## Introduction

The Office of Academic Planning & Analysis conducts an on-going study of persistence and graduation rates of undergraduate transfer students at Central Michigan University. This report includes a summary of the results along with tables that present the persistence and graduation rates for new transfer students. The tables present data on persistence and graduation rates, as well as rates broken down by students' entry class for CMU, on campus and off campus.

For this study, a student is defined as having persisted into a given semester if he or she attended CMU during that semester or had previously graduated from CMU with a baccalaureate degree. Non-persisters include transfers (students who have transferred to other colleges/universities), stopouts (those who have dropped out temporarily and who will return to college in the future), and dropouts (those who no longer will continue with their education).
