Title/Subject: **INFORMATION SECURITY INCIDENT RESPONSE POLICY**

Applies to: ☒ faculty ☒ staff ☒ students ☒ student employees ☐ visitors ☒ contractors

Effective Date of This Revision: July 1, 2018

Contact for More Information: Office of Information Technology

☐ Board Policy ☒ Administrative Policy ☒ Procedure ☐ Guideline

---

BACKGROUND:

A formal information security incident response process allows the Office of Information Technology to identify, investigate, and respond promptly and appropriately to information security concerns. The process mitigates for possible harmful effects, protects the University data and information technologies, improves response in future events and incidents, and ensures the University fulfills its response obligations. This policy requires the University to follow a formal response procedure for identifying, investigating, tracking, and properly responding to information security concerns.

DEFINITIONS:

A. ***Security event*** means any unconfirmed or reported concern or complaint related to the inappropriate access, misuse, theft, or compromise of the University's information, information technologies, or information systems.

B. ***Security alert*** means any confirmed event or concern, related to the inappropriate access, misuse, theft, or compromise of the University's information, information technologies, or information systems that merits follow-up tracking and reporting, or action to remediate. Security alerts also include trusted, automated-alarms or other reported detections of known-malicious activity or high-risk, exploitable vulnerabilities. Security alerts requiring investigation and/or significant follow-up or non-routine action are escalated to incident status.

C. ***Security incident*** means any confirmed inappropriate access, misuse, theft, or compromise of the University's information, information technologies, or information systems, requiring investigation and/or significant follow-up, and/or non-routine action. Security incidents requiring formal breach response are escalated to breach status.

D. ***Security breach*** means any confirmed inappropriate access, misuse, theft, or compromise of the University's Protected or Restricted data or information technologies requiring formal breach response, reporting, and/or notification(s).

POLICY:

The Office of Information Technology will follow a formal incident response procedure for identifying, investigating, tracking, and properly responding to University information security concerns.

Information security concerns will be responded to promptly and appropriately to ensure proper handling and consideration, and to mitigate for harmful effects, including escalation to technical response and/or administrative teams as necessary, to protect the University data and information systems, and meet University response obligations.

Authority: George E. Ross, President
History: New Policy
Indexed as: information technology; information system; security alert; security breach; security event

Title/Subject: **INFORMATION SECURITY INCIDENT RESPONSE POLICY**

PROCEDURE:

Information Security concerns, complaints, and inquiries shall be reported to abuse@cmich.edu. OIT staff will then create a ticket to begin formal tracking and resolution, or re-assignment. Information Security Events not immediately resolvable will be assigned to the OIT Information Security Office (ISO) or Security Incident Response Team (SIRT) members for evaluation and formal response through the process(es) described in the documents linked below:

A. Help Desk Ticket and Incident Reporting, Assignment, Tracking, and Escalation Process for Information Security
B. OIT Compromise, Loss, or Theft of System or Data Resolution Process (Alert, Event, Incident, Breach)
C. Information Security Incident Documentation, Communications, and Review Process
D. Information Security Restricted Data Incident Processes (PII, FERPA, HIPAA, PCI, Other Agreements)
