The Aladdin Company offers you an opportunity to buy a complete house direct from the manufacturer saving four profits on the lumber, mill-work, hardware and labor.

The Bluebird—A Home of Dream-like Perfection—Price $799. And We Pay the Freight

Tens of Thousands of American families are living in Aladdin houses. For nineteen years this organization has devoted its energies, its brains and its experience to making home building simpler, easier and less expensive. The Savings Aladdin offers you, the Service Aladdin offers you and the Safety Aladdin offers you are completely explained on pages 14 and 15 of this book.

THE BLUEBIRD is a home of beautiful proportions, interesting detail and excellent interior arrangements. To own it insures the fullest satisfaction in everything that goes to make a real home. It will measure up to your highest expectations from the strength of its sturdy timbers to the charm and beauty of woodwork and finish. Three floor plan arrangements are shown below. They are all priced alike. The price in single construction, specifications for which are shown at the bottom of the page, is $799. The price in double construction is $925 and the specifications are the same as above except that the following materials are added: Sub-floor sheathing under finished floor with building paper between two floors, outside wall sheathing under bevel siding with building paper between, sash weights, cord, pulleys and locks for all double sliding windows and additional nails for this extra material. Porch size 16'x8' shown in picture may be had by adding $108 to above price.

RAPID1250
The Savings After Building a Small Home Will Add More to Your Happiness Than the Luxuries of a Big Home. The COLUMBIAS are Priced at $498 — and We Pay the Freight

Porch for Columbias

The porch shown in the accompanying picture will be furnished for $55.00. It is size 14x8 ft. and price includes all materials complete.

(Continued from page 1)

casement glass size 18x24 is furnished. Interior woodwork is made of clear beautiful grained stock, while all inside doors are of handsome two-panel design, size 2 ft. 8 in. by 6 ft. 8 in. Glass in upper half of front and rear doors. Cellar stairs furnished where shown in plans. Highest grade paint manufactured is supplied for two coats for outside while stain and varnish is furnished for the interior trim and doors. This quality insures perfect protection to materials and most attractive finish. Mortised lockets with brushed brass escutcheons in attractive designs come for each door in the house, except dining room door which is furnished with double acting floor hinge. Spring window bolts for all windows together with all nails necessary for constructing house are included. The height of ceilings is 8 feet and the roof has one quarter pitch. Exposed eaves are of one foot projection. The foregoing is an accurate description of the Columbia as furnished at $498 in Single Construction. Double Construction is identical except that following materials are added: Outside wall sheathing under bevel siding with building paper between; sub-floor sheathing under finish floor with building paper between two floors. Sash weights, sash pulleys, and sash locks for all double sliding windows and additional nails for the above materials. Price of any Columbia in Double Construction is $597.

Be it ever so humble—"it's our own"

The Cedars is a beautiful bungalow, marvelously priced and remarkably designed. The photograph above illustrates the charm and home appeal of the exterior. From the five floor plan arrangements shown here, you will be sure to find one that exactly meets your ideas of a comfortable, convenient, sturdy home.

The price in single construction, specifications for which are given at the bottom of the next page, is $648 which includes outside walls furnished with siding instead of shingles. Shingles will be furnished at the double construction price.

The price of the Cedars in double construction is $769 and the specifications are the same as for single construction except that the following materials are added: Sub-floor sheathing under finish floor with building paper to be placed between the two floors, outside wall sheathing under bevel siding or shingles with building paper to be placed between, sash weights, cord, pulleys and sash locks for all double sliding windows, additional nails for the above extra materials. Porch shown in picture may be had by adding $108 to the price. Size of porch 16 feet by 8 feet.

The Cedars—Plan 1
Plan 1 of the Cedars design offers a type with dining room, arched opening to living room, two bedrooms, kitchen, bath and pantry. It is a much-sought-after type and never fails to make a happy little home. Note the double windows in living room and dining room.

The Cedars—Plan 2
The Cedars—Plan 2, presents a type with inset front porch together with a cozy arrangement of rooms. Note especially the closets off each bedroom with an extra closet from living room. Two fine bedrooms with bath between and big living room and kitchen offer every comfort.

The Cedars—Plan 3
Here is a plan for a family of six. Three bedrooms, living room, kitchen, dining alcove and bath. A cozy, convenient little home as you will agree. Porch size 16x8 feet will be furnished like shown in picture, for $108.00 additional.

The Cedars—Plan 4
The Cedars—Plan 4, shown below, is produced as the result of a demand for three bedrooms, with big living room, and big kitchen. It also has double windows in the two latter rooms. As mentioned above the porch shown in picture may be had by adding $108.00 to the above price.

The Cedars—Plan 5
This floor plan arrangement is a highly popular one. Think of such a complete home—containing living room, dining room, kitchen, two bedrooms, bath and inside cellar entrance for the astonishingly small price of $648. Plan No. 5 shown at the right. Remember that the price of the Cedars is freight paid to your station.
The Potomac—A Quaint Colonial Bungalow—Price $949.

The Potomac is a master design. Colonial atmosphere is ever appealing to the home owner for it bespeaks hospitality, generosity, old-fashioned simplicity and true goodness.

From its clean straight timbers to its beautifully machined siding, and handsomely grained woodwork it represents the very best in everything desirable in a real home. Three attractive floor plan arrangements for the Potomac are shown here. You may have sheathing and lath for a stucco exterior without adding anything to the above price. Pergola type porch comes extra at $69—size 8x14 feet. The price of the Potomac in single construction is $949 as described in specifications below. The price in double construction is $1098 with specifications the same as below except that the following materials are added: Sub-floor sheathing below finish floor with building paper between; outside wall sheathing under bevel siding with building paper between, sash weights, cords and sash locks, for all double sliding windows and extra nails for this additional material.

Specifications for Potomac

(Single Construction.) Size 36 feet by 26 feet. 6x6 inch built-up sill. 2x8 inch floor joists on 16 inch centers. The Potomac—Plan Q

The Potomac Style Q offers a room arrangement that gives most unusual satisfaction to all owners. Splendid light and good air are secured from the carefully studied placing of windows. This will make a perfectly appointed home.

The Potomac—Plan L

This plan gives full accommodations for a family of six, having three bedrooms. A fine living room, extra large dining room, bath, kitchen and inside cellar entrance complete this desirable arrangement.
The Victory
An Interesting and Charming Home Astonishingly Priced at $949. We pay the Freight

DIGNIFIED simplicity was the aim of the thoughtful designers in creating the Victory. There is spread before you on these two pages a truly remarkable selection of interesting homes. Seven arrangements of the same size structure offer you an opportunity to pick exactly what floor plan your needs demand. These plans are worthy of a very careful and painstaking study. They are the result of our experience and knowledge of 19 years in planning homes. It would be almost impossible to secure a better planned home of this size than represented among these seven plans.

Splendidly manufactured siding and flooring; clear interior wood work—that's the kind of material Aladdin furnishes. No finer quality grows. It is beautiful in grain, strong and lasting. Highest grade paints and varnishes are also supplied. You will be assured of a high type of material and construction. The Victory can be placed on a lot as narrow as 30 feet. The complete plans and illustrations and instructions furnished with each Aladdin house guard the home builder from costly mistakes and make the work pleasant and easy.

The Victory Plan W
Plan W offers you a porch, big living room and dining room, three splendid bedrooms, kitchen, bath and three bedroom closets. Note spaciousness of the carefully planned bedrooms. Doors and windows are thoughtfully considered in connection with the placement of bed and other furniture. Plumbing expense is held down by placement of bath room next to the kitchen. Ample wall space in kitchen gives opportunity for excellent arrangement of fixtures. Scientific design has made this a really big home at small cost.

The Victory Plan Z
This plan includes our inside cellar entrance, a feature that is of course much desired where a basement is a part of the home. Splendid living room, dining room, two bedrooms, kitchen, bath and large closets complete the home.

A Cozy Interior
This is how one experienced home-maker has arranged the interior. There is ample opportunity to express one's taste in this roomy home.

ALADDIN—Homebuilder to the Nation
Here Are Five Other Fine Plans of the Victory to Choose From. They Are All Priced the Same—$949., and We Pay the Freight.

The five plans on this page, any one of which may be had at the above quoted price, are all tested plans, having been built many times. There are valuable features included in each, yet each offers a particular arrangement for a particular need. If you desire to stucco the outside of your home, we will furnish sheathing and lath for the outside walls at the price quoted above. Price in single construction $949 as described in specifications below. Price of Victory in double construction is $1098 and specifications are same as below except that following materials are added: Sub-floor sheathing under finished floor, with building paper to be placed between the two floors; outside wall sheathing under bevel siding with building paper to be placed between; sash weights, cords, pulleys and sash locks for all double sliding windows; additional nails for above extra materials.

SPECIFICATIONS FOR ALL VICTORY TYPES

Victory—(Single Construction.) Size 26x36. 6x6 inch built up sill. 2x8 inch joints on 16 inch centers. Clear 5/8 inch face tongued and grooved flooring. 2x4 inch wall and partition studding on 16 inch centers. Lath for lining all walls and ceilings. Clear A redwood bevel siding for outside walls. Clear outside finish. 2x4 inch ceiling joists on 16 inch centers. 2x6 inch rafters on 24 inch centers. Roof sheathing laid tight. Best grade of green slate-shake faced roofing. Cross rail windows and frames, size of glass in each sash 26x24 inches, sash glazed ready to hang. Bathroom supplied with check rail window, size of glass in each sash, 26x16 inches. Clear interior trim. Clear 6 inch two member baseboard of attractive design. Door frames and doors size 2 feet 8 inches by 6 feet 8 inches, highest quality fir. Front and rear doors glazed upper half. Cellar stairs furnished where shown in plans. Two coats of paint for exterior. Stain and varnish for interior trim and doors. All nails, mortised locksets, hinges, double acting floor hinges and spring window bolts to complete house. Size of house 26x36 feet. Height of ceiling 8 feet. Roof 1/2 pitch. Exposed eave 1 foot projection.

The Victory—Plan E

In the Victory Plan E within the compass of 26x36 feet there is included a 12x8 foot porch, generous sized living room and dining room, two bedrooms with unusually large closets, a closet, fine kitchen and good bath room. The location and arrangement of the several rooms are ideal.

The Victory—Plan X

Here is a new type Victory which includes a central hall separating the rooms into two groups of three-on each side. The bath room is located at end of this hall. A big living room, dining room, three bedrooms, kitchen, bath, closets and inside cellar entrance make a home complete to the last detail.

The Victory—Plan Y

Here is a three bedroom Victory with grade cellar entrance. Each bedroom has closet, the big living room is separated from dining room with an arch while hall leads to bath room. This is a fine type of complete home that will give the best of satisfaction to all owners.

The Victory—Plan F

Here is a design especially presented for those who demand a spacious living room. Light and air enter from three sides as it extends for 26 feet across the entire house—big enough for a dance. The plan has been a popular one for the family of three or four and will be much admired.
The Marigold—Remarkable for its Low First Cost—Price $825. And We Pay the Freight

The Marigold offers a story and a half home that can be built at the very lowest cost. The price quoted above provides you with the home with the first floor finished in the same way as all our other houses are furnished. The second floor is unfinished except for the floor. The Marigold can be furnished in either of the two floor plans shown below. Regardless of which plan you select it is possible for you to arrange for two extra bed rooms on the second floor. Our suggestion of a convenient and practical arrangement is shown opposite the first floor plans. When you purchase the home if you wish us to also include materials for finishing the second floor in accordance with our suggestion, we will be glad to do so for $95 additional. The small sketch over the plan arrangement suggested for the second floor, will inform you of the ceiling height obtainable.

The price of the Marigold in Single Construction, specifications for which are listed below, is $825. In Double Construction the price is $945 and the specifications are the same as in Single Construction except that the following materials are added: Sub-flooring for first floor only with building paper to be placed between the sub-flooring and finish flooring, outside wall sheathing under level siding with building paper between, sash weights, cord, pulleys and hooks for all double sliding windows and additional nails for extra materials. Whether you purchase in Single Construction or Double Construction, materials with which to finish the second floor in accordance with our suggestion can be furnished for $95 additional. Porch shown in picture may be had by adding $125. Size of Porch 20'x8'.

ALADDIN'S $100,000.00 GUARANTY FUND

Valuable to Marigold customers.

ALADDIN'S GUARANTY FUND

Suggested Second Floor Plan

Specifications for Marigold

First Floor—Plan A

First Floor—Plan B
The Pilgrim—A Perfect Home—Price $1199.—We Pay the Freight

The Pilgrim is an interesting adaptation of Dutch architecture to the American Colonial type. This style has come to be the most popular for modest two story homes all over the country. Perfect harmony is manifest in the Pilgrim. While the impression is of a story and a half house, all ceilings both first and second floors are square with full height side walls. Study the interior. A 14x22 foot living room, 12x12 foot dining room, 12x10 foot kitchen, a coat closet and grade cellar entrance complete the first floor. The second floor has three bedrooms, hall, three closets, linen closet and bath. The price of the Pilgrim in single construction, specifications for which are shown below, is $1199. The price in double construction is $1395 and specifications are the same as for single construction except that the following materials are added: Sub-floor sheathing under finished floors, with building paper between the two floors. Outside wall sheathing under bevel siding with building paper between, sash weights, cord, pulleys and sash locks for the double sliding windows, and additional nails for the extra materials. Pergola porch shown in picture may be had at $69 additional. Size of porch 8 feet by 14 feet.

Specifications, The Pilgrim (Single Construction.)

Size 22x26, 6x6 bulk-up sill; 2x8 inch joists on 16 inch centers 1st and 2nd floors. Clear 4 1/2 inch face tongued and grooved flooring. 2x4 inch wall and partition studding on 16 inch centers. Lath for lining all walls and ceilings. Clear A redwood bevel siding for outside walls. Clear outside finish. 2x4 inch ceiling joists on 16 inch centers. 2x4 inch rafters on 24 inch centers. Roof sheathing laid tight. Best quality green slate surfaced roofing. Check rail windows and frames size of glass in each sash 26x28 inches 1st floor, 26x24 2nd floor. Sash glazed ready to hang. Kitchen and bath room supplied with check rail window, size of glass in each sash 26x16 inches. Clear interior trim. Clear 6 inch two member baseboard. Door frames and doors size 2 feet 8 inches by 6 feet 8 inches, highest quality fir. Front and rear doors upper half glazed. Cased arch furnished where shown in plans. Attractive circle tread stairs as shown on plans. Grade entrance cellar stairs under main stairs. Two coats of paint for exterior. Stain and varnish for interior trim and doors. All nails, mortised locksets, hinges, double acting floor hinges and spring window bolts to complete house. Height of ceiling 9 feet 1st floor—8 feet 2nd floor. Roof 3/4 pitch. Boxed eaves 1 foot projection.
The Capitol—A Fine Dutch Colonial Type—Price $1775. We Pay the Freight.

This is one of the most popular homes ever designed. It contains every modern convenience and is ideal in appearance, arrangement and comfort.

The charm of the Dutch Colonial never fades. The early Dutch settlers along the coast of New England developed this type with its gambrel roof, and broken roof lines. Aladdin designers have held true to this inspiration while actually giving full dimensions to the second floor in height, breadth and depth. No space is lost, ceiling being full height and square, yet the observer on the street gains the impression of a true gambrel type. Note the protected entrance, columned and inset—a true Colonial approach.

Examine minutely the placement of the rooms. Can you conceive a higher degree of perfection? The entrance hall with semi-open stairway and cloak closet demand your admiration the minute you enter. Arches lead to the right and left into living room and dining room. Think of the possibilities of a living room 26 feet deep and 14 feet wide! Leading from this interesting room is a library or den. On the other side of the house is found pantry separating dining room and kitchen, with cellar entrance under the main stairway. There are six rooms on the second floor—and closets. It may be called a twelve-room home, and at a price that is unapproachable through any other source. The Capitol is priced in single construction at $1775. The price in double construction is $2065 and the specifications are the same as for single construction except that the following materials are added: Sub-floor sheathing under finish floors with building paper between; outside wall sheathing under bevel siding with building paper between and extra nails for all additional materials. Pergola porch, size 8x14 feet, will be furnished by your adding $69 to the price. If you want the 10x14 foot Porte Cochere shown on right side of house add $56 to price.

First Floor Plan—The Capitol

Second Floor Plan—The Capitol

Specifications

Capitol—(Single Construction.) Size 36x26. 9x8 in. built-up sills. 2x8 in. joists on 16 in. centers 1st and 2nd floors. Clear 2x4 in. face tongued and grooved flooring. 2x4 inch wall and partition studding on 16 inch centers. Lath for lining all walls and ceilings. Clear A redwood bevel siding for outside walls. Clear outside finish. 2x4 inch ceiling joists on 16 inch centers. 2x4 inch rafters on 24 inch centers. Roof sheathing laid tight. Best quality green slate surfaced roofing. Check-rail windows and frames size of glass in each sash 26x28 inches, first floor; 26x24 inches 2nd floor. Sash glazed ready to hang. Bath room and kitchen supplied with check-rail window, size of glass in each sash 26x16 inches. Clear interior trim. Clear 6 inch two member baseboard. Door frame and doors size 2 feet 8 inches by 6 feet 8 inches, high quality fir. Front, rear and side doors upper half glazed. Attractive circle tread stairs as shown on plan. Cellar stairs under main stairs. Door frame and cased arches furnished where shown in plans. Two coats of paint for exterior, Stain and varnish for interior trim and doors. All nails, mortised locksets, hinges and double acting floor hinges, sash weights, sash cord, sash pulleys and sash locks to complete house. Height of ceilings 9 feet 1st floor, 8 feet 2nd floor. Ceilings on 2nd floor are full height not sloped. Roof 34 pitch. Boxed eaves 1 foot projection.
A STRONG, substantial, dignified and complete American home! Thus might be described in one sentence, the splendid Liberty. To avoid the wasting of a single penny, is a duty we all owe to our families and ourselves. To accomplish this object in the building of a home is the most laudable of all ambitions. Aladdin designers set about the task of creating a structure in which there would not be wasted one foot of material—one inch of space. Waste material, waste space, means wasted dollars for the owner.

Examine minutely every feature of the Liberty. Clean square pigeons, well proportioned walls and roof, regular placement of windows, blend into perfect harmony. It pleases the eye at first impression, as well as under more continued study. Two interior arrangements are offered at the same price, one having three bedrooms and one with four bedrooms. The Liberty is priced at $998 for single construction, specifications for which are shown at bottom of page, and the price for double construction is $1165. Double construction specifications are the same as for single construction except that the following materials are added: Sub-floor sheathing under finished floors with building paper to be placed between the two floors, outside wall sheathing under bevel siding with building paper to be placed between, sash weights, cord, pulleys and sash locks for all double sliding windows, and additional nails for the above extra materials. Porch size 16x8 foot will be furnished by your adding $115 to the price.

The Liberty—Plan J

Plan J affords gratification to the careful and discerning observer because it illustrates a perfect example of avoidance of waste space. No unnecessary angles or projections are discoverable in the partitions dividing the rooms. Handsome semi-open staircase leads from generous living room to second floor, where are found three bedrooms, bath and splendid closets. Pantry and rear porch are valuable features of the first floor.

SPECIFICATIONS

(Single Construction.) 6x6 inch built-up sill, 2x6 inch joists on 16 inch centers Ist and 2nd floors. Clear 2% inch, face, tempered and ground glazed flooring. 2x4 inch wall and partition siding inside 16 inch centers. Lath for lining all walls and ceilings. Clear A redwood siding outside for walls. The Aladdin Plan

The Aladdin Plan of home building has been in successful operation for nineteen years.

The whole purpose of the plan is to help builders of modest homes.

Its first object and principal benefit, is to save money for builders of modest homes.

The Aladdin Plan has saved $200, $300, $500, $800—$1200 and even more money on the individual homes of thousands of home builders.

Our home builder customers write us after finishing their homes and tell us these things.

They tell us how we helped them to buy their materials for less than their local lumber dealer would sell them.

They tell us how much better our lumber is than they could get from their local dealers.

They tell us how strong their homes are, how warm they are, how convenient the room arrangements are, and how pretty they look when finished.

How ALADDIN Saves You Money

The ready-cut plan avoids wasting lumber when building—saves about $18.00 out of every $100.00 worth of lumber ordinarily used in building your home.

Nine-tenths of all lumber coming out of the forests are in 8-foot, 10-foot, 12-foot, 14-foot and 16-foot lengths. When you want to use other lengths you have to pay more money for the same quantity and quality. Aladdin designs houses to use standard lengths. That's the economy of standard parts and that's the same kind of manufacturing economy that enables automobiles to be manufactured so cheaply. And that is what enables us to put in higher quality at lower prices.

Rapid, automatic machinery handles this lumber so swiftly, so accurately and so perfectly, that one man at a machine in our mills will cut as much as nearly a hundred carpenters can in the same length of time.

And you get the benefit of this saving.

The Aladdin system of cutting the lumber in the mill saves about $30.00 out of every $100.00 worth of carpenter labor—as against the old system of measure, try, cut and fit on the job.

Twenty Feet of Lumber from a Sixteen-Foot Board

Think of taking a six-inch board sixteen feet long and getting twenty feet of six-inch board out of it! Think of applying this system of saving throughout all the lumber used in building your home!

Think of your own good money it saves!

Think of your money this system saves, for the board is priced to you in exactly the number of feet of lumber going into it.

To eliminate waste by scientific planning, designing and cutting of lumber is to save your money from the waste pile.

W. J. Sovereign, president of The Aladdin Company, conceived this tremendous thought, originated, perfected, and established the system.

The principle has been so thoroughly established through the success of The Aladdin Company that it is now accepted and approved by lumbermen, contractors, engineers and scientists.

The Aladdin Company

And these customers of ours tell us how pleased they are with all their dealings with us.

And, really, we are most pleased when they say this, for the Aladdin people are human. We are just ordinary people whose life work, life experiences are devoted to home building, devoted to making home building simpler, more economical, easier and more pleasant for our customers.

Every stockholder in The Aladdin Company is a worker in the company. We are all interested in every customer and we are all interested in knowing that every customer is satisfied.

Aladdin Homes are the original and first ever sold where the materials were all prepared in the mill, cut to fit and ready to be nailed in place when the house is built. The ready-cut house industry was founded by Aladdin—by W. J. and O. E. Sovereign and the present workers, in The Aladdin Company.
Summer Cottages
A separate booklet is ready to be mailed to you, if you are interested in summer cottages. Aladdin Summer Cottages are single walled, exposed studding, single matched ceiling partitions, with rooms open to the rafters.

How Lumber
The B-ist Cut to Fit

The illustration at the left demonstrates the great saving and the simple work in erecting an Aladdin home. The material is cut to fit in our mills and numbered according to the blueprints which explain every step of the erection. The pieces fit together perfectly. And you save at least 60% waste besides 30% to 40% of the labor of erection. Aladdin is the originator of the Ready-Cut System of construction and has saved thousands of homes to date from $300 to $800 on their homes.

Sturdy, Honest
Lumber Makes
Sturdy, Honest
Homes

Early in its history, the Aladdin Company started to improve the quality of lumber that it had put in modern homes. It started to furnish beautiful, clear lumber for the doors and interior woodwork. And ever since it has devoted its efforts to improving its own home, in the same way, by using the best materials. The beauty, velvety-grained Oregon fir and yellow pine used in Aladdin homes is the finest coming out of the forests. It takes the handsome stain, oils and varnish and holds the coloring permanently.

The paints furnished are standard high-quality—the beautiful brushed brass hardware and locksets finish off the woodwork attractively. Our grading is made by one of the largest companies in the country and is of the highest quality. Pleasure and pride can't help but come to you when you know how good a house you have. Later, when it is needed, you will be glad to have the assurance that you have a house that is truly a house and that the materials used are the best.

Some people will tell you not to build an Aladdin house. But most of them will be people who have lost some profit they expected to make out of you if you did. They will be people who want to sell you something, who will want to get your money. They will never be people who have built Aladdin homes.

ALADDIN Customers

If you want to ask advice, it is only fair to yourself, and fair to us, to ask people who know about Aladdin houses. Can a man who hasn’t built an Aladdin house know as much about it, or about us, as a man who has dealt with us? We will give you the names and addresses of many customers to write to, or call on. We wouldn’t do that if we didn’t know they knew money, would we? All right then, if a dealer or a contractor tells you not to build an Aladdin house, ask him for his reasons and investigate these reasons by talking to the man who has built an Aladdin house. Don’t take anybody’s advice, who has not actually built an Aladdin house. Get your facts from people who know.

Nineteen Years
Experience

The houses shown in this book are the best we have planned in our nineteen years’ experience. We have learned from furnishing homes for thousands of families, enough to make a city of a quarter of a million population. Each size has many different floor plan arrangements to suit your family and your tastes. We have designed these houses and priced them so that you can get into a home at the lowest possible cost, or you can have added values like porches, kitchen cabinets and other luxuries and necessities. You can buy as much or as little as you like. We want to satisfy you exactly.

Shingled Walls

Shingled walls cannot be furnished for single construction. At the double construction price we will furnish cedar shingles on the side walls instead of siding, without additional charge, which includes all other features called for in double construction.

Stucco Walls

Stuccoing and lath for stucco side walls will be furnished instead of siding for the side walls without additional charge.

Painting

You receive paint for painting the outside, two coats and stain and varnish for interior trim. You may choose natural oil and varnish, light or dark oak stain and varnish, or any stain and varnish. These materials are standard high quality and make a beautifully finished job.

From the Pyramids to the Woolworth Building

Cut System is not possible or practical. Point to the Pyramids of Egypt, refer to Solomon's Temple as described in the Bible, or inspect Washington Monument, or the 57-story Woolworth Building in New York City. You will find that these structures were erected and completed by the Ready-Cut System. But it remained for The Aladdin Company to first apply the system to your benefit in the building of a home. And thousands of American families scattered over this broad land will testify to its economy and practical success.

The pyramids aren’t portable, the Woolworth Building is not portable, nor are Aladdin houses portable.

If you attempt to tear apart, or dismantle an Aladdin house, the most expert contractor could not tell you from any first-class frame dwelling because there is no difference.

Masonry Chimneys and Fire Places

Chimneys can be located anywhere in the house you like, for we do not cut the materials for these openings. If you do not want the fireplace which may be shown in the photograph, you need not have it. Of course, every house will have a fireplace, and the foundation work must be done on the ground. Brick, stone and cement can be had in your locality as cheaply as we could furnish it. We furnish you a foundation plan to tell you how to proceed to build the kind of foundation you want.

Blue Prints

Complete blue prints showing every step of erection are furnished with every order so that even though you may not be a carpenter, you will know just how to erect your home. Any of these houses will be reversed without additional charge. The opening for fireplaces shown in some of the photographs is not cut so that the chimney may be omitted or its location changed from where it is shown in the picture.

Freight Exception

We pay the railroad freight on all our houses to all states, except the following: Texas, Louisiana, Oklahoma, New Mexico, Arkansas, Arizona, Nebraska, Colorado and Kansas. We write for freight quotations on shipments to above states.

Terms and References

Aladdin houses are sold for cash only. We require the full price of the house to be paid with the order to obtain the price quoted. If, however, you prefer to send only twenty-five per cent or one-quarter of the price, with the order and pay the balance upon the arrival of the shipment, we will accept your order on this basis, providing you add $15.00 to the price quoted to pay for expenses of shipping the house in this way.

NOTES: This catalog supersedes all previous catalogs, and all prices herein quoted are subject to revision April 1, 1923, July 1st, 1925, and September 1st, 1926.

THE ALADDIN COMPANY

General Offices and Mills:
BAY CITY, MICHIGAN
The Aladdin Co.
Portland, Oregon; Toronto, Ont.

Cable Address: "ALADDIN"
W. C. U. Code

The Adams is an American home of chaste simplicity. Straight architectural lines create a pleasing and substantial style of home, which fulfills the ideals of those home builders who rather invest their money in conveniences than embellishments. Note the exposed rafters, shingled gable and belt at second story. A spacious living room with semi-open stairway, well proportioned dining room and model kitchen with grade cellar entrance complete the first story. The second story has three excellent bedrooms, four closets and bath. We show an optional second story which incorporates four bedrooms; either may be had at the same price.

The price in single construction is $1135 as per specifications below. The price in double construction is $1330, with specifications same as above except the following materials are added: Sub-floor sheathing under finished floor with building paper to be placed between two floors, outside wall sheathing under bevel siding with building paper to be placed between, sash weights, cord, pulleys and sash locks for all double sliding windows and additional nails for the above extra materials. The porch size 16x8 will be shipped if you will add $108 to price.

Specifications, The Adams (single construction) Size 22x26. 666 built up tiles; 2x8 inch joists on 16 inch centers 1st and 2nd floors. Clear 2 1/4 inch face tongued and grooved flooring. 2x4 inch wall and partition studs on 16 inch centers. 2x4 inch rafters on 24 inch centers.

First Floor Plan

Second Floor Plan No. 1

Garages as Low as $89

The three Aladdin garages shown below cover the demand for 95 per cent of all garages built. Aladdin garages are staunchly built of sound materials. Lumber is all cut to fit. A couple of days’ time will erect and finish one. Prices quoted are astonishingly low and include freight paid to your railroad station.

The Ford—Size 8x14 ft. or 10x16 ft.

The Ford illustrated below is made in two standard sizes. The 8x14 size being the smallest and will admit a Ford touring car with top either up or down. Size 8x14 sells complete for $88. Size 10x16 is priced at $112. Price freight paid. This will admit a car of 110 inch wheel base.

Studebaker—Size, 12x20 ft.

The Studebaker will take the largest car on the market with ample room at sides for storage and working. It has swinging doors. Always looks good when erected. Paint to match your house. The Studebaker price is $156, freight paid.

The Lincoln—Size, 20x20 ft.

Distinctive and attractive, the Lincoln size 20x20, two car garage will do credit to any surrounding. It is strong, substantial and built of best materials. Four swing doors are provided. Price $325, freight paid.

Specifications as follows; Walls 4”x4”; Studs 2”x4”, 24” centers; Drop siding for side walls; rafters 2”x4”, 24” on centers; Roof one-quarter pitch; Exposed Eaves, 1 foot projection. Roof Sheathing, laid tight. Best quality green slate surfaced roofing for two coats exterior. Materials do-it-yourself and complete blue prints showing every step of erection. All garages shown are furnished without floors, as practically all auto owners prefer to build floor of concrete or cinders.

Offices and Mills, Bay City, Michigan, Wilmington, N. Car., Portland, Ore., Toronto, Ont.
