## Introduction

The Office of Academic Planning & Analysis conducts an on-going study of persistence and graduation rates of on-campus undergraduate students at Central Michigan University titled "*Persistence and Graduation Rates of First-time Freshmen*". The following report provides supplemental persistence and graduation rate statistics for first-time freshmen cohorts broken down by first term residence hall address.

For this study:

- For this study, Residence Hall is determined by a student's local, campus address as of the beginning of the fall semester of entry. 94% of first-time freshmen live in a residence hall in their first semester.
- Weighted statistics for the most current three cohort years have been calculated at the bottom of each persistence and graduation rate tables to add stability to report results by residence hall.
- A student is defined as having persisted into a given semester if he or she attended CMU during that semester or had previously graduated from CMU with a baccalaureate degree. Non-persisters include transfers (students who have transferred to other colleges/universities), stopouts (those who have dropped out temporarily and who will return to college in the future), and dropouts (those who no longer will continue with their education). Students said to graduate in 4, 5, 6, or 7 years are fall semester (December), spring semester (May), or summer semester (August) graduates.

**Tables and Charts:** the following are first-time freshmen cohort persistence and graduation rate tables followed by charts, for a visual summary.
