding for outside walls. No 1 outside finish. 2x4 inch ceiling joists on 16 inch centers. 2x6 inch rafters on 24 inch centers. Roof sheathing laid tight. Best quality green slate-surfaced roofing. Check rail windows, size of glass in each rash 26x24 inches, sash glazed ready to hang. Bathroom supplied with check rail window, size of glass in each rash 26x16 inches. Clear interior trim. Clear 6 inch two member baseboard of attractive design. Doors size 2 feet 8 inches by 6 feet 8 inches. Highest quality finish. Front and rear doors glazed upper half. Ceiling stairs furnished where shown in plans. Two coats of paint for exterior. Stain and varnish for interior trim and doors. All nails, mortised locksets, hinges, double acting floor hinges and spring window bolts to complete house. Size of house 26x36 feet. Height of ceiling 8 feet. Roof 14 pitch. Exposed eaves 1 foot projection.

**THE VICTORY PLAN A**

Complete convenience for a family of six are represented in the interior arrangements of the Victory Plan A. The living room has unusual wall space, and opening as it does through an arch to the dining room there is an impression of spaciousness which is the result of a depth of 24 feet. The bath is well detached, a desirable feature. Note especially the three large bed rooms, each with closet. A study of the window placements will reveal excellent light and airiness. Plan A shown at the right.

**The Victory Plan E**

In the Victory Plan E there is an excellent example of the theory that a modest home can be as artistic, as comfortable and as attractive as the pretentious house. Within the compass of 26x36 feet there is included an 8x12 foot porch, generous sized living room and dining room, two bed rooms with unusually large closets, a cloak closet, fine kitchen and good bath room. The location and arrangement of the several rooms are ideal. Plan E is a most desirable bungalow.

**The Victory Plan X**

Here is a new type Victory which includes a central hall separating the rooms into two groups of three on each side. The bath room is located at end of this hall. A big living room, dining room, three bed rooms, kitchen, bath and closets with inside cellar entrance make a home complete to the last detail.

**The Victory Plan Y**

Here is a three bed room Victory with grade cellar entrance. Each bed room has closet, the big living room is separated from dining room with an arch while hall leads to bath room. This is a fine type of complete home that will give the best of satisfaction to all owners.

**The Victory Plan F**

Here is a design especially presented for those who demand a spacious living room. Light and air enter from three sides as it extends for 26 feet across the entire house—big enough for a dance. The arrangement of the balance of the house is ideal in every respect. This plan has been a popular one for the family of three or four and will be much admired by all discerning observers.
The Capitol—A Fine Dutch Colonial Type—Price $1932.

This is one of the most popular homes ever designed. It contains every modern convenience and is ideal in appearance, arrangement and comfort.

The Charm of the Dutch Colonial never fades. The early Dutch settlers along the coast of New England developed this type with its gambrel roof, shingles and broken roof lines. Aladdin designers have held true to this inspiration while actually giving full dimensions to the second floor in height, breadth and depth. No space is lost, ceiling being full height and square, yet the observer on the street gains the impression of a true gambrel type.

Examine minutely the placement of the rooms. Can you conceive a higher degree of perfection? The entrance hall with semi-open stairway and cloak closet demand your admiration the minute you enter. Arches lead to the right and left into living room and dining room. Think of the possibilities of a living room 26 feet deep and 14 feet wide! Leading from this interesting room is a library or den. On the other side of the house is found pantry separating dining room and kitchen, with cellar entrance under the main stairway. There are six rooms on the second floor—and closets. It may be called a twelve-room home, and at a price that is unapproachable through any other source. The Capitol is priced in single construction at $1932. The price in double construction is $2254 (see page 16).

Pergola porch, size 8 x 14 feet, will be furnished by your adding $75 to the price.

If you want the 10 x 14 feet Porte Cochere shown on right side of house add $63 to price.

Specifications. Capitol—Size 36 x 26. (Single construction), 6 x 35, 2 x 36, 1/2 x 16, in. on 16 in. centers. 1st and second floors. No. 1 tongued and grooved flooring, 2 1/4 inch wall and partition studding on 16 in. centers. Lath for lining all walls and ceilings. No. 1 drop siding for outside walls. No. 1 outside finish, 2 x 4 inch ceiling joists on 16 in. centers. 2 x 6 inch rafters on 24 in. centers. Roof sheathing laid tight. Best quality green slate surfaced roofing. Clock-call windows, size of glass in each 26 x 30 inches, 1st floor; 30 x 36 inches 2nd floor. Sash glazed ready to hang. Bath room and kitchen supplied with clock-call windows, size of glass in each 30 x 36 inches, 1st floor; 36 x 42 inches 2nd floor.

Clear 6 inch tongue and groove baseboard. Doors size 2 feet 8 inches by 6 feet 8 inches, high quality fir. Front, rear and side doors upper half glazed. Attractive circle tread stairs as shown on plan. Cellar stairs under main stairs. 3 foot eased arch furnished where shown in plan. Two coats of paint for exterior. Stain and varnish for interior trim and doors. All nails, mortised lockets, hinges and double setting floor hinges, each weight, each cord, each pulley and each lock to complete house.

Height of ceilings 9 feet 1st floor, 8 feet 2nd floor. Ceilings on 2nd floor are full height not sloped. Roof 1/12 pitch. boxed sashes.

First Floor Plan—The Capitol

Second Floor Plan—The Capitol

THE HOUSE THAT GROWS

The Capitol No. 2

Here is an opportunity to start with a moderate size home—complete in every detail, and of excellent architectural design and later add to it to complete the larger home—the Capitol. The usual losses are not encountered when reconstructing this home as is so often the case when changing or enlarging a home. The cost of the Capitol No. 2 in single construction is $1396. Double construction cost is $1597.
The Liberty—A Splendid 2 Story, 7 Room Home—Price $1068. We Pay the Freight.

A STRONG, substantial, dignified and complete American home! Thus might be described in one sentence, the splendid Liberty. To avoid the wasting of a single penny, is a duty we all owe to our families and ourselves. To accomplish this object in the building of a home is the most laudable of all ambitions. Aladdin designers set about the task of creating a structure in which there would not be wasted one foot of material—one inch of space. Waste material, or waste space, means wasted dollars for the owner.

Examine minutely every feature of the Liberty. Clean square lines, well proportioned walls and roof, regular placement of windows, blend into perfect harmony. It pleases the eye at first impression, as well as under more continued study. Two interior arrangements are offered at the same price, one having three bed rooms and one with four bed rooms. The Liberty is priced at $1068 for single construction and $1252 for double construction. Porch size 16 x 8 feet is furnished by your adding $123 to price. See page 16 for details double construction.

The Liberty—Plan K

For those whose necessities require four bedrooms, the Liberty Plan K has been devised by our designers. Think of it! Living room, dining room, kitchen, bath and four bedrooms, all included in a house of the dimensions of the Liberty, and more remarkable still, at the price of $1068. This home is big enough for a family of eight and offers all modern conveniences.

The Liberty—Plan J

Plan J affords gratification to the careful and discerning observer because it illustrates a perfect example of avoidance of waste space. No unnecessary angles or projections are discernable in the partitions dividing the rooms. Handsome semi-open staircase leads from generous living room to second floor, where are found three bedrooms, bath and splendid closets. Pantry and rear porch are valuable features of the first floor.
Facts About the Aladdin Plan

The Aladdin Plan of homebuilding has been in successful operation for eighteen years. The whole purpose of the plan is to help builders of modest homes with its first object and principal benefit, is to save money for builders of modest homes. The Aladdin Plan has saved $200, $300, $500, $800-$1200 and even more money on the individual homes of thousands of home builders. Our home-builder customers write us after finishing their homes and tell us these things. They tell us how we helped them to buy their materials for less than their local lumber dealer would sell them. They tell us how much better their lumber is than they could get from their local dealers. They tell us how strong their homes are, how warm they are, how convenient the room arrangements are, and how pretty they look when finished.

HOME OFFICES OF THE ALADDIN COMPANY

Now let us tell you how we save you money.

The ready-cut plan avoids wasting lumber when building—saves about $18.00 out of every $100.00 worth of lumber ordinarily used in building your home.

Nineteenth of all lumber coming out of the forests are in 8-foot, 9-foot, 12-foot, 14-foot, and 16-foot lengths. When you want to use other lengths you have to pay more money for the same quantity and quality. Aladdin designs houses to use standard lengths. That's the economy of standard parts and that's the same kind of manufacturing economy that enables automobiles to be made and sold so cheaply. And that is what enables us to put in higher quality at lower prices.

Rapid, automatic machinery handles this lumber so swiftly, so accurately and so perfectly, that one man at a machine in our mills will cut as much as nearly a hundred carpenters can in the same length of time. And you get the benefit of this saving.

The Aladdin system of cutting the lumber in the mill saves about $30.00 out of every $100.00 worth of carpenter labor—as against the old system of measuring, cutting, and fitting on the job.

Twelve Feet of Lumber From a Sixteen-Foot Board

Think of taking a six-inch board sixteen feet long and getting twelve feet of six-inch board out of it! Think of applying this system of saving throughout all the lumber used in building your home.

The principle of saving our good money it saves! Think of your money this system saves, for the board is priced to you in exactly the number of feet of lumber going into it.

To eliminate waste by scientific planning, designing and cutting of lumber is to save your money from the waste pile.

W. J. Sovereign, president of the Aladdin Company, conceived this tremendous thought, originated, perfected, and established the system.

The principle has been so thoroughly established through the success of The Aladdin Company that it is now accepted and approved by lumbermen, contractors, engineers, and scientists.

Facts About the Aladdin Company

And these customers of ours tell us how pleased they are with all their dealings with us. And, really, we are most pleased when they say this, for the Aladdin people are human. We are just ordinary people whose life work, life experiences are devoted to homesteading, and this makes homebuilding simpler, more economical, easier and more pleasant for our customers.

Every stockholder in The Aladdin Company is a worker in the company. We are all interested in every customer and we are all interested in knowing that every customer is satisfied.

Aladdin Homes are the original and first ever sold where homesteading was first practiced, every piece of material was cut and fitted through the Aladdin cut-house industry was founded by Aladdin—by W. J. and O. E. Sovereign and the present workers, in the Aladdin Company.

Build It Yourself

We usually advise our customers to have a carpenter, if possible, but we do say that any sensible man can build an Aladdin home if he follows our simple plain instructions and detailed blueprints of every piece. Every piece of material is cut to fit, with a few exceptions. And these pieces are marked and numbered so that you know just where every piece goes when you look at the pictures and photographs we supply.

Of course if you build your own house, like so many other Aladdin customers have, you, too, will save the money you would have to pay a carpenter.

"It's just common horse sense," wrote a customer after he had moved into his new Aladdin. This man was so proud because he built his Aladdin himself—and he was not a carpenter either.

Avoid Profits of the Middlemen

The Aladdin Company buys immense quantities of lumber from the forests, getting absolutely the lowest prices. You therefore buy direct, without any middlemen to add their profit to the price of your lumber, millwork and hardware.

Is it any wonder our customers write us and tell us they saved $300, $500, $800 and more, when we are able to avoid all these wastes that exist for the person who builds the old way?

For years many great corporations have been buying and building Aladdin homes for their employees. The United States Government and many states and cities have been our customers. These facts alone prove that there is economy and satisfaction for our customers.

This Catalog Our Only Salesman

With this catalog, you are able to keep the profits in your own pocket that you ordinarily pay to your local dealers. Because we do not sell through dealers, they can't add their several hundred dollar profits to the goods you buy from us. You keep this money yourself.

When your dealer says "Don't buy your lumber out of town," ask him where he buys the lumber he wants to sell you. You see he buys his lumber up here and the only money that stays in your town is the dealer's profit. Wouldn't you rather have it in your pocket than in his?

This catalog makes possible this saving—and many others.

ALADDIN Homes Not Portable

And please remember, always remember, that there is nothing "portable," nothing "sectional," nothing "fabricated" about an Aladdin home. You can't take an Aladdin house down after it is built. It is just like the best architect-designed, contractor-built houses in your neighborhood. Aladdin homes are sturdy, warm, and strong—real year-round homes. They have been built and lived in for years in Maine, North Dakota, Michigan, Canada—and in Alaska. The President, the General Manager and most of the executives of The Aladdin Company have been living in Aladdin homes for years.

Aladdin homes are designed to use standard lengths of lumber cut from standard lengths of logs as they come out of the forest. This saves waste of lumber; saves the $18.00 out of every $100.00 we spoke of before.
Sturdy, Honest Lumber Makes Sturdy, Honest Homes

The Aladdin Company

Early in its history, The Aladdin Company started to improve the quality of lumber that had been the custom to put into modern homes. It started to furnish beautiful, clear lumber for the doors and interior, woodwork. And ever since it has devoted its efforts to improving its houses. It feels and believes that the modest home should have as good quality as the biggest homes. The beautiful, velvety-grained Oregon fir and yellow pine used in Aladdin homes is the finest coming out of the forests. It takes the handsomest stain, oils and varnish and holds the coloring permanently.

The paints furnished are standard high-quality—the beautiful brushed brass hardware and locksets finish off the woodwork attractively. Our roofing is made by one of the largest companies in the country and is of the highest quality. Pleasure and pride can't help but come to you when you know how good a home you have built, and especially when you have secured all these good things and saved a lot of money too.

Some people will tell you not to build an Aladdin house. But most of them will be people who will lose some profit they expected to make out of you if you do. They will be people who want to sell you something, who will want to get your money. They will never be people who have built Aladdin homes.

ALADDIN Customers

If you want to ask advice, it is only fair to yourself, and fair to us, to ask people who know about Aladdin houses. Can a man who hasn't built an Aladdin house know as much about it, or about us, as a man who has dealt with us? We will give you the names and addresses of many customers to write to, or call on. We wouldn't do that if we didn't know they saved money, would we? All right then, if a dealer or a contractor tells you not to build an Aladdin house, ask him for his reasons and investigate these reasons by talking with a man who has built an Aladdin house. Don't take anybody's advice, who has not actually built an Aladdin house. Get your facts from people who know.

Eighteen Years of Experience

The houses shown in this book are the best we have planned in our eighteen years' experience. We have learned from furnishing homes for thousands of families, enough to make a city of a quarter of a million population. Each size has many different floor plan arrangements to suit your family and your tastes. We designed and priced them so that you can get into a home at the lowest possible cost, or you can have added values like porches, kitchen cabinets and other luxuries and necessities. You can buy as much or as little as you like. We want to satisfy you exactly.

The ALADDIN Guaranty

Satisfaction, or your money back, is the soundest guaranty ever written. When this guaranty is backed by a company whose assets run into the millions you are sure of absolute safety in all your dealings. The Aladdin Company guarantees your satisfaction or your money back in every transaction with us.

How Lumber is Cut to Fit

The illustration at the left demonstrates the great saving and the simple work erecting an Aladdin home. The material is cut to fit in our mills and numbered according to the blueprints which explain every step of the erection. The pieces fit together perfectly. And you save at least 15% waste lumber besides 30% to 40% of the labor of erection. Aladdin is the originator of the Ready-Cut System of construction and has saved thousands of homebuilders from $800 to $800 on their homes.

Summer Cottages

A separate booklet is ready to be mailed to you, if you are interested in summer cottages. Aladdin Summer Cottages are single walled, exposed studding, single matched ceiling partitions, with rooms open to the rafters.

From the Pyramids to the Woolworth Building

To him who says the Ready-Cut System is not possible or practicable, point to the Pyramids of Egypt, refer to Solomon's Temple as described in the Bible, or inspect Washington Monument, or the 57-story Woolworth Building in New York City. You will find that each was prepared, erected and completed by the Ready-Cut system. But it remained for The Aladdin Company to first apply the system to your benefit in the building of a home. And thousands of American families scattered over this broad land will testify to its economy and practical success.

The pyramids aren't portable, the Woolworth Building is not portable, nor are Aladdin houses portable.

If you attempt to tear apart, or dismantle an Aladdin house, the most expert carpenter could not tell from any first-class frame dwelling where there is no difference.

Painting

You receive paint for painting the outside, two coats and stain and varnish for interior trim. You may choose natural oil and varnish, light or dark oak stain and varnish or mahogany stain and varnish. These materials are standard high quality and make a beautifully finished job.

Masonry Chimneys and Fireplaces

Chimneys can be located anywhere in the house you like, for we do not cut the materials for these openings. If you do not want the fireplace which may be shown in the photograph, you need not build it. Of course, any excavation work, and the foundation work must be done on the ground. Brick, stone and cement can be had in your locality as cheaply as we could furnish it. We furnish you a foundation plan to tell you how to proceed to build the kind of foundation you want.

Freight Exception

We pay the railroad freight on all our houses to all states, except the following: Texas, Louisiana, Oklahoma, New Mexico, Arkansas, Arizona, Nebraska, Colorado and Kansas. Write us for freight quotations on shipments to above states.

Terms and References

Aladdin houses are sold for cash only. We require the full price of the house to be sent with the order to obtain the prices quoted. If, however, you prefer to send only twenty-five per cent, or one-quarter of the price, with the order and pay the balance upon the arrival of the shipment, we will accept your order on this basis, providing you add $10.00 to the price quoted to pay for expenses of shipping the house in this way.

NOTE—This catalog supersedes all previous catalogs, and all prices herein quoted are subject to revision April 1st, 1924, July 1st, 1924, and September 1st, 1924.

The Mayflower
5 Plans—Price $414
We Pay the Freight

Happiness is a state of mind! Good old fashioned common sense tells us that we can be happiest in a home that is well within our means—that we can afford. The Mayflower brings this happiness to thousands of families, whose savings and income are limited. It permits the family of modest means to get into a snug, warm and strong little home at almost unbelievable little cost. Five plans of interior arrangement are offered for your choice. It is of course not necessary to build the brick porch or the fireplace chimney. This little home is being put up by many owners who have had no experience in carpenter work. Our instructions, with pictures, explain every step. The price in single construction is $414. The price in double construction is $499. (See page 16.)

Specifications
- Mayflower—Size 18x18 feet. (Single construction). 4x6 inch sills, 2x6 inch joists on 24-inch centers. No. 1 tongued and grooved flooring; 2x4 inch wall and partition studding on 16 inch centers. Lath for lining all walls and ceilings. No. 1 drop siding for outside walls. No. 1 outside finish. 2x6 inch ceiling joists on 16 inch centers. Roof sheathing laid tight. Best quality green slate surfaced roofing. Check-rail windows; size of glass in each sash 26x24 inches, each glazed ready to hang. Kitchen, size of glass in each sash 20x16 inches. Clear interior trim. Clear 6 inch two member basement. Doors 2 feet 8 inches by 6 feet 8 inches. Highest quality fir. Front and rear doors upper half glazed. Cellar stairs furnished where shown on plan. Two coats of paint for interior. Stain and varnish for interior trim and doors. All nails, mortised hooks, hinges, double set dining room door blours and spring window bolts to complete house. Size of house 18x18 feet. Height of ceilings 8 feet. Roof 15 pitch. Exposed eaves 1 foot projection.

Garages as Low as $95—We Pay the Freight

The Studebaker, Size 12x20 ft.
The Studebaker, size 12 by 20 ft., will take the largest car on the market, with ample room at sides for working about car, also storage space for supplies. It has swinging doors. It is of a splendid type and always looks good wherever it may be erected. Paint to match your house. The Studebaker price is $165.

The Lincoln, Size 20x20 ft.
Distinctive and attractive, the Lincoln size 20x20 ft., two car garage, will do credit to any surroundings. It is furnished with siding which can be painted to match color scheme of home. Four swinging doors are provided. The Lincoln, Price $248.

The Ford, Size 8x14 ft. or 10x16 ft.
The Ford, illustrated below is made in two standard sizes, the 8x14 ft. size being designed for Ford cars. It is just large enough to admit a Ford touring car with the top either up or down. Any garage of smaller dimensions will not admit the Ford car. Size 8x14 ft. sells complete with all material cut to fit, paints to match the colors of your house, hardware, locks, nails and roofing for $95. Size 10x16 ft. is of the same construction. Its price is $118. This will admit a car of 110 inch wheel base.

Specifications as follows: Sills, 4x4"; Studding, 2x4", 3x4" centers; Drop siding for side walls; Rafter, 2x8", 2x10" on centers; Exposed Eaves, Roof Sheathing, box lumber and tight. Best quality green slate surfaced roofing for roof. Hardware, nails and paint for two coach coat exterior. Materials ready-cut and complete blue prints showing every step of erection. All garages shown are furnished without floors, as practically all auto owners prefer to build floor of concrete or Cinder.
Aladdin Achievements

Aladdin has done for others is important to you as indicating what we can do for you. Aladdin has built six cities. Aladdin
has provided high-quality products for the Panama-Pacific International Exposition and the Michigan State Agricultural
Exposition. Selected by the United States Government to co-operate in the production of an ideal workman’s cottage. Selected
by State of Michigan to furnish homes for State officials. Furnished a house for the president of the Republic of Liberia, East
Africa. We have furnished from one to three hundred and fifty Aladdin houses to each of the following great industrial concerns:
Dominion Coal Co., Dow Chemical Co., Dupont
Iron & Steel Co., M. A. Hanna Mining
& Iron Co.

The Duplex No. 10—14 Rooms,
Priced very Low—$1765.

We pay the freight

The Aladdin Duplex No. 10 presents a number of distinct advantages. The design has been
invented during the past ten years in many localities and has proved
to be a perfect type to meet the average demand. There are two
seven-room apartment homes of most unusual attractions under
this roof. All materials quoted in our specifications are included
at the remarkable price of $1765. If you want to
include the 26x8 foot porch when this Duplex is shipped, add $190 to
above price. Shingled walls will be furnished as described on page 16.
Double construction is priced at $2065. See page 16 for details.
This
is a sturdy, strong and attractive design and its extremely low price
makes it a most attractive investment—a big return on the money.
One of the biggest copper mines in the
world purchased a number of these over ten years ago and report the
highest satisfaction throughout all these years.

Specifications

Prices for Heating and Electric Wiring
We list below prices on equipment you will ultimately need for your home. Prices on wiring necessary No. 14 H. C. wire for complete installation of your electrical wiring system, as well as switches to control a light fixture in the walk room, front porch, three way switch, three way switch controlling lights in the back room and upper hall of two story homes, and other lights for basement controlled by switch in kitchen.

ALADDIN RECYCLATING FURNACE
In Aladdin Furnaces are embodied the latest and most practical features of warm air heating, as well as the latest improvement in design. They are the ideal heating plant for any home. They are designed to control a light fixture in the walk room, front porch, three way switch, three way switch controlling lights in the back room and upper hall of two story homes, and other lights for basement controlled by switch in kitchen.

How it Works
Cold air from your room is drawn down through every portion of the furnace casing, as illustrated and circulates around lower end of sub-base; the moving air striking the hot furnace casings becomes heated rapidly, passing through center of register to the room above from where it is distributed throughout the house.

Complete
Complete equipment includes check draft, damper, asbestos covert for joints, water pan, duplex register, poker, shaker handle, damper chain and wall plate.
